

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

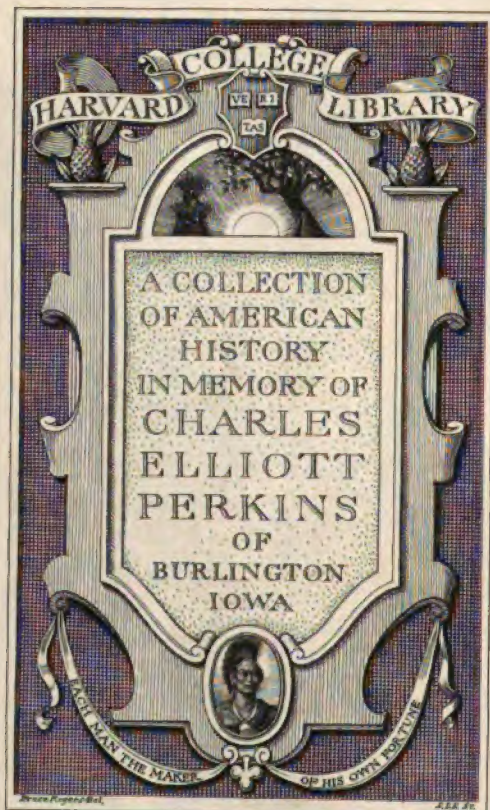

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

W. B. Burleigh,  
Chicago  
(Publishers Collection)  
**PREFACE.**

There are no longer off years in American politics. The variety of issues, the multiplicity of parties, the frequency of elections, all combine to keep up the general interest in political affairs that culminates in the presidential elections. While only a small number of states held elections in 1897 they were of unusual interest as indicating any change in public sentiment since 1896 upon which estimates may be based as to the congressional elections of the present year.

A new feature is incorporated into the present issue of the Almanac and that is the chapter showing the movements of political parties during the year 1897. While they have not been numerous they have been important and significant. Some space has been devoted to the war in the east, from the fact that it excited very considerable interest in the United States and may have an important bearing on the history of Europe.

Especially care has been taken in treating the Cuban revolt, annexation of Hawaii, the monetary commission and Alaska, with its gold fields and disputed boundary. The statistics upon education, the tariff, agriculture, forestry, domestic commerce, gold and silver, pensions and other subjects of immediate importance and interest are full, impartial and as accurate as possible. The article on the ship canal from the great lakes to the Atlantic seaboard is of interest to the entire country between the Mississippi valley and eastern tide-water.

The aim has been to give facts and figures from a strictly nonpartisan standpoint according to their value and importance.

Chicago, January 1, 1898.

# Chicago Daily News Almanac 1898.

NOTE.—The time given in this Almanac is local mean time, except when otherwise indicated.

## ECLIPSES.

In the year 1898 there will be six eclipses, three of the Sun and three of the Moon.

I.—A Partial Eclipse of the Moon, January 7. Visible generally in the Eastern portions of North America, in South America, Europe, Asia and Africa. Occurring as follows:

STANDARD	EASTERN	CENTRAL	MOUNTAIN	PACIFIC
Moon enters Penumbra.....	7d. 4h. 59m. A.	7d. 3h. 59m. A.	7d. 2h. 59m. A.	7d. 1h. 59m. A.
Moon enters Shadow.....	7d. 6h. 48m. A.	7d. 5h. 48m. A.	7d. 4h. 48m. A.	7d. 3h. 48m. A.
Middle of Eclipse.....	7d. 7h. 35m. A.	7d. 6h. 35m. A.	7d. 5h. 35m. A.	7d. 4h. 35m. A.
Moon leaves Shadow.....	7d. 8h. 23m. A.	7d. 7h. 23m. A.	7d. 6h. 23m. A.	7d. 5h. 23m. A.
Moon leaves Penumbra.....	7d. 10h. 11m. A.	7d. 9h. 11m. A.	7d. 8h. 11m. A.	7d. 7h. 11m. A.

First contact of shadow 133 degrees from North point of the Moon's limb toward the East.  
Magnitude of Eclipse = 0.157. (Moon's diameter = 1.0.)

II.—A Total Eclipse of the Sun, January 22. Invisible to America. Visible to Eastern Europe, the greater part of Asia and Africa, and to the Northern part of the Indian Ocean. The line of totality running through the Chinese Empire, India, and Eastern Africa.

III.—A Partial Eclipse of the Moon, July 3. Invisible to North America. Visible generally in Europe, Asia and Africa.

IV.—An Annular Eclipse of the Sun, July 18. Invisible to North America. Visible to the South Pacific Ocean, and the extreme Southern part of South America. The line of Annulus passing through the South Pacific Ocean.

V.—A Partial Eclipse of the Sun, December 13. Invisible here.

VI.—A Total Eclipse of the Moon, December 27. Visible generally throughout North and South America, Europe, Asia and Africa. Occurring as follows:

STANDARD	EASTERN	CENTRAL	MOUNTAIN	PACIFIC
Moon enters Penumbra.....	27d. 3h. 33m. A.	27d. 2h. 33m. A.	27d. 1h. 33m. A.	27d. 0h. 33m. A.
Moon enters Shadow.....	27d. 4h. 49m. A.	27d. 3h. 49m. A.	27d. 2h. 49m. A.	27d. 1h. 49m. A.
Total Eclipse begins.....	27d. 5h. 59m. A.	27d. 4h. 59m. A.	27d. 3h. 59m. A.	27d. 2h. 59m. A.
Middle of Eclipse.....	27d. 6h. 42m. A.	27d. 5h. 42m. A.	27d. 4h. 42m. A.	27d. 3h. 42m. A.
Total Eclipse ends.....	27d. 7h. 27m. A.	27d. 6h. 27m. A.	27d. 5h. 27m. A.	27d. 4h. 27m. A.
Moon leaves Shadow.....	27d. 8h. 36m. A.	27d. 7h. 36m. A.	27d. 6h. 36m. A.	27d. 5h. 36m. A.
Moon leaves Penumbra.....	27d. 9h. 51m. A.	27d. 8h. 51m. A.	27d. 7h. 51m. A.	27d. 6h. 51m. A.

First contact of shadow 112 degrees from North point of the Moon's limb toward the East.  
Magnitude of Eclipse = 1.884 (Moon's diameter = 1.0).

## THE FOUR SEASONS.

SEASON.	Begins.	Lasts.
Winter.....	December 21, 1897, 7:12 A.M.	D. H. M. 39 0 54
Spring.....	March 20, 1898, 8:08 A.M.	92 20 01
Summer.....	June 21, 1898, 4:07 A.M.	93 14 28
Autumn.....	September 22, 1898, 6:35 P.M.	80 18 24
Winter.....	December 21, 1898, 0:59 P.M.	Common Year, 305 5 47

## EMBER DAYS.

March.....	2, 4, 5	September.....	21, 23, 24
June.....	1, 3, 4	December.....	14, 16, 17

## MORNING AND EVENING STARS.

MERCURY will be Morning Star about January 29, May 23, and September 21; and Evening Star about April 10, August 9, and December 3.

MARS will be Morning Star all through this year.

VENUS will be Morning Star until February 15; then Evening Star until December 1; and then Morning Star the rest of the year.

JUPITER will be Morning Star till March 25; then Evening Star till October 13; and then Morning Star the rest of the year.

## CHURCH DAYS AND CYCLES OF TIME.

Epiphany.....	Jan. 6	Whit Sunday.....	May 29
Septuagesima Sunday.....	Feb. 6	Trinity Sunday.....	June 6
Sexagesima Sunday.....	Feb. 13	Corpus Christi.....	June 9
Quinquagesima Sunday.....	Feb. 20	Hebrew New Year (5659).....	Sept. 17
Ash Wednesday.....	Feb. 25	First Sunday in Advent.....	Nov. 27
Quadragesima Sunday.....	Feb. 27	Christmas.....	Dec. 25
Purim.....	Mar. 8	Dominical Letter.....	B
Mid-Lent Sunday.....	Mar. 20	Solar Cycle.....	3
Palm Sunday.....	Apr. 3	Lunar Cycle (or Golden Number).....	18
Good Friday.....	Apr. 8	Roman Indiction.....	11
Easter Sunday.....	Apr. 10	Epact (Moon's Age, Jan. 1).....	7
Low Sunday.....	Apr. 17	Julian Period.....	6611
Ascension Day.....	May 15	Year of the World (Septuagint).....	7406-7407
Ascension Day.....	May 19	Dionysian Period.....	227

NOTE.—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For Example: To know on what day of the week July 4 was in the year 1835, in the table of years look for 1835, and in a parallel line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

\*1752 same as 1753 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1750 (Sept. 3-13 were omitted).—This Calendar is from Whitaker's London Almanack, with some revisions.

**IMPORTS OF MERCHANDISE, WITH RATE OF DUTY.**

For the fiscal year ended June 30, 1897, compared with the corresponding period of 1895.  
[Abbreviation: n. e. s., not elsewhere specified.]

NOTE.—The new arrangement, combining free and dutiable, is made to conform to the tariff classification which took effect Aug. 28, 1891.

## THE TARIFF QUESTION.

Congress convened in extra session on the 15th day of March, 1897. On the opening day of the session a message was read from the president in which he dealt wholly with the tariff question. The same day Mr. Dingley of Maine, chairman of the committee of ways and means, introduced into the house of representatives a new tariff bill which had been for several months in preparation. The bill was a very long one, covering 189 printed pages, and was popularly called after the mover. It was not until the 23d of March that the debate began on the bill. The democratic members of the house strongly

opposed the rule adopted by the house for the conduct of the debate. In brief, the special rule provided that the debate should proceed from 10 o'clock a. m. to 11 o'clock p. m., with a recess from 6 to 8 p. m. The general debate was limited to the time between the 23d and the 25th of March, after which the debate was to be under the five-minute rule. The democrats claimed that the object of this special rule was to cut off debate and prevent the claimed inconsistencies of the bill from being brought out. The only important amendment offered to the bill was one by Gen. Grosvenor of Ohio,

which proposed to make the bill retroactive, so as to apply to all goods imported after April 1, whether the bill should become a law by that time or not. The certainty of the passage by congress of a bill that would increase the duties levied under the law in force greatly stimulated importations and the object of the Grosvenor amendment was to secure to the government the rate of duties on such importations under the new schedule. The amendment was adopted by the house by a vote of 200 to 140. The affirmative vote was made up of the republicans and one silverite (Newlands of Nevada). The negative vote was composed of the democrats and some of the populists. The following did not vote: Hartman (Mont.), Jones (Wash.), Martin (N. C.), Shafroth (Col.), Shuford (N. C.) and Stroud (N. C.).

A vote was taken on the bill on the 31st of March, when it passed by a vote of 205 to 121. Of those who voted in the affirmative 199 were republicans, 5 were democrats and 1 was a populist (Howard of Alabama). The negative vote was made up of 114 democrats and 7 populists. Twenty-one refrained from voting, of whom eighteen were populists and three were silverites.

The bill was sent to the senate, and referred to the finance committee. Upon reaching the committee the entire bill was rewritten and instead of the 169 pages, as it left the house, it became a bill of 230 when it left the senate finance committee. The debate on the bill in the senate was opened by Senator Aldrich of Rhode Island, who gave a general synopsis of its contents, with the reasons for the proposed changes in the law. Several exciting scenes occurred while the bill was before the senate, the most notable being the charges made by Senator Tillman of South Carolina on the 28th of May, when he offered a resolution for investigating "the open charges of corruption" made against senators and the sugar trust regarding the controlling of legislation. The senate did not, however, take any action on the resolution. The rate of duty on raw cotton was the subject of an animated debate.

The senate added the reciprocity, retaliation and stamp tax on bonds, debentures, certificates of stock, etc., clauses. A number of efforts were made to incorporate a clause providing that when any article is manufactured or controlled by a trust it should be placed upon the free list, but nothing further was done than to secure the insertion into the bill of the anti-trust provision of the law of 1894. A vote in the senate was reached on the 7th of July, when the bill was passed by a vote of 38 to 28.

The following senators voted for the bill:

#### REPUBLICANS.

Allison, Iowa.  
Baker, Kan.  
Burrows, Mich.  
Carter, Mont.  
Clark, Wyo.  
Cullom, Ill.  
Davis, Minn.  
Deboe, Ky.  
Elkins, W. Va.  
Fairbanks, Ind.  
Furnaker, O.  
Gallinger, N. H.  
Hale, Me.  
Hanna, O.  
Hawley, Conn.  
Lodge, Mass.  
McClure, Ore.  
McMillan, Mich.

Mason, Ill.  
Morrill, Vt.  
Nelson, Minn.  
Penrose, Pa.  
Perkins, Cal.  
Platt, Conn.  
Platt, N. Y.  
Pritchard, N. C.  
Proctor, Vt.  
Quay, Pa.  
Sewell, N. J.  
Shoup, Idaho.  
Spooner, Wis.  
Warren, Wyo.  
Wellington, Md.  
Westmore, R. I.  
Wilson, Wash.—35.

#### SILVER REPUBLICANS.

Jones, Nev. Mantle, Mont.—2.

#### PROTECTION DEMOCRAT.

McEnery, La.—1. Total .....38

These senators voted against the bill:

#### DEMOCRATS.

Bacon, Ga. Martin, Va.  
Bate, Tenn. Mills, Tex.  
Berry, Ark. Mitchell, Wis.  
Caffery, La. Morgan, Ala.  
Chilton, Tex. Pasco, Fla.  
Clay, Ga. Pettus, Ala.  
Cookrell, Mo. Rawlins, Utah.  
Faulkner, W. Va. Roach, N. D.  
Gray, Del. Turple, Ind.  
Jones, Ark. Vest, Mo.  
Kendrick, Ky. Walthall, Miss.  
Lindsey, Ky. White, Cal.—25.  
Maloney, Fla.

#### POPULISTS.

Harris, Kas. Turner, Wash.—2.

#### SILVER REPUBLICAN.

Cannon, Utah—1. Total .....28

These senators were present, but did not vote:

#### SILVER REPUBLICANS.

Teller, Col. Pettigrew, S. D.—2.

#### POPULISTS.

Allen, Neb. Kyle, S. D.  
Butler, N. C. Stewart, Nev.—5.  
Helfield, Idaho. Total .....7

The following senators were paired, the first named being a republican and the second a democrat:

Aldrich of Rhode Island with Murphy of New York; Chandler of New Hampshire with McLaurin of South Carolina; Frye of Maine with Gorman of Maryland; Gear of Iowa with Smith of New Jersey; Hansbrough of North Dakota with Daniel of Virginia; Hoar of Massachusetts with Harris of Tennessee; Thurston of Nebraska with Tillman of South Carolina; Wolcott of Colorado with George of Mississippi.

The bill then went to a conference committee of the two houses and work was begun on it July 9, 1897. July 17 the conference committee reached an agreement. Among the changes made are the following: The tax on stocks and bonds was abandoned; the house sugar schedule with some important changes was adopted; the schedule now reads in part: "Sugars not above 16 Dutch standard, etc., testing by the polariscope not above 75 degrees, ninety-five one-hundredths of a cent per pound, for every additional degree thirty-five one-hundredths of a cent per pound additional; on sugar above 16 Dutch standard and on refined sugar the duty is 1 cent and ninety-five one-hundredths of a cent per pound." Works of art, excepting books for libraries, were placed on the dutiable list, as were also cotton ties, burlaps, matting, etc.; cotton ties will pay a specific duty of one-half a cent and on the other articles the duty has been slightly decreased from the senate rates; the wool schedule, as agreed to by the conference provides for a duty of 11 cents per pound on first class, 12 cents per pound on second class and on third class wools 4 cents per pound when valued at less than 12 cents per pound and 8 cents per pound when valued above 12 cents; the duty on hides has been reduced from 20 per cent to 15 per cent ad valorem; it is said that a "strong fight" was made to have hides restored to the free list.

The measure finally passed the house July 19 and the senate July 24 and became a law at 4:04 p. m. of that day, when the president affixed his name to the bill.

## SILVER WITH GOLD.

The following table exhibits the value of the pure silver in the silver dollar, reckoned at the commercial price of silver bullion, from 80 cents to \$1.2929 (parity of our coining rate) per fine ounce. (From report on precious metals in the United States, 1892, and subsequent additional reports by the director of the mint.)

Price of Silver Per Fine Ounce	Value of the Pure Silver in a Silver Dollar.	Price of Silver Per Fine Ounce	Value of the Pure Silver in a Silver Dollar.	Price of Silver Per Fine Ounce	Value of the Pure Silver in a Silver Dollar.	Price of Silver Per Fine Ounce	Value of the Pure Silver in a Silver Dollar.

## COMMERCIAL RATIO OF SILVER TO GOLD EACH YEAR SINCE 1687.

From 1687 to 1832 the ratios are taken from Dr. A. Soetbeer; from 1833 to 1878 from Pixley and Abell's tables; and from 1879 to 1894 from daily cablegrams from London to the bureau of the mint:

YEAR.	Ratio.	YEAR.	Ratio.	YEAR.	Ratio.	YEAR.	Ratio.	YEAR.	Ratio.	YEAR.	Ratio.
1687.....	14.94	1722.....	15.17	1757.....	14.87	1792.....	15.17	1827.....	15.74	1862.....	15.35
1688.....	14.94	1723.....	15.20	1758.....	14.85	1793.....	15.00	1828.....	15.78	1863.....	15.37
1689.....	15.02	1724.....	15.11	1759.....	14.15	1794.....	15.37	1829.....	15.78	1864.....	15.37
1690.....	15.02	1725.....	15.11	1760.....	14.14	1795.....	15.55	1830.....	15.82	1865.....	15.44
1691.....	11.98	1726.....	15.15	1761.....	14.54	1796.....	15.65	1831.....	15.72	1866.....	15.43

**FOREIGN COINS.**—Before the United States mint could supply the demand for money the gold coins of Great Britain, France, Spain and Portugal and the silver coins of France and Spain were by several acts of congress made legal-tender. All such laws were repealed by the act of 1857, Feb. 21.

\*Section 11 of the act of 1792, April 2, provides "that in all coins which shall be current as money in the United States . . . every fifteen pounds weight of pure silver shall be of equal value in all payments with one pound of pure gold." Ratio 15 to 1.

†The act of 1831, June 23, reduced the weight of pure gold in the gold coins so that the proportion of gold to alloy should be as 899.225 to 100, or nearly .900 fine.

‡The act of 1837, Jan. 18, reduced the weight of the alloy in the silver dollar so that the weight of that coin should be 412.5 grains instead of 416 grains; but the weight of pure silver in that coin has always been the same—namely, 371.25 grains. This act also increased a very little the fineness of the gold coin and so fixed the ratio between gold and silver at 15 to 1.

§Section 14 of the act of 1873, Feb. 12, provides "that the gold coins of the United States shall be a \$1 piece, which at the standard weight, 25.8 grains, shall be the unit of value." The act of 1890, Sep. 26, expressly prohibits the coinage of "the \$1 gold piece."

## GOLD AND SILVER CURRENCY OF THE UNITED STATES.—CONTINUED.

DENOMINATION.	Acts of congress directing coinage, changing fineness, weight, or legal tender power.	Weight of pure metal in each coin, troy grs.	Weight of alloy in each coin, troy grs.	Total weight of each coin, troy grs.	Legal-tender power.	Total value of currency in 1896, June 30.	Acts of congress prescribing or limiting coinage.
<b>SILVER.</b>

## NON-LEGAL-TENDER TREASURY NOTE ISSUES, 1812-61.

Various issues of treasury notes were authorized by acts of congress, down to 1861, but in every case they were merely temporary loans, usually bearing interest and payable only to such persons "as chose to receive them." The various issues of non-legal-tender treasury notes are shown as follows:

AUTHORIZING ACT.	Amount issued.	Length of loan.	Sold at.	Rate of interest.	Remarks.
June 30, 1812..	\$5,000,000	1 year.	Par.	5-5 %	
Feb. 21, 1813..	5,000,000				
Mar. 4, 1814..	10,000,000				
Dec. 26, 1814..	8,318,400.	Pleasure of government.	{ Par. { Par @ 4 % prem.	5-5 % None.	{ Denom- { \$100 & over nations, { under \$100
Feb. 24, 1815..	{ 4,382,400				
Oct. 12, 1837	10,000,000				
May 21, 1838..	5,709,810	1 year	Par.	1-10 to 6 %	Total issue, \$47,002,900.
Mar. 2, 1839	8,857,276				
Mar. 31, 1840..	7,114,251				
Feb. 15, 1841..	7,529,082	2 years.

July 17, 1861..	139,990,750	3 years.	465,1000 % prem.	73-10 %	"Seven-thirties" of '61

## LEGAL-TENDER NOTES.

For nearly fifty years, from 1812 to 1861, at various times congress had authorized the issue of treasury notes, but not until the latter year was it ever proposed to make such notes a legal tender. A bankrupt treasury, an impaired credit and a civil war of unparalleled proportions made desperate measures necessary, and there was scarcely a financier in 1861 who did not consider the proposed issue of legal-tender notes a desperate undertaking, justified only, if at all, by the law of self-preservation, which operates in behalf of nations as well as individuals. The first "legal-tender" act was approved Feb. 25, 1862. It authorized the issue of \$150,000,000 non-interest-bearing notes, payable to bearer, in denomina-

tions of not less than \$5 and legal tender in payment of all debts, public and private, except duties on imports and interest on the public debt. These notes were made exchangeable for 6 per cent bonds and receivable for loans that might thereafter be made by the government. Supplementary acts of July 11, 1862, and Jan. 17, 1863, authorized additional issues of \$150,000,000 each, in denominations of not less than \$1, and the time in which to exchange the notes for bonds was limited to July 1, 1863. It was under these acts that the legal-tender notes known as "greenbacks," now outstanding, were issued. The legal-tender issues during the war period were:

AUTHORIZING ACT.	Amount authorized.	Amount issued.	Length of loan.	Sold at.	Rate of interest.
Feb. 25, 1862.....	\$150,000,000	\$447,300,203*	Indefinite.	Par.	None.
July 11, 1862.....	150,000,000				
March 3, 1863.....	150,000,000				
March 3, 1863.....	400,000,000	{ 44,520,000† 168,440,000† 296,596,440†	1 year. 2 years. 3 years.	Par. Par. Par.	5 % 5 % 6 % compound.

\*Highest amount outstanding at any one time, June 30, 1864. †Includes reissues.

## GOLD AND SILVER IN THE UNITED STATES TREASURY.

The total holdings of gold and silver by the government at the close of each fiscal year since 1878 are shown in the table below. First is given the gross gold, including coin and bullion, and then the net gold, after deducting the amount of gold certificates in circulation. The gross amount of silver dollars and bullion in the treasury is next shown, and then the net, after deducting the silver certifi-

cates outstanding. The treasury notes issued since Aug. 15, 1860, for the purchase of silver bullion are not deducted from the silver in the treasury, as the notes are not certificates of deposit redeemable in silver, the same as the silver certificates, but are treasury notes, the same as the old legal tenders. To the net silver dollars and bullion is added the subsidiary silver in the treasury, which gives the total net silver.

## TREASURY HOLDINGS OF GOLD AND SILVER.

JUNE 30.	Total gold coin and bullion.	Gold less certificates outstanding.	Total silver dollars and bullion.	Silver dollars and bullion less certificates outstanding.	Subsidy silver.	Total net silver.	Ratio silver to gold, Per cent.

The difference between the amount of money in the country and the amount in circulation represents the money in the treasury. Currency certificates, act of June 8, 1872, are included in the amount of United States notes in circulation in tables for years 1876 to 1891, inclusive; since 1891 they are reported separately.

## MONEY OF THE WORLD.

**The Supreme Court.**

The Supreme court consists of seven judges, elected for a term of nine years, one from each of the seven districts into which the state is divided. The election is held in June of the year in which any term expires.

The state was formerly divided into three grand divisions which have been consolidated by act of legislature. The three clerks elected from the old divisions hold over until the end of their terms in 1902, after which only one will be elected. One clerk for each of the three grand divisions is elected for a term of six years.

**Justices.**

Dis.	(Salary \$5,000.)	Term Expires.
1. Carroll C. Boggs	Fairfield	June, 1906

## CHRONOLOGY OF STEAMBOATING.

The following chronological exposition of the origin, invention and introduction of the steamboat and steamship is given on the authority of the New York Marine Journal:

The first idea of steam navigation was contained in a patent obtained in England by Hulls in 1736.

Fitch experimented in steam navigation on the Delaware river in 1783-4.

Oliver Evans was the next experimenter in steam navigation in 1785-6.

Ramsey was also an experimenter in Virginia in steam navigation in 1787.

W. Symington made a trial on the Forth and Clyde with a small and rudely constructed model of a steamer in 1789.

Chancellor Livingston built a steamer on the Hudson in 1797.

The first experiment in steamboating on the Thames, England, was in 1801.

Mr. Symington repeated his experiments on the Thames with success in 1802.

Fulton built the steamer the North River and made a passage up the Hudson river to Albany from New York in thirty-three hours—the first steam navigation on record. The engines were constructed by Boulton & Watts. The voyage was made in 1807.

The next steamboat was the Car of Neptune, in 1808.

Fulton built the Orleans at Pittsburg—the first steamer on western rivers. It was completed and made the voyage to New Orleans, 2,000 miles, in 1811.

The Paragon was the next steamer, built in New York in 1811.

The Richmond was built in New York in 1812.

The first steam vessel of Europe commenced plying on the Clyde in 1812.

The Vesuvius was built at Pittsburg in 1813.

Five steam vessels appeared in Scotland in 1813.

The first steam vessel to make a voyage up the Thames was brought to Glasgow by a Mr. Dodd in 1815.

England built her first steamer in 1815.

The Savannah, the first steamer to cross the ocean, was of 350 tons burden and sailed for Liverpool from Savannah, Ga., July 15, 1819.

The first steamer in Ireland was in 1820.

Capt. Johnson was paid £10,000, or \$50,000, for making the first steam voyage to India. The voyage was made on the steamer Enterprise, which sailed from Falmouth, England, Aug. 18, 1825.

The Great Western, from Bristol, England, and the Sirius, from Cork, Ireland, both arrived at New York city, each on her first voyage and each eighteen days out, on June 17, 1838.

The first steamer of the Cunard line to arrive on American shores was the Britannia, which arrived at Boston, after a passage of fourteen days and eight hours, in July, 1840.

The first war steamer was built in England in 1838.

Returns from twenty-three states gave an aggregate of 700 steamboats in the United States in 1835.

There were about 1,500 steam vessels in the United States in 1847.

The Washington was the first American ocean steamer of note. She made her first passage to Southampton, England, in June, 1847.

\*This does not include \$70,488 secondary pupils in the public high schools.

†Including pupils in preparatory or academic departments of higher institutions, public and private, and excluding elementary pupils, who are classed under "Pupils receiving elementary instruction."

‡This is made up chiefly from the returns of individual high schools to the bureau and is considerably too small, as there are a great many secondary pupils outside the completely organized high schools whom there are no means of enumerating.

§Including colleges for women, agricultural and mechanical (land grant) colleges and scientific schools. Students in law, theological and medical departments are excluded, being included in tabulation under that head; students in academic and preparatory depart-

ments are also excluded, being included in "Pupils receiving secondary instruction."

¶Including schools of pharmacy and veterinary medicine.

‡Non-professional pupils in normal schools are included in "Pupils receiving secondary instruction."

\*\*Mainly state universities and agricultural and mechanical colleges.

††Mainly in schools or departments of medicine and law attached to state universities.

‡Private normal schools are, with few exceptions, scarcely superior to the ordinary secondary schools.

§§There are in addition to this number 23,202 students taking normal courses in universities, colleges and high schools.

## CORN FOR FUEL.

Burning corn for fuel has often been mentioned as one of the signs that the poor farmer who burns it is in the last ditch of poverty, but a bulletin issued by the experiment station of the University of Nebraska, giving results of tests of the value of corn as fuel, shows that the burning of corn may be a proceeding showing financial wisdom and one greatly to the farmer's benefit when the price of corn is low and that of coal high. The tests showed that 1 pound of screened Wyoming coal, costing

\$6.66 per ton, evaporated 1.9 times as much water in a steam boiler as could be evaporated by 1 pound of a good grade of yellow dent corn on the ear, not thoroughly dry. The following figures show the value of corn per bushel as fuel when coal of the same variety as that used in the tests is selling at the prices given:

Coal per ton .... \$4.87 \$5.41 \$5.95 \$6.19 \$7.11 \$7.57 \$8.11  
Corn per bushel 09 10 11 12 13 14 15

1883.....	535 tons	1896.....	40,000 tons

\*Estimated

## COTTON CROPS AND PRICES.

One of the more interesting records of cotton crops in the United States for three-quarters of a century is that published for distribution by the S. Blaisdell, Jr., company of Chicopee, Mass. The convenient form in which the figures are arranged, together with highest and lowest prices for corresponding years, renders the exhibit worthy of reproduction:

## COTTON CROPS OF THE UNITED STATES.

Season.	Bales.
1822-23.....	486,000
1823-24.....	509,158

Turkey.....	Gold.....	Plaster.....	40.4
Uruguay.....	Gold.....	Peso.....	1.06.4
Venezuela.....	Gold and silver.....	Bolivar.....	19.8

\*Gold the nominal standard. Silver practically the standard.

†Silver the nominal standard. Paper the actual currency, the depreciation of which is measured by the gold standard.

‡The "British dollar" has the same legal value as the Mexican dollar in Hongkong, the Straits settlements and Labuan.

§The law of February 11, 1886, introduced the gold standard, with an ideal gold peso weighing 569 grams as the monetary unit.

Alaska, to which the general land laws are not applicable and in which surveys and disposals of no great importance have been made..... 369,529,000

Grand total..... 1,835,017,092

\* "Vacant public lands" (272,294,120 acres of which are unsurveyed) are those subject to settlement, and to filing and entry if surveyed.

† "Reserved lands" mean those reserved for satisfaction of railroad grants, for military and naval purposes, reservoir sites, Indians, timber, and those embraced in unconfirmed private land grants—in other words, all lands reserved for any purpose whatsoever, which may be eventually restored to the public domain.

‡ "Appropriated lands" include all lands embraced in selections, filings and entries, perfected and unperfected, and the area of lands granted for school purposes.

By the concurrent action of the principal governments of the world an International Bureau of Weights and Measures has been established near Paris. Under the direction of the International Committee two ingots were cast of pure platinum-iridium in the proportion of 9 parts of the former to 1 of the latter metal. From one of these a certain number of kilogrammes were prepared, from the other a definite number of meter bars. These standards of weight and length were inter-compared, without preference, and certain ones were selected as international prototype standards. The others were distributed by lot, in September, 1890, to the different governments and are called national prototype standards. Those apportioned to the United States were received in 1890 and are in the keeping of this office.

The metric system was legalized in the United States in 1893.

The international standard meter is derived from the meter des archives, and its length is defined by the distance between two lines at 0° centigrade, on a platinum-iridium bar deposited at the International Bureau of Weights and Measures.

The international standard kilogramme is a mass of platinum-iridium deposited at the same place, and its weight in vacuo is the same as that of the kilogramme des archives.

The liter is equal to a cubic decimeter, and it is measured by the quantity of distilled water which, at its maximum density, will counterpoise the standard kilogramme in a vacuum, the volume of such a quantity of water being, as nearly as has been ascertained, equal to a cubic decimeter.

## CONVERTING UNITED STATES WEIGHTS AND MEASURES.

(Prepared by T. C. Mendenhall, of the United States Coast and Geodetic Survey.)

## CUSTOMARY TO METRIC.

## LINEAR.

9.....	147.484	.25485	6.881	2.36154

1 Gunter's chain	=	20.1168	meters.
1 sq. statute mile	=	259.000	hectares.
1 fathom	=	1.829	meters.
1 nautical mile	=	1853.25	meters.
1 foot = .304801 meter.	=	9.4540158	log.
1 avoirdupois pound	=	453.59237	gram.
15432.35639 grains	=	1	kilogramme.

The only authorized material standard of customary length is the Trough scale belonging to this office, whose length at 59° C. 22 Fahr. conforms to the British standard. The yard in use in the United States is therefore equal to the British yard.

The only authorized material standard of customary weight is the troy pound of the mint. It is of brass of unknown density, and therefore not suitable for a standard of mass. It was derived from the British standard troy pound of 1758 by direct comparison. The British avoirdupois pound was also derived

from the latter, and contains 7,000 grains troy.

The grain troy is therefore the same as the grain avoirdupois, and the pound avoirdupois in use in the United States is equal to the British pound avoirdupois.

The British gallon = 4.54336 liters.

The British bushel = 36.3477 liters.

The length of the nautical mile given above and adopted by the United States Coast and Geodetic Survey many years ago is defined as that of a minute of arc of a great circle of a sphere whose surface equals that of the earth (Clarke's Spheroid of 1866).

## QUALIFICATIONS FOR SUFFRAGE.

STATE.	Requirements as to citizenship.	PREVIOUS RESIDENCE REQUIRED.				Registration.	Ballot reform.	Excluded from voting.
		State.	County.	Town.	Precinct.			
Alabama.....	Citizens, or alien who has declared his intentions; must exhibit poll-tax receipt.	1 y.	3 m.	30 d.	30 d.	Yes.	Yes.	If convicted of treason, embezzlement of public funds, malfeasance in office or other penitentiary offenses. Idiots or insane.
Arkansas.....	Like Alabama.....	1 y.	6 m.	.....	30 d.	No.	Yes.	Idiots, insane, convicts until pardoned.
California.....	Citizens by nativity; naturalized for 90 days or treaty of Queretaro.	1 y.	90 d.	.....	30 d.	Yes.	Yes.	Chinese, insane, embezzlers of public moneys, convicts.
Colorado.....	Citizens, or alien who has declared his intention 4 months before offering to vote; unlimited woman suffrage.	6 m.	90 d.	90 d.	10 d.	Yes.	Yes.	Persons under guardianship, insane, idiots, prisoners.
Connecticut..	Citizens who can read.....	1 y.	.....	6 m.	.....	Yes.	Yes.	Convicted of felony or other infamous crime.
Delaware.....	Citizens and paying co. tax; limited woman suffrage.	1 y.	1 m.	.....	15 d.	No.	Yes.	Insane, idiots, felons, paupers.
Florida.....	Citizens or alien who has declared his intention and paid capitation tax 2 years; women at school elections.	1 y.	6 m.	.....	.....	Yes.	No.	Persons not registered, insane or under guardian felons, convicts.
Georgia.....	Citizens who have paid all taxes since 1877.	1 y.	6 m.	.....	.....	(a)	No.	Persons convicted of crimes punishable by imprisonment, insane, delinquent taxpayers.
Idaho.....	Citizens; limited woman suffrage.	6 m.	30 d.	.....	.....	Yes.	No.	Chinese, Indians, insane, felons, polygamists, bigamists, traitors, bribers.
Illinois.....	Citizens; women at school elections.	1 y.	90 d.	30 d.	30 d.	Yes.	Yes.	Convicts of penitentiary until pardoned.
Indiana.....	Citizens, or alien who has declared intention and resided 1 year in U. S. and 6 months in state; limited woman suffrage.	6 m.	.....	30 d.	30 d.	No.	Yes.	Convicts and persons disqualified by judgment of a court.
Iowa.....	Citizens.....	6 m.	60 d.	.....	.....	(b)	Yes.	Idiots, insane, convicts.
Kansas.....	Citizens; aliens who have declared intention; women vote at municipal and school elections.	6 m.	30 d.	30 d.	30 d.	(b)	Yes.	Insane, persons under guardianship, convicts, bribers, defrauders of the government and persons who have borne arms against the U. S.
Kentucky....	Citizens; limited woman suffrage.	1 y.	6 m.	30 d.	30 d.	(c)	No.	Treason, felony, bribery, idiots, insane.
Louisiana....	Citizens or aliens who have declared intention.	1 y.	6 m.	30 d.	30 d.	Yes.	No.	Idiots, insane, all crimes punishable by imprisonment, embezzling public funds.
Maine.....	Citizens.....	3 m.	3 m.	3 m.	3 m.	Yes.	Yes.	Paupers, persons under guardianship, Indians not taxed, persons who cannot read and write.
Maryland....	Citizens.....	1 y.	6 m.	.....	.....	Yes.	Yes.	Persons convicted of larceny or other infamous crime, persons under guardianship, insane, idiots.
Massachusetts.	Citizens who can read and write English; women allowed to vote for school committees.	1 y.	.....	6 m.	30 d.	Yes.	Yes.	Paupers (except U. S. soldiers), persons under guardianship.
Michigan.....	Citizens; women vote at school elections.	3 m.	.....	10 d.	10 d.	Yes.	Yes.	Indians holding tribal relations, duellists and their abettors.
Minnesota...	Citizens and aliens who have declared intention; civilized Indians; women can vote at school elections.	4 m.	10 d.	10 d.	10 d.	(d)	Yes.	Treason, felony unless pardoned, insane, persons under guardianship, uncivilized Indians.
Mississippi...	Citizens who can read or understand the constitution.	2 y.	1 y.	1 y.	1 y.	Yes.	Yes.	Insane, idiots, felons, delinquent taxpayers.

(a) Registration required in some counties. (b) In all cities. (c) In the cities of first, second and third class. (d) Required in cities of 1,200 inhabitants or over.

\*Year ended June 30.

†includes fermented liquors removed from breweries for export free of tax

## SALES OF MALT LIQUORS—1890-96.

The *Brewers' Journal* publishes the following statistics, compiled from the report of the Commissioner of Internal Revenue, of the sales of malt liquors in the various states and territories and in the leading cities of the country for the year 1896 as compared with the six preceding years. The states showing largest increase are Pennsylvania, New York, Illinois, Ohio, Massachusetts and New Jersey. The divisions in which there has been the largest decrease are Oregon, Louisiana, Nebraska, Washington, North and South Dakota and New Mexico. The net increase for 1896 as compared with 1890 is 2,356,422 barrels:

1895.....	157	15,061	125	3,127	282	18,188
1896.....	156	15,683	140	3,579	296	19,262
1897.....	145	15,028	143	3,650	288	18,676

\*Some of the figures in this table as printed prior to 1896 were taken from reports of the superintendent of Indian schools. As revised, they are all taken from the reports of the commissioner of Indian affairs. Prior to 1882 the figures include the New York schools.

†Indian children attending public schools are included in the average attendance, but the schools are not included in the number of schools.

‡Decrease in number of boarding schools is due to discontinuance of some contract schools and the conversion of others into day schools.

## NONRESERVATION TRAINING SCHOOLS.

Location, average attendance, capacity, etc., during the fiscal year ended June 30, 1897.

## RESERVATION GOVERNMENT BOARDING SCHOOLS.

Location, capacity and date of opening of 73 government reservation boarding schools.

LOCATION.	Capacity.	Date of opening.	Remarks.
Arizona—Colorado River.....	80	Mar. —, 1879	
Keams Canyon.....	80	—, 1887	
Navajo Agency.....	120	Dec. —, 1881	
Pima.....	150	Sept. —, 1881	
San Carlos.....	100	Oct. —, 1880	
White Mountain Apache.....	65	Feb. —, 1884	
California—Fort Yuma.....	250	Apr. —, 1884	
Hoop Valley.....	200	Jan. 21, 1883	
Round Valley.....	70	Aug. 15, 1881	Suspended after July, 1883, by burning of building.
Idaho—Fort Hall.....	150	Sept. 12, 1883	
Fort Lapwal.....	250	Sept. —, 1886	
Lemhi.....	40	Sept. —, 1885	
Indian Territory—Quapaw.....	80	Sept. —, 1872	
Seneca, Shawnee and Wyandotte	180	June —, 1872	Begun by Friends as orphan asylum in 1867 under contract with tribe.

## INDIAN SCHOOLS—CONTINUED.

LOCATION.	Capacity.	Date of opening.	Remarks.
Kansas—Kickapoo.....	30	Oct. —, 1871	
Pottawattomie.....	80	—, 1873	
Sac and Fox and Iowa.....	40	—, 1871	Iowa.
Minnesota—Leech Lake.....	50	Sept. —, 1875	Sac and Fox.
Pine Point.....	100	Nov. —, 1867	
Red Lake.....	50	Mar. —, 1882	Prior to this date a contract school opened in November, 1883.
White Earth.....	40	Nov. —, 1877	
Wild Rice River.....	65	—, 1871	Building burned in February, 1895.
Montana—Blackfeet.....	125	Mar. —, 1862	Prior to this date a contract school opened in November, 1883.
Crow.....	100	Jan. —, 1883	
Montana Industrial.....	60	Oct. —, 1884	
Fort Belknap.....	100	July 1, 1886	Prior to this date a contract school opened in 1883.
Fort Peck.....	200	Aug. —, 1861	
Nebraska—Omaha.....	75	Aug. —, 1861	
Santee.....	30	—, 1861	
Winnebago.....	100	Apr. —, 1874	
Nevada—Pyramid Lake.....	120	Oct. —, 1874	
Western Shoshone.....	50	Nov. —, 1863	Previously a semi-boarding school.
New Mexico—Mescalero.....	100	Feb. 11, 1886	
North Dakota—Fort Berthold.....	60	Apr. —, 1884	
Fort Totten.....	350	Nov. 21, 1894	
Standing Rock, agency.....	110	—, 1874	At agency.
Standing Rock, agricultural.....	100	Jan. —, 1891	At Fort Totten.
Standing Rock, Grand River.....	90	May —, 1877	
North Carolina—East Cherokee.....	150	Nov. 20, 1886	
Oklahoma—Absentee Shawnee.....	75	Jan. 1, 1886	Prior to this date a contract school opened in 1883.
Arapahoe.....	120	May —, 1872	
Cheyenne.....	200	Dec. —, 1872	
Fort Sill.....	125	—, 1873	
Kaw.....	60	Aug. —, 1861	
Osage.....	180	Dec. —, 1869	In Kansas.
Otoe.....	75	Aug. —, 1874	In Indian Territory.
Pawnee.....	125	Feb. —, 1874	
Ponca.....	100	Oct. —, 1875	In Nebraska.
Rainy Mountain.....	50	—, 1865	In Nebraska.
Riverside (Wichita).....	100	—, 1873	In Indian Territory.
Sac and Fox.....	120	Jan. —, 1883	
Seger.....	125	Sept. —, 1893	
Oregon—Grande Ronde.....	100	—, 1868	In Kansas.
Klamath.....	140	Apr. —, 1871	In Indian Territory.
Siletz.....	80	Feb. —, 1874	
Umatilla.....	100	Oct. —, 1873	
Yainax.....	100	Jan. —, 1866	
South Dakota—Cheyenne River ..	130	Nov. —, 1863	
Crow Creek.....	140	Apr. 1, 1868	At new agency. At old agency school for girls opened in 1874 under missionary auspices in government buildings; school for boys opened in 1880.
Crow Creek, Grace Mission .....	50	—, 1874	
Hope (Springfield).....	60	Feb. 1, 1897	
Lower Brule.....	140	Aug. 1, 1895	Prior to this date a contract school opened in 1882.
Sisseton.....	130	Oct. —, 1881	
Yankton.....	160	—, 1873	
Utah—Ouray.....	80	Feb. —, 1882	
Utah.....	90	Apr. —, 1893	
Washington—		Jan. —, 1881	
Okanagon (Tonasket).....	90	—, 1890	
Puyallup.....	200	June —, 1871	
Yakima.....	140	—, 1860	
Wisconsin—Lac du Flambeau.....	140	July 10, 1895	
Menominee.....	160	—, 1876	
Onondaga.....	120	Mar. 27, 1886	
Wyoming—Shoshone.....	200	Apr. —, 1870	
Total.....	8,270		

## CLIMATOLOGY OF THE UNITED STATES.

The following table of average rainfall, highest and lowest temperatures, based upon observations of twenty-six or less years, at selected stations in the several states and territories of the United States, was compiled from the records of the weather bureau by the United States weather office at Chicago, Ill.:

STATIONS.	No. of years.	TEMPERATURE.				Average precipitation.	STATIONS.	No. of years.	TEMPERATURE.				Average precipitation.

## Military Societies of the United States.

## SOCIETY OF THE CINCINNATI.

## General Officers.

*President-General*—William Wayne, Pa.  
*Vice-President-General*—Winslow Warren, Mass.  
*Treasurer-General*—Richard M. McSherry, Md.  
*Secretary-General*—Hon. Asa Bird Gardner, L. I., D., of Rhode Island, Garden City, N. Y.  
*Assistant Secretary-General*—Nich. Fish, N. Y.

## State Societies.

*Massachusetts*—Organized June 9, 1783; Winslow Warren, president.  
*New York*—Organized June 9, 1778; Hon. John Cochrane, president, New York city.  
*Pennsylvania*—Organized Oct. 4, 1783; Hon. William Wayne, president, Paoli, Chester county, Pa.  
*Maryland*—Organized Nov. 21, 1783; Hon. Robert M. McLane, president, Baltimore, Md.  
*Rhode Island*—Organized June 24, 1783; Hon. Nathaniel Greene, president, Newport, R. I.  
*New Jersey*—Organized June 11, 1783; William S. Stryker, president, Mount Holly, N. J.  
*Connecticut* (revived 1838)—George B. Sanford, acting president.  
*South Carolina*—Organized Aug. 29, 1783; Rev. Charles Cotesworth Pinckney, D. D., president, Charleston, S. C.  
*Virginia*—John Cropper, president.  
*France*—Organized at Paris Jan. 7, 1784; re-instituted July 1, 1887; Marquis de Rochambeau, president, 51 Rue de Naples, Paris.

The historic and patriotic Order of the Cincinnati was founded by the American and French officers at the cantonments of the continental army on the Hudson at the close of hostilities in the war of the revolution for American independence in May, 1783.

In forming the society it was declared that "to perpetuate, therefore, as well the remembrance of this vast event as the mutual friendships which have been formed under the pressure of common danger, and, in many instances, cemented by the blood of the parties, the officers of the American army do hereby, in the most solemn manner, associate, constitute and combine themselves into one society of friends, to endure as long as they shall endure, or any of their eldest male posterity,

and in failure thereof the collateral branches who may be judged worthy of becoming its supporters and members."

For convenience, thirteen state societies were formed, and one in France under the direct patronage of Louis XVI. Upon the roll of original members appeared the names of all the great historic military and naval characters of the revolution, and upon the roll of honorary members, elected for their own lives only, appeared many of the signers of the declaration of independence.

Several state societies became dormant because the members had to emigrate to the lands given them for their services, west of the Alleghenies, and with broken health and ruined fortunes begin life anew in failure of congress to keep its promises as to half-pay.

There now remain nine state societies—viz., those of Massachusetts, Rhode Island, Connecticut (revived 1838), New York, New Jersey, Pennsylvania, Maryland, Virginia and South Carolina, and the one in France, which was dispersed at the reign of terror in 1793, has been re-established under the acting presidency of M. le Marquis de Rochambeau.

Membership descends to the eldest lineal male descendant, if judged worthy, and, in failure of direct male descent, to male descendants through intervening female descendants.

The general society is composed of the general officers and five delegates from each state society, and meets triennially. In 1884 it ruled that proper descendants of revolutionary officers who were entitled to original membership, but who never could avail themselves of it, are qualified for hereditary membership, if found worthy, on due application.

The last triennial meeting of the general society was held in Philadelphia, Pa., in May, 1886.

The number of living members of the Society of the Cincinnati, as reported at the triennial meeting May, 1886, was 430. President Cleveland and Maj.-Gen. Howard, U. S. A., are honorary members in the New York state society; ex-President Harrison is an honorary member of the Pennsylvania state society, and Gen. John M. Schofield is an honorary member of the New Jersey state society.

## SOCIETY OF COLONIAL WARS.

## Officers of the General Society.

*Governor-General*—Frederick J. de Peyster, New York.  
*Secretary-General*—Howland Pell, 4 Warren street, New York.  
*Deputy Secretary-General*—F. E. Haight, 49 Leonard street, New York.  
*Treasurer-General*—Edward Shippen, Philadelphia, Pa.  
*Deputy Treasurer-General*—Walter Chandler, Elizabeth, N. J.  
*Registrar-General*—George Norbury Mackenzie, Baltimore, Md.  
*Historian-General*—Rev. C. E. Stevens, Philadelphia, Pa.  
*Chaplain-General*—Rev. H. B. Whipple, L. I., D., D. C. L., Fairbault, Minn.

*New Hampshire*—H. O. Kent, Lancaster; J. C. Thorne, Concord.  
*Vermont*—E. A. Chittenden, St. Albans; J. G. Norton, St. Albans.  
*Illinois*—J. L. Lombard, Chicago; Seymour Morris, Chicago.  
*Missouri*—Henry Cadle, Bethany; H. Brinsmode, St. Louis.  
*Ohio*—M. M. Shoemaker, Cincinnati; A. H. Hugh, Cincinnati.  
*Nebraska*—J. O. Morton, Nebraska City; Clement Chase, Omaha.

**Minnesota**—Rukard Hurd, St. Paul; Maj. C. H. Whipple, St. Paul.

**Kentucky**—D. M. Jones, Harrodsburg; W. L. Halsey, Louisville.

**California**—S. R. Thorpe, Los Angeles; C. P. Fenner, Los Angeles.

**Colorado**—A. S. Dwight, Pueblo; T. W. M. Draper, Denver.

**Iowa**—W. S. Perry, Dubuque; H. G. Torbett, Dubuque.

**Georgia**—J. A. G. Carson, J. H. Kenzie, Savannah.

The Society of Colonial Wars was instituted in 1892 to "perpetuate the memory of these events and of the men who, in military, naval and civil positions of high trust and responsibility, by their acts of counsel assisted in the establishment, defense and preservation of the American colonies, and were in truth the founders of this nation. With this end in view it seeks to collect and preserve manuscripts, rolls and records; to provide suitable commemorations or memorials relating to the

American colonial period, and to inspire in its members the paternal and patriotic spirit of their forefathers, and in the community respect and reverence for those whose public services made our freedom and unity possible." Eligibility is confined to an adult male descendant of an ancestor who fought in battle under colonial authority, from the settlement of Jamestown, Va., in 1607, to the battle of Lexington, in 1775, or who served as governor, deputy-governor, lieutenant-governor, member of the council, or as a military, naval or marine officer in the service of the colonies or under the banner of Great Britain, or was conspicuous in military, official or legislative life during that period. The New York society was the original society, and state societies have also been organized in Pennsylvania, Maryland, Massachusetts, New Jersey, New Hampshire, Connecticut, Vermont, Missouri, Illinois, Virginia and the District of Columbia.

### SONS OF THE REVOLUTION.

[Organized 1875.]

#### General Officers.

**General President**—John Lee Carroll, Maryland.

**General Vice-President**—Garrett Dorset Wall Vroom, New Jersey.

**Second General Vice-President**—John Screven, Georgia.

**General Secretary**—James Mortimer Montgomery, New York.

**Assistant General Secretary**—William Hall Harris, Maryland.

**General Treasurer**—Richard McCall Cadwalader, Pennsylvania.

**Assistant General Treasurer**—Henry Cadle, Missouri.

**General Chaplain**—Rt. Rev. Henry B. Whipple, Minnesota.

**General Registrar**—Francis Ellingwood Abbott, Massachusetts.

**General Historian**—Galliard Hunt, Washington, D. C.

#### List of Secretaries of State Societies.

**Alabama**—Thomas McDady Owen, Birmingham.

**California**—Arthur Burnett Benton, 114 N. Spring-st., Los Angeles.

**Colorado**—Percy Maraden Cook, M. D., 1230 Haced-st., Denver.

**Connecticut**—Rev. Henry N. Wayne, New Britain.

**District of Columbia**—Henry Greenway Kemp, 1335 F-st. N.W., Washington.

**Florida**—Clarence Sherman Hammatt, Jacksonville.

**Georgia**—William Harden, 154 President-st., Savannah.

**Illinois**—Frank Kimball Root, 397 Wabash-av., Chicago.

**Iowa**—Van Samuel Roosevelt Johnson Hoyt, S. T. D., Davenport.

**Kentucky**—Prof. Wilbur R. Smith, Lexington.

**Maryland**—Robert Riddell Brown, 213 St. Paul-st., Baltimore.

**Massachusetts**—Henry Dexter Warren, Hotel Berkeley, Boston.

**Michigan**—Frank D. Haddock, Holland.

**Minnesota**—John Townsend, 137 Endicott Bldg., St. Paul.

**Missouri**—Henry Cadle, Bethany.

**Montana**—James F. McClelland, Great Falls.

**New Hampshire**—Thomas E. O. Marvin, Portsmouth.

**New Jersey**—John Alexander Campbell, Trenton.

**New York**—Charles Isham, 146 Broadway, New York.

**North Carolina**—Marshall DeLancey Haywood, Raleigh.

**North Dakota**—Irving McElroy, 208 9th-st., Fargo.

**Ohio**—Achilles Henry Pugh, lock box 635, Cincinnati.

**Pennsylvania**—Ethan Allen Weaver, lock box 713, Philadelphia.

**Rhode Island**—R. F. Tilley, Newport.

**South Carolina**—Gustavus M. Pinckney, Charleston.

**Tennessee**—Henry Hudson, Knoxville.

**Texas**—H. M. Aubrey, San Antonio.

**Virginia**—R. T. W. Duke, Jr., Charlottesville.

**Washington**—William Brownell Goodwin, Seattle.

**West Virginia**—Alex. Updegraff, Wheeling.

The two societies (Sons of the American Revolution and Sons of the Revolution) are alike in their aims and objects. These are fostering among themselves and their descendants the patriotic spirit of the men who in the naval, military or civil service of the colonies assisted in advancing the independence of the United States, and to collect and preserve the history of the revolutionary war and to promote intercourse and fraternal feeling among the members. Eligibility to membership in each is confined to male descendants from an ancestor who as a soldier, sailor or civil official assisted in establishing American independence during the war of the revolution. The society has a membership of 5,330.

### MILITARY ORDER OF FOREIGN WARS.

[Instituted Dec. 27, 1894.]

#### General Officers of the National Commandery.

**Commander-General**—Brevet-Major-General Alexander Stewart Webb, late U. S. A.

**Vice-Commanders-General**—Rear-Admiral Bancroft Gherardi, U. S. N., New York; Rear-Admiral Richard W. Meade, U. S. N., Pennsylvania; A. Floyd Delafield, Connecticut;

James H. Gilbert, Illinois; Horace Davis,

California; Rodney Macdonough, Massachusetts; Lieut. J. H. Bull, Florida.

**Secretary-General**—James Henry Morgan, New York.

**Treasurer-General**—Edward S. Sayres, Philadelphia, Pa.

*Registrar-General*—Rev. Henry N. Wayne, New Britain, Conn.

*Historian-General*—Capt. Henry Hobart Bellas, U. S. A.

*Judge-Advocate General*—Frank Montgomery Avery.

*Chaplain-General*—Rev. C. Ellis Stevens, L. L. D., D. C. L.

*Recorder-General*—Frederick J. Huntington.

#### Officers of State Commanderies.

*New York*—David Banks, commander.

*Pennsylvania*—Rev. C. E. Stevens, commander.

*District of Columbia*—Gen. David S. Stanley, U. S. A., commander.

*Ohio*—Gen. T. J. Wood, U. S. A., commander.

*Georgia*—Capt. J. E. P. Stevens, U. S. A., commander.

*Maine*—Gen. F. Fessenden, U. S. A., commander.

*Mississippi*—Henry St. L. Capper, commander.

*Vermont*—E. A. Chittenden, commander.

*California*—E. S. Holden, commander.

*Illinois*—S. E. Gross, commander.

*Florida*—Lt. J. H. Bull, U. S. N., commander.

*Tennessee*—Capt. J. Biddle, U. S. A., commander.

### SOCIETY OF THE SONS OF THE AMERICAN REVOLUTION.

[Organized June 29, 1876.]

#### General Officers.

Elected April 30, 1894.

*President-General*—Edwin Shepard Barrett, 15 Broad street, New York city.

*Vice-Presidents-General*—Col. Thos. M. Anderson, U. S. A., Vancouver Barracks, Wash.; John Whitehead, Morristown, N. J.; James M. Richardson, Cleveland, O.; Capt. Samuel Eberly Gross, Chicago; Gen. Joseph C. Breckinridge, U. S. A., Washington, D. C.

*Secretary-General*—Franklin Murphy, Newark, N. J.

*Treasurer-General*—C. W. Haskins, 30 Broad street, New York city.

*Registrar-General*—A. Howard Clarke, Washington city.

*Historian-General*—Henry Hall, New York city.

*Chaplain-General*—The Rt. Rev. Charles Edward Cheney, D. D., Chicago, Ill.

#### State Societies and Officers.

*Arizona*—H. F. Robinson, Phoenix.

*Arkansas*—S. W. Williams, president, Little Rock.

*California*—Sidney M. Smith, president, San Francisco.

*Colorado*—J. F. Tuttle, Jr., Denver.

*Connecticut*—Jonathan Trumbull, president, Norwich.

*Delaware*—Wm. A. La Motte, president, Wilmington.

*District of Columbia*—Edw. M. Gallaudet, L. L. D., Washington.

*Florida*—Hon. John C. Avery, Pensacola.

*Hawaii*—Peter Cushman Jones, Honolulu.

*Illinois*—S. E. Gross, president, Chicago.

*Indiana*—Wm. E. English, president, Indianapolis.

*Iowa*—Wm. H. Wheeler, president, Des Moines.

*Kansas*—George D. Hale, president, Topeka.

*Kentucky*—Geo. D. Todd, president, Louisville.

*Louisiana*—Marshall J. Smith, president, New Orleans.

*Maine*—James P. Baxter, president, Portland.

*Maryland*—Joseph L. Brent, president, Baltimore.

*Massachusetts*—E. S. Barrett, president, Concord.

*Michigan*—Thos. W. Palmer, president, Detroit.

*Minnesota*—Gen. John B. Sanborn, president, St. Paul.

*Missouri*—Gen. Geo. H. Shields, president, St. Louis.

*Montana*—Cornelius Hedgcs, president, Helena.

*Nebraska*—Lucius D. Richards, president, Fremont.

*New Hampshire*—Howard L. Porter, president, Concord.

*New Jersey*—John Whitehead, president, Morristown.

*New York*—Chauncey M. Depew, president, New York city.

*Ohio*—J. W. Richardson, president, Cincinnati.

*Oregon*—Col. Thomas M. Anderson, president, Vancouver Barracks, Wash.

*Pennsylvania*—W. A. Herron, president, Pittsburgh.

*Rhode Island*—Royal C. Taft, president, Providence.

*Texas*—Ira H. Evans, president, Austin.

*Utah*—N. W. Brigham, president, Salt Lake City.

*Vermont*—William P. Dillingham, president, Waterbury.

*Virginia*—Chas. W. Williams, president, Richmond.

*Washington*—Col. S. W. Scott, Seattle.

*Wisconsin*—Geo. H. Noyes, president, Milwaukee.

The membership of the society was 11,000 at the annual meeting in Cleveland, O., April 30, 1897.

### MILITARY ORDER OF THE LOYAL LEGION OF THE UNITED STATES.

(Instituted 1865. Membership July 31, 1897, 8,961.)

*Commander-in-Chief*—Rear-Admiral Bancroft Gherard, U. S. N., New York city.

*Senior Vice-Commander-in-Chief*—Brig.-Gen. Belden Connor, U. S. V., Portland, Me.

*Junior Vice-Commander-in-Chief*—Bvt. Maj.-Gen. John R. Brooke, U. S. A., Chicago, Ill.

*Recorder-in-Chief*—Bvt. Lieut.-Col. J. P. Nicholson, U. S. V., Philadelphia, Pa.

*Register-in-Chief*—Bvt. Maj. W. P. Huxford, Washington, D. C.

*Treasurer-in-Chief*—Col. Cornelius Codle.

*Chaplain-in-Chief*—Rev. Henry Hopkins.

#### Commanderies.

*Pennsylvania*—Bvt. Maj.-Gen. D. McMc Gregg, U. S. V., commander; Bvt. Lieut.-Col. John P. Nicholson, U. S. V., recorder, Philadelphia.

*New York*—Maj.-Gen. Granville M. Dodge, U. S. V., commander; Paymaster A. Noel Blakeman, U. S. N., recorder, New York.

*Maine*—Col. Samuel H. Allen, U. S. V., commander; Bvt. Maj. Henry S. Burrage, U. S. V., recorder, Portland.

*Massachusetts*—Bvt. Maj.-Gen. George L. Andrews, U. S. V., commander; Col. Arnold A. Rand, U. S. V., recorder, Boston.

*California*—Brig.-Gen. William R. Shafter, U. S. A., commander; Bvt. Lieut.-Col. William R. Smedberg, U. S. A., recorder, San Francisco.

*Wisconsin*—First Lieut. Cornelius Wheeler, U. S. V., commander; Capt. A. Ross Houston, U. S. V., recorder, Milwaukee.

*Illinois*—Brig.-Gen. Wm. Sooy Smith, U. S. V., commander; Capt. Roswell H. Mason, U. S. V., recorder, Chicago.

**District of Columbia**—Rear Admiral John G. Walker, U. S. N., commander; Bvt. Maj. William P. Huxford, U. S. A., recorder, Washington.

**Ohio**—Bvt. Brig.-Gen. B. R. Cowen, U. S. V., commander; Maj. W. H. Chamberlin, U. S. V., recorder, Cincinnati.

**Michigan**—Lieut. Henry M. Duffield, U. S. V., commander; Bvt. Brig.-Gen. F. W. Swift, U. S. V., recorder, Detroit.

**Minnesota**—Bvt. Brig.-Gen. R. N. Adams, U. S. V., commander; Bvt. Maj. George Q. White, U. S. A., recorder, St. Paul.

**Oregon**—Lieut.-Col. Jas. Jackson, U. S. A., commander; Maj. William M. Calk, U. S. V., recorder, Portland.

**Missouri**—Bvt. Lieut. Col. Jas. O. Churchill, U. S. V., vice-commander; Capt. William R. Honiges, U. S. V., recorder, St. Louis.

**Nebraska**—Lieut. William Wallace, U. S. V.,

commander; Lieut. F. B. Bryant, U. S. V., recorder, Omaha.

**Kansas**—Lieut.-Col. J. T. Haskell, U. S. A., commander; Capt. W. B. Reynolds, U. S. A., recorder, Fort Leavenworth.

**Iowa**—Col. C. L. Godfrey, U. S. V., commander; Lieut. Joseph W. Muffy, U. S. V., recorder, Des Moines.

**Colorado**—Lieut. George Ady, U. S. V., commander; Bvt. Capt. James B. Saville, U. S. V., recorder, Denver.

**Indiana**—Maj.-Gen. Lew Wallace, U. S. V., commander; Bvt. Col. Z. Smith, U. S. V., recorder, Indianapolis.

**Washington**—Col. W. W. Robinson, U. S. V., commander; Lieut.-Comdr. J. E. Noel, U. S. N., recorder, Tacoma.

**Vermont**—Maj. John L. Barstow, U. S. V., commander; First Lieut. William L. Greenleaf, U. S. V., recorder, Burlington.

### GRAND ARMY OF THE REPUBLIC.

**Commander-in-Chief**—John P. S. Gobin, Lebanon, Pa.

**Senior Vice-Commander-in-Chief**—Alfred Lyth, Buffalo, N. Y.

**Junior Vice-Commander-in-Chief**—Francis B. Allen, Hartford, Conn.

**Surgeon-General**—David McKay, Dallas, Tex.

**Chaplain-in-Chief**—Rev. Frank C. Bruner, Chicago, Ill.

The national council of administration has forty-five members, each department being represented by one member.

## THE LEGAL HOLIDAYS.

Jan. 1—New Year's day: In all the states except Arkansas, Massachusetts, Mississippi, New Hampshire and Rhode Island.

Jan. 8—Anniversary of the battle of New Orleans: In Louisiana.

Jan. 19—Lee's birthday: In Florida, Alabama, Georgia, North Carolina and Virginia.

Feb. 6—Mardi Gras, Shrove Tuesday (the day before Ash Wednesday, the first day of Lent): In Alabama and Louisiana.

Feb. 12—Lincoln's birthday: In Illinois, Minnesota, New Jersey, New York, Washington.

Feb. 23—Washington's birthday: In all the states except Arkansas, Iowa and Mississippi.

March 2—Anniversary of Texan Independence: In Texas.

March 4—Firemen's anniversary: In New Orleans, La.

March 10—Good Friday (the Friday before Easter): In Alabama, Louisiana, Maryland, Pennsylvania and Tennessee.

April (first Wednesday)—State election day: In Rhode Island.

April 19—Patrick's day: In Massachusetts.

April 21—Anniversary of the battle of San Jacinto: In Texas.

April 25—Memorial day: In Alabama and Georgia.

May 10—Memorial day: In North Carolina.

May 30—Anniversary of the signing of the Mecklenburg declaration of independence: In North Carolina.

May 30—Decoration day: In Arizona, California, Colorado, Connecticut, Delaware, Iowa, Illinois, Indiana, Kansas, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, Tennessee, Utah, Vermont, Wisconsin, Washington and Wyoming.

June 3—Jefferson Davis' birthday: In Florida.

July 4—Independence day: In all the states.

July 24—Pioneers' day: In Utah.

\*September (first Monday)—Labor day: In California, Colorado, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas,

Maine, Massachusetts, Michigan, Montana, Nebraska, New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia and Washington.

Sept. 9—Admission day: In California.

Sept. 12—Labor day: In Florida.

Oct. 31—Admission in the Union day: Nevada.

November (generally the Tuesday after the first Monday)—General election day: In Arizona, California, Florida, Idaho, Indiana, Kansas, Maryland, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota, South Carolina, Tennessee, Texas, West Virginia, Washington, Wisconsin and Wyoming.

November, the last Thursday in—Thanksgiving day: It is observed in all the states, although in some it is not a statutory holiday.

Nov. 25—Labor day: In Louisiana.

Dec. 25—Christmas day: In all states, and in South Carolina the two succeeding days in addition.

Sundays and fast days (whenever appointed) are legal holidays in nearly all the states.

Arbor day is a legal holiday in Kansas, Rhode Island and Wyoming, the day being set by the governor—in Nebraska, April 22; California, Sept. 9; Colorado, on the third Friday in April; Montana, third Tuesday in April; Utah, first Saturday in April; and Idaho, on Friday after May 1.

Every Saturday after 12 o'clock noon is a legal holiday in New York, New Jersey, Pennsylvania and Maryland, and the city of New Orleans, and June 1 to Sept. 30 in Newcastle county, Delaware.

\*Labor day was made a national holiday by congress. It is the only strictly national holiday we have, not excepting the Fourth of July. Congress has at various times appointed special holidays, and has recognized the existence of certain days as holidays, but there is no general statute on the subject. The proclamation of the president, designating a day of thanksgiving only makes such day a holiday in those states which provide for it by law.

## NATIONAL DEBTS.

The total national debt of the world is now \$29,900,000,000, while in 1875 it was \$23,750,000,000. France has the distinction of leading the world in this regard with a debt of \$6,000,000,000, followed by Great Britain with \$3,300,000,000. The third on the list is Austria-Hungary with \$1,030,000,000, while Russia is fourth with \$2,375,000,000 and Italy fifth with \$2,530,000,000. Spain comes next, with \$1,325,000,000, and the United States is seventh with \$996,141,962. Germany has a debt of only \$420,000,000.

Spain owes comparatively the largest sum to foreigners, while in France the great bulk of the papers are in possession of Frenchmen themselves. But nearly every other nation is indebted for enormous amounts to its own subjects. France takes the lead as a lending people on account of the good financial standing and the saving propensities of its people. The example of France seems to confirm the proposition that a national debt is a good thing for the prosperity of a people, for in that country the national debt and the general prosperity of the populace have steadily advanced in recent decades in equal proportions.

The growth of national debts can be seen from the following table, in which the fig-

ures for twenty years ago are given in the first column, those for 1897 in the second column:

France	\$4,600,000,000	\$6,000,000,000
England	3,900,000,000	3,300,000,000
Austria-Hungary	1,750,000,000	2,030,000,000
Russia	1,700,000,000	2,375,000,000
Italy	1,350,000,000	2,530,000,000
Spain	1,375,000,000	1,325,000,000
Australia	230,000,000	1,200,000,000
United States	2,320,000,000	996,141,962
Turkey	675,000,000	200,000,000
Portugal	345,000,000	765,000,000
India	650,000,000	635,000,000
Brazil	475,000,000	580,000,000
Egypt	375,000,000	530,000,000
Holland	.....	480,000,000
Belgium	.....	445,000,000
Germany	1,000,000,000	420,000,000
Argentina	.....	370,000,000
Canada	165,000,000	255,000,000
Japan	.....	285,000,000

Each inhabitant of France pays, on the average, each year \$4.75 interest on the national debt; each Russian, \$1.20; each Englishman, \$3.15; each Austrian, \$7.50; each Italian, \$3.80; each Spaniard, \$3.25; each American, 42 cents, and each German, 33 cents.

## The National Government.

[Corrected to Nov. 15, 1897.]

## EXECUTIVE DEPARTMENT.

President, William McKinley (O.).....	\$50,000
Vice to the President, John Addison Porter (Conn.).....	5,000
Sec.-President, Garret A. Hobart (N. J.).....	8,000
U. S. Dist. Marshal, A. A. Wilson (D. C.).....	6,000

## DEPARTMENT OF STATE.

Secretary, John Sherman (O.).....	8,000
Asst. Sec., William R. Day (O.).....	4,500
Second Asst. Sec., Alvey A. Adee (D. C.).....	3,500
Third Asst. Sec., Thos. W. Gridler (W. Va.).....	3,500
Solicitor, Wm. L. Penfield (Ind.).....	3,500

1. Isaac A. Barber.....Easton.
2. William B. Baker\*.....Aberdeen.
3. William S. Booz.....Baltimore.
4. William W. McIntire.....Baltimore.
5. Sidney E. Mudd,†.....Laplace.
6. John McDonald.....Rockville.

## MASSACHUSETTS.

1. George P. Lawrence.....North Adams.
2. Frederick H. Gillet\*.....Springfield.
3. Joseph Henry Walker\*.....Worcester.

4. Geo. W. Weymouth..... Fitchburg.
5. William S. Knox..... Lawrence.
6. William H. Moody..... Haverhill.
7. Willard B. Barrett..... Melrose.
8. Samuel W. McCall..... Winchester.
9. John F. Fitzgerald..... Boston.
10. S. J. Barrows..... Boston.
11. Charles F. Sprague..... Boston.
12. William C. Loring..... Taunton.
13. John Simpkins..... Yarmouth.

## MICHIGAN.

1. John B. Corlies..... Detroit.
2. George Spalding..... Monroe.
3. ALBERT M. TOND..... Kalamazoo.
4. Edward L. Hamilton..... Niles.
5. Wm. Alden Smith..... Grand Rapids.
6. Samuel W. Smith..... Pontiac.
7. Horace G. Shover..... Port Austin.
8. F. D. Bruckner..... Saginaw.
9. Rowell P. Bishop..... Ludington.
10. Thomas D. Crump..... Bay City.
11. William I. Mack..... Marcellona.
12. Carlos D. Sheldon..... Houghton.

## MINNESOTA.

1. James A. Twiney..... Winona.
2. James T. McCleary..... Mankato.
3. Joel P. Heatwole..... Northfield.
4. F. C. Stevens..... St. Paul.
5. Loren Fletcher..... Minneapolis.
6. Page Morris..... Duluth.
7. Frank M. Eddy..... Glenwood.

## MISSISSIPPI.

1. John M. Allen..... Tupelo.
2. W. V. Sullivan..... Oxford.
3. Thomas C. Catchings..... Vicksburg.
4. Andrew F. Fox..... West Point.
5. John S. Williams..... Yazoo City.
6. C. W. V. Love..... Gloster.
7. Patrick Henry..... Brandon.

## MISSOURI.

1. James T. Lloyd..... Shelbyville.
2. Robert N. Bodine..... Paris.
3. Alexander M. Buckner..... Galatin.
4. Charles F. Cochran..... St. Joseph.
5. William S. Cowhard..... Kansas City.
6. David A. De Armand..... Butler.
7. James A. Cooney..... Marshall.
8. Richard P. Blamit..... Lebanon.
9. Chas. Clark..... Bowling Green.
10. Richard Burtholdt..... St. Louis.
11. Charles F. Jay..... St. Louis.
12. Charles E. Pearce..... St. Louis.
13. Edward A. Robt..... Perryville.
14. William D. Vandiver..... Cape Girardeau.
15. M. E. Benton..... Neosho.

## MONTANA.

CHARLES S. HARTMAN..... Bozeman.

## NEBRASKA.

1. Jesse B. Strode..... Lincoln.
2. David H. Mercer..... Omaha.
3. SAMUEL MAXWELL..... Fremont.
4. WILLIAM L. STARK..... Aurora.
5. J. D. SUTHERLAND..... Nelson.
6. WILLIAM L. GREEN..... Kearney.

## NEVADA.

F. G. NEWLANDS..... Reno.

## NEW HAMPSHIRE.

1. Cyrus A. Sulloway..... Manchester.
2. Frank G. Clark..... Peterboro.

## NEW JERSEY.

1. Henry C. Loudenslager..... Paulsboro.
2. John J. Gardner..... Atlantic City.
3. Benjamin F. Howell..... New Brunswick.
4. Mahlon Pinyon..... Morristown.
5. James F. Stearns..... Paterson.
6. Richard Wayne Parker..... Newark.
7. Thomas McEuan, Jr..... Jersey City.
8. Charles Newell Fowler..... Elizabeth.

## NEW YORK.

1. Joseph M. Belford..... Riverhead.
2. Denis M. Hurley..... Brooklyn.
3. E. H. Briggs..... Brooklyn.
4. Israel F. Fischer..... Brooklyn.
5. Charles G. Bennett..... Brooklyn.
6. James R. Howe..... Brooklyn.
7. John H. G. Vehlslage..... New York city.
8. John M. Mitchell..... New York city.
9. Thomas J. Bradley..... New York city.
10. Amos J. Cummings..... New York city.
11. William Sulzer..... New York city.
12. George B. McClellan..... New York city.
13. Robert C. Shannon..... New York city.
14. Lemuel E. Quigg..... New York city.
15. Philip B. Lou..... New York city.
16. William L. Ward..... Port Chester.
17. Benjamin B. Odell, Jr..... Newburg.
18. John H. Ketcham..... Dover Plains.
19. Aaron V. Cochran..... Hudson.
20. George N. Sou'hwick..... Albany.
21. David Wilbert..... Oneonta.
22. Lucien L. Littauer..... Gloversville.
23. Wallace T. Foote, Jr..... Port Henry.
24. Charles A. Chickering..... Copenhagen.
25. James S. Sherman..... Utica.
26. George W. Ray..... Norwich.
27. James J. Belden..... Syracuse.
28. Sereno E. Payne..... Auburn.
29. Charles W. Gill..... Addison.
30. James W. Wadsworth..... Genesee.
31. Henry C. Breyst..... Rochester.
32. Rowland B. Mahany..... Buffalo.
33. Deatra S. Alexander..... Buffalo.
34. Warren B. Hooker..... Fredonia.

## NORTH CAROLINA.

1. HARRY SKINNER..... Greenville.
2. Geo. H. White..... Tarboro.
3. JOHN E. FOWLER..... Clinton.
4. WILLIAM F. STROUD..... Pittsboro.
5. W. W. Kitchin..... Roxboro.
6. CHARLES H. MARTIN..... Polkton.
7. A. C. SHUFORD..... Albemarle.
8. Romulus Z. Linney..... Taylorsville.
9. Richmond Pearson..... Asheville.

## NORTH DAKOTA.

Martin N. Johnson..... Petersburg.

## OHIO.

1. William B. Shattuck..... Madisonville.
2. Jacob H. Brownwell..... Cincinnati.
3. John L. Bremen..... Dayton.
4. GEO. A. MARSHALL..... Sidney.
5. David Meekison..... Napoleon.
6. Seth W. Brown..... Lebanon.
7. Walter L. Weaver..... Springfield.
8. Archibald Lybrand..... Delaware.
9. James N. Southard..... Toledo.
10. Lucien J. Fenton..... Winchester.
11. Charles H. Grosvenor..... Athens.
12. John J. Lents..... Columbus.
13. James A. Norton..... Tiffin.
14. Winfield S. Kerr..... Mansfield.
15. Henry C. Van Voorhis..... Zanesville.
16. Lorenzo Danford..... St. Clairsville.
17. John A. McDowell..... Millersburg.
18. Robert W. Taylor..... New Lisbon.
19. Stephen A. Northway..... Jefferson.
20. Clifton B. Beach..... Cleveland.
21. Theo. E. Burton..... Cleveland.

## OREGON.

1. Thomas H. Tongue..... Hillsboro.
2. William R. Ellis..... Heppner.

## PENNSYLVANIA.

- At Large—Galusha A. Grow..... Greenwood.
- Samuel A. Davenport..... Erie.
1. Henry H. Brigham..... Philadelphia.
2. Robert Adams, Jr..... Philadelphia.
3. William A. Allen..... Philadelphia.
4. James R. Young..... Philadelphia.
5. Alfred C. Harmer..... Philadelphia.
6. Thomas S. Butler..... West Chester.

## HOUSE OF REPRESENTATIVES.—CONTINUED.

7. Irving P. Wanger	Norristown.
8. William S. Rickpatrick	Easton.
9. David Erimment	Reading.
10. Merriott Bruns	Lancaster.
11. William C. H. H.	Scranton.

## RATES OF POSTAGE.

## DOMESTIC.

**FIRST CLASS.**—Letters and all written matter, whether sealed or unsealed, and all other matter sealed, nailed, sewed, tied or fastened in any manner so that it cannot be easily examined, 2 cents per ounce or fraction thereof. A "special delivery" 10-cent stamp when attached to a letter, in addition to the lawful postage, shall entitle the letter to immediate delivery at or within one mile of any postoffice.

Postal cards, 1 cent each.

**SECOND CLASS.**—All regular newspapers, magazines and other periodicals issued at intervals not exceeding three months; the postage is 1 cent for each pound. A special rate of 1 cent for four ounces is made for all second-class matter mailed by other than publishers or newsdealers.

**THIRD CLASS.**—Embraces printed books, pamphlets, circulars, engravings, lithographs, proof-sheets and manuscript accompanying the same, and all matter of the same general character, and not having the character of personal correspondence. Circulars produced by hectograph or similar process, or by electric pen, are rated as third class. The limit of weight for mail matter of the third class is four pounds, except in the case of single books exceeding that weight. The rate of postage on mail matter of the third class is 1 cent for each two ounces or fraction thereof.

**FOURTH CLASS.**—All mailable matter, like merchandise, not included in the three preceding classes, which is so prepared for mailing as to be easily taken from the wrapper and examined. Rate, 1 cent per ounce or fraction thereof, except seeds, roots, cuttings, bulbs, plants and scions, which are 1 cent per two ounces. Limit of weight, four pounds. Full prepayment compulsory. Liquids and other like injurious matter, not admitted, except some under conditions which may be learned at any postoffice.

**SUGGESTIONS.**—Direct your mail matter to a postoffice, writing the name of the state plainly; and if to a city, add the street and number or postoffice box of the person addressed. Matter not addressed to a postoffice cannot be forwarded. Write or print your name and address, and the contents, if a package, upon the upper left-hand corner of all mail matter. This will insure its immediate return to you for correction, if improperly addressed or insufficiently paid; and if it is not called for at destination, it can be returned to you without going to the dead-letter office. If a letter, it will be returned free. Register all valuable letters and packages. Registry fee, 8 cents, which, with the postage, must be fully prepaid.

**MONEY-ORDER FEES.**—For money orders in denominations of \$10 or less, the following fees are charged:

For orders for sums not exceeding \$2.50.....	2c
For over \$2.50 and not exceeding \$5.....	5c
For over \$5 and not exceeding \$10.....	8c
For over \$10 and not exceeding \$20.....	10c
For over \$20 and not exceeding \$50.....	12c
For over \$50 and not exceeding \$100.....	15c
For over \$100 and not exceeding \$500.....	18c
For over \$500 and not exceeding \$1,000.....	20c
For over \$1,000 and not exceeding \$5,000.....	25c
For over \$5,000 and not exceeding \$10,000.....	30c

## FOREIGN.

To all parts of the Universal Postal Union, embracing Argentine Republic, Australia, Austria-Hungary, Belgium, Bolivia, Brazil, Bulgaria, Ceylon, China via Hongkong, Chile, Cuba, Denmark and Danish colonies, Ecuador, Egypt, Falkland Islands, France and French colonies, Germany, Great Britain and British West Indies, Greece, Greenland, Guatemala, Haiti, Holland or Netherlands and Nether-

land colonies, Honduras, Hongkong, India (British), Ireland, Italy, Japan, Liberia, Luxemburg, Malacca, Mauritius, Montenegro, Natal, Newfoundland, Norway, Paraguay, Patagonia, Penang, Persia, Peru, Portugal and Portuguese colonies, Roumania, Russia, St. Bartholomew, Salvador, Servia, Siam, Singapore, Spain and Spanish colonies, Straits settlements, Sweden, Switzerland, Transvaal, Trinidad, Turkey, United States of Colombia, Uruguay, Venezuela:

**ON LETTERS.**—Five cents for each half ounce or fraction thereof—prepayment optional. Double rates are collected on delivery of unpaid or short paid letters.

On newspapers, books, pamphlets, photographs, sheet music, maps, engravings and similar printed matter, 1 cent for each two ounces or fraction thereof.

**TO CANADA.**—(Including Nova Scotia, New Brunswick, Manitoba and Prince Edward Island): Letters, 2 cents for each ounce or fraction thereof; books, circulars and similar printed matter, 1 cent for each two ounces or fraction thereof; second-class matter, same as in the United States; samples and merchandise, 1 cent per ounce. Packages must not exceed four pounds six ounces in weight—prepayment compulsory.

**TO MEXICO.**—Letters, postal cards, and printed matter, same rates as in the United States; samples, 1 cent per ounce; merchandise other than samples can only be sent by parcel post.

**TO AUSTRALIA.**—(Except New South Wales, Queensland and Victoria) via San Francisco: On letters, 5 cents for each half ounce or fraction thereof; to places excepted above, 12 cents for each half ounce; on newspapers, 2 cents each—prepayment compulsory.

**LIMITS OF SIZE AND WEIGHT.**—Packages of samples of merchandise to the countries named above (except Great Britain, France, Belgium and Switzerland) must not exceed eight and three-fourths ounces, nor measure more than eight inches in length, four in breadth and two in depth; and packages of printed matter must not exceed four pounds six ounces. Packages of merchandise samples to Great Britain, France, Belgium, Switzerland and Argentine Republic are limited to twelve ounces in weight, twelve inches in length, eight in width and four in depth. Packages of printed matter to Germany and Great Britain are limited to two feet in length and one foot in each other dimension.

## INTERNATIONAL MONEY-ORDER FEES.

On Algeria, Belgium, British India, Cape Colony, Constantinople, Denmark, Dominion of Canada, Egypt, England, France, German empire, Hongkong, Ireland, Italy, Jamaica, Japan, Newfoundland, New South Wales, New Zealand, Portugal, Sandwich Islands, Scotland, Shanghai, Sweden, Switzerland, Tasmania, Victoria:

For sums not exceeding \$10.....	10c
Over \$10 and not exceeding \$20.....	20c
Over \$20 and not exceeding \$50.....	30c
Over \$50 and not exceeding \$100.....	40c
Over \$100 and not exceeding \$500.....	50c
Over \$500 and not exceeding \$1,000.....	60c
Over \$1,000 and not exceeding \$5,000.....	70c
Over \$5,000 and not exceeding \$10,000.....	80c
Over \$10,000 and not exceeding \$50,000.....	90c
Over \$50,000 and not exceeding \$100,000.....	\$1

Orders can also be obtained on Austria and East Indies, by remittance through the postal department of Switzerland, subject to the rates of the Swiss department to those countries. Also on Norway and the Netherlands, through the postal department of the German empire, subject to the rates of the German department to those countries.

## United States Diplomatic and Consular Service.

# Utterances of State Conventions.

## RESOLUTIONS ADOPTED AT VARIOUS STATE CONVENTIONS ON NATIONAL QUESTIONS.

As a rule the party conventions in the states holding elections in 1897 confined themselves very closely to local issues in their platforms. In some states the conventions contented themselves by ratifying the platforms of the national assemblies of 1896.

## THE FINANCES.

[Where parties are omitted no declaration was made.]

### COLORADO.

#### REPUBLICANS.

Resolved, That the republican party of Colorado unqualifiedly indorses the determination of the national republican party to restore the value of silver bullion and secure permanent bimetalism by appointing a monetary commission to secure an international agreement. That in appointing Senator Wolcott at the head of said commission and backing the efforts of said commission by the whole diplomatic power of his administration President McKinley is entitled to the unanimous support of all citizens of Colorado who desire the restoration of silver.

We earnestly commend the efforts of Senator Wolcott in his active prosecution of the only rational attempt that has hitherto been made to secure enduring bimetalism and we denounce as infamous the calumny that has been heaped upon him by the democratic and populist press.

#### DEMOCRATS.

We believe the free coinage of silver at the ratio of 16 to 1 to be the paramount issue before the people of this nation and until settled rightly it should be the supreme question in every election, whether national or local. We expressly declare our opposition to any movement which may be construed as a waiver of that issue and pledge ourselves to do all in our power, whether alone or in conjunction with others who believe in the same thing, to defeat any candidate who accepts a nomination by those who are opposed to the principles of the Chicago platform.

#### SILVER REPUBLICANS.

The silver republicans of Colorado in convention assembled declare that the adoption of a single gold standard by the nations of the world means the restriction of commerce to the narrowest possible limit and will, if continued, entail upon the wage-earning classes a lasting servitude, which will seriously retard, if not destroy, the development of civilization. We owe it, therefore, not only to ourselves, but to the people of our common country, to steadfastly and courageously continue the battle for the restoration of the money of the constitution.

We declare that the silver republican party of Colorado will maintain its organization intact without yielding, abandoning or compromising any of the principles which called it into existence, and we oppose affiliation with any organization which does not stand with us upon the question of bimetalism, which we regard as of controlling and paramount political importance. We especially oppose affiliation with the present republican administration party because it declared in its platform of 1896

that it is opposed to the free coinage of silver and that the present gold standard must be maintained until the principal commercial nations of the world consent that we may have a financial system of our own. We recognize that a judicial convention should be as far as practicable divorced from politics, yet we desire to place ourselves upon record as being unqualifiedly in favor of the free coinage of silver at the ratio of 16 to 1, without waiting for the aid or consent of any other nation or country on earth.

#### PEOPLE'S PARTY.

We demand the free and unlimited coinage of silver and gold at the legal ratio of 16 to 1 by our own government, independent of the action of any other nation, and we demand that the amount of paper money be regulated to the wants of trade and be issued directly by the government. We call upon all friends of this cause to be manly and brave at this critical time.

### IOWA.

#### REPUBLICANS.

The platform "reaffirms and adopts in every part the declaration of principles announced by the republican national convention in 1896 and it pledges for Iowa the election in November next shall be a still more emphatic evidence of the strength and justice of republican doctrines. "It again specially declares for protection and honest money."

#### DEMOCRATS.

The democracy of Iowa in convention assembled send greeting to the nearly 7,000,000 patriots who participated and aided in the battle of the people in their struggle for their rights in the last campaign, by giving renewed expression of devotion to the principles of the democracy of the nation as set forth in the platform adopted by the democratic party at Chicago in 1896. We lay special emphasis upon that portion of the national platform of the democratic party on the financial question, believing that the very existence of the farming, laboring and commercial interests of the country depends upon a change of our financial policy, and we enter into the first campaign after the great battle of the people against the combined corporate and money power, in which that peerless statesman and patriot, W. J. Bryan, was our leader, with the reassertion "that we demand the free and unlimited coinage of both gold and silver at the present legal ratio of 16 to 1, without waiting for the aid or consent of any other nation."

#### FREE SILVER REPUBLICANS.

The free silver republican party of Iowa, in convention assembled, hereby declare these are our principles:

We are first and unalterably in favor of

the free and unlimited coinage of silver and gold at the present legal ratio of 16 to 1, and heartily indorse the declaration of the republican party of Iowa in 1877 that, "the silver dollar having been the legal unit of value from the foundation of the federal government until 1873, the law by which its coinage was suspended should be repealed at the earliest possible day and silver made with gold a legal tender for the payment of all debts, both public and private."

That the epithet "cheap money," as applied to the old standard silver dollar of the United States, is both disloyal and dishonest. It had its origin and use with the money shark during the war of the rebellion, in denouncing the legal tender notes, and is now the favorite term of those who want to make money scarce and high, so they may take advantage of it and prey upon the necessities and distresses of the government and people.

We reaffirm the doctrine of the resolution passed by a republican congress in 1878, known as the Matthews resolution, to the effect that the payment of all national obligations in the silver dollar of 412½ grains standard is not in violation of the public faith nor in derogation of the public credit.

We further affirm that, the national debts having been contracted under the legal ratio of 16 to 1, the proposition made by the republican party to make the gold standard permanent and to ignore the constitutional sphere of silver is rank repudiation of the contract and we therefore denounce it as both dishonest and un-American.

#### PEOPLE'S PARTY.

We, the populists of Iowa, in convention assembled, hereby declare these our principles:

We are first and unalterably in favor of the free and unlimited coinage of silver at the present legal ratio of 16 to 1 with gold, and we heartily indorse the declaration of the party in Iowa in 1877 that, "the silver dollar having been the legal unit of value from the foundation of the federal government until 1873, the law by which its coinage was suspended should be repealed at the earliest possible moment and silver made with gold a full legal tender for the payment of all debts, both public and private."

That all supplementary currency should be issued by the government and should be a full legal tender for all debts, and we view with alarm the threat of the present administration to withdraw and to destroy the government issue and look upon the movement as a further crime in decreasing the amount of money in use, while population is increasing, and augmenting the bonded debt in times of peace.

#### NATIONAL (GOLD) DEMOCRATS.

The national democrats of the state of Iowa, in convention assembled, declare:

The doctrines of paternalism, class legislation and debased coinage, to which each of the three contracting parties making up the free silver-populist triple alliance in this state have recently pledged themselves in their several platforms, are as abhorrent to every true democrat when advocated by populists under the name of democracy as when taught by republicans. Democracy is a necessary foe of each and we repudiate them as unworthy of the support of every true democrat.

#### KENTUCKY.

#### REPUBLICANS.

Resolved, by the republican party in con-

vention assembled, That we reaffirm the principles of the republican party as set forth in the platform adopted by it at St. Louis in 1896.

#### DEMOCRATS.

Resolved, First—That we hereby reaffirm our faith in the principles set forth and enumerated in the platform adopted by the democratic party in national convention held at Chicago in July, 1896, and we re-adopt said platform as the platform of the democracy of Kentucky.

Second—That the principles adopted and set forth in that platform are the true principles of democratic faith and we urge upon all true democrats to stand by them at all times and under all circumstances and conditions.

Third—That we indorse the canvass made by William J. Bryan, the nominee of the democratic party for the presidency of the United States in the late election. We recommend its wisdom, approve it as just and fair to all parties and interests of our common country. We recognize in him the peerless orator and statesman and the great champion of the people's rights against the money power, the monopolists, the syndicates and trusts and pledge him the support of a united democracy in our state.

#### PEOPLE'S PARTY.

The people's party of Kentucky, in convention assembled, do hereby in positive terms reaffirm our faithful allegiance and ardent devotion to the principles of the people's party, as enunciated in the platform adopted at Omaha, Neb., in 1892, and at St. Louis in 1896, and we hereby cordially invite all true reformers throughout the state and nation to assist us in carrying into effect the said principles.

(The Omaha platform advocated the free coinage of silver at present ratio.)

#### NATIONAL (GOLD) DEMOCRATS.

The national democracy of Kentucky, in convention assembled, cordially approve the action taken last year resulting in the Indianapolis convention, the nomination of Palmer and Buckner and the complete reorganization and perpetuation of the democratic party, not only for that campaign, but for all time. We reaffirm as the pledge of the democratic party that when intrusted with federal power it will enact such tax laws as will produce sufficient revenue and framed for revenue only, levying necessary taxes only and impartially and without bounties, bonuses or favors; will reform the currency laws so as to maintain the standard of the world and furnish a sound, stable and sufficient currency of gold and silver, interchangeable with each other at equal commercial value; will regain, with suitable revenue and navigation laws, the supremacy of the seas; enforce a proper civil-service system; preserve the public order; maintain the public peace, and protect the rights, liberties and property of the citizens by such means as may be necessary at home and abroad. We denounce the free and unlimited coinage of silver as inevitably producing silver monometallism, and we advocate a gold standard and the coinage of silver to the requirements of commerce as offering the only means of maintaining bimetalism, and denounce any attempt to fix the ratio between the metals arbitrarily by law without reference to their commercial value as unsafe and dangerous to public welfare and private interests.

MASSACHUSETTS.

REPUBLICANS.

Twelve months ago a party, once great, put forward a platform of devastation and destruction.

Upon it, under new and strange leadership, stood candidates who violently advocated its purposes of disorder—disorder in our revenue, in our financial system, in the execution of law and the administration of justice.

To-day that mass of dream and delusion is spurned even by the Nebraska farmers, who voted for it and who now know the fallacy of the deadly parallel between wheat and the white metal. Calked with free silver heresies, that same platform floats an abandoned derelict upon a turbulent sea, sighted now and then from some volcanic rock by a Debs, an Altgeld, or, even as on yesterday, by somebody or other in our own state, but never again to enter the haven of American confidence, to threaten and alight.

To that creed of Bryanism and disorder the St. Louis platform stood opposed.

It won the fight in behalf of principle and national honor. But the republican party has done more than win; it has scrupulously kept and promptly performed its promises.

It has maintained the gold standard. It has given what the people wanted and believe in—a tariff to protect our labor and our industries, to furnish adequate revenue to our treasury—an American policy for the American people.

We see a republican president instituting an honest search for honest bimetalism, which an international agreement alone can effect; under severe pressure for peace, not merely maintaining, but wisely extending, the merit system in our civil service; declaring to other nations a policy dignified and firm without arrogance, patriotic always.

DEMOCRATS.

Whether it is judicious to abandon half of the money in the world is the supreme question. The demonetization of silver, begun in 1873, with little or no thought in Europe and America, has been a potent and increasing factor in the disastrous depression of the last twenty years, not uniform, but with ups and downs, each level being lower than the last. Gold has appreciated in purchasing power more than 3 per cent a year, demoralizing the producing classes with paralysis of trade through falling prices and causing cruel unemployment of labor and reduction of the wage fund. The destruction of silver money already in process will, if completed, have doubled the demand for gold, its price and its purchasing power, while all other prices will have suffered an enormous decrease, with the burden of debts doubled, debtors bankrupted and a vast share of the world's wealth transferred from debtors to creditors by the malignant magic of an appreciating standard of value.

The democratic party opposes the attempt to fasten on the country gold monometallism and demands the remonetization of silver at the ratio of 16 to 1. The demand for silver would be so enormous and the demand for gold so reduced that the two would meet and remain at parity and the paralyzing battle of the standards cease and the world would enter upon a period of assured prosperity.

Just now a shortage of the world's food crops, culminating in widespread and ghastly Asiatic famine, has raised prices for our

products. These abnormal conditions have largely eliminated the competition of silver using countries. But a recurrence of good crops will renew the fierce competition of these countries, which will again underbid the American farmer and reduce the world's prices of agricultural products. While republicans may place their reliance upon temporary distress abroad, democrats demand such just and broad basis of standard money as will maintain a stable standard of value and stable prices, with steady employment of labor and capital.

The greenbacks issued by the government have proved the country's best paper money, and should not be canceled. There can be no privilege more dangerous than the control of our currency supply by private bankers, and we stoutly oppose their attempt to strengthen such a monopoly by the substitution of bank notes for our national notes.

NATIONAL (GOLD) DEMOCRATS.

We adhere to and insist upon the maintenance of the present gold standard. We believe that the free coinage of silver at a ratio of 16 to 1, when the present commercial ratio is nearly 40 to 1, would be destructive to the interests of wage earners of depositors in savings banks, of the insured, of the veterans and of the whole people. We believe that the payment of debts, public or private, in dollars of less intrinsic value than those in which they were contracted is dishonorable and dishonest. Therefore, we reaffirm our allegiance to the great financial principle which guides Jefferson, Jackson and Cleveland—that it is the sole function of the federal government in monetary matters to provide a standard of value and to coin metallic money, ever dollar of which shall be of equal intrinsic value; that nothing but this coined money shall be legal tender and that the government shall not carry on a banking business.

We demand that some safe plan be adopted whereby our legal tender paper, silver and silver certificates shall be withdrawn and a banking system under proper control be established through which adequate banking facilities may be furnished to all sections of the country.

We believe that a currency based upon business assets and issued upon proper safeguards responds automatically to the necessities of commerce and permits the issue of an elastic medium of exchange in those sections where it is most needed for the creation of new enterprises and the employment of American labor.

MICHIGAN.

REPUBLICANS.

We reaffirm the principles laid down in the last national platform and we believe the triumph of republican principles will restore the country to that condition of prosperity which it has always enjoyed under republican supremacy.

DEMOCRATS.

The democracy of Michigan, in state convention assembled, declare our unalterable adherence and devotion to the principles of the democratic party as expressed in the Chicago platform of 1896. And we do further declare that the free and unlimited coinage of silver and gold at the ratio of 16 to 1 is the paramount issue and is essential to the restoration of general prosperity to the American people.

We are opposed to the retirement of the paper currency issued by the government

and the substitution thereof of paper currency issued by banking corporations. We believe that to invest the bank corporation with this power is highly detrimental to the business interests and industrial classes of the country.

#### UNION SILVER.

Resolved, That the first great struggle against the despotism of the money power has passed into history and, though defeated by a combination of forces, fraud and corruption unknown before in the political history of civilized government, the ranks of the advocates of the free coinage of gold and silver are still unbroken, and with the memory of our gallant leader, William Jennings Bryan, still fresh in the minds and hearts of more than six millions of freemen, who supported him loyally on Nov. 3 last, we pledge ourselves again to take up the conflict that must end in victory before the guaranties of the constitution—life, liberty and the pursuit of happiness—can be assured by the people; and, believing this, we, the union silver party of the state of Michigan, reaffirm our adherence to the great cause of bimetalism and dedicate ourselves anew to the struggle for the restoration of the free and unlimited coinage of silver and gold at the ratio of 16 to 1, to the end that the parity of the metals may be established without awaiting the consent of any other nation.

We declare ourselves as unalterably opposed to the proposed plan of the incoming administration to further control the circulating medium by the retirement of the greenbacks and the increase of the bonded debt, to the end that the power of the national banks may be increased by giving them practically the control of the national finances, believing that to the government alone belongs the power to issue all the money and that it shall be full legal tender in payment of all debts, public and private.

#### PEOPLE'S PARTY.

The people's party of the state of Michigan, in convention assembled, pride themselves as being the pioneers of the movement to establish the free and unlimited coinage of silver and a paper currency that shall be a full legal tender for all debts, dues and demands, wholly in the control of the people, without the intervention of banks of issue, and extends its congratulations to every man, regardless of past party affiliations, who on the 3d of November, 1896, cast his ballot for William J. Bryan and the above demand the most momentous ever presented to the American people. The battle on these lines has been fought and lost, but the issue remains, still strong, still worthy the suffrage of every true American in 1900.

The laboring man and the farmer who were inveigled into voting for McKinley through promises of restored confidence and a return of prosperity which have as yet failed to materialize will soon become convinced that the conduct of public affairs by William McKinley and the republican party will be but a repetition of Grover Cleveland's single gold standard, bond-issuing, trust-fostering, cuckoo administration that has destroyed all commodity values and the opportunities to labor.

#### NATIONAL (GOLD) DEMOCRATS.

We indorse the platform adopted at Indianapolis Sept. 3, 1896, as a clear and explicit statement of fiscal and economic truths and a masterly enunciation of democratic faith.

We believe the time has now come when a consistent, straightforward and deliberately planned monetary system should be inaugurated by this country, the fundamental basis of which should be:

That the gold standard which was definitely proclaimed at Indianapolis and indorsed by the people in November last be maintained.

That a banking system be provided which shall furnish credit facilities to every portion of the country and a safe and elastic circulation sufficient in amount to meet all demands of business and planned with a view of securing such a distribution of the loanable capital of the country as will tend to equalize the rates of interest in all parts thereof.

That such steps be taken as will insure the retirement of all classes of United States notes.

#### MARYLAND.

##### REPUBLICANS.

That the supreme duty of maintaining inviolate the national honor and credit renders it impracticable that Maryland at this juncture should elect to the United States senate an advocate and supporter of sound money and one whose past conduct is a guaranty of his future faithfulness.

That the action of the republican house of representatives, under the able leadership of Speaker Reed, in promptly seconding the efforts of President McKinley to secure a nonpartisan currency commission meets with our hearty approval.

##### DEMOCRATS.

The democracy of Maryland, in common with the democracy of the union, believe now, as they always have believed, in honest money, the gold and silver money of the constitution and the coinage of both metals without discrimination against either into standard dollars of final payment and redemption. We note with satisfaction that the demand of more than six and one-half millions of democratic voters expressed at the polls last November has compelled President McKinley and a republican congress to urge upon the European powers, through the medium of a duly appointed commission, the necessity of an international conference to arrange the terms of a bimetallic system under the operation of which both gold and silver shall be used and recognized as money of final redemption.

The sufferings of the masses, the honest toilers, the bone and sinew, the brain and courage and manhood of the land, have met with the sympathy of the democracy, and the protest of our great party, so eloquently voiced in last year's election, has forced the republican party, despite its arrogance and recklessness, to recognize the needs of an aroused and patriotic people. And, while many democrats have not approved all the expressions of their party in national convention, bimetalism will surely come. It may come through the instrumentalities set in motion by the present administration, though in truth inspired by the intrepid action of the democratic voters. But it will come, and the prosperity and happiness that follow in its train will be due to the courage, the undaunted fidelity and the intelligent patriotism of the democracy.

#### NEBRASKA.

##### REPUBLICANS.

No reference was made to the financial question in the platform.

DEMOCRATS.

The democracy of Nebraska, in convention assembled, renews its devotion to the principles of our party as taught by Thomas Jefferson and Andrew Jackson, and fully, exactly and clearly defined by the democratic convention of 1896 and indorsed at the polls by more than 6,000,000 voters of the United States. Re-enforced by a multitude of voters who were coerced and deluded in 1896, the patriots in 1900 will supplant the regime of trusts by the reign of the people.

We heartily indorse the platform adopted at Chicago last year by the democracy of the nation and reiterate the declaration therein made that the money question is the paramount question before the people. John G. Carlisle, in his speech of 1878, said the struggle now going on cannot cease and ought not to cease until all the industrial interests of the country are fully and finally emancipated from the heartless domination of the syndicates, stock exchanges and other combinations of money grabbers in this country and in Europe. We assert that the struggle described by Mr. Carlisle is more bitter to-day than it was in 1878, and that emancipation from the heartless combination of the syndicates, stock exchanges and other money combinations in this country and Europe is more imperative than ever before in the history of the nation.

We denounce the masked attempt of the administration to secure the retirement of the greenbacks under the pretense of currency reform, and we urge members and representatives in senate and house to use every effort to prevent the consummation of this scheme.

We congratulate the democracy of Nebraska on having furnished to the allied silver forces of the nation that great leader, William J. Bryan, who so fully met the responsibilities of the memorable campaign of 1896, and who, though defeated, is stronger to-day in the hearts of the American people than his victorious opponent. We indorse and commend his determination to continue the fight for bimetallism with unabated vigor, and we pledge to the cause our allegiance and devotion until the gold and silver coinage of the constitution shall be restored.

SILVER REPUBLICANS.

We, the silver republicans of Nebraska, assembled in our first state convention, declare:

First—Our loyalty to the money of the constitution as declared in that instrument, and as known, interpreted and understood by the people of the United States until silver was demonetized by fraud and corrupt means, in pursuance of a conspiracy of the designing money powers in this country and in England.

Second—That we are in favor of the free and unlimited coinage by the government of the United States of both gold and silver into legal tender money at the present legal ratio of 16 to 1, without waiting for the consent of any other nation; and we demand that all money, gold, silver and paper, shall be issued by the government of the United States, and that such money be a legal tender in payment of all debts, public and private. We denounce the gold standard republican party for its effort and purpose to retire the greenbacks and to confer upon the national banks the sole power and authority to issue all the paper money to be used as a circulating medium among the people.

PEOPLE'S INDEPENDENT PARTY.

The people's independent party of Nebraska reaffirm the principles of our national platform adopted at St. Louis. We stand upon every one of the grand truths therein enunciated and specifically reiterate our loyalty to the free coinage of silver at the ratio of 16 to 1.

We pledge the people that there shall be no faltering until private corporations are stripped of the privilege of issuing money and until all our currency, whether coin or paper, shall be issued by the government and shall be standard money of the United States.

We view with alarm the settled policy of the present national administration to retire our greenback currency and issue gold interest-bearing bonds in place thereof, and we denounce such a course as a change in the settled policy of our government and a betrayal of the interests of the people.

NATIONAL (GOLD) DEMOCRATS.

The platform indorses the Indianapolis platform and concludes as follows: "We congratulate the nation upon the rapid decline of the silver vagary and the disposition now manifest in a number of statesmen of the party which supported the Chicago platform to abandon the untenable position they took and oppose republicanism upon democratic rather than populist ground. This feeling we welcome as a step toward a reunion of all democrats without regard to former differences on the silver issue."

OHIO.

DEMOCRATS.

The democrats of Ohio, in convention assembled, reaffirm and indorse the declaration of principles contained in the platform adopted by the democratic party in national convention at Chicago in 1896, which platform declares the money question paramount to all others at this time, and is as follows:

We invite attention to the fact that the constitution names silver and gold together as the money metals of the United States and that the first coinage law passed by congress under the constitution made the silver dollar the money unit, and admitted gold to free coinage at a ratio based upon the silver dollar unit. We declare that the act of 1873 demonetizing silver without the knowledge or approval of the American people has resulted in the appreciation of gold and a corresponding fall in the prices of commodities produced by the people, a heavy increase in the burden of taxation and of all debts, public and private, the enrichment of the money-lending classes at home and abroad, the prostration of industry and impoverishment of the people.

We are unalterably opposed to monometallism, which has locked fast the prosperity of an industrial people in the paralysis of hard times. Gold monometallism is a British policy and its adoption has brought other nations into financial servitude to London. It is not only un-American but anti-American, and it can be fastened on the United States only by the stifling of that spirit and love of liberty which proclaimed our political independence in 1776 and won it in the war of the revolution.

We demand the free and unlimited coinage of both silver and gold at the present

ratio of 16 to 1, without waiting for the aid or consent of any other nation. We demand that the standard silver dollar shall be a full legal tender, equally with gold, for all debts, public and private, and we favor such legislation as will prevent for the future the demonetization of any kind of legal tender money by private contract.

#### PEOPLE'S PARTY.

We reaffirm our adherence to the principles of the people's party as enunciated in the Omaha and St. Louis platforms—viz.:

Public ownership of railways and telegraphs; postal banks; government by law and not by injunction; the issuance of money to be by the federal government exclusively; silver to be coined into money on an equality with gold and at the legal ratio of 16 to 1, supplemented with treasury notes, and all money to bear the stamp of the government to be full legal tender.

#### NATIONAL (GOLD) DEMOCRATS.

We, the representatives of the national democratic party of Ohio, in state convention assembled, reaffirm allegiance to the principles of the party as set forth in the platform adopted at Indianapolis in 1896. Criticism and attack of that platform have vindicated its strength and wisdom.

We declare for the maintenance of the gold standard, for the retirement of the greenback and for the extension of the civil-service merit system wherever possible in the nation and in this state.

#### LIBERTY PARTY.

Pledges itself to "the reform of our present financial system by the free coinage of silver and gold at the present ratio of 16 to 1 as the first step and the ultimate adoption of a system of full legal tender paper money, issued through government banks on equal terms to all, the supply being regulated by the demand and the ability to furnish adequate security."

#### PENNSYLVANIA.

##### REPUBLICANS.

"Dollar wheat" has sounded the death knell of the "free coinage" heresy. In the late presidential campaign the strongest bid made for the agricultural vote by the democratic party was the promise that their success in that election would raise the market price of wheat to \$1 a bushel—payable in silver. They were overwhelmingly defeated at the polls and the farmer now receives for his wheat \$1 a bushel—payable in gold. The dollar he thus receives will buy in the market \$2.35 worth of silver, as measured by

the coinage value of that metal. We pledge ourselves anew to the republican doctrine of sound money and an honest dollar.

##### DEMOCRATS.

We, the democracy of Pennsylvania, in convention assembled, heartily reaffirm and reiterate the principles of the democratic party as expressed in the platform adopted by the national convention at Chicago in 1896 and approved by 6,500,000 free and independent voters. We are firmly and unalterably opposed to the single gold standard, which has been the direct cause of the financial distress that has followed upon our people since its adoption, and we are in favor of a complete and immediate return to our original specie basis as it existed prior to the demonetization act of 1873. We congratulate William J. Bryan, the glorious champion of a righteous cause, for his masterly leadership in support of these principles.

#### VIRGINIA.

##### DEMOCRATS.

We reaffirm the platform of the democratic convention adopted at Chicago in July, 1896. We especially indorse the doctrines of the democratic party upon the four great issues which are before the people of this country—viz.: The tariff, the income tax and regulating of trusts and currency. We denounce the tariff bill recently passed by the republican congress as dictated by trusts and monopolies and in the interest of the classes that live upon the favoritism of the government and not upon the fair and just earnings of industry.

We favor an income tax for the support of the federal government that industry may be the less burdened and that wealth may bear its proper share of the general public burden, and, if necessary, we favor a constitutional amendment that such taxes may be levied. Upon the subject of the currency we declare ourselves unalterably opposed to the British system of monometallism, which has aggrandized that empire at the expense of the nations producing food supplies and raw materials, and its adoption has only aggravated our financial servitude to London. We demand the free and unlimited coinage of both gold and silver at the ratio of 16 to 1, without waiting for the aid or consent of any nation. We demand the repeal of the 10 per cent tax on the issues of state banks, which pays not a dollar into the treasury of the United States and which remains upon the statute books as a monument of arbitrary and perverse legislation, inspired by monopoly and conceived in distrust of the people.

### THE TARIFF.

[Where parties are omitted no declaration was made.]

#### COLORADO.

##### REPUBLICANS.

We are emphatically in favor of the protection of American labor and American industries and we exhibit in justification of our faith the wonderful impetus given to every department of business life by the passage of that great republican measure, the Dingley bill, which will raise revenue sufficient to support the government, prevent the issue of interest-bearing bonds, protect American labor and maintain the national credit.

#### IOWA.

##### PEOPLE'S PARTY.

We declare the methods resorted to by the leaders of the republican party in the late national campaign have justly alarmed the entire country. Their flagrant acts of bribery, intimidation, colonization and deception overwaded, and were intended to overawe, the electorate and thus prevent a free and honest expression of public opinion. We affirm this to be a direct attack upon popular government and a declaration of war against free institutions. If submitted

to without rebuke the presidential office will be permanently under the domination of money and of the corrupt influences which money controls.

The purpose of the high-handed and criminal methods is evident from the results following their success. The trusts, the combines, the syndicates, the corporations all united to make the government an agency for the promotion of their special interests and welfare. They contributed millions upon millions to Mark Hanna's campaign fund, and having triumphed by the corrupt use of these vast sums they are now about to recoup themselves from the pockets of the people. The notorious, almost avowed, purpose of the tariff bill now under consideration in the senate is to repay the trusts and the mine, the mill and the factory barons for their pecuniary aid to McKinley.

#### NATIONAL (GOLD) DEMOCRATS.

We denounce the Dingley tariff bill soon to be enacted into law by a republican congress. Under the pretense of increasing revenue it is the old republican policy of protection to the few at the expense of the many. It tends to create and foster trusts and monopolies and we recognise in it the fulfillment of promised reward to those who supplied the party treasury. We renew our allegiance to the historic democratic doctrine of a tariff for revenue only.

#### KENTUCKY. REPUBLICANS.

We commend the action of the representatives of the republican party in the passage of a tariff bill which will raise revenue sufficient to support the government, prevent the issue of interest-bearing bonds, protect American labor and maintain the national credit.

#### MASSACHUSETTS. REPUBLICANS.

See financial declaration.

#### DEMOCRATS.

The tariff bill on its report from the conference committee was forced through without opportunity for examination. As a result of this suppression of the rights of the people's representatives one section embodying a 10 per cent discriminating duty, which threatened the business interests of New England, was passed without the knowledge of a single member of the Massachusetts delegation in the house. The clandestine insertion of this clause shows how tariffs are made.

#### MICHIGAN.

#### NATIONAL (GOLD) DEMOCRATS.

We believe that further legislation to protect American manufacturers is unnecessary and vicious. The exports of manufactures increased from \$150,000,000 in 1892 to \$250,000,000 in 1896 the largest in our history. And the balance of trade for that year, \$25,000,000 in our favor, is also the highest yet reached. Owing to the intelligence of our workmen and our improved facilities and natural advantages we can successfully compete with any foreign nation in any market of the world.

We denounce the assumption of certain republican politicians that at the last election the people declared in favor of higher tariffs as entirely opposed to the truth.

And we charge that further so-called protective legislation can only result in benefits of the few at the expense of the many and

will delay a return to stable finance and consequent prosperity.

The present cost of government in this country is extravagant and wasteful. And we believe that the extravagance in expenditure is a legitimate result of excessive taxation under the guise of protection. It is not increased revenue but decreased expenditures that the times demand.

We denounce protection as the fruitful parent of populism and declare that each is alike destructive of that individual and political integrity upon which our welfare and happiness depend. We demand a return to that equitable system of taxation authorized by the constitution, a tariff for revenue only.

#### MARYLAND. DEMOCRATS.

The democratic party, in the interest of the whole people, will continue to wage war against the iniquities of this act and will insist upon a tariff for revenue sufficient for the needs of the government, economically administered, and will always maintain that unnecessary taxation is unjust taxation.

Thus, in a time of widespread industrial depression, when the agricultural classes are confronted by poverty in its direst form and when the toilers in the mines and factories find themselves forced into despair and suffering, the republican party not only fails to keep the solemn promises of 1896, but actually mocks the taxpayers by an extravagance of expenditure and prodigality of appropriation which that party, even in the carnival that raged from 1868 to 1876, never dreamed of rivaling.

#### NEBRASKA. REPUBLICANS.

We commend the tariff legislation enacted in a special session of congress at the instance of President McKinley as the most effective measure for vitalizing the patriotic principle of protection to American industries, through which American manufacturers are enabled to compete successfully with the imported product of foreign labor. American workmen are afforded an opportunity to secure employment at remunerative wages and American farmers secure the benefit of a market through increased home consumption.

#### DEMOCRATS.

We commend the action of the democrats of the senate and the house in resisting the efforts of the republicans to pay back to the trusts and combines through the Dingley bill their enormous contributions to the republican campaign of last year, and although such resistance was unavailing we are confident that an experience under the new law will prove that the producers of wealth need more money with which to pay present taxes rather than an increase of the burdens which they now bear.

#### SILVER REPUBLICANS.

We denounce the present tariff law as being inspired by and enacted in the interest of trusts in payment of contributions by them to the republican campaign fund in the late presidential election, as placing an artificial price on imports, unnecessary to the support of the government and unjustly oppressive and burdensome to the people.

#### PEOPLE'S INDEPENDENT PARTY.

We are thankful to Providence rather than to any man for the measure of prosperity with which our state has been blessed an

we attribute the rise in the price of wheat to the foreign scarcity rather than suppose it to be the result of dear sugar or an increased tariff on straw.

### OHIO.

#### REPUBLICANS.

Faithfully wedded to the principle of protection, we demand for the wool growers of Ohio such ample protection for wool as shall speedily increase American flocks sufficiently to supply all American needs.

#### NATIONAL (GOLD) DEMOCRATS.

We denounce the recent tariff legislation as encouragement of extravagance and infringement of private rights, an unfair tax on all for the benefit of some of the people and an arbitrary interference by legislation with the natural laws of trade.

We denounce in the Dingley bill the heavier duties on lumber, wool and hides as in-

creasing the cost of clothing and shelter to the people.

### PENNSYLVANIA. REPUBLICANS.

The republicans of Pennsylvania ratify and reaffirm the doctrines enunciated in the national platform adopted at St. Louis in 1884 and approved by the people at the last presidential election.

We rejoice with the people of the nation upon the passage of the Dingley tariff bill. Its enactment redeems the pledges made by the republican party to our prostrate manufacturing, commercial and business interests and holds out to them the bright promise of prosperity and material development, such as ever attended upon legislation designed for the protection of home industries and the preservation of home markets. Already the hum of reviving industry is heard throughout the land and the business interests are responding eagerly to the encouraging influence of this legislation.

### MISCELLANEOUS.

### COLORADO.

#### REPUBLICANS.

We are unalterably opposed to a system of civil service that builds up an official class, especially in life tenure, in almost all branches of the public service, and condemn a law as un-American which permitted the Cleveland administration, in the name of civil-service reform, to displace 40,000 republicans with partisan democrats, and then by presidential proclamation guaranteeing them their official position for the remainder of their lives. We approve the sentiments of Gen. Washington as expressed to his secretary of war when he declared:

"I shall not, while I have the honor to administer the government, bring a man into any office of consequence, knowingly, whose political tenets are adverse to the measures which the general government are pursuing; for this, in my opinion, would be a sort of political suicide. That it would embarrass its movements is most certain."

#### DEMOCRATS.

We reaffirm our allegiance to the great essential principles of justice and liberty—freedom of speech, liberty of the press and the preservation of personal rights; and we denounce the assumption of authority of judges to inflict summary and arbitrary punishment by fine and imprisonment, without trial by jury, or right of appeal, for alleged contempt in the use of language, or by acts not in the presence of the court, or in interference with its process, as a crime against free institutions; and we demand that the power of the court to punish for contempt be restricted by proper legislation.

We extend our sympathy to the striking miners of other states now engaged in the struggle to secure for their labor a compensation sufficient to procure for them and their families the necessities of life; we condemn the efforts of organized capital to further reduce wages and fasten upon a large and worthy class of American citizens still heavier chains of industrial slavery.

#### PEOPLE'S PARTY.

We denounce the federal judiciary in arrogating to itself by the illegal use of the writ of injunction the legislative functions of government. This abuse of power is a violation of the constitution of the United

States; it denies the assurance of life, liberty and the pursuit of happiness and it is a menace to our rights under state sovereignty.

### KENTUCKY.

#### REPUBLICANS.

We are opposed to a system of civil service that builds up an official class with practically a life tenure in almost all branches of the public service, and we demand that the civil-service law be modified so as to limit the term of service to four years, with the privilege of reappointment or promotion subject to such restrictions as will secure competent officials and to every section of the country its proper proportion of them.

We heartily sympathize with the struggling people of Cuba in their efforts to secure liberty and independence.

#### DEMOCRATS.

The sympathies of the American people are always enlisted in behalf of those who are battling for liberty and independence, and the heroic struggle of the people of Cuba is no exception to this rule. The appalling atrocities committed in the war now being waged on that island merit the execration of all civilized people, and we demand that the American government, while observing every treaty obligation, shall take such proper and effective action as will ameliorate the atrocities now being committed and fully protect every American citizen in his life and property.

### MASSACHUSETTS.

#### REPUBLICANS.

They would secure a safe and high citizenship, and they therefore urge that the laws of naturalization and immigration be so improved that our gates shall be promptly and tightly closed against all who are too ignorant to understand or too vicious to appreciate our institutions and laws.

#### DEMOCRATS.

On "government by injunction" the platform declares: The country has seen with indignation the logical result of this judicial tyranny, when after an unequal struggle lasting nine weeks, conducted with remarkable self-control and long suffering by thousands of starving miners appealing in a

free land for a living wage, men unarmed and in peaceable procession are shot down on the public highway. Let the people remember this massacre at Lattimer and resolve that government by injunction shall not be tolerated and that American liberty shall not perish.

#### MICHIGAN.

##### NATIONAL (GOLD) DEMOCRATS.

We demand the enactment in this state of a civil-service law making character and ability the sole tests of fitness for appointive places in the public service. The great improvement in the federal civil service since this principle has been applied thereto, especially during the present administration, is cause for congratulation to all good citizens, and the time has come when the reform should be extended to all branches of state and municipal administration.

#### NEBRASKA.

##### SILVER REPUBLICANS.

We denounce the present administration for its inattention to the interests of the struggling patriots of Cuba, who are sacrificing their lives, their families and their property in the interest of liberty at the very door of our republic.

We are opposed to the proposed annexation to the United States of the Hawaiian Islands, or any other territory, as un-American in principle and in violation of the wise policy pursued by this republic from its foundation.

##### DEMOCRATS.

We renew the expression of sympathy with the people of Cuba made in the last national platform of the democratic party, and we cite the delay of the republican administration in effecting any settlement of the affairs of that unhappy island as equivalent to a declaration that not only our domestic finances but our foreign policy also shall be dictated by the leading commercial nations of the world.

##### PEOPLE'S INDEPENDENT PARTY.

We are unalterably and unequivocally in favor of the recognition of the independence of the Cuban republic and we condemn the republican party for having failed to carry out the specific pledge of their national platform on this question.

#### OHIO.

##### REPUBLICANS.

The republican party has always been the friend of the downtrodden and oppressed, and has always deeply sympathized with the struggle of any people for independence. We extend our sympathy to the patriots of Cuba in their efforts to achieve freedom from Spanish cruelty and oppression and hope that the day of their deliverance is near at hand. We commend the course of the president and express our confidence in his speedy and patriotic disposition of the Cuban question in accordance with wise statesmanship and a firm and vigorous foreign policy.

We believe that the administration in negotiating the treaty for the annexation of Hawaii has acted wisely and we express the hope that the senate will ratify the same.

##### DEMOCRATS.

We demand the immediate recognition of the belligerent rights of the republic of Cuba as an act of justice to an American nation struggling for liberty against foreign oppression, and we denounce and protest against the action of Senator Hanna in voting to nullify the memorial presented to congress unanimously by the legislature of Ohio in favor of the Cuban patriots.

##### PEOPLE'S PARTY.

We extend our sympathy to the struggling patriots of Cuba in the efforts to cast off the yoke of slavery placed upon their necks by the Spanish government, and we hope and trust that they may succeed in their contest for liberty, and we denounce the present and past administrations of the United States for failing to recognize the belligerency of the Cuban patriots.

##### NATIONAL (GOLD) DEMOCRATS.

We condemn the proposed annexation of the Hawaiian Islands, as introducing into our union a large Asiatic and tropical population utterly unfit for American citizenship, as the beginning of a policy of territorial expansion certain to entail upon our country large taxation to sustain strong armies and navies in distant lands and on distant seas, and as constituting a menace to peaceful industry by exposing our country to foreign wars.

### IMPORTANT LEGISLATION--SECOND SESSION LIVTH CONGRESS.

Among the most important measures passed at the second session of the LIVth congress was the monetary conference bill, which will be found in full in the article entitled "International Bimetallism" in another part of this work.

#### LIMITING THE DEATH PENALTY.

The act approved Jan. 15, 1897, provides that in all cases where the accused is found guilty of the crime of murder or of rape under sections 5339 or 5345, revised statutes, the jury may qualify their verdict by adding thereto "without capital punishment," and whenever the jury shall return a verdict qualified as aforesaid the person convicted shall be sentenced to imprisonment at hard labor for life.

That except offenses mentioned in sections 5333, 1242, 1624, 5339 and 5345, revised statutes, when a person is convicted of any offense to which the punishment of death is now specifically affixed by the laws of

the United States, he shall be sentenced to imprisonment at hard labor for life, and when any person is convicted of an offense to which the punishment of death, or a lesser punishment, in the discretion of the court, is affixed, the maximum punishment shall be imprisonment at hard labor for life.

#### IMPURE TEA BILL.

The act approved March 2, 1897, prohibiting the importation of impure or unwholesome tea, provided that from and after May 1, 1897, it shall be unlawful for any person or persons or corporation to import or bring into the United States any merchandise as tea which is inferior in purity, quality and fitness for consumption to the standards provided in section 3 of this act, and the importation of all such merchandise is hereby prohibited.

That immediately after the passage of

this act, and on or before Feb. 15 of each year thereafter, the secretary of the treasury shall appoint a board, to consist of seven members, each of whom shall be an expert in tea, and who shall prepare and submit to him standard samples of tea; that the persons so appointed shall be at all times subject to removal by the said secretary, and shall serve for the term of one year.

That the secretary of the treasury, upon the recommendation of the said board, shall fix and establish uniform standards of purity, quality and fitness for consumption of all kinds of teas imported into the United States, and shall procure and deposit in the customhouses of the ports of New York, Chicago, San Francisco and such other ports as he may determine, duplicate samples of such standards; that said secretary shall procure a sufficient number of other duplicate samples of such standards to supply the importers and dealers in tea, at all ports desiring the same at cost. All teas, or merchandise described as tea, of inferior purity, quality and fitness for consumption to such standards shall be deemed within the prohibition of the first section hereof.

#### ALIEN OWNERSHIP OF LAND.

An act was approved March 2, 1887, limiting the right of aliens to hold land in the territories of the United States. It provided:

That no alien or person who is not a citizen of the United States, or who has not declared his intention to become a citizen of the United States in the manner provided by law, shall acquire title to or own any land in any of the territories of the United States except as hereinafter provided: Provided, that the prohibition of this section shall not apply to cases in which the right to hold or dispose of lands in the United States is secured by existing treaties to citizens or subjects of foreign countries, which rights, so far as they may exist by force of any such treaty, shall continue to exist so long as such treaties are in force, and no longer.

That this act shall not apply to land now owned in any of the territories of the United States by aliens, which was acquired on or before March 3, 1887, so long as it is held by the then owners, their heirs or legal representatives, nor to any alien who shall become a bona fide resident of the United States, and any alien who shall become a bona fide resident of the United States, or shall have declared his intention to become a citizen of the United States in the manner provided by law, shall have the right to acquire and hold lands in either of the territories of the United States upon the same terms as citizens of the United States: Provided, that if any such resident alien shall cease to be a bona fide resident of the United States then such alien shall have ten years from the time he ceases to be such bona fide resident in which to alienate such lands. This act shall not be construed to prevent any persons not citizens of the United States from acquiring or holding lots or parcels of lands in any incorporated or platted city, town, or village, or in any mine or mining claim, in any of the territories of the United States.

That this act shall not prevent aliens from acquiring lands or any interests therein by inheritance or in the ordinary course of justice in the collection of debts, nor from acquiring liens on real estate or any interest therein, nor from lending

money and securing the same upon real estate or any interest therein, nor from enforcing any such lien, nor from acquiring and holding title to such real estate, or any interest therein, upon which a lien may have heretofore or may hereafter be fixed, or upon which a loan of money may have been heretofore or hereafter may be made and secured: Provided, however, that all lands so acquired shall be sold within ten years after title shall be perfected in him under said sale or the same shall escheat to the United States and be forfeited as hereinafter provided.

#### OBSCENE LITERATURE.

An act approved Feb. 8, 1897, provides that it shall be unlawful for any person to deposit with any express company or other common carrier for carriage from one state or territory of the United States or the District of Columbia to any other state or territory of the United States or the District of Columbia any obscene, lewd, or lascivious book, pamphlet, picture, paper, letter, writing, print or other matter of indecent character, or any article or thing designed or intended for the prevention of conception or procuring of abortion, or any written or printed card, letter, circular, book, pamphlet advertisement or notice of any kind giving information, directly or indirectly, where, how or of whom or by what means any of the hereinbefore mentioned articles, matters or things may be obtained or made; and any person who shall knowingly deposit or cause to be deposited with any express company or other common carrier for carriage from one state or territory of the United States or the District of Columbia to any other state or territory of the United States or the District of Columbia, or who shall take from such express company or other common carrier with intent to sell, distribute or circulate any matter or thing herein forbidden to be deposited for carriage, shall for each offense, upon conviction thereof, be fined not more than \$5,000 or imprisoned at hard labor not more than five years, or both, at the discretion of the court.

#### SALE OF LIQUOR TO INDIANS.

An act was approved Jan. 30, 1897, providing that any person who shall sell, give away, dispose of, exchange or barter any malt, spirituous or vinous liquor, including beer, ale and wine, or any ardent or other intoxicating liquor of any kind whatsoever, or any essence, extract, bitters, preparation, compound, composition or any article whatsoever, under any name, label or brand, which produces intoxication, to any Indian to whom allotment of land has been made while the title to the same shall be held in trust by the government, or to any Indian a ward of the government under charge of any Indian superintendent or agent, or any Indian, including mixed bloods, over whom the government, through its departments, exercises guardianship, and any person who shall introduce or attempt to introduce or sell spirituous or vinous liquor, including beer, ale and wine, or any ardent or intoxicating liquor of any kind whatsoever into the Indian country, which term shall include any Indian allotment while the title to the same shall be held in trust by the government, or while the same shall remain inalienable by the allottee without the consent of the United States, shall be punished by imprisonment for not less than sixty days, and by a fine of not less than

\$100 for the first offense and not less than \$200 for each offense thereafter.

#### PATENTING PETROLEUM LANDS.

The president signed an act April 12, 1897, which provided that any person authorized to enter lands under the mining laws of the United States may enter and obtain patent to lands containing petroleum or other mineral oils, and chiefly valuable therefor, under the provisions of the laws relating to placer mineral claims: Provided, that lands containing such petroleum or other mineral oils which have heretofore been filed upon, claimed or improved as mineral, but not yet patented, may be held and patented under the provisions of this act the same as if such filing, claim or improvement were subsequent to the date of the passage hereof.

#### FIRES ON PUBLIC LANDS.

Feb. 24, 1897, the president approved an act which provided that any person who shall willfully or maliciously set on fire, or cause to be set on fire, any timber, under-

brush or grass upon the public domain, or shall carelessly or negligently leave or suffer fire to burn unattended near any timber or other inflammable material, shall be deemed guilty of a misdemeanor, and upon conviction thereof in any district court of the United States having jurisdiction of the same, shall be fined in a sum not more than \$5,000 or be imprisoned for a term of not more than two years, or both.

That any person who shall build a camp fire, or other fire, in or near any forest, timber or other inflammable material upon the public domain shall, before breaking camp or leaving said fire, totally extinguish the same. Any person failing to do so shall be deemed guilty of a misdemeanor, and, upon conviction thereof in any district court of the United States having jurisdiction of the same, shall be fined in a sum not more than \$1,000 or be imprisoned for a term of not more than one year, or both.

That in all cases arising under this act the fines collected shall be paid into the public school fund of the county in which the lands where the offense was committed are situate.

### EXTRA SESSION LVTH CONGRESS.

Congress did little in the way of general legislation further than the passage of the tariff bill, which is elsewhere discussed in this volume.

#### RESOLUTIONS GRANTING RELIEF.

April 7, 1897, the president approved two joint resolutions. The first provided that the sum of \$200,000 is hereby appropriated out of any money in the treasury not otherwise appropriated, to be expended by and under the direction of the secretary of war in the purchase and distribution of subsistence stores to such destitute persons as may require assistance in the district overflowed by the Mississippi river and its tributaries and by the Red River of the North, by the recent floods.

The second provided that the secretary of the navy be, and he is hereby, authorized to employ and place at the disposal of the collector of the port of New York any ship or vessel belonging to the navy of the United States best adapted for such service for the purpose of transporting to the famishing poor of India such contributions as may be made for their relief, or to charter and employ under the authority of the United States a suitable American steamship or vessel, with a cargo capacity of

2,000 to 4,000 tons, for the same purpose. Any sum of money which may be necessary to carry out the object of this resolution is hereby appropriated out of any money in the treasury not otherwise appropriated.

#### SECTARIAN INDIAN SCHOOLS.

The Indian appropriation bill, approved June 7, 1897, provided in regard to Indian schools as follows:

"And it is hereby declared to be the settled policy of the government to hereafter make no appropriation whatever for education in any sectarian school: Provided, that the secretary of the interior may make contracts with contract schools apportioning as near as may be the amount so contracted for among schools of various denominations for the education of Indian pupils during the fiscal year 1898, but shall only make such contracts at places where nonsectarian schools cannot be provided for such Indian children and to an amount not exceeding 40 per centum of the amount so used for the fiscal year 1896: Provided, further, that the foregoing shall not apply to public schools of any state, territory, county, or city, or to schools herein or hereafter specifically provided for."

### WHITE PINE TIMBER SUPPLY.

In response to a resolution of the senate passed April 14, 1897, the forestry division of the department of agriculture made a report as to the consumption and supply of white pine timber in the United States, from which the following statements are taken:

#### CONSUMPTION.

From the statistics of the cut since 1872, compiled by the Northwestern Lumberman,

it appears that since that year the stupendous amount of 154 billion feet, B. M., and 83 billion shingles, or altogether in round numbers 165 billion feet of white pine, has been cut in the states of Michigan, Wisconsin and Minnesota; and this total may be readily increased, by allowing for cuts in other parts of the country, to over 200 billion feet, B. M., which this single species has yielded to build up our civilization in the last eighteen years—an amount

to produce which continuously at least 20,000,000 acres of well-stocked and well-kept pine forest would be required.

Divided for convenience and comparison into six-year periods, the cut in the northwest appears to have been as follows, according to the source cited:

### MICHIGAN, WISCONSIN AND MINNESOTA.

(In billion feet, B. M., round numbers.)

	1873-78.	1879-84.	1885-90.	1891-96.
Lumber.....	23	40	48	44
Shingles (1,000-100 ft., B. M.).....	2	3	3	2
	25	43	51	46

A total of 165 billion feet, B. M.

From 1873, when the cut was about 4 billion feet, the draft on this resource was constantly increased until 1892, when it reached its maximum, nearly 9 billion feet, B. M., and 4½ billion shingles. Then a gradual decline began to 7.6 billion feet in 1893, 6½ billion feet in 1894, rising once more to over 7 billion in 1895, and reaching the lowest output in 1896, with 6½ billion feet; shingle production declining similarly to 1½ billion, which, translated into board measure, raises the requirements for that year to little less than 7½ billion feet. This decline does not necessarily indicate any giving out of the supply, but might have been due, and probably was due, to business depression generally and to the competition of other kinds of lumber and shingles.

The total output of white pine in 1890, before the maximum was reached and when the cut of the northwest was recorded for lumber and shingles as a little over 9 billion feet, was placed by the competent agent of the eleventh census in charge of the statistics of lumber manufacture at 11.3 billion feet of white pine and Norway pine, or about 25 per cent as coming from other regions, while hemlock, spruce and fir were estimated as furnishing 7.9 billion feet, so that our requirements of these classes of timber may for ordinary years be placed in round numbers at 20 billion feet.

In discussing the question of duration of supplies it can, as stated before, be reasonably done only by considering at the same time all supplies of a similar nature—namely, of the white pine, Norway pine, spruce and hemlock at least, which can be and are used more or less interchangeably, and will be still more so in the future, to meet our immense requirements for this class of material. That these requirements are not to remain stationary, but have a tendency to increase, may be seen from the development of the wood-pulp industry.

While in 1881 the daily capacity of wood-pulp mills was less than 750,000 pounds, it had more than doubled in 1887, and then increased steadily, doubling almost every three or four years, as follows:

	Pounds.
1887.....	1,687,900
1888.....	2,153,500
1889.....	3,474,100
1890.....	4,012,200
1891.....	4,497,300
1892.....	5,136,300
1893.....	6,495,400
1894.....	7,231,900
1896.....	9,027,000

This last figure may be conservatively estimated to correspond to an annual consumption of probably 800,000,000 feet, B. M., of material.

There was imported from 1891 to 1896 wood pulp to the value of \$10,337,659, as follows:

1891.....	\$1,902,689	1896.....	984,692
1892.....	1,820,143	1896.....	1,056,704
1893.....	2,908,884		
1894.....	1,664,547	Total...	\$10,337,659

### SUPPLIES.

While the above figure of 20 billion feet, B. M., gives a fair idea as to average consumption, which may vary perhaps by 10 per cent one way or the other, we are much less certain as to supplies standing.

For Minnesota the chief fire warden of the state has attempted a canvass, the result of which would indicate nearly 18 billion feet as standing in the state, including Norway pine, the estimate having been made for 1895. This has been criticised by competent judges as much too high; nevertheless, adding the estimates of all other kinds of coniferous wood, some of which as yet remains unused, it is thought that a statement in round numbers of 20 billion feet of coniferous wood in Minnesota fit for lumbering, though large, would be reasonably enough near the truth for our purposes in forecasting the probabilities.

For Wisconsin official data are entirely lacking; an estimate of 10 billion as the maximum stand of white pine and Norway pine has been made by a competent lumberman. As there is considerable hemlock and other coniferous wood in the state, and as it is preferable to overstate, we may treble this amount and take 30 billion feet, a probable overstatement of 50 per cent, as the maximum amount of coniferous timber fit for lumbering standing in the state.

For Michigan a canvass from township to township has been made by the commissioner of labor of the state for 1896, which develops an area of 2½ million acres in pine and hemlock. If the average stand per acre, which the census of 1890 showed as 6,000 feet for white pine, is applied to the whole area, the amount of timber standing would be 15 billion feet, which for safety we may increase by 20 per cent, or, say, 18 billion feet, of which 6 billion would be white pine. This, too, is supposed to overstate the conditions by 50 per cent.

For Pennsylvania the partial returns of the commissioner of forestry would make an estimate of 10 billion feet of pine and hemlock appear highly extravagant. In a private communication he estimates the standing timber of white pine at 500 million, of spruce at 70 million and of hemlock at 5,000 million feet, B. M.

For New York, without much basis, 5 billion may be allowed as an extravagant figure, with a cut of not less than 500 million feet; another 3 billion for New Hampshire; and, with a closer estimate, based on figures given by the forest commissioner of Maine, that state may be given at best not to exceed 10 billion feet of spruce, pine and hemlock.

In Maine the white pine is long since reduced to a small proportion of the coniferous wood standing. The spruce country is confined to the elevated northern half of the state, north of a line from the White mountains to Mars hill, with a spruce-bearing area of probably less than 6,000 square miles. The stand on the two main spruce-

producing drainage basins, the Kennebec and Androscoggin, has been estimated at round 5,000 million feet, B. M., with a present cut of round 350 million feet. Partial statistics of the cut would indicate a total cut of coniferous woods in Maine of not far from 500 million feet in 1895 and preceding years.

In all these estimates of standing timber the writer of the report has leaned toward extravagance rather than understatement, and thus the total is found to add up 160 billion feet of coniferous growth in the northern states, of which less than half is pine, to satisfy a cut of at least 18 to 20 billion feet per annum.

The writer of the report does not say that in less than six years every stick of pine, spruce and hemlock will be cut, for such figures as these do not admit of mathematical deductions; but the gravity of the question of supply is certainly apparent. Even doubling the estimates it is found that, with the present rate and method of cutting, ten years will have exhausted our virgin timber of these classes. We should add that much more intimate knowledge exists now regarding these supplies than was possible in 1880, when much of the country was still unopened and unknown.

The southern pines, to be sure, will enter more largely into competition, as will also the cypress and other coniferous woods of the south.

The entire region within which pines occur in the south in merchantable condition comprises about 230,000 square miles, or in round numbers 147 million acres; for land in farms, 10 million acres must be deducted, and allowing us such as two-thirds of the remainder as representing pine lands (the other to hard woods), we would have about 30 million acres on which pine may occur. An average growth of 3,000 feet per acre—an extravagant figure when referred to such an area—would make the possible stand 270 billion feet, provided it was in virgin condition and not largely cut out or culled. Altogether, the conclusion has been reached that, adding all other coniferous wood in the south, an estimate of 300 billion feet would be extravagant, which, added to the northern supply of coniferous wood, gives a total supply of 460 billion feet to draw from in the eastern United States; and as the entire cut of these classes of wood appears now to be not less than 25 billion feet a year, and probably is nearer 30 billion. It may be stated with some degree of certainty that not fifteen to twenty years' supply of coniferous timber can be on hand in the eastern states.

In 1880 the writer of the report ventured a statement that there were 600 billion feet of coniferous growth in the eastern states; the cut was then estimated at 12 billion feet. If an average cut of 20 billion for the last ten years be allowed, which is reasonable, the present estimate of 460 billion standing would lend color to the approximate correctness of these figures.

If the inquiry is extended to the coniferous growth of the Pacific coast, which in spite of the distance must finally come to our aid, only partial comfort will be found. The present estimate of 1,000 billion feet standing has been by competent judges declared extravagant. The annual cut on the Pacific coast approaches certainly 4 billion feet, hence, adding these figures to those obtained for the east, with 1,400 billion feet standing at best, and a cut of at least 30

billion feet per annum, there would appear to be, under most favorable contingencies, not more than forty to fifty years of this most necessary part of our wood supply in sight if the same lavishness in the use of it is continued.

To be sure, there is some new growth and reproduction going on. The probability as to the former is that decay and destruction by fire offset the accretion on the old timber of coniferous growth, and no one familiar with our forest conditions and present methods will indulge in a hope that the reproduction and young growth can materially change the results. Long before any new reproduction can have attained log size we will have got rid of the virgin supplies.

### ECONOMY.

There is, then, only the possible alternative of supplying ourselves from other countries, or of curtailing our cut. In this latter regard the possibility is large. Not only can a much closer utilization of the standing timber be practiced, but a more economical use of the same is reasonably to be expected.

As will appear from the figures given, this country consumes of coniferous wood somewhat over 400 feet, B. M., per capita, while England, which probably has the lowest per capita consumption of wood among civilized nations, being almost entirely dependent upon importation, is able to get along with one-third that amount, and Germany's consumption remains below 150 feet, B. M., per capita of all kinds of sizable wood. The margin within which, therefore, we can curtail our requirement is large enough to lengthen out our supplies considerably.

### CANADIAN SUPPLIES.

As to importations, there is practically only one country from which such timber can be obtained—Canada.

The statistician of the department of agriculture of the Dominion of Canada in 1895 estimated the white pine standing at 37.3 billion feet, with an annual cut of nearly 2 billion feet, including spars, masts, shingles, etc., which, as will readily be seen, cannot materially change the position stated before—namely, that the next decade must witness the practical exhaustion of this greatest lumber staple. Even allowing 10 billion feet of merchantable space which may be found in New Brunswick and Nova Scotia, such allowance cannot appreciably retard this exhaustion, since the total annual cut of Canadian coniferous wood exceeds 5 billion feet. Fifty per cent may be readily added to the estimates of standing timber in eastern Canada, thus assuming 75 billion feet as on hand, and still Canada's cut alone will exhaust her resources in fifteen years, and this country will assist her to get rid of it in less time.

So far the importations from Canada, although rapidly increasing, have been insignificant when compared with our home consumption. The importations of all kinds of forest products and wood manufactures have been hardly over 1 per cent of our own production, and if we confine the inquiry to coniferous material only the proportion of the importation of this class of materials rises to hardly 5 per cent of our home production of the same kinds.

## EXPORTS OF CONIFEROUS PRODUCTS FROM CANADA TO UNITED STATES.

(In millions of feet. B. M., rounded off.)

To arrive at an idea of the extent to which we have so far drawn on our neighbors for coniferous supplies, an attempt has been made in the following table to segregate from the trade and navigation reports of the Dominion of Canada those items which have reference to this discussion,

translating into board measure approximately the returns given in other measures. These figures are probably somewhat below the truth, but are sufficiently accurate for the present purpose, and are, moreover, the only ones available:

## LOGS IMPORTED FROM CANADA.

YEARS.	PINE LOGS.			SPRUCE LOGS.			HEMLOCK LOGS.

It will be seen that each six-year period shows an increase and that the exports of the last three years were only 25 per cent lower than those of the six preceding years. The largest imports were recorded for 1894, when nearly 1½ billion feet partly manufactured coniferous wood and 300 million feet of logs of conifers were imported. This latter importation increased steadily up to that time, furnishing raw material mainly to our Michigan mills, whose home supply is largely gone.

In the importation of logs it is interesting to observe that they increased in quantity without reference to the existence or absence of the export duty which the Canadian government imposed in 1886 and abolished in 1891 and the price per thousand feet also seems unimpaired. The necessity for these supplies to our mills, especially the

mills of the Saginaw (Mich.) district, began to assert itself in 1886, the very year the export duty was imposed. To prevent, if possible, these exports of raw material, and has grown constantly, the decline in 1886 and 1891 simply marking the general business depression.

It will be evident from these statements that our virgin coniferous supplies must share the fate which the buffalo has experienced unless a practical application of rational forestry methods and a more economic use of supplies is presently inaugurated. Since coniferous wood represents two-thirds to three-fourths of our entire lumber wood consumption, and its reproduction requires more care and longer time than that of hard woods, the urgency of changing methods in its use and treatment will be apparent.

## Men of the Year.

## JOHN SHERMAN.

John Sherman of Ohio, secretary of state, was born in Lancaster, that state, May 19, 1823; is of Anglo-Saxon ancestry; received an academic education; studied law, and was admitted to the bar May 11, 1844; was a delegate in the national whig conventions of 1848 and 1852, and presided over the first republican convention in Ohio in 1855; was a representative in the XXXIVth, XXXVth, XXXVIth and XXXVIIth congresses, and was the republican candidate for speaker in the winter of 1858-60; was elected to the United States senate in March, 1861, and re-elected in 1866 and 1872; was appointed secretary of the treasury in March, 1877, and served as such during President Hayes' administration; was again elected to the United States senate in 1880 and was re-elected in 1885 and 1892; was president of the senate from Dec. 7, 1885, till Feb. 28, 1887; resigned his seat in the senate to accept the position of secretary of state.

## LYMAN J. GAGE.

Lyman Judson Gage of Illinois, secretary of the treasury, was born in De Ruyter, Madison county, N. Y., June 28, 1836, but for the last forty-two years he has made his home in Chicago, and has been prominently identified with many of the institutions and plans that have made for Chicago's greatness.

The business of a banker was Mr. Gage's first choice as a profession, and when he was 17 years old he entered the employ of the Onondaga Central bank, serving as office boy and general utility clerk. For two years he remained there, and then, at the age of 19, he started out for the west and located at Chicago.

His first position there was that of clerk in a planing mill located at the corner of Canal and Adams streets, but in 1858 he returned to the banking business and became bookkeeper of the Merchants' Savings, Loan and Trust company. His salary at first was only \$500 a year, but his merits were soon recognized, and in 1861 he was the cashier of the institution.

When the clearing-house was first organized he acted for a short time as its manager, and in 1868 left to become the cashier of the First national bank. Mr. Gage has been connected with this bank ever since. At the time of its reorganization in 1881 his abilities and valuable services were recognized by the directors and he was offered the position of vice-president. In 1891, when Samuel M. Nickerson resigned from the presidency, Mr. Gage was appointed to fill the position, one which his long experience in Chicago banks and his natural abilities enabled him to fill with great success, as subsequent events have shown.

In many other lines of activity, municipal and social, as well as business, Mr. Gage has been prominent. At the time of the World's Fair, when it was necessary to select some man upon whose shoulders the burdens and responsibilities of the great exhibition might fall, Mr. Gage was chosen the first president of the directory.

His intimate knowledge of banks and banking led to his selection for the presidency of the American Bankers' association three times. He was also first president of the Chicago Bankers' club.

When the Citizens' league was organized in 1885 Mr. Gage was one of its officers, and during the two terms of his presidency of the Civic federation his advice and counsel have always proved of value in advancing the cause of pure citizenship.

## RUSSELL A. ALGER.

Gen. Russell A. Alger of Michigan, secretary of war, was born in Lafayette township, Medina county, O., on Feb. 27, 1836. His grandfather served in the revolutionary war and is claimed to have been a descendant of William the Conqueror.

When he was 11 years of age both his parents died. For the next seven years he worked on a farm, earning money to defray his expenses at the Richfield (O.) academy during the winters. Subsequently he taught school, and in March, 1867, entered a law office in Akron. Two years later he was admitted to the bar. He entered the law office of Ciss & Coffinbury in Cleveland, but abandoned the practice of law the following autumn on account of failing health and moved to Grand Rapids, Mich., where he engaged in the lumber business.

In 1867 he enlisted in the 2d Michigan cavalry and was made captain of company C. He was wounded in the battle of Boonville, Miss. Owing to his part in this engagement he was promoted to the rank of major. In 1862 he became lieutenant-colonel of the 6th Michigan cavalry, and in 1863 was made colonel of the 8th Michigan cavalry, his regiment being in Custer's famous brigade. In 1864 his health induced him to retire from the service. He was brevetted brigadier and major-general "for gallant and meritorious services," and was on private service in 1863-64, receiving orders personally from President Lincoln.

In 1866 he removed to Detroit, where he has since been engaged extensively in lumber and pine land business. He was a member of the firm of Moore & Alger, and became the head of the firm of R. A. Alger & Co., then the most extensive pine timber operators in the west. Subsequently the firm was merged into that of Alger, Smith & Co., which owns and operates extensive tracts and mills in Michigan and in the Canadian Georgian bay region.

Gen. Alger was elected governor of Michigan in 1884, receiving a plurality of 3,950 votes over Begole, fusionist. His administration of state affairs was considered highly successful.

In 1888 he was one of the leading candidates for the republican nomination for president.

Gen. Alger served one term as commander-in-chief of the G. A. R. He is of exceptionally generous and kindly disposition and is especially beloved by the veterans and by his friends in Michigan. He has three sons and three daughters.

## JOHN D. LONG.

John Davis Long of Massachusetts, secretary of the navy, was born in Buckfield, Oxford county, Me., Oct. 27, 1838; received his preparatory education in the common school of his native town and the Hebnon academy, Maine; was graduated from Harvard in 1857; taught two years in Westford academy, Massachusetts; studied law at Harvard law school and in private offices; was admitted to the bar and has

since practiced; was a member of the Massachusetts legislature in 1875, 1876, 1877 and 1878; was speaker of the house during the last three years; was lieutenant-governor of his state in 1879 and governor in 1880, 1881 and 1882; was elected to the XLVIIIth and re-elected to the XLIXth and Lth congresses, and was for several years on the statehouse construction commission of his state.

#### CORNELIUS N. BLISS.

Cornelius N. Bliss of New York, secretary of the interior, was born in Fall River, Mass., Jan. 26, 1833; was educated in public schools and academy at Fall River and the high school at New Orleans; after leaving the latter was for a year in his stepfather's counting room in New Orleans, and then removed to Boston and entered as a young clerk the house of I. M. Beebe, Morgan & Co.; in 1846 became a member of the firm of J. S. & E. Wright & Co., a commission house of Boston, and removed to New York to take charge of the business of the firm in that city; the firm name became Bliss, Fabyan & Co. in 1881; is in the directories of many financial institutions; was a member of the pan-American conference; was president of the Protective Tariff league; was chairman of the republican state committees of New York of 1887 and 1888; was treasurer of the national republican committee in 1892 and 1894; declined to be a candidate for the nomination for governor of his state in 1885, and refused to have his name presented to the convention for that position in 1891; was chairman of the business men's committee which tried to nominate President Arthur for a second term in 1884, and was chairman of the committee of thirty in 1893.

#### JAMES A. GARY.

James Albert Gary of Maryland, postmaster-general, was born in Uncasville, Conn., Oct. 22, 1833. He attended school at Rockhill institute, Elllicott City, and afterward at Allegheny college, Meadville, Pa., and in 1861 became a partner in the firm of James S. Gary & Son, cotton duck manufacturers. His energy was quickly made apparent. An office and warehouse had been established in Baltimore, and in 1862 a branch house was opened in St. Louis. This gave the concern a footing in the west which has since proved highly profitable. In 1870 Mr. Gary succeeded his father as head of the firm, and he has conducted its affairs ever since with marked success. The large mills in Albion, Howard county, thrive under his management and employ hundreds of people. Mr. Gary owns other valuable business properties in Baltimore and Howard counties, and has been repeatedly called upon to share in the management of financial and other business corporations in Baltimore. He was president for several years of the Merchants and Manufacturers' association, and is now vice-president of the Consolidated Gas company and vice-president of the Citizens' national bank. He also holds directorships in the Savings bank of Baltimore, the Warehouse company, the American Insurance company, the Merchants' and Manufacturers' Insurance company and the Baltimore Trust and Guarantee company.

An ardent unionist during the civil war, Mr. Gary has been a republican ever since. In 1870 the republicans nominated him for congress in the 5th district, which was

democratic at that time, and he was defeated. In 1879 the republicans nominated him for governor. In those days the state was hopelessly democratic, and Mr. Gary failed of election, although he made an active canvass. He has been a delegate to every national convention of his party since 1872, and from 1880 to 1894 represented Maryland upon the republican national committee. In 1866 Mr. Gary was married to Miss Lavinia W. Corrie, daughter of James Corrie, and is the father of one son and seven daughters.

#### JOSEPH B. McKENNA.

Joseph B. McKenna of California, attorney-general, was born in Philadelphia Aug. 16, 1843. In January, 1865, at the age of 21 years, he removed to California with his parents, going by way of the Isthmus of Panama. The family located at Benicia, in Solano county, and young Joseph attended the public schools.

Later he attended a collegiate institute at Benicia, studying law under Prof. Abbot. He was graduated from the institute in 1865 and was admitted to practice law before the supreme court of California.

In the same year he was elected district attorney of Solano county and went to reside at Fairfield, the county seat. He was re-elected in 1867. At the expiration of his second term as district attorney he removed to Suisun, a few miles from Fairfield, and commenced the practice of law. He was very successful.

In 1875 Mr. McKenna was elected to the legislature and served in that body during the session of 1875-76. This brief experience as a lawmaker served as an incentive to the ambitious young attorney and in 1876 the republicans of the 3d congressional district nominated him for congress.

The district was strongly democratic and McKenna was defeated, but he proved his popularity by reducing the democratic plurality from more than 9,000 to 800. Two years later he was again nominated, and was again defeated, this time by 180 votes. In 1884, after the state had been re-districted, Mr. McKenna was again nominated for congress and elected by a handsome majority. He was three times re-elected, serving through the XLIXth, Lth, List and LIId congresses.

While serving in the List congress Mr. McKenna was a member of the ways and means committee of which Maj. McKinley was chairman, and in this way came under the notice of the future president, and a warm friendship sprang up between them.

On the death of United States Judge Lorenzo Sawyer in 1890 President Harrison appointed Mr. McKenna to the circuit bench. He is regarded as an authority on all matters relating to land legislation.

#### JAMES WILSON.

James Wilson of Iowa, secretary of agriculture, was born in the parish of Girvan, Ayrshire, Scotland, in 1840, immigrating to America with his parents when a small boy. The first settlement of the family was in Connecticut, from which state they removed to Iowa in the '50s, in company with Gov. Buckingham and other distinguished people of the former state. For many years Mr. Wilson was a teacher in the country schools near Old Buckingham and West Union, Iowa, and so poor was he at that time that even in the coldest weather he

was compelled to go barefooted. By strict economy he accumulated money with which to purchase a portion of the magnificent farm of 1,200 acres, which he now owns in Tama county. This place may well be termed the "garden spot" of Iowa, for there is probably not another farm in the state so well improved in all respects. For many years he was a breeder of fancy cattle, and in that business he has made a competence. His home life has been simple, yet his family have enjoyed many privileges not accorded the ordinary farmer's family. Two of his sons, Ward W. and Peter, now manage the big farm.

Mr. Wilson was a member of the XIIIth, XIIIth and XIVth general assemblies of Iowa, has been state railroad commissioner, president of the state temperance alliance, and has held many other important public offices in the state. In 1874 he was elected to the United States congress from the 5th Iowa district, and was returned to the house in 1876. In 1882 he was again a candidate, defeating Ben T. Fredericks by a majority of 23 votes. His election was at once contested, but the matter was not considered in the house until the last day of the term in 1885, when he stepped down and allowed Mr. Fredericks to claim the seat, upon the condition that the house should pass the bill to place Gen. U. S. Grant upon the retired list. This bill could not be passed until the contest was disposed of, which was done during the last fifteen minutes of the session.

Mr. Wilson has also been engaged in the newspaper business, becoming editor of the Traer (Iowa) Clipper in 1881, his partner in the business being James Morrison, now of Washington, D. C. He managed the paper and farm at the same time, but soon sold his newspaper business, which had become very profitable. As a student and scholar Mr. Wilson ranks among the best in the middle west. For several years he has been professor of agriculture in the state school at Ames, and in connection with his other duties has edited a farm department for the newspapers that has been published in all the counties of the state. Mr. Wilson adheres to the tenets of the presbyterian church and is prominent in Masonic circles in the state.

#### JOHN HAY.

John Hay, ambassador to Great Britain was born in Salem, Ind., Oct. 8, 1838. His father was a physician, and his grandfather was one of the heroes of the revolution. After graduating at Brown college he went, at the age of 21, to Springfield, Ill., where he entered the office of Abraham Lincoln and began to study law. When Lincoln was made president he selected Col. Hay as one of his private secretaries. The other was John G. Nicolay, who later collaborated with Col. Hay in writing the history of the martyred president.

After the assassination of President Lincoln, Col. Hay, who had seen some service during the war and had gained the title of colonel, went to Paris as secretary of the United States legation, and was later transferred to Madrid, where he did some of his best literary work.

In 1872 Col. Hay returned to this country and accepted an editorial position on the staff of the New York Tribune. This position he retained until the election of President Hayes, who offered him the position of assistant secretary of state under Sec-

retary Everts. This agreeable position he accepted on Nov. 1, 1877, and held until May, 1881. Soon after, at the request of Whitelaw Reid, he returned to the New York Tribune and managed that newspaper while Mr. Reid went on a wedding tour to Europe. Although it was a time of great political excitement, the Garfield-Blaine-Conkling quarrel occurring during that period, Col. Hay conducted the Tribune to the satisfaction of all concerned.

Col. Hay married the daughter of Amasa Stone, the Ohio millionaire, who on his death left him a million or more dollars. He was then living in a beautiful home on Euclid avenue, Cleveland. Since then he has occupied the Washington mansion which he built.

Col. Hay has won even more repute by his literary work than by his activity in politics and diplomacy. His most important book is the "Life of Lincoln," written in collaboration with John G. Nicolay, which was published first as a serial in the Century and later in several volumes. It embodies the intimate knowledge of Lincoln and of his career gained by his private secretaries' personal observation and participation in a large part of the stirring events with which it deals, and is regarded as a contribution to American history of the first importance. Col. Hay's poems had previously gained for him a wide reputation as a keen humorist and sympathetic observer of human nature. His "Pike County Ballads," published in 1871; "Jim Bludso" and "Little Breches" have become exceedingly popular. A complete collection of his poems was published in 1890. His "Castilian Days," studies of Spanish life and character, the fruit of his sojourn in Spain as a diplomatic officer of the United States, appeared in 1871.

#### HORACE PORTER.

Horace Porter, ambassador to France, was born at Huntingdon, Pa., in 1837, the son of David R. Porter, who soon afterward became governor of the state. His early schooling was in the Harrisburg academy. After a year in the scientific department of Harvard university he entered West Point. His graduation took place in 1860.

After a brief space as instructor in artillery at West Point, he was assigned to duty in the department of the east. After being sent to Washington as a bearer of dispatches he was promoted to be first lieutenant while under Sherman and Dupont in the expedition against Port Royal. In 1863 he was brevetted captain for gallant services at the capture of Fort Pulaski, where he had command of the siege batteries. In May, 1864, he was brevetted major for his conduct in the battle of the Wilderness. The next year found him brevet lieutenant-colonel, and 1865 brevet brigadier-general of the United States army. He had been chief of ordnance of the army of the Potomac under Gen. Meade, but after the battle of Antietam was transferred first to the army of the Ohio and then to the army of the Cumberland. While on the staff of Gen. Thomas at Chattanooga he became acquainted with Gen. Grant. Their intimacy lasted until Grant's death. Gen. Porter became an aid-camp on Grant's staff, and was with him during most of the rest of the war. He was one of the few persons who witnessed the surrender at Appomattox.

When Gen. Grant became secretary of war Gen. Porter became the assistant sec-

retary, and during his chief's service as president acted as private secretary. Gen. Porter then went into business, and has been exceedingly successful. He has been connected with numerous important corporations; became vice-president of Pullman's Palace Car company, a director of the Equitable Life Assurance society, the Continental national bank, the St. Louis & San Francisco Railway company, the Burlington, Cedar Rapids & Northern Railway company, the Ontario & Western Railway company, the Atlantic & Pacific Railway company, the Hannibal & St. Joe Railway company and the Oregon Railway & Navigation company. He was also the first president of the West Shore road.

Gen. Porter has for several years been president of the Union League club; he belongs to the Century, University, Metropolitan, Lotus, Players', Authors' and Grolier clubs, to the chamber of commerce, the Loyal Legion, the American Geographical society, the Grand Army of the Republic, and many other organizations. He is president of the General National Society of the Sons of the American Revolution and the Grant Monument association. The completion of the Grant monument is largely the result of his efforts. The project languished when a start had been made on it until Gen. Porter made a personal canvass and set on foot a campaign through which \$400,000 was raised in two months.

#### WILLIAM F. DRAPER.

William Franklin Draper, ambassador to Italy, was born in Lowell, Mass., April 9, 1842. He was educated in the common schools of Lowell, supplemented by two years at an academy. At 16 he went to work in a cotton mill and made a study of the processes of manufacturing cotton goods. He enlisted in the 29th Massachusetts volunteers as a headless youth of 19 and served throughout the war for the union, being promoted successively from the rank of second lieutenant to that of brigadier-general. He was a gallant soldier, and bears upon his person the scars of battle, having been shot through the body at the battle of the Wilderness and wounded at Pegram's Farm. After the war he engaged in the manufacture of cotton machinery, and with his brothers, who were associated with him, amassed a fortune. He took much interest in politics as early as 1876, when he was a delegate to the Cincinnati convention. He was president of the famous Home Market club of Boston in 1890. Although a candidate for the gubernatorial nomination in 1884, he never held public office until elected to the 47th congress. His work in both that and the subsequent congress has been valuable. He was chairman of the committee on patents and a member of the committee on foreign affairs. In the former position he pressed successfully through congress the bill to revise the patent laws and the bill to protect the copyright of theatrical and operatic productions. As a member of the foreign affairs committee his course was distinctively conservative. While stalwart in his Americanism, he opposed hasty action which might embroil this country in foreign complications. For this reason he opposed the resolution to recognize the belligerency of the Cuban insurgents during the first session of this congress, and made a speech against it on the floor. Mr. Draper is a gentleman of commanding presence, genial, yet dignified in manner, a polished scholar and a pleasing and forceful speaker.

#### STEWART L. WOODFORD.

Gen. Stewart L. Woodford, minister to Spain, was born in New York city Sept. 3, 1835, from early Connecticut stock. He graduated at Columbia college in 1854, delivering the centennial oration of the college. He was admitted to the bar in 1857 and entered politics in the first Lincoln campaign, 1860.

Lincoln offered him the judgeship of the territory of Nebraska, but he declined it. Later he became assistant United States district attorney, resigned to enter the army as a volunteer, became captain, judge-advocate general of the department of the south, provost-marshal-general and chief-of-staff of Gen. Gilmore. He was brevetted brigadier-general for gallantry in action and after the war was military governor of Charleston and later of Savannah.

In 1866 he was elected lieutenant-governor of New York. In 1872 was elected to congress, nominated Arthur for vice-president in 1880, under Grant was United States district attorney, and has declined a hundred offices.

Gen. Woodford is an officer in the City savings bank, the Sprague national bank and the Fidelity Fire Insurance company, and stands high in financial circles. Yale, Columbia and Trinity colleges have bestowed the degree of M. A. upon him, and the latter gave him the degree of LL. D.

#### JAMES B. ANGELL.

James Burrill Angell, minister to Turkey, was born in Scituate, R. I., in 1828. He was graduated at Brown university in 1849, and spent some time thereafter in Europe, traveling and studying. On his return in 1853 he was appointed professor of modern languages and literature in Brown university. In 1856 he took editorial charge of the Providence Journal in the absence of Senator Anthony, its editor and proprietor, in Washington, and this post he filled for six years, his work covering the critical period of the civil war. In 1868 he was appointed president of the University of Vermont, and in 1871 president of the University of Michigan, where he has since remained. His influence there having raised that institution to a place among the foremost of American universities.

President Angell has occupied diplomatic positions of importance. In 1890 President Hayes appointed him minister to China, with the special purpose of negotiating a treaty bearing upon the rapidly growing hostility in this country to Chinese immigration and the rapidly increasing commercial relations between the two countries. He was at the head of the commission intrusted with this delicate duty, which was promptly executed, two treaties being ready for ratification by congress at the close of 1900. In 1881 President Angell resigned his office as minister and returned to his work at the University of Michigan. In 1887 he was appointed by President Cleveland one of the commissioners to settle the dispute with Great Britain over the rights of American fishermen in the waters of Canada and Newfoundland.

#### POWELL CLAYTON.

Powell Clayton, minister to Mexico, was born in Pennsylvania in 1833. He was educated for the profession of civil engineer and began to practice it in Leavenworth, Kas., where he settled in 1855. He was chosen city engineer of that city in 1871.

and held the place till the outbreak of the civil war, when he raised a company and went to the front with the 1st Kansas volunteer infantry regiment as captain. He gained rapid promotion, and at the close of the war, having served through it, he had reached the rank of brigadier-general. After the war he married and bought a large plantation in Jefferson county, Arkansas, where he lived till he was elected governor in 1868. In 1871 he was elected United States senator, and after serving the term of six years went to Little Rock, Ark., to live, remaining there till 1882, when he moved to Eureka Springs. He built the Eureka Springs railway, of which company he has since been president and general manager.

Gen. Clayton has been active in politics for many years, both before and since his occupation of public office. He has been a delegate to every republican national convention since Grant was first nominated, and until his business interests compelled him to resign was chairman of the republican state committee. He has also been for many years a member of the republican national committee. He also holds several local offices, is a member of the Loyal Legion and has been department commander of the G. A. R. in Arkansas.

#### CHARLEMAGNE TOWER.

Charlemagne Tower, minister to Austria, is descended from John Tower, a native of Norfolk, England, who settled at Hingham, Mass., in 1637. He was born in Philadelphia and was educated at a military academy at New Haven, Conn., and afterward at Phillips academy, Exeter, N. H. Upon graduating from Harvard university in 1872 he went to Europe to study history, modern languages and literature. After an absence of four years he returned to Philadelphia and studied law. He was admitted to the bar in 1878. Four years later he removed to Duluth, Minn., where he became president of the Duluth & Iron Range railroad and managing director of the Minnesota Iron company. He went east again in 1887. Mr. Tower is a trustee of the University of Pennsylvania, vice-president of the Historical Society of Pennsylvania, a member of the Academy of Natural Sciences, of the Numismatic society and of the American Institute of Mining Engineers; he is a director of the Lehigh Coal and Navigation company and of the Philadelphia and Reading Coal and Iron company. He received the degree of LL. D. from Lafayette college. Mr. Tower achieved much prominence through his scholarly work upon "The Marquis de la Fayette in the American Revolution," which has won for him a high place among the historians of the country.

#### A. S. HARDY.

Arthur Sherburne Hardy, minister to Persia, was at his appointment professor of mathematics in Dartmouth college and has been a soldier, an author and an editor. He was born in Boston Aug. 13, 1847, and was graduated at West Point. After a service of 18 months as second lieutenant he resigned from the army and traveled and studied abroad for several years. Later he went to Iowa college as professor of civil engineering and afterward accepted the chair of mathematics at Dartmouth. Prof. Hardy's works on the higher mathematics are used as text-books in Oxford and Cambridge and many of the leading American

universities. Among his works of fiction the most noted are "But Yet a Woman" and "Passe Rose." He was for a time associated with John Brisben Walker in the publication of the Cosmopolitan Magazine. Prof. Hardy was the personal choice of the president for the Persian mission, but his appointment is said to have been decidedly pleasing to the New Hampshire senators.

#### EDWIN H. CONGER.

E. H. Conger, minister to Brazil, was born in Knox county, Illinois, March 7, 1843, and was graduated at Lombard university, Galesburg, Ill., in 1862. Immediately after leaving college he enlisted in the union army and was brevetted major for gallant and meritorious conduct. After the war he studied law and was graduated from the Albany law school in 1866. He practiced in Galesburg. In 1868 he moved to Iowa and engaged in farming, stock-raising and banking. He was state treasurer of Iowa in 1882-85 and in 1884 was elected to congress from that state. He served three terms in congress and was minister to Brazil under President Harrison.

#### HAROLD M. SEWALL.

H. M. Sewall, minister to Hawaii, was born in Bath, Me., about thirty-eight years ago, son of Arthur Sewall, democratic candidate in 1896 for vice-president. He was originally a democrat, but became a republican during the first Cleveland administration, chiefly owing to his views on foreign policy. In 1885 President Cleveland had appointed him consul at Apia, Samoa, and later consul-general to those islands; but, disagreeing with the administration on its policy, he resigned after a year or two of service. Under President Harrison he shared in the negotiation of the Berlin treaty of 1889 committing Samoan affairs to the joint regulation of Germany, Great Britain and the United States. He was a delegate-at-large to the republican national convention of 1896.

#### ALFRED E. BUCK.

A. E. Buck, minister to Japan, was born in Foxcroft, Me., in 1832. He made his own way through college, took high rank, and taught school afterward. He went to the war, fought with credit, stayed in the south, and in the reconstruction days represented an Alabama district in congress. Later he went to Georgia, was clerk of the federal court at Atlanta, and afterward served as United States marshal for Georgia. He is a popular and influential citizen of Atlanta.

#### ARCHIBALD J. SAMPSON.

A. J. Sampson, minister to Ecuador, is a resident of Phoenix, Ariz., but he formerly resided in Colorado. He is a lawyer and was the first attorney-general of Colorado after that state was admitted into the union. He was the United States consul at Paso del Norte, Mexico, during President Harrison's administration. He has made quite a record as a campaign orator in the Mississippi valley states. He is a native of Ohio, and is about 55 years old.

#### W. GODFREY HUNTER.

Dr. Hunter, minister to Guatemala and Honduras, was born Dec. 25, 1841, was educated as a physician and practiced his pro-

fession. He was a surgeon in the union army during the late war. After the war he was elected to the state legislature of Kentucky and was a delegate to the republican national convention of 1880, being one of the 304 delegates who stood by Gen. Grant in that memorable contest. He was a delegate to the Minneapolis convention of 1892. He was elected to the Lth congress from the 3d district of Kentucky, re-elected to the LIVth, and was a candidate for re-election to the LVth in 1896, but was defeated by 209 votes. At the time of his appointment he was preparing to contest the election.

#### BELLAMY STORER.

Bellamy Storer, minister to the Netherlands, was born in Cincinnati Aug. 28, 1847; was graduated from Harvard college in 1867, and from the law school of Cincinnati college in 1869; was admitted to the bar April, 1869; was a member of the LIII and LIIId congresses from the 1st Ohio district.

#### CHARLES PAGE BRYAN.

C. P. Bryan, minister to China, was born in Chicago and is 42 years old. He was educated at the University of Virginia, and was graduated a lawyer from the law department of Columbia college, New York. In 1878 he was admitted to the bar and went to Colorado the following year. He was soon thereafter elected to the legislature of Colorado, and served in both houses of that body. In 1883 he returned to Illinois, took up his residence in Elmhurst, and was sent to the legislature in 1890. He has been re-elected every succeeding term since that time. His title of colonel comes from his appointments on the military staffs of Govs. Flier, Oglesby and Altgeld. Col. Bryan has ever interested himself in labor legislation. His work in the legislature has been of a lofty kind and he has served on many important committees. He is one of the hardest workers in the republican party of Illinois, and, indeed, he has always been a most ardent republican. He stumped Colorado for Blaine in 1884, and his voice has never been silent when he felt that his state, his district, his country or his party was in need of his efforts.

#### WILLIAM W. ROCKHILL.

W. W. Rockhill, minister to Greece and Roumania, is a native of Pennsylvania, and was first appointed to office from Maryland in 1884, when he was made assistant secretary of the American legation at Peking. From 1886 to 1887 he was charge d'affaires in Korea. In 1887 he resigned and spent most of the next five years in travel in Asia, on his return publishing a work on Thibet. In 1893 he became chief clerk of the state department. In 1894 he was appointed third assistant secretary of state and in 1894 became first assistant.

#### H. L. WILSON.

H. L. Wilson of Washington, minister to Chile, is a native of Indiana, and has had little to do with politics outside of the state of Washington, but has filled the position of chairman of the state republican committee. He is a brother of Senator Wilson of that state.

#### L. S. SWENSON.

L. S. Swenson of Minnesota, minister to Denmark, is well known among the educators of the country. He comes of Norwegian stock but was born in Minnesota.

After graduating at the Albert Lea university he took a post-graduate course at Johns Hopkins university, devoting himself especially to languages, history and political science. At the time of his appointment he was principal of the Luther academy at Albert Lea.

#### WILLIAM L. MERRY.

Mr. Merry of California, minister to Costa Rica and Nicaragua, has been essentially a business man. He has been secretary of the chamber of commerce of San Francisco and is owner of a line of steamers plying between San Francisco and Central American states. He was formerly consul-general for Nicaragua at San Francisco. He is said to have extensive plans for the completion of the Nicaraguan canal.

#### C. B. HART.

Mr. Hart of West Virginia, minister to Colombia, is a journalist, being editor and proprietor of the Wheeling Intelligencer. He has for many years been a factor in state politics.

#### W. F. POWELL.

Mr. Powell of New Jersey, minister to Haiti and Santo Domingo, has been for some time engaged in educational matters in Camden, N. J.

#### HIRAM N. ALLEN.

H. N. Allen of Ohio, minister resident to Korea, has previously been a secretary of legation and is a thorough Korean scholar. When the first Korean legation came to this country Mr. Allen accompanied it as an interpreter.

#### SANFORD NEWELL.

Mr. Newell of Minnesota, minister to the Netherlands, is a prominent lawyer at St. Paul and has long been active in state politics.

#### W. R. FRENCH.

Mr. French of Michigan, minister to Paraguay, is an educator rather than a politician, having been a professor in the state university at Ann Arbor.

#### J. B. DUDLEY.

Mr. Dudley of California is a lawyer and a brother of W. W. Dudley, who was prominent in the national campaign of 1888.

#### L. TOWNSEND.

Mr. Townsend of Pennsylvania, minister to Portugal, has had considerable experience in the diplomatic service of the government. He has been secretary of the American legation at Vienna.

#### ETHAN ALLEN HITCHCOCK.

Mr. Hitchcock of Missouri, minister to Russia, was a millionaire merchant in St. Louis and has been a strong and active republican. It is understood that the personal friendship of the president was his strongest indorsement.

#### J. G. LEISHMAN.

Mr. Leishman of Pennsylvania, minister to Switzerland, is a manufacturer and has been vice-president of the Carnegie Iron company.

**FRANK B. LOOMIS.**

Mr. Loomis of Ohio, minister to Venezuela, was the representative of the United Press and stationed at Canton during the last campaign, and formed a very intimate acquaintance with Mr. McKinley, who conferred the mission upon him as a wedding present.

**BENJAMIN BUTTERWORTH.**

Benjamin Butterworth, commissioner of patents, was born near Foster's Crossing, O., Oct. 22, 1837. His parents and other ancestors were friends, and he is a member of that church. He received his education at Ohio university at Athens, O. In the war he was a soldier and attained the rank of major.

After the war he settled in Cincinnati, studied law in the office of Durbin Ward and William M. Ramsey, was admitted to the bar and soon acquired a lucrative practice. Of strong convictions and aggressive temperament, he soon became a leader in Ohio republican politics, and a distinguished orator.

He served one term in the Ohio senate, was elected three times to congress from the 1st Ohio district, and was finally defeated in his fourth race by the democratic candidate, John F. Follette. In congress he won the esteem of his republican colleagues and the respect of the democratic members.

He was appointed commissioner of patents by Gen. Arthur, but since 1884 has been out of political office. During the World's Fair at Chicago he served as secretary of the national commission. Since that time he has practiced law, chiefly in Washington.

He was a delegate-at-large from Ohio to the republican national convention of 1884 and 1888, and was a determined Sherman man each time.

**E. W. PETTUS.**

Edmund Winston Pettus of Selma, senator from Alabama, was born in Limestone county, Alabama, July 6, 1821; is the youngest child of John Pettus and Alice T. Pettus, who was a daughter of Capt. Anthony Winston of Virginia, a revolutionary soldier; was educated at the common schools in Alabama and at Clinton college in Smith county, Tennessee; studied law in the office of William Cooper, then the leader of the bar in north Alabama; was admitted to the bar in 1842 and commenced the practice of law at Gainesville, Ala., as the partner of the Hon. Turner Reavis; in 1844 was elected solicitor for the 7th circuit; served as a lieutenant in the Mexican war; in 1846 resigned the office of solicitor and went, with a party of his neighbors, on horseback to California; was elected judge of the 7th circuit after his return to Alabama in 1856, but resigned that office in 1858 and removed to Dallas county, where he now resides; resumed the practice of law as a member of the firm of Pettus, Pugh & Dawson; in 1861 went into the confederate army as major of the 20th Alabama infantry and soon afterward was made lieutenant-colonel of that regiment; in October, 1863, was made a brigadier-general of infantry, and served till the close of the war, being in many battles; after the war returned to his home and to the practice of law, and has continued at that work ever since; ever since he became a voter has been a member of the demo-

cratic party; in November, 1896, was nominated by that party and elected by the legislature of Alabama United States senator for the term commencing March 4, 1897; after his nomination the opposition to his election was merely nominal; received the entire vote of his party, and more; has been a delegate to all of the democratic national conventions, except the first and last, since the war, and when a delegate was chairman of the Alabama delegation.

**R. R. KENNEY.**

Richard R. Kenney of Dover, senator from Delaware, was born in Sussex county, Delaware, Sept. 3, 1848; graduated from Laurel academy, Delaware, June, 1874; attended Hobart college, Geneva, N. Y.; read law under the tuition of the late Senator Willard Saulsbury of Dover; was admitted to the bar Oct. 19, 1881, and has practiced his profession since; was elected state librarian in January, 1879, and held that office for two terms; was appointed adjutant-general of the state by Gov. B. T. Diggs, January, 1887, and retired from that office at the end of his term, January, 1891; was delegate to the national democratic convention at Chicago in 1892; was made a member of the national democratic committee in 1894, which position he still holds; was elected to the United States senate as a democrat Jan. 19, 1896, to fill the vacancy caused by the legislature of 1896 failing to elect a senator to succeed the Hon. Anthony Higgins, whose term expired March 4, 1895. He took his seat Feb. 5, 1897. His term of service will expire March 3, 1901.

**STEPHEN R. MALLORY.**

Mr. Mallory, senator from Florida, is a resident of Pensacola. He was born Nov. 2, 1848, and entered the confederate army in Virginia in 1864. In 1865 he was appointed midshipman in the confederate navy. Later in the same year he entered Georgetown college, District of Columbia, and was graduated in June, 1869. He then taught a class at the same college until 1871, when he began the study of law. He was admitted to the Louisiana bar in 1872.

He moved to Pensacola in 1874 and began the practice of law. In 1876 he was elected to the legislature and in 1880 and 1884 to the state senate. He was a member of the LIII and LIIII congresses from the 1st Florida district. Mr. Mallory is a son of the late secretary of the confederate navy.

**A. S. CLAY.**

Alexander Stephens Clay of Marietta, Cobb county, Ga., senator from Georgia, was born on a farm in Cobb county; received his primary and preparatory education in the country schools and the high school at Palmetto, Ga.; graduated from Hiwassee college in 1875; taught school for two years; studied law under Judge David Irwin of Marietta and was admitted to the bar in September, 1877, and has been engaged actively in the practice of law since; was elected a member of the city council in 1880 and re-elected in 1881; in 1884-85 and 1886-87 represented Cobb county in the general assembly of the state; in the latter term was elected speaker pro tempore; was re-elected for 1889-90, and served as speaker for two years; in 1892 was elected to the state senate, and served as president

of that body for two years; in 1894 was elected chairman of the state democratic executive committee, and conducted the state campaign between the democrats and populists that year; was re-elected to the same position in 1896, and still occupies the place; was elected to the United States senate as a democrat, to succeed John B. Gordon, in October, 1896, and took his seat March 4, 1897. His term of service will expire March 3, 1903.

#### HENRY HEITFELD.

Mr. Heitfeld, senator from Idaho, was born in St. Louis in January, 1859. He attended the public schools of St. Louis until 1870, when, with his mother, he moved to Seneca, Kas., learning the trade of a stonemason.

In 1882 Mr. Heitfeld moved into the northwest, locating at Pomeroy, Wash., where he remained one year. While there he took up two claims in the Big Bend country, one a homestead and the other a timber culture. While holding the land he worked in the shops of the Northern Pacific railroad at Sprague, continuing that employment until the fall of 1883, when he became a resident of Idaho.

He settled in Nez Perces county, a short distance from the Washington line, his post-office being Uniontown, Wash. There he has since been engaged as a farmer, fruit grower and cattleman. He has 640 acres of land and has been conspicuously successful in his operations.

In politics Mr. Heitfeld was a democrat until he joined the populists. He is a member of the Farmers' alliance and it was through his connection with that organization that he was influenced to ally himself with the populist party. It was on the day of Cleveland's nomination in 1892 that he renounced his democracy and entered the ranks of the new party. He was active in politics, but never held any office until he was chosen in 1894 to represent Nez Perces and Latah counties in the state senate.

#### WILLIAM E. MASON.

William E. Mason of Chicago, senator from Illinois, was born in Franklinville, Cattaraugus county, N. Y., July 7, 1850; removed with his parents to Bentonport, Iowa, in 1858; attended school at the Bentonport academy and Birmingham college; taught school from 1866 to 1870, the last two years at Des Moines, Iowa; entered the law office of the Hon. Thomas F. Winthrop and was admitted to practice law in Des Moines; went to Chicago in 1872 and has practiced law there ever since; was elected to the general assembly in 1879, to the state senate in 1881; was elected to the 14th congress and defeated for the 15th in the landslide of 1892; was elected to the United States senate Jan. 29, 1897, by a strict party vote, receiving 125 votes against 78 votes for John P. Altgeld, democrat. He took his seat March 4, 1897. His term of service will expire March 3, 1903.

#### C. W. FAIRBANKS.

Charles Warren Fairbanks of Indianapolis, senator from Indiana, was born May 11, 1852, near Unionville Center, Union county, O.; was educated in the district schools of the neighborhood and at the Ohio Wesleyan

university, Delaware, O., graduating from that institution in 1872 in the classical course; is an attorney-at-law; has never held any civil or military office; was a delegate-at-large to the republican national convention at St. Louis in 1896, and was temporary chairman of the convention; was elected to the United States senate as a republican, Jan. 20, 1897, by a majority of 21 on joint ballot, over Daniel W. Voorhees and Leroy Tammerton, and took his seat March 4, 1897. His term of service will expire March 3, 1903.

#### WILLIAM A. HARRIS.

William A. Harris of Linwood, Leavenworth county, Kas., who has succeeded Pfeffer as senator from that state, was born in Loudon county, Virginia, Oct. 29, 1841. He spent the early years of his life in Luray, Va., where he attended school. In 1859 he was graduated from Columbian college, Washington, D. C., and in 1861 from the Virginia Military institute. Mr. Harris served in the confederate army as assistant adjutant-general of Wilcox' brigade and ordnance officer of D. H. Hill's and Rodes' division, army of northern Virginia. He removed to Kansas in 1865 and was employed as civil engineer in the construction of the Kansas division of the Union Pacific railroad. In 1883 he accepted the agency for the sale of the Delaware reservation and other lands, at the same time embarking in farming and stock-raising, in which he is still engaged. In 1892 he was nominated for congressman-at-large by the populist state convention and endorsed by the democrats. In the election that followed he received 163,634 votes, against 156,761 for his opponent.

#### WILLIAM J. DEBOE.

Mr. Deboe, senator from Kentucky, was born in Crittenden county forty-seven years ago, was raised on a farm and educated in the common schools of his county, supplemented by two years in Ewing college in Illinois. His parents were born in Virginia and came to Kentucky early in the 18th century. His grandfather on his father's side served for seven years in the revolutionary war. His father, Abram Deboe, was a minister of the baptist church. After leaving the farm young Deboe first taught school and afterward studied medicine and was graduated at the University of medical college, Louisville. He practiced medicine for a number of years and then took up the law, which he has practiced successfully for nine years. He has always been an ardent and active republican, and few men in the state have done more than he for his party. In 1888 he was a delegate to the Chicago convention. In 1892 he made the race for congress in his district as the republican nominee, and greatly reduced the democratic majority.

He has been a member of the state central committee since 1890, and in 1896 was a delegate from the state at large to the St. Louis convention which nominated McKinley and Hobart, and was chairman of the Kentucky delegation to that convention. In 1893 he was elected to the state senate from a democratic district and has served his people during the last three terms ably and faithfully. As a political organizer and leader of men he is second to none in the state, as evidenced by the management of his own campaign and as member of the executive committee of the state in 1896 during the

McKinley campaign. The fact that Kentucky was swung to the republican column was largely due to his part in the management of the state campaigns of 1895 and 1896.

#### T. C. PLATT.

Thomas Collier Platt, senator from New York, of Owego, was born in Owego, N. Y., July 15, 1833; was prepared for college at the Owego academy; was a member of the class of 1853 of Yale college, but was compelled to give up the course in that institution on account of ill health; received the honorary degree of M. A. from that college in 1876; entered mercantile life soon after leaving school, and has been in active business since; was president of the Tioga national bank at its organization; became largely interested in the lumbering business in Michigan; was county clerk of the county of Tioga in 1859, 1869 and 1861; was elected to the XLIII and XLIVth congresses; was elected United States senator Jan. 13, 1881, and resigned that office May 16 of the same year; was chosen secretary and director of the United States Express company in 1879, and in 1880 was elected president of the company; was member and president of the board of quarantine commissioners of New York from 1880 till 1888; was delegate to the national republican conventions of 1876, 1880, 1884, 1888, 1892 and 1896; was president of the Southern Central railroad; has been a member of the national republican committee; was elected United States senator in 1896 and took his seat March 4, 1897. His term of service will expire March 3, 1903.

#### HENRY W. CORBETT.

Mr. Corbett, senator from Oregon, was born in Westborough, Mass., on Feb. 18, 1827. He was the youngest son in a family of eight children. His early boyhood was spent in Washington county, New York, where he attended the common schools. Later he attended Cambridge academy, taking the regular academy course. He then held a clerkship in Salem, the county seat, for one year, when at 17 years of age he went to New York city and was employed in the dry-goods business until 1851. His employers intrusted him with a stock of goods which was shipped around Cape Horn to Portland. In 1850, the agreement being that he should devote three years in Oregon to merchandising, then return and divide the proceeds. He sailed from New York on Jan. 20, 1851, via the Isthmus, and arrived in Portland on March 5, where he found about 400 inhabitants. So well did he succeed in his venture that his entire stock of goods was disposed of in fourteen months, when he returned to New York with \$20,000 net profits for division. After remaining one year in New York he returned to Oregon.

He was a delegate to the Chicago convention in 1860, but was unable to reach there in time, so Horace Greider represented the state. He attended Lincoln's inauguration in 1861 and was a delegate to the republican convention that nominated Grant and Colfax, in 1868. In 1866 he was elected United States senator to succeed the Hon. J. W. Nesmith, and became prominently identified with the financial discussions of the time. During and after the war the gold standard was maintained on the Pacific coast, and Mr. Corbett invented the idea of national gold banks. The first national bank of Portland was organized in 1865, and in 1865

he, with Henry Failing, obtained control of the stock, and it has ever since been the strongest national bank in the Pacific northwest. He assisted in the organization of the board of trade and was its president for many years. He is president of the Boys and Girls' Aid society and of the Hotel Portland. He is a director of the Oregon Railway & Navigation company, was the first in the senate to advocate the building of the Northern Pacific railroad, is an active worker in benevolent matters, has liberally endowed various Oregon institutions, and is interested in everything that tends to improve the condition of the community.

#### M. A. HANNA.

Marcus Alonzo Hanna of Cleveland, senator from Ohio, was born in New Lisbon (now Lisbon), Columbiana county, O., Sept. 29, 1837; removed with his father's family to Cleveland in 1852; was educated in the common schools of that city and the Western Reserve college, Hudson, O.; was engaged as an employee in the wholesale grocery house of Hanna, Garretson & Co., his father being senior member of the firm; his father died in 1862 and he represented his interest in the firm until 1867, when the business was closed up; then became a member of the firm of Rhodes & Co., engaged in the iron and coal business; at the expiration of ten years the title of this firm was changed to M. A. Hanna & Co., which still exists; has been identified with the lake carrying business, being interested in vessels on the lakes and in the construction of such vessels; is a director in the Globe Ship Manufacturing company of Cleveland; is president of the Union national bank of Cleveland; president of the Cleveland City Railway company; president of the Chapin Mining company, Lake Superior; was government director of the Union Pacific Railway company in 1885, by appointment of President Cleveland; was a delegate to the national republican conventions of 1884, 1888 and 1896; was elected chairman of the national republican committee in 1896 and still holds that position; was appointed to the United States senate as a republican by Gov. Bushnell March 5, 1897, to fill vacancy caused by the resignation of the Hon. John Sherman, who resigned to accept the position of secretary of state in President McKinley's cabinet; took his seat March 5, 1897. His term of service will expire in January, 1903, or when the legislature of his state elects his successor.

#### BOIES PENROSE.

Boies Penrose of Philadelphia, senator from Pennsylvania, was born in Philadelphia a Nov. 1, 1800; was prepared for college by private tutors and in the schools of Philadelphia; was graduated from Harvard college in 1821; read law with Wayne MacVaneigh and George Tucker Bishop and was admitted to the bar in 1832; practiced his profession in partnership with S. Davis Page and Edward P. Allinson under the firm name of Page, Allinson & Penrose; was elected to the Pennsylvania house of representatives from the 8th Philadelphia district in 1834; in connection with Edward P. Allinson wrote, at the request of Johns Hopkins university, for the university studies in historical and political science, a history of the city government of Philadelphia; was elected to the Pennsylvania state senate

from the 6th Philadelphia district in 1886, re-elected in 1890, and again in 1894; was elected to the United States senate as a republican to succeed J. Donald Cameron and took his seat March 4, 1897. His term of service will expire March 3, 1903.

#### J. L. RAWLINS.

Joseph Rawlins of Salt Lake City, senator from Utah, was born in Salt Lake county, Utah, March 23, 1850; lived on a farm until 18 years of age; completed a classical course in the University of Indiana, but, having gone to Utah, did not return for graduation; was professor in the University of Deseret in Salt Lake City, Utah, for two years, until 1875; was admitted to the bar in that year and followed the profession of the law until his election as delegate in 1892; in politics has always been a democrat; was elected to the Lillard congress as delegate on the democratic ticket, and was defeated for the LIVth congress by the Hon. Frank A. Cannon and was elected to the United States senate as a democrat in 1897; took his seat March 4, 1897. His term of service will expire March 3, 1903.

#### GEORGE TURNER.

George Turner of Spokane, senator from Washington, was born in Edina, Mo., Feb. 25, 1850; was educated in the common schools; is a lawyer; was United States marshal for the southern and middle districts of Alabama from 1876 till 1880; was associate justice of the Supreme court for the territory of Washington from July 4, 1884, till Feb. 15, 1886; was a member of the constitutional convention which framed the constitution for the state of Washington; was elected to the United States senate as a representative of the people's party, composed of a fusion of silver republicans, democrats and populists; he took his seat March 4, 1897. His term of service will expire March 3, 1903.

#### JOHN C. SPOONER.

John C. Spooner of Madison, senator from Wisconsin, was born at Lawrenceburg, Dearborn county, Ind., Jan. 6, 1843; removed with his father's family to Wisconsin and settled at Madison June 1, 1859; was graduated at the State university in 1864; was private in company D, 40th regiment, and captain of company A, 60th regiment, Wisconsin infantry volunteers; was brevetted major at the close of service; was private and military secretary of Gov. Lucius Fairchild of Wisconsin; was admitted to the bar in 1867 and served as assistant attorney-general of the state until 1870, when he removed to Hudson, where he practiced law from 1870 until 1884; was member of the assembly from St. Croix county in 1872; member of the board of regents of the Wisconsin university; was elected United States senator as a republican, to succeed Angus Cameron, republican, for the term beginning March 4, 1885; was chairman of the Wisconsin delegation to the national republican convention in 1888; was succeeded as United States senator March 4, 1891, by William F. Vilas, democrat, receiving, however, the full vote of the republican members of the legislature for re-election; was chairman of the Wisconsin delegation to the national republican convention at Minneapolis in 1892; was unanimously nominated as republican candidate for governor of Wisconsin in 1892, but was

defeated; removed from Hudson to Madison in 1893; has been actively engaged in the practice of law since April, 1893; unanimously nominated in republican caucus Jan. 13, 1897, and duly elected Jan. 27, 1897, United States senator for the term beginning March 4, 1897, to succeed William F. Vilas, democrat, receiving 117 votes, against eight votes for W. C. Silverthorn and two votes for Edward S. Bragg. His term of service will expire March 3, 1903.

#### JOHN R. YOUNG.

John Russell Young, librarian of the new congressional library, was born on a farm near Downingtown, Pa., in 1841. His parents went to Philadelphia when he was a child, and his early education was received in a grammar school there and was supplemented in the high school at New Orleans, where for some years he was an inmate of his uncle's house. When 16 years old he was employed as a copyholder in a Philadelphia proof-room, and soon became a reporter and an editorial writer. He served as secretary to John W. Forney while the latter was secretary of the United States senate, and at the same time as a war correspondent. In 1872 he became managing editor of the Philadelphia Press. In 1885 he went to New York in the employ of Jay Cooke & Co. to use his pen in advertising the government loan. While there he contributed to the New York Tribune, of which in 1886 he became managing editor. He resigned that position in January, 1889. He started a daily newspaper in New York, the Standard, a few months later, but it was not a success. Afterward he became an editorial writer for the Herald and one of its foreign correspondents. He accompanied Gen. Grant around the world and wrote a book on the subject. President Arthur appointed him minister to China, a position which he resigned in 1886. Later he became one of the vice-presidents of the Reading railroad.

#### JOHN P. S. GOBIN.

Brevet Brig.-Gen. John P. S. Gobin, commander of the G. A. R., is a resident of Lebanon, Pa.; entered the war as captain and at the close of hostilities came out with the rank of brigadier-general. Gen. Gobin was born at Sunbury, Pa., on Jan. 26, 1838, and is about 59 years old. He attended the public schools of Sunbury and was admitted to the bar just before the breaking out of the war. In 1861 he enlisted in the 11th Pennsylvania for three months' service, and at the expiration of his enlistment went with his company, which was merged into the 47th Pennsylvania infantry. He was soon in command of that regiment and fought with the 19th army corps in the Red river campaign and with Sheridan in the Shenandoah valley. During this campaign his meritorious actions brought him the rank he now holds. After the surrender of Lee he was made provost judge of South Carolina and remained in that office during the reconstruction days. He has been prominent in Grand Army circles and organized post No. 42 of the department of Pennsylvania in 1867, at Lebanon, Pa., where he settled after his term of service as provost judge in South Carolina. He was prominent in politics of Pennsylvania and for sixteen years has been a state senator, and for several terms presiding officer of the Pennsylvania upper house. He is a prominent Mason and has commanded the 3d brigade of the Grand Army.

Utterances of the President.

INAUGURAL ADDRESS OF WILLIAM MCKINLEY.

Delivered March 4, 1897.

Fellow-Citizens: In obedience to the will of the people and in their presence, by the authority vested in me by this oath, I assume the arduous and responsible duties of president of the United States, relying on the support of my countrymen and invoking the guidance of Almighty God. Our faith teaches that there is no safer reliance than upon the God of our fathers, who has so singularly favored the American people in every national trial and who will not forsake us so long as we obey His commandments and walk humbly in His footsteps.

ENDURING BASIS FOR CURRENCY.

The responsibilities of the high trust to which I have been called—always of grave importance—are augmented by the prevailing business conditions, entailing idleness upon willing labor and loss to useful enterprises. The country is suffering from industrial disturbances from which speedy relief must be had.

Our financial system needs some revision; our money is all good now, but its value must not further be threatened. It should all be put upon an enduring basis, not subject to easy attack, nor its stability to doubt or dispute. Our currency should continue under the supervision of the government. The several forms of our paper money offer, in my judgment, a constant embarrassment to the government and a safe balance in the treasury. Therefore I believe it necessary to devise a system which, without diminishing the circulating medium or offering a premium for its contraction, will present a remedy for those arrangements which, temporary in their nature, might well in the years of our prosperity have been displaced by wiser provisions.

MORE REVENUE A NECESSITY.

With adequate revenue secured, but not until then, can we enter upon such changes in our fiscal laws as will, while insuring safety and volume to our money, no longer impose upon the government the necessity of maintaining so large a gold reserve, with its attendant and inevitable temptations to speculation.

Most of our financial laws are the outgrowth of experience and trial, and should not be amended without investigation and demonstration of the wisdom of the proposed changes. We must be sure we are right and "make haste slowly."

If, therefore, congress in its wisdom shall deem it expedient to create a commission to take under early consideration the revision of our coinage, banking and currency laws, and give them that exhaustive, careful and dispassionate examination that their importance demands, I shall cordially concur in such action. If such power is vested in the president it is my purpose to appoint a commission of prominent, well-informed citizens of different parties, who will command public confidence both on account of their ability and special fitness for the work.

Business experience and public training may thus be combined and the patriotic zeal of the friends of the country be so directed that such a report will be made as to receive the support of all parties and our finances cease to be the subject of mere partisan contention. The experiment is, at all events,

worth a trial, and, in my opinion, it can but prove beneficial to the entire country.

INTERNATIONAL BIMETALLISM.

The question of international bimetallicism will have early and honest attention. It will be my constant endeavor to secure it by co-operation with the other great commercial powers of the world. Until that condition is realized when the parity between our gold and silver money springs from and is supported by the relative value of the two metals, the value of the silver already coined and of that which may hereafter be coined must be kept constantly at par with gold by every resource at our command.

The credit of the government, the integrity of its currency and the inviolability of its obligations must be preserved. This was the commanding verdict of the people, and it will not be unneeded.

Economy is demanded in every branch of the government at all times, but especially in periods like the present depression of business and distress among the people. The severest economy must be observed in all public expenditures and extravagance stopped wherever it is found and prevented wherever in the future it may be developed. If the revenues are to remain as now, the only relief that can come must be from decreased expenditures. But the present must not become the permanent condition of the government. It has been our uniform practice to retire, not increase, our outstanding obligations, and this policy must again be resumed and vigorously enforced. Our revenues should always be large enough to meet with ease and promptness, not only our current needs and the principal and interest of the public debt, but to make proper and liberal provision for that most deserving body of public creditors, the soldiers and sailors and the widows and orphans who are the pensioners of the United States.

MORE REVENUE, NOT MORE LOANS.

The government should not be permitted to run behind or increase its debts in times like the present. Suitably to provide against this is the mandate of duty; the certain and easy remedy for most of our financial difficulties, or deficiency is inevitable so long as the expenditures of the government exceed its receipts. It can only be met by loans or an increased revenue. While a large annual surplus of revenue may invite waste and extravagance, inadequate revenue creates distrust and undermines public and private credit. Neither should be encouraged. Between more loans and more revenue there ought to be but one opinion. We should have more revenue, and that without delay, hindrance or postponement. A surplus in the treasury created by loan is not a permanent or safe reliance. It will suffice while it lasts, but it cannot last long while the outlays of the government are greater than its receipts, as has been the case during the last two years. Nor must it be forgotten that, however much such loans may temporarily relieve the situation, the government is still indebted for the amount of the surplus thus accrued, which it must ultimately pay, while its ability to pay is not strengthened but weakened by a continued deficit. Loans are imperative in great emergencies to preserve the government or its

credit, but a failure to supply needed revenue in time of peace for the maintenance of either has no justification.

The best way for the government to maintain its credit is to pay as it goes—not by resorting to loans, but by keeping out of debt—through an adequate income secured by a system of taxation, external or internal, or both. It is the settled policy of the government, pursued from the beginning and practiced by all parties and administrations, to raise the bulk of our revenues from taxes upon foreign productions entering the United States for sale and consumption—and avoiding for the most part every form of direct taxation, except in time of war. The country is clearly opposed to any needless additions to the subjects of internal taxation and is committed by its latest popular utterance to the system of tariff taxation.

#### TARIFF TAXATION.

There can be no misunderstanding, either, about the principle upon which this tariff taxation shall be levied. Nothing has ever been made plainer at a general election than that the controlling principle in the raising of revenue on imports is zealous care for American interests and American labor.

The people have declared that such legislation should be had as will give ample protection and encouragement to the industries and the development of our country. It is, therefore, earnestly hoped and expected that congress will, at the earliest practicable moment, enact revenue legislation that shall be fair, reasonable, conservative and just, and which, while supplying sufficient revenue for public purposes, will still be signally beneficial and helpful to every section and every enterprise of the people.

To this policy we are all, of whatever party, firmly bound by the voice of the people—a power vastly more potent than the expression of any political platform. The paramount duty of congress is to stop deficiencies by the restoration of that protective legislation which has always been the firmest prop of the treasury. The passage of such a law or laws would strengthen the credit of the government both at home and abroad and go far toward stopping the drain upon the gold reserve held for the redemption of our currency, which has been heavy and well-nigh constant for several years.

#### NEW MARKETS BY RECIPROCITY.

In the revision of the tariff special attention should be given to the re-enactment and extension of the reciprocity principle of the law of 1890, under which so great a stimulus was given to our foreign trade in new and advantageous markets for our surplus agricultural and manufactured products. The brief trial given this legislation amply justifies a further experiment and additional discretionary power in the making of commercial treaties, the end in view always to be the opening up of new markets for the products of our country by granting concessions to the products of other lands that we need and cannot produce ourselves, and which do not involve any loss of labor to our own people, but tend to increase their employment.

The depression of the last four years has fallen with especial severity upon the great body of the country, and upon none more than the holders of small farms. Agriculture has languished and labor suffered. The revival of manufacturing will be a relief to both. No portion of our population is more devoted to the institutions of free government nor more loyal in their support, while none bears more cheerfully or fully its

proper share of maintenance of the government or is better entitled to its wise and liberal care and protection.

Legislation helpful to the producer is beneficial to all. The depressed condition of industry on the farm and in the mine and factory has lessened the ability of the people to meet the demands upon them, and they rightfully expect that not only a system of revenue shall be established that will secure the largest income with the least burden, but that every means will be taken to decrease rather than increase our public expenditures. Business conditions are not the most promising.

#### RESTORATION OF PROSPERITY.

It will take time to restore the prosperity of former years. If we cannot promptly attain it we can resolutely turn our faces in that direction and aid its return by friendly legislation. However troublesome the situation may appear, congress will not, I am sure, be found lacking in disposition or ability to relieve it, so far as legislation can do so. The restoration of confidence and the revival of business, which men of all parties so much desire, depend more largely upon the prompt, energetic and intelligent action of congress than upon any other single agency affecting the situation.

It is inspiring, too, to remember that no great emergency in the 108 years of our eventful national life has ever risen that has not been met with wisdom and courage by the American people, with fidelity to their best interests and highest destiny and to the honor of the American name. These years of glorious history have exalted mankind and advanced the cause of freedom throughout the world and immeasurably strengthened the precious free institutions which we enjoy. The people love and will sustain these institutions.

The great essential to our happiness and prosperity is that we adhere to the principles upon which the government was established and insist upon their faithful observance. Equality of rights must prevail and our laws be always and everywhere respected and obeyed. We may have failed in the discharge of our full duty as citizens of the great republic, but it is consoling and encouraging to realize that free speech, a free press, free thought, free schools, the free and unmolested right of religious liberty and worship and free and fair elections are dearer and more universally enjoyed today than ever before.

These guarantees must be sacredly preserved and wisely strengthened. The constituted authorities must be cheerfully and vigorously upheld. Lynchings must not be tolerated in a free and civilized country like the United States; courts—not mobs—must execute the penalties of the law.

The preservation of public order, the right of discussion, the integrity of courts and the orderly administration of justice must continue forever the rock of safety upon which our government securely rests.

#### NO IMMUNITY FOR LAW-BREAKERS.

One of the lessons taught by the late election which all can rejoice in is that the citizens of the United States are both law-respecting and law-abiding people, not easily swayed from the path of patriotism and honor. This is in accord with the genius of our institutions, and but emphasizes the advantages of inculcating even a greater love for law and order in the future. Immunity should be granted to none who violates the laws, whether individuals, cor-

porations or communities; and as the constitution imposes upon the president the duty of both its own execution and of the statutes enacted in pursuance of its provisions, I shall endeavor carefully to carry them into effect.

The declaration of the party now restored to power has been in the past that of "opposition to all combinations of capital organized in trusts or otherwise to control arbitrarily the condition of trade among our citizens," and it has supported "such legislation as will prevent the execution of all schemes to oppress the people by undue charges on their supplies or by unjust rates for the transportation of their products to market." This purpose will be steadily pursued, both by the enforcement of the laws now in existence and the recommendation and support of such statutes as may be necessary to carry it into effect.

#### NATURALIZATION AND IMMIGRATION.

Our naturalization and immigration laws should be further improved, to the constant promotion of a safer, a better and a higher citizenship. A grave peril to the republic would be a citizenship too ignorant to understand or too vicious to appreciate the great value and benefit of our constitutions and laws—and against all who come here to make war upon them our gates must be promptly and tightly closed. Nor must we be unmindful of the need of improvement among our citizens, but with the zeal of our forefathers encourage the spread of knowledge and free education. Illiteracy must be banished from the land if we shall attain that high destiny as the foremost of the enlightened nations of the world which, under Providence, we ought to achieve.

#### CIVIL-SERVICE REFORM.

Reforms in the civil service must go on, but the change must be real and genuine, not perfunctory or prompted by a zeal in behalf of any party simply because it happens to be in power.

As a member of congress I voted and spoke in favor of the present law, and I shall attempt its enforcement in the spirit in which it was enacted. The purpose in view was to secure the most efficient service of the best men who would accept appointment under the government, retaining faithful and devoted public servants in office, but shielding none under the authority of any rule or custom who is inefficient, incompetent or unworthy.

The best interests of the country demand this, and the people heartily approve the law wherever and whenever it has been thus administered.

#### MERCHANT MARINE AND NAVY.

Congress should give prompt attention to the restoration of our American merchant marine, once the pride of the seas in all the great ocean highways of commerce. To my mind few more important subjects so imperatively demand its intelligent consideration. The United States has progressed with marvelous rapidity in every field of enterprise and endeavor, until we have become foremost in nearly all the great lines of inland trade, commerce and industry. Yet, while this is true, our American merchant marine has been steadily declining until it is now lower, both in the percentage of tonnage and the number of vessels employed, than it was prior to the civil war.

Commendable progress has been made of late years in the upbuilding of the American navy, but we must supplement these efforts by providing as a proper consort for it a

merchant marine amply sufficient for our carrying trade to foreign countries. The question is one that appeals both to our business necessities and the patriotic aspirations of a great people.

#### THE FOREIGN POLICY.

It has been the policy of the United States since the foundation of the government to cultivate relations of peace and amity with all the nations of the world, and this accords with my conception of our duty now. We have cherished the policy of non-interference with the affairs of foreign governments, wisely inaugurated by Washington, keeping ourselves free from entanglements either as allies or foes, content to leave undisturbed with them the settlement of their own domestic concerns. It will be our aim to pursue a firm and dignified foreign policy, which shall be just, impartial, ever watchful of our national honor, and always insisting upon the enforcement of the lawful rights of American citizens everywhere. Our diplomacy should seek nothing more, and accept nothing less, than is due us. We want no wars of conquest; we must avoid the temptation of territorial aggression. War should never be entered upon until every agency of peace has failed; peace is preferable to war in almost every contingency.

#### THE PRINCIPLE OF ARBITRATION

Arbitration is the true method of settlement of international as well as local or individual differences. It was recognized as the best means of adjustment of differences between employers and employees by the XLIXth congress in 1886, and its application was extended to our diplomatic relations by the unanimous concurrence of the senate and house of the List congress in 1890. The latter resolution was accepted as the basis of negotiations with us by the British house of commons in 1893, and upon our invitation a treaty of arbitration between the United States and Great Britain was signed at Washington and transmitted to the senate for its ratification in January last.

Since this treaty is clearly the result of our own initiative, since it has been recognized as the leading feature of our foreign policy throughout our entire national history—the adjustment of difficulties by judicial methods rather than by force of arms—and since it presents to the world the glorious example of reason and peace, not passion and war, controlling the relations between two of the greatest nations of the world, an example certain to be followed by others, I respectfully urge the early action of the senate thereon, not merely as a matter of policy, but as a duty to mankind.

The importance and moral influence of the ratification of such a treaty can hardly be overestimated in the cause of advancing civilization. It may well engage the best thought of the statesmen and people of every country, and I can but consider it fortunate that it was reserved to the United States to have the leadership in so grand a work.

#### NECESSITY OF AN EXTRA SESSION.

It has been the uniform practice of each president to avoid, so far as possible, the convening of congress in extraordinary session. It is an example which, under ordinary circumstances and in the absence of a public necessity, is to be commended. But a failure to convene the representatives of the people in congress in extra session when

It involves neglect of public duty places the responsibility of such neglect upon the executive himself.

The condition of the public treasury, as has been indicated, demands the immediate consideration of congress. It alone has the power to provide revenues for the government. Not to convene it under such circumstances I can view in no other sense than the neglect of a plain duty.

I do not sympathize with the sentiment that congress in session is dangerous to our general business interests. Its members are the agents of the people, and their presence at the seat of government in the execution of the sovereign will should not operate as an injury, but a benefit.

There could be no better time to put the government upon a sound financial and economic basis than now. The people have only recently voted that this should be done, and nothing is more binding upon the agents of their will than the obligation of immediate action.

It has always seemed to me that the postponement of the meeting of congress until more than a year after it has been chosen deprives congress too often of the inspiration of the popular will and the country of the corresponding benefits. It is evident, therefore, that to postpone action in the presence of so great a necessity would be unwise on the part of the executive, because unjust to the interests of the people.

Our actions now will be freer from mere partisan consideration than if the question of tariff revision were postponed until the regular session of congress. We are nearly two years from a congressional election, and politics cannot so greatly distract us as if such a contest were immediately pending. We can approach the problem calmly and patriotically without fearing its effect upon an early election.

Our fellow-citizens who may disagree with us upon the character of this legislation prefer to have the question settled now, even against their preconceived views—and perhaps settled so reasonably as I trust and believe it will be, as to insure great permanence—than to have further uncertainty menacing the vast and varied business interests of the United States. Again, whatever action congress may take will be given a fair opportunity for trial before the people are called to pass judgment upon it.

and this I consider a great essential to the rightful and lasting settlement of the question.

In view of these considerations I shall deem it my duty as president to convene congress in extraordinary session on Monday, March 15, 1897.

### SPIRIT OF THE PEOPLE.

In conclusion, I congratulate the country upon the fraternal spirit of the people and the manifestation of good will everywhere so apparent. The recent election not only most fortunately demonstrated the obliteration of sectional or geographical lines, but to some extent also the prejudices which for years have distracted our councils and marred our true greatness as a nation.

The triumph of the people, whose verdict is carried into effect to-day, is not the triumph of one section, nor wholly of one party, but of all sections and all the people.

The north and south no longer divide on the old lines, but upon principles and policies, and in this fact surely every lover of the country can find cause for true felicitation. Let us rejoice in and cultivate this spirit; it is ennobling, and will be both a gain and a blessing to our beloved country.

It will be my constant aim to do nothing and permit nothing to be done that will arrest or disturb the growing sentiment of unity and co-operation, this revival of esteem and affection which now animates so many thousands in both the old and the antagonistic sections, but I shall certainly do everything possible to promote and increase it.

Let me again repeat the words of the oath administered by the chief justice, which, in their respective spheres so far as applicable, I would have all my countrymen observe:

"I will faithfully execute the office of president of the United States, and will, to the best of my ability, preserve, protect and defend the constitution of the United States."

This is the obligation I have reverently taken before the Lord most high. To keep it will be my single purpose, my constant prayer, and I shall confidently rely upon the forbearance and assistance of all the people in the discharge of my solemn responsibilities.

### MESSAGE OF THE PRESIDENT.

To the extra session of the LVth congress, convening March 15, 1897:

To the Congress of the United States: Regretting the necessity which has required me to call you together I feel that your assembling in extraordinary session is indispensable, because of the condition in which we find the revenues of the government. It is conceded that its current expenditures are greater than its receipts, and that such a condition has existed for more than three years. With unlimited means at our command we are presenting the remarkable spectacle of increasing our public debt by borrowing money to meet the ordinary outlays incident upon even an economical and prudent administration of the government. An examination of the subject discloses this fact in every detail, and leads inevitably to the conclusion that the condition of the revenue which allows

it is unjustifiable and should be corrected. Since 1893 the receipts of no fiscal year, and with but few exceptions of no month of a fiscal year, have exceeded the expenditures. The receipts of the government from all sources during the year ended June 30, 1894, were \$372,802,498.29, and its expenditures \$442,605,758.87, leaving a deficit the first since the resumption of specie payments, of \$69,803,260.58. Notwithstanding there was a decrease of \$16,769,128.78 in the ordinary expenses of the government, as compared with the previous fiscal year, its income was still not sufficient to provide for its daily necessities, and the gold reserve in the treasury for the redemption of greenbacks was drawn upon to meet them. But this did not suffice, and the government then resorted to loans to replenish the reserve.

The receipts of the government for the fiscal year ended June 30, 1896, were \$390,373,203.30, and the expenditures \$433,178,426.48, showing a deficit of \$42,806,223.18. A further loan of \$100,000,000 was negotiated by the government in February, 1896, the sale netting \$111,166,246, and swelling the aggregate of bonds issued within three years to \$262,315,400. For the fiscal year ended June 30, 1896, the revenues of the government from all sources amounted to \$409,475,408.78, while its expenditures were \$434,673,654.48, or an excess of expenditures over receipts of \$25,203,245.70. In other words, the total receipts for the three fiscal years ended June 30, 1896, were insufficient by \$137,811,729.46 to meet the total expenditures.

Nor has this condition improved. Not only are we without a surplus in the treasury, but with an increase in the public debt there has been a corresponding increase in the annual interest charge from \$2,893,883.23 in 1892, the lowest of any year since 1862 to \$4,357,297.60 in 1896, or an increase of \$11,463,414.40. It may be urged that, even if the revenues of the government had been sufficient to meet all its ordinary expenses during the last three years, the gold reserve would still have been insufficient to meet the demands upon it, and that bonds would necessarily have been issued for its replenishment. Be this as it may, it is clearly manifest, without denying or affirming the cor-

rectness of such a conclusion, that the debt would have been decreased in at least the amount of the deficiency, and business confidence immeasurably strengthened throughout the country. Congress should promptly correct the existing condition. Ample revenues must be supplied, not only for the ordinary expenses of the government, but for the prompt payment of liberal pensions and the liquidation of the principal and interest of the public debt. In raising revenue duties should be so levied upon foreign products as to preserve the home market, so far as possible, to our own producers; to revive and increase manufactures; to relieve and encourage agriculture; to increase our domestic and foreign commerce; to aid and develop mining and building, and to render to labor in every field of useful occupation the liberal wages and adequate reward to which skill and industry are justly entitled. The necessity of the passage of a tariff law which shall provide ample revenue need not be further urged. The imperative demand of the hour is the prompt enactment of such a measure, and to this object I earnestly recommend that congress shall make every endeavor. Before other business is transacted let us first provide sufficient revenue to faithfully administer the government without the contracting of further debt or the continued disturbance of our finances.

# MESSAGE OF THE PRESIDENT.

Regarding a Currency Commission. as Advised by the Indianapolis Conference, Sent to Congress July 21, 1897.

To the Congress of the United States: In my message convening the congress in extraordinary session I call attention to a single subject—that of providing revenue adequate to meet the reasonable and proper expenses of the government. I believed that to be the most pressing subject for settlement then. A bill to provide the necessary revenues for the government has already passed the house of representatives and the senate and awaits executive action. Another question of very great importance is that of the establishment of our currency and banking system on a better basis, which I commented upon in my inaugural address in the following words:

"Our financial system needs some revision; our money is all good, but its value must not further be threatened. It should all be put upon an enduring basis, not subject to attack, nor its stability to doubt or dispute. The several forms of our paper money offer, in my judgment, a constant embarrassment to the government and imperil a safe balance in the treasury."

Nothing was settled more clearly at the late national election than the determination upon the part of the people to keep their currency stable in value and equal to that of the most advanced nations of the world. The soundness of our currency is nowhere questioned. No loss can occur to its holders. It is the system which should be simplified and strengthened, keeping our money just as good as it is now, with less expense to the government and the people.

The sentiment of the country is strongly in favor of early action by congress in this direction, to revise our currency laws and remove them from partisan contention. A notable assembly of business men, with

delegates from twenty-nine states and territories, was held at Indianapolis in January of this year. The financial situation commanded their earnest attention, and after a two days' session the convention recommended to congress the appointment of a monetary commission.

I commend this report to the consideration of congress. The authors of the report recommend a commission "to make a thorough investigation of the monetary affairs and needs of this country in all relations and aspects, and to make proper suggestions as to any evils found to exist and the remedies therefor. This subject should receive the attention of congress at the special session. It ought not to be postponed until the regular session."

I, therefore, urgently recommend that a special commission be created, nonpartisan in its character, to be composed of well-informed citizens of different parties who will command the confidence of congress and the country, because of their special fitness for the work, whose duty it shall be to make recommendations of whatever changes in our present banking and currency laws may be found necessary and expedient, and to report their conclusions before Nov. 1, next, in order that the same may be transmitted by me to congress for its consideration at its first regular session.

It is to be hoped that the report thus made will be as comprehensive and sound as to receive the support of all parties and the favorable action of congress. At all events, such a report cannot fail to be of value to the executive branch of the government, as well as to those charged with public legislation, and to greatly assist in the establishment of an improved system of finance.

## THE PRESIDENT'S MESSAGE.

(To the first regular session of the LVth Congress, Dec. 6, 1897.)

To the Senate and House of Representatives: It gives me pleasure to extend greeting to the LVth congress assembled at the seat of government, with many of whom, senators and representatives, I have been associated in the legislative service. Their meeting occurs under felicitous conditions, justifying sincere congratulation and calling for our grateful acknowledgment to a beneficent Providence which has so signally blessed and prospered us as a nation.

Peace and good will with all the nations of the earth continue unbroken. A matter of genuine satisfaction is the growing feeling of fraternal regard and unification of all sections of our country, the incompleteness of which has too long delayed realization of the highest blessings of the union. The spirit of patriotism is universal and is ever increasing in fervor.

The public questions which now most engross us are lifted far above either partisanship, prejudice or former sectional differences. They affect every part of our common country alike and permit of no division on ancient lines. Questions of foreign policy, of revenue, the soundness of the currency, the inviolability of national obligations, the improvement of the public service, appeal to the individual conscience of every earnest citizen to whatever party he belongs or in whatever section of the country he may reside.

The extra session of this congress which closed during July last enacted important legislation, and while its full effect has not yet been realized, what it has already accomplished assures us of its timeliness and wisdom. To test its permanent value further time will be required, and the people, satisfied with its operation and results thus far, are in no mind to withhold from it a fair trial.

## THE CURRENCY.

Tariff legislation having been settled by the extra session of congress the question next pressing for consideration is that of the currency. The work of putting our finances upon a sound basis, difficult as it may seem, will appear easier when we recall the financial operations of the government since 1866. On the 30th day of June of that year we had outstanding demand liabilities to the sum of \$728,868,447.41. On the 1st of January 1878, these liabilities had been reduced to \$443,889,496.88. Of our interest-bearing obligations the figures are even more striking.

July 1, 1866, the principal of the interest-bearing debt of the government was \$2,332,331,208. On the 1st day of July, 1893, this sum had been reduced to \$585,037,100, an aggregate reduction of \$1,747,294,108. The interest-bearing debt of the United States on the 1st day of December, 1897, was \$847,365,620. The government money now outstanding (Dec. 1) consists of \$346,681,016 of United States notes, \$107,793,280 of treasury notes issued by authority of the law of 1890, \$334,943,503 of silver certificates and \$1,280,761 standard silver dollars.

With the great resources of the government and with the honorable example of the past before us, we ought not to hesitate to enter upon a currency revision which will make our demand obligations less onerous to the government and relieve our financial laws from ambiguity and doubt.

The brief review of what was accomplished from the close of the war to 1893 makes unreasonable and groundless any distrust either of our financial ability or soundness, while the situation from 1893 to 1897 must admonish congress of the immediate necessity of so legislating as to make the return of the conditions then prevailing possible.

There are many plans proposed as a remedy for the evil. Before we can find the true remedy we must appreciate the real evil. It is not that our currency of every kind is not good, for every dollar of it is good; good because the government's pledge is out to keep it so, and that pledge will not be broken. However, the guaranty of our purpose to keep the pledge will be best shown by advancing toward its fulfillment.

The evil of the present is found in the great cost to the government of maintaining the parity of our different forms of money—that is, keeping all of them at par with gold. We surely cannot be longer heedless of the burden this imposes upon the people, even under fairly prosperous conditions, while the last four years have demonstrated that it is not only an expensive charge upon the government but a dangerous menace to the national credit.

It is manifest that we must devise some plan to protect the government against bond issues for repeated redemptions. We must either curtail the opportunity for speculation, made easy by the multifold redemptions of our demand obligations, or increase the gold reserve for their redemption.

We have \$900,000,000 of currency which the government by solemn enactment has undertaken to keep at par with gold. Nobody is obliged to redeem in gold but the government. The banks are not required to redeem in gold. The government is obliged to keep equal with gold all its outstanding currency and coin obligations, while its receipts are not required to be paid in gold. They are paid in every kind of money but gold, and the only means by which the government can with certainty get gold is by borrowing. It can get it in no other way when it most needs it.

The government, without any gold revenue, is pledged to maintain gold redemption, which it has steadily and faithfully done, and which under the authority now given it will continue to do.

The law which requires the government, after having redeemed its United States notes, to pay them out again as current funds, demands a constant replenishment of the gold reserve. This is especially so in times of business panic and when the revenues are insufficient to meet the expenses of the government.

At such times the government has no other way to supply its deficit and maintain redemption, but through the increase of its bonded debt, as during the administration of my predecessor, when \$262,315,400 of 4½ per cent bonds were issued and sold and the proceeds used to pay the expenses of the government in excess of the revenues and sustain the gold reserve. While it is true that the greater part of the proceeds of these bonds were used to supply deficient revenues, a considerable portion was required to maintain the gold reserve.

With our revenues equal to our expenses there would be no deficit requiring the issuance of bonds. But if the gold reserve falls

below \$100,000,000 how will it be replenished except by selling more bonds? Is there any other way practicable under existing law?

The serious question then is: Shall we continue the policy that has been pursued in the past—that is, when the gold reserve reaches the point of danger, issue more bonds and supply the needed gold—or shall we provide other means to prevent the recurring drains upon the gold reserve?

If no further legislation is had and the policy of selling bonds is to be continued then congress should give the secretary of the treasury authority to sell bonds at long or short periods, bearing a less rate of interest than is now authorized by law.

### REDEMPTION OF GREENBACKS.

I earnestly recommend, as soon as the receipts of the government are quite sufficient to pay all the expenses of the government, that when any of the United States notes are presented for redemption in gold and are redeemed in gold such notes shall be kept and set apart and only paid out in exchange for gold. This is an obvious duty, if the holder of the United States note prefers the gold and gets it from the government he should not receive back from the government a United States note without paying gold in exchange for it.

The reason for this is made all the more apparent when the government issues an interest-bearing debt to provide gold for the redemption of United States notes—a non-interest-bearing debt. Surely it should not pay them out again except on demand and for gold. If they are put out in any other way they may return again to be followed by another bond issue to redeem them—another interest-bearing debt to redeem a non-interest-bearing debt.

In my view it is of the utmost importance that the government should be relieved from the burden of providing all the gold required for exchanges and export. This responsibility is alone borne by the government without any of the usual and necessary banking powers to help itself.

The banks do not feel the strain of gold redemption. The whole strain rests upon the government, and the size of the gold reserve in the treasury has come to be, with or without reason, the signal of danger or of security. This ought to be stopped.

If we are to have an era of prosperity in the country, with sufficient receipts for the expenses of the government, we may feel no immediate embarrassment from our present currency; but the danger still exists and will be ever present menacing us so long as the existing system continues.

And, besides, it is in times of adequate revenues and business tranquillity that the government should prepare for the worst. We cannot avoid, without serious consequences, the wise consideration and prompt solution of this question.

### SECRETARY GAGE'S PLAN.

The secretary of the treasury has outlined a plan in great detail for the purpose of removing the threatened recurrence of a depleted gold reserve and saving us from future embarrassment on that account. To this plan I invite your careful consideration.

I concur with the secretary of the treasury in his recommendation that national banks be allowed to issue notes to the face value of the bonds which they have deposited for circulation, and that the tax on circulating notes secured by deposit of such

bonds be reduced to one-half of 1 per cent per annum.

I also join him in recommending that authority be given for the establishment of national banks with a minimum capital of \$25,000. This will enable the smaller villages and agricultural regions of the country to be supplied with currency to meet their needs.

I recommend that the issue of national bank notes be restricted to the denomination of \$10 and upward. If the suggestions I have herein made shall have the approval of congress, then I would recommend that national banks be required to redeem their notes in gold.

### OUR RELATIONS WITH CUBA.

The most important problem with which this government is now called upon to deal pertaining to its foreign relations concerns its duty toward Spain and the Cuban insurrection. Problems and conditions more or less in common with these now existing have confronted this government at various times in the past. The story of Cuba for many years has been one of unrest, growing discontent, an effort toward a larger enjoyment of liberty and self-control, of organized resistance to the mother country, of depression after distress and warfare and of ineffectual settlement, to be followed by renewed revolt.

For no enduring period since the enfranchisement of the continental possessions of Spain in the western continent has the condition of Cuba or the policy of Spain toward Cuba not caused concern to the United States. The prospect from time to time that the weakness of Spain's hold upon the island and the political vicissitudes and embarrassments of the home government might lead to the transfer of Cuba to a continental power called forth between 1823 and 1860 various emphatic declarations of the policy of the United States to permit no disturbance of Cuba's connection with Spain unless in the direction of independence or acquisition by us through purchase, nor has there been any change of this declared policy since upon the part of the government.

The revolution which began in 1868 lasted for ten years, despite the strenuous efforts of the successive peninsular governments to suppress it. Then, as now, the government of the United States testified its grave concern and offered its aid to put an end to bloodshed in Cuba.

The overtures made by Gen. Grant were refused and the war dragged on, entailing great loss of life and treasure and increased injury to American interests, besides throwing enhanced burdens of neutrality on the government. In 1878 peace was brought about by the truce of Zanjón, obtained by negotiations between the Spanish commander, Martinez de Campos, and the insurgent leaders. The present insurrection broke out in February, 1895.

It is not my purpose at this time to recall its remarkable increase or to characterize its tenacious resistance against the enormous forces massed against it by Spain. The revolt and the efforts to subdue it carried destruction to every quarter of the island, developing wide proportions and defying the efforts of Spain for its suppression. The civilized code of war has been disregarded, no less so by the Spaniards than by the Cubans.

The existing conditions cannot but fill this government and the American people with the gravest apprehensions. There is no de-

aire on the part of our people to profit by the misfortunes of Spain. We have only the desire to see the Cubans prosperous and contented, enjoying that measure of self-control which is the inalienable right of man, protected in their right to reap the benefit of the exhaustless treasures of their country.

### FRIENDLY OFFICES REFUSED.

The offer made by my predecessor in April, 1896, tendering the friendly offices of this government, failed. Any mediation on our part was not accepted. In brief, the answer read: "There is no effectual way to pacify Cuba unless it begins with the actual submission of the rebels to the mother country." Then only could Spain act in the premised direction of her own motion and after her own plans.

The cruel policy of concentration was initiated Feb. 16, 1896. The productive districts controlled by the Spanish armies were depopulated. The agricultural inhabitants were herded in and about the garrison towns, their lands laid waste and their dwellings destroyed.

This policy the late cabinet of Spain justified as a necessary measure of war and as a means of cutting off supplies from the insurgents. It has utterly failed as a war measure. It was not civilized warfare. It was extermination. Against this abuse of the rights of war I have felt constrained on repeated occasions to enter the firm and earnest protest of this government.

There was much public condemnation of the treatment of American citizens by alleged illegal arrests and long imprisonment awaiting trial or pending protracted judicial proceedings. I felt it my first duty to make instant demand for the release or speedy trial of all American citizens under arrest. Before the change of the Spanish cabinet in October last twenty-two prisoners, citizens of the United States, had been given their freedom.

For the relief of our own citizens suffering because of the conduct the aid of congress was sought in a special message, and under the appropriation of April 4, 1897, effective aid has been given to American citizens in Cuba, many of them at their own request having been returned to the United States.

### RELATIONS WITH SPAIN.

The instructions given to our new minister to Spain before his departure for his post directed him to impress upon that government the sincere wish of the United States to lend its aid toward the ending of the war in Cuba by reaching a peaceful and lasting result, just and honorable alike to Spain and to the Cuban people.

These instructions recited the character and duration of the contest, the widespread losses it entails, the burdens and restraints it imposes upon us, with constant disturbance of national interests and the injury resulting from an indefinite continuance of this state of things.

It was stated that at this juncture our government was constrained seriously to inquire if the time was not ripe when Spain, of her own volition, moved by her own interests and every sentiment of humanity, should put a stop to this destructive war and make proposals of settlement honorable to herself and just to her Cuban colony. It was urged that, as a neighboring nation, with large interests in Cuba, we could be required to wait only a reasonable time for the mother country to establish its authority

and restore order within the borders of that island; that we could not contemplate an indefinite period for the accomplishment of this result.

No solution was proposed to which the slightest idea of humiliation to Spain could attach, and, indeed, precise proposals were withheld to avoid embarrassment to that government. All that was asked or expected was that some safe way might be speedily provided and permanent peace restored.

It so chanced that the consideration of this offer, addressed to the same Spanish administration which had declined the tenders of my predecessor and which for more than two years had poured men and treasure into Cuba in the fruitless effort to suppress the revolt, fell to others. Between the departure of Gen. Woodford, the new envoy, and his arrival in Spain the statesman, who had directed the policy of his country fell by the hand of an assassin, and, although the cabinet of the late premier still held office and received from our envoy the proposals before, that cabinet gave place within a few days thereafter to a new administration under the leadership of Sagasta.

### A REPLY RECEIVED.

The reply to our note was received on the 23d day of October. It is in the direction of a better understanding. It appreciates the friendly purposes of this government. It admits that our country is deeply affected by the war in Cuba and that its desires for peace are just.

It declares that the present Spanish government is bound by every consideration to a change of policy that should satisfy the United States and pacify Cuba within a reasonable time. To this end Spain has decided to put into effect the political reforms heretofore advocated by the present premier, without halting for any consideration in the path which in its judgment leads to peace. The military operations, it is said, will continue, but will be humane and conducted with all regard for private rights, being accompanied by political action leading to the autonomy of Cuba, while guarding Spanish sovereignty.

This, it is claimed, will result in investing Cuba with a distinct personality; the island to be governed by an executive and by a local council or chamber, reserving to Spain the control of the foreign relations, the army and navy and the judicial administration. To accomplish this the present government proposes to modify existing legislation by decree, leaving the Spanish cortes, with the aid of Cuban senators and deputies, to solve the economic problem and properly distribute the existing debt.

In the absence of a declaration of the measures that this government proposes to take in carrying out its proffer of good offices it suggests that Spain be left free to conduct military operations and grant political reforms, while the United States for its part shall enforce its neutral obligations and cut off the assistance which it is asserted the insurgents receive from this country.

The supposition of an indefinite prolongation of the war is denied. It is asserted that the western provinces are already well-nigh reclaimed; that the planting of cane and tobacco therein has been resumed, and that by force of arms and new and ample reforms very early and complete pacification is hoped for.

The immediate amelioration of existing

conditions under the new administration of Cuban affairs is predicted, and therewith the disturbance and all occasion for any change of attitude on the part of the United States.

Discussion of the question of the international duties and responsibilities of the United States as Spain understands them is presented, with an apparent disposition to charge us with failure in this regard.

This charge is without any basis in fact. It could not have been made if Spain had been cognizant of the constant efforts this government has made, at the cost of millions and by the employment of the administrative machinery of the nation at command, to perform its full duty according to the law of nations. That it has successfully prevented the departure of a single military expedition or armed vessel from our shores in violation of our laws would seem to be a sufficient answer.

But of this aspect of the Spanish note it is not necessary to speak further now. Firm in the conviction of a wholly performed obligation, due response to this charge has been made in diplomatic course.

Throughout all these horrors and dangers to our own peace this government has never broken or in any way abrogated its sovereign prerogative of reserving to itself the determination of its policy and course according to its own high sense of right, and in consonance with the dearest interests and convictions of our own people, should the prolongation of the conflict so demand.

#### FORCIBLE ANNEXATION.

Of the untried measures there remain only: Recognition of the insurgents as belligerents; recognition of the independence of Cuba; neutral intervention to end the war by imposing a rational compromise between the contestants, and intervention in favor of one or the other party.

I speak not of forcible annexation, for that cannot be thought of. That, by our code of morality, would be criminal aggression.

Recognition of the belligerency of the Cuban insurgents has often been canvassed as a possible if not inevitable step, both in regard to the previous ten years' struggle and during the present war. I am not unmindful that the two houses of congress in the spring of 1894 expressed the opinion by concurrent resolution that a condition of public war existed requiring or justifying the recognition of the state of belligerency in Cuba, and during the extra session the senate voted a joint resolution of like import, which, however, was not brought to a vote in the house of representatives.

In the presence of these significant expressions of the sentiment of the legislative branch it behooves the executive to soberly consider the conditions under which so important a measure must needs rest for justification.

It is to be seriously considered whether the Cuban insurrection possesses beyond dispute the attributes of statehood which alone can demand the recognition of belligerency in its favor. Possession, in short, of the essential qualifications of sovereignty by the insurgents and the conduct of the war by them according to the received code of war are no less important factors toward the determination of the problem of belligerency than are the influences and consequences of the struggle upon the internal policy of the recognizing state.

The utterances of President Grant in his

memorable message of Dec. 7, 1875, are significantly relevant to the present situation in Cuba, and it may be wholesome now to recall them. At that time a ruinous conflict had for seven years wasted the neighboring island. During all those years an utter disregard of the laws of civilized warfare and of the just demand of humanity, which called forth expressions of condemnation from the nations of Christendom, continued unabated. Desolation and ruin pervaded that productive region, enormously affecting the commerce of all commercial nations, but that of the United States more than any other by reason of proximity and larger trade and intercourse.

#### GRANT ON RECOGNITION.

At that juncture Grant uttered these words, which now, as then, sum up the elements of the problem:

"A recognition of the independence of Cuba being, in my opinion, impracticable and indefensible, the question which next presents itself is that of the recognition of belligerent rights in the parties to the contest. In a former message to congress I had occasion to consider this question, and reached the conclusion that the conflict in Cuba, dreadful and devastating as were its incidents, did not rise to the fearful dignity of war."

It is possible that the acts of foreign powers, and even acts of Spain herself, of this very nature, might be pointed to in defense of such recognition. But now, as in its past history, the United States should carefully avoid the false lights which lead it into the mazes of doubtful law and of questionable propriety, and adhere rigidly and sternly to the rule which has been its guide, of doing only that which is right and honest and of good report.

The question of according or of withholding rights of belligerency must be judged in every case in view of the particular attending facts. Unless justified by necessity, it is always, and justly, regarded as an unfriendly act and a gratuitous demonstration of moral support to the rebellion. It is necessary, and it is required, when the interests and rights of another government or of its people are so far affected by a pending civil conflict as to require a definition of its relations to the parties thereto. But this conflict must be one which is recognized in the sense of international law as war.

Belligerency, too, is a fact. The mere existence of contending armed bodies and their occasional conflicts do not constitute war in the sense referred to. Applying to the existing conditions of affairs in Cuba the tests recognized by publicists and writers on international law, and which have been observed by nations of dignity, honesty and power, when free from sensitive or selfish and unworthy motives, I fail to find in the insurrection the existence of such a substantial political organization, real, palpable and manifest to the world, having the forms and capable of the ordinary functions of government toward its own people and to other states, with courts for the administration of justice, with a local habitation, possessing such organization of force, such material, such occupation of territory, as to take the contest out of the category of a mere rebellious insurrection or occasional skirmishes and place it on the terrible footing of war, to which a recognition of belligerency would aim to elevate it.

The contest, moreover, is solely on land; the insurrection has not possessed itself of a single seaport whence it may send forth

its flag, nor has it any means of communication with foreign powers except through the military lines of its adversaries. No apprehension of any of those sudden and difficult complications which the war upon the ocean is apt to precipitate upon the vessels, both commercial and national, and upon the consular officers of other powers, call for the deduction of their relations of the parties to the contest.

"Considered as a question of expediency, I regard the accordance of belligerent rights still to be as unwise and premature as I regard it to be, at present, indefensible as a measure of right.

"Such recognition entails upon the country according the rights which flow from it difficult and complicated duties, and requires the exaction from the contending parties of the strict observance of their rights and obligations. It confers the right of search upon the high seas by vessels of both parties; it would subject the carrying of arms and munitions of war, which now may be transported freely and without interruption in vessels of the United States, to detention and to possible seizure; it would give rise to countless vexatious questions, would release the parent government from responsibility for acts done by the insurgents and would invest Spain with the right to exercise the supervision recognized by our treaty of 1795 over our commerce on the seas, a very large part of which, in its traffic between the Atlantic and the gulf states and between all of them and the states on the Pacific, passes through the waters which wash the shores of Cuba. The exercise of this supervision could scarce fail to lead, if not to abuses, certainly to collisions perilous to the peaceful relations of the two states.

"There can be little doubt as to what result such supervision would before long draw this nation. It would be unworthy of the United States to inaugurate the possibilities of such results by measures of questionable right or expediency or by any indirection."

#### THE ACT OF RECOGNITION.

Turning to the practical aspects of a recognition of belligerency and reviewing its inconveniences and positive dangers, still further pertinent considerations appear. In the code of nations there is no such thing as a naked recognition of belligerency unaccompanied by the assumption of international neutrality. Such recognition will not confer upon either party to a domestic conflict a status not theretofore actually possessed or affect the relation of either party to other states.

The act of recognition usually takes the form of a solemn proclamation of neutrality, which recites the de facto condition of belligerency as its motive. It announces a domestic law of neutrality in the declaring state. It assumes the international obligations of a neutral in the presence of a public state of war. It warns all citizens and others within the jurisdiction of the proclamation that they violate those rigorous obligations at their own peril and cannot expect to be shielded from the consequences. The right of visit and search on the seas and seizure of vessels and cargoes and contraband of war under admiralty law must, under international law, be admitted as a legitimate consequence of a proclamation of belligerency.

While according the equal belligerent right defined by public law to each party in our ports disfavor would be imposed on both which, while nominally equal, would weigh

heavily in behalf of Spain herself. Possessing a navy and controlling the ports of Cuba, her maritime rights could be asserted not only for the military investment of the island, but up to the margin of our own territorial waters, and a condition of things would exist for which the Cubans within their own domain could not hope to create a parallel, while its creation through aid or sympathy from within our domain would be even more impossible than now, with the additional obligations of international neutrality we would perform assume.

The enforcement of this enlarged and onerous code of neutrality would only be ineffectual within our own jurisdiction by land and sea and applicable by our own instrumentalities. It could impart to the United States no jurisdiction between Spain and the insurgents. It would give the United States no right of intervention to enforce the conduct of the strife within the paramount authority of Spain, according to the international code of war.

For these reasons I regard the recognition of the belligerency of the Cuban insurgents as now unwise and therefore unadvisable. Should this step hereafter be deemed wise as a measure of right and duty the executive will take it.

#### REFORMS BY SPAIN.

Intervention upon humanitarian grounds has been frequently suggested and has not failed to receive my most anxious and earnest consideration. But should such a step be now taken when it is apparent that a hopeful change has supervened in the policy of Spain toward Cuba? A new government has taken office in the mother country. It is pledged in advance to the declaration that all the effort in the world cannot suffice to maintain peace in Cuba by the bayonet; that vague promises of reform after subjugation afford no solution of the insular problem; that with a substitution of commanders must come a change of the past system of warfare for one in harmony with a new policy which shall no longer aim to drive the Cubans to the "horrible alternative of taking to the thicket or succumbing in misery" that reforms must be instituted in accordance with the needs and circumstances of the time, and that these reforms, while designed to give full autonomy to the colony and to create a virtual entity and self-controlled administration, shall yet conserve and affirm the sovereignty of Spain by a just distribution of powers and burdens upon a basis of mutual interests untainted by methods of selfish expediency.

The first acts of the new government lie in these honorable paths. The policy of cruel rapine and extermination that so long shocked the universal sentiment of humanity has been reversed. Under the new military commander a broad clemency is proffered. Measures have already been set on foot to relieve the horrors of starvation. The power of the Spanish armies, it is asserted, is to be used not to spread ruin and desolation, but to protect the resumption of peaceful agricultural pursuits and productive industries.

That past methods are futile to force a peace by subjugation is freely admitted and that ruin without conciliation must inevitably fail to win for Spain the fidelity of a contented dependency.

Decrees in application of the foreshadowed reforms have already been promulgated. The full text of these decrees has not been received, but as furnished in a telegraphic summary from our minister are: All civil

and electoral rights of peninsular Spaniards are, in virtue of existing authority, forthwith extended to colonial Spaniards. A scheme of autonomy has been proclaimed by decree to become effective upon ratification by the cortes. It creates a Cuban parliament, which, with the insular executive, can consider and vote upon all subjects affecting local order and interests, possessing unlimited powers save as to matters of state, war and the navy, as to which the governor-general acts by his own authority as the delegate of the central government.

This parliament receives the oath of the governor-general to preserve faithfully the liberties and privileges of the colony and to let the colonial secretaries be responsible. It has the right to propose to the central government, through the governor-general, modifications of the national charter and to invite new projects of law or executive measures in the interest of the colony.

Besides its local powers it is competent, first, to regulate electoral registration and procedure and prescribe the qualifications of electors and the manner of exercising suffrage; second, to organize courts of justice, with native judges from members of the local bar; third, to frame the insular budget both as to expenditures and revenues without limitations of any kind, and to set apart the revenues to meet the Cuban share of the national budget, which latter will be voted by the national cortes, with the assistance of the Cuban senators and deputies; fourth, to initiate or take part in the negotiations of the national government for commercial treaties which may affect Cuban interests; fifth, to accept or reject commercial treaties which the national government may have concluded without the participation of the Cuban government; sixth, to frame the colonial tariff, acting in accord with the peninsular government in scheduling articles of mutual commerce between the mother country and the colonies.

Before introducing or voting upon a bill the Cuban government or the chambers will lay the project before the central government and hear its opinion thereon, all the correspondence in such regard being made public.

Finally, all conflicts of jurisdiction arising between the different municipal, provincial and insular assemblies, or between the latter and the insular executive power, and which from their nature may not be referable to the central government for decision, shall be submitted to the courts.

That the government of Sagasta has entered upon a course from which recession with honor is impossible can hardly be questioned; that in the few weeks it has existed it has made earnest of the sincerity of its professions is undeniable. I shall not impugn its sincerity, nor should impatience be suffered to embarrass it in the task it has undertaken.

#### WHAT IS DUE TO SPAIN.

It is honestly due to Spain and to our friendly relations with Spain that she should be given a reasonable chance to realize her expectations and to prove the asserted efficacy of the new order of things to which she stands irrevocably committed. She has recalled the commander whose brutal orders inflamed the American mind and shocked the civilized world. She has modified the horrible order of concentration and has undertaken to care for the helpless and permit those who desire to resume the cultivation of their fields to do so and assures them of

the protection of the Spanish government in their lawful occupations.

She has just released the Competitor prisoners, heretofore sentenced to death and who have been the subject of repeated diplomatic correspondence during both this and the preceding administration. Not a single American citizen is now in arrest or confinement in Cuba of whom this government has any knowledge.

The near future will demonstrate whether the indispensable condition of a righteous peace, just alike to the Cubans and to Spain, as well as equitable to all our interests, so intimately involved in the welfare of Cuba, is likely to be attained. If not further and other action by the United States will remain to be taken.

When that time comes that action will be determined in the line of indisputable right and duty. It will be faced without misgivings or hesitancy, in the light of the obligations this government owes to itself, to the people who have confided to it the protection of their interests and honor, and to humanity.

Sure of the right, keeping free from all offense ourselves, actuated only by upright and patriotic considerations, moved neither by passion nor selfishness, the government will continue its watchful care over the rights and property of American citizens and will abate none of its efforts to bring about by peaceful agencies a peace which shall be honorable and enduring. If it shall hereafter appear to be a duty imposed by our obligations to ourselves, to civilization and humanity, to intervene with force, it shall be without fault on our part and only because the necessity of such action will be so clear as to command the support and approval of the civilized world.

#### THE ANNEXATION OF HAWAII.

By a special message dated the 16th day of June last I laid before the senate a treaty signed that day by the plenipotentiaries of the United States and of the republic of Hawaii, having for its purpose the incorporation of the Hawaiian Islands as an integral part of the United States and under its sovereignty.

The senate having removed the injunction of secrecy, although the treaty is still pending before that body, the subject may be properly referred to in this message, because the necessary action of congress is required to determine by legislation many details of the eventual union should the fact of annexation be accomplished, as I believe it should be.

While consistently disavowing from a very early period any aggressive policy of absorption in regard to the Hawaiian group, a long series of declarations through three-quarters of a century has proclaimed the vital interest of the United States in the independent life of the islands and their intimate commercial dependence upon this country. At the same time it has been repeatedly asserted that in no event could the entity of Hawaiian statehood cease by the passage of the islands under the domination or influence of another power than the United States.

Under these circumstances the logic of events required that annexation, heretofore offered but declined, should in the ripeness of time come about as the natural result of the strengthening ties that bind us to those islands, and be realized by the free will of the Hawaiian state.

That treaty was unanimously ratified with-

out amendment by the senate and president of the republic of Hawaii on the 10th of September last and only awaits the favorable action of the American senate to effect the complete absorption of the islands into the domain of the United States.

What the conditions of such a union shall be, the political relation thereof to the United States, the character of the local administration, the quality and degree of the elective franchise of the inhabitants, the extension of the federal laws to the territory or the enactment of special laws to fit the peculiar conditions thereof, the regulation, if need be, of the labor system therein, are all matters which the treaty has wisely relegated to congress.

If the treaty is confirmed, as every consideration of dignity and honor requires, the wisdom of congress will see to it that, avoiding abrupt assimilation of elements perhaps hardly yet fitted to share in the highest franchises of citizenship, and having due regard to the geographical conditions, the just provisions for self-rule in local matters with the largest political liberties as an integral part of our nation, will be accorded to the Hawaiians. No less is due to a people who, after nearly five years of demonstrated capacity to fulfill the obligations of self-governing statehood, come of their own free will to merge their destinies in our body politic.

The questions which have arisen between Japan and Hawaii by reason of the treatment of Japanese laborers emigrating to the islands under the Hawaiian-Japanese convention of 1888 are in a satisfactory stage of settlement by negotiation.

This government has not been invited to mediate, and, on the other hand, has sought no intervention in that matter further than to evince its kindest disposition toward such a speedy and direct adjustment by the two sovereign states in interest as shall comport with equity and honor.

It is gratifying to learn that the apprehensions at first displayed on the part of Japan lest the cessation of Hawaii's national life through annexation might impair privileges to which Japan honorably laid claim have given place to confidence in the uprightness of this government and in the sincerity of its purpose to deal with all possible ulterior questions in the broadest spirit of friendliness.

#### CENTRAL AMERICAN AFFAIRS.

As to the representation of this government to Nicaragua, Salvador and Costa Rica I have concluded that William M. Merry, confirmed as minister of the United States to the states of Nicaragua, Salvador and Costa Rica, shall proceed to San Jose, Costa Rica, and there temporarily establish the headquarters of the United States to those three states.

I took this action for what I regarded as the paramount interests of this country. It was developed upon investigation by the secretary of state that the government of Nicaragua, while not unwilling to receive Mr. Merry in his diplomatic capacity, was unable to do so because of the compact concluded June 20, 1896, whereby that republic and those of Salvador and Honduras, forming what is known as the Greater Republic of Central America, had surrendered to the representative diet thereof their right to receive and send diplomatic agents.

The diet was not willing to accept him because he was not accredited to that body. I could not accredit him to that body be-

cause the appropriation law of congress did not permit it. Mr. Baker, the present minister at Managua, has been directed to present his letters of recall.

W. Godfrey Hunter has likewise been accredited to the governments of Guatemala and Honduras, the same as his predecessor. Guatemala is not a member of the Greater Republic of Central America, but Honduras is. Should this latter government decline to receive him he has been instructed to report the fact to his government and await its further instructions.

#### THE NICARAGUAN CANAL.

A subject of large importance to our country and increasing appreciation on the part of the people is the completion of the great highway of trade between the Atlantic and Pacific, known as the Nicaraguan canal. Its utility and value to American commerce are universally admitted.

The commission appointed under date of July 24 last "to continue the surveys and examinations authorized by the act approved March 2, 1895," in regard to "the proper route, feasibility and cost of construction of the Nicaraguan canal, with a view of making complete plans for the entire work of construction of such canal," is now employed in the undertaking.

In the future I shall take occasion to transmit to congress the report of this commission, making at the same time such further suggestions as may then seem advisable.

#### THE MONETARY COMMISSION.

Under the provisions of the act of congress approved March 3, 1897, for the promotion of an international agreement respecting bimetalism, I appointed, on the 14th day of April, 1897, Edward C. Welford of Colorado, Adlai E. Stevenson of Illinois and Charles J. Paine of Massachusetts as special envoys to represent the United States.

They have been diligent in their efforts to secure the co-operation of European countries in the international settlement of the question, but up to this time have not been able to secure an agreement contemplated by their mission.

The gratifying action of our great sister republic of France in joining this country in the attempt to bring about an agreement among the principal nations of Europe whereby a fixed and relative value between gold and silver shall be secured furnished assurance that we are not alone among the larger nations of the world in realizing the international character of the problem and in the desire of reaching some wise and practical solution of it. The British government has published a resume of the steps taken jointly by the French ambassador in London and the special envoys of the United States with whom our ambassador at London actively co-operated in the presentation of this subject to her majesty's government. This will be laid before congress.

Our special envoys have not made their final report, as further negotiations between the representatives of this government and the governments of other countries are pending and in contemplation.

They believe that doubts which have been raised in certain quarters respecting the position of maintaining the stability of the parity between the metals and kindred questions may yet be solved by further negotiations.

Meanwhile it gives me satisfaction to state that the special envoys have already

demonstrated their ability and fitness to deal with the subject, and it is to be earnestly hoped that their labors may result in an international agreement which will bring about a recognition of both gold and silver as money upon such terms and with such safeguards as will secure the use of both metals upon a basis which shall work no injustice to any class of our citizens.

#### TRADE WITH FOREIGN COUNTRIES.

In order to execute as early as possible the provisions of the third and fourth sections of the revenue act approved July 24, 1897, I appointed John A. Kasson of Iowa a special commissioner plenipotentiary to undertake the requisite negotiations with foreign countries desiring to avail themselves of these provisions. The negotiations are now proceeding with several governments, both European and American.

It is believed that by a careful exercise of the powers conferred by that act some grievances of our own and of other countries in our mutual trade relations may be either removed or largely alleviated, and that the volume of our commercial exchanges may be enlarged with advantage to both contracting parties.

Most desirable from every standpoint of national interest and patriotism is the effort to extend our foreign commerce. To this end our merchant marine should be improved and enlarged. We should do our full share of the carrying trade of the world. We do not do it now. We should be the laggard no longer.

The inferiority of our merchant marine is justly humiliating to the national pride. The government by every proper constitutional means should aid in making our ships familiar visitors at every commercial port of the world, thus opening up new and valuable markets to the surplus products of the farm and the factory.

#### PROTECTION FOR THE SEALS.

The efforts which had been made during the two previous years by my predecessor to secure better protection to the fur seals in the north Pacific ocean and Bering sea were renewed at an early date by this administration and have been pursued with earnestness.

Upon my invitation the governments of Japan and Russia sent delegates to Washington and an international conference was held during the months of October and November last, wherein it was unanimously agreed that under the existing regulations this species of useful animals was threatened with extinction and that an international agreement of all the interested powers was necessary for their adequate protection.

The government of Great Britain did not see proper to be represented at this conference, but subsequently sent to Washington as delegates the expert commissioners of Great Britain and Canada, who had during the last two years visited the Pribilof Islands, and who met in conference similar commissioners on the part of the United States.

The result of this conference was an agreement on important facts connected with the condition of the seal herd, heretofore in dispute, which should place beyond controversy the duty of the governments concerned to adopt measures without delay for the preservation and restoration of the herd. Negotiations to this end are now in progress,

the result of which I hope to be able to report to congress at an early date.

#### INTERNATIONAL ARBITRATION.

International arbitration cannot be omitted from the list of subjects claiming our consideration. Events have only served to strengthen the general views on this question expressed in my inaugural address.

The best sentiment of the civilized world is moving toward the settlement of differences between nations without resorting to the horrors of war. Treaties embodying these humane principles on broad lines without in any way imperiling our interests or our honor shall have my constant encouragement.

#### THE PARIS EXPOSITION.

The acceptance by this government of the invitation of the republic of France to participate in the universal exposition of 1900 at Paris was immediately followed by the appointment of a special commissioner to represent the United States in the proposed exposition, with special reference to the securing of space for an adequate exhibition in behalf of the United States.

The special commissioner delayed his departure for Paris long enough to ascertain the probable demand for space by American exhibitors. His inquiries developed an almost unprecedented interest in the proposed exposition, and the information thus acquired enabled him to justify an application for a much larger allotment of space for the American section than had been reserved by the exposition authorities.

The result was particularly gratifying in view of the fact that the United States was one of the last countries to accept the invitation of France. The reception accorded our special commissioner was most cordial, and he was given every reasonable assurance that the United States would receive a consideration commensurate with the proportions of our exhibit.

The report of the special commissioner as to the magnitude and importance of the coming exposition and the great demand for space by American exhibitors supplies new arguments for a liberal and judicious appropriation by congress to the end that an exhibit fairly representative of the industries and resources of our country may be made in an exposition which will illustrate the world's progress during the nineteenth century.

That exposition is intended to be the most important and comprehensive of the long series of international exhibitions of which our own at Chicago was a brilliant example, and it is desirable that the United States should make a worthy exhibit of American genius and skill and their unrivaled achievements in every branch of industry.

#### THE AMERICAN NAVY.

The present immediately effective of the navy consists of four battleships of the first class, two of the second and forty-eight other vessels, ranging from armored cruisers to torpedo boats. There are under construction five battleships of the first class, sixteen torpedo boats and one submarine boat.

No provision has yet been made for the armor of three of the five battleships, as it has been impossible to obtain it at the price fixed by congress. It is of great importance that congress provide this armor,

as until then the ships are of no fighting value.

The present naval force, especially in view of its increase by the ships now under construction, while not so large as that of a few other powers, is a formidable force; its vessels are the very best of each type; and with the increase that should be made to it from time to time in the future, and careful attention to keeping it in a high state of efficiency and repair, it is well adapted to the necessities of the country.

The great increase of the navy which has taken place in recent years was justified by the requirements for national defense and has received public approbation. The time has now arrived, however, when this increase, to which the country is committed, should for a time take the form of increased facilities commensurate with the increase of our naval vessels.

It is an unfortunate fact that there is only one dock on the Pacific coast capable of docking our largest ships, and only one on the Atlantic coast, and that the latter has for the last six or seven months been under repair and therefore incapable of use. Immediate steps should be taken to provide three or four docks of this capacity on the Atlantic coast, at least one on the Pacific and a floating dock on the gulf. This is the recommendation of a very competent board appointed to investigate the subject.

There should also be ample provision made for powder and projectiles and other munitions of war and for an increased number of officers and enlisted men. Some additions are also necessary to our navy yards for the repair and care of our larger number of vessels.

As there are now on the stocks five battle-ships of the largest class which cannot be completed for a year or two, I concur with the recommendation of the secretary of the navy for an appropriation authorizing the construction of one battleship for the Pacific coast, where at present there is only one in commission and four under construction, while on the Atlantic coast there are three in commission and four under construction, and also that several torpedo boats be authorized in connection with our general system of coast defense.

### GOVERNMENT OF ALASKA.

The territory of Alaska requires the prompt and early attention of congress. The conditions now existing demand material changes in the laws relative to the territory. The great influx of population during the last summer and fall and the prospect of a still larger immigration in the spring will not permit us to longer neglect the extension of civil authority within the territory or postpone the establishment of a more thorough government.

A general system of public surveys has not been extended to Alaska and all entries thus far made in that district are upon special surveys. The act of congress extending to Alaska the mining laws of the United States contained the reservation that it should not be construed to put in force the general land laws of the country. By act approved March 3, 1891, authority was given for entry of lands for town-site purposes and also for the purchase of not exceeding 160 acres then or thereafter occupied for purposes of trade and manufacture.

The purpose of congress, as thus far expressed, has been that only such rights should apply to that territory as should be specifically named. It will be seen how

much remains to be done for that vast and remote and yet promising portion of our country.

Special authority was given to the president by the act of congress approved July 24, 1897, to divide that territory into two land districts, and to designate the boundaries thereof and to appoint registers and surveyors of such land offices, and the president was also authorized to appoint a surveyor-general for the entire district. Pursuant to this authority a surveyor-general and receiver have been appointed, with offices at Sitka.

If in the ensuing year the conditions justify it, the additional land district authorized by law will be established, with an office at some point in the Yukon valley. No appropriation, however, was made for this purpose, and that is now necessary to be done for the two land districts into which the territory is to be divided.

I concur with the secretary of war in his suggestions as to the necessity for a military force in the territory of Alaska for the protection of persons and property. Already a small force, consisting of twenty-five men with two officers, under command of Lieut.-Col. Randall of the 8th Infantry, has been sent to St. Michael to establish a military post.

As it is to the interest of the government to encourage the settlement of the country and its duty to follow up its citizens with the benefit of legal machinery, I earnestly urge upon congress the establishment of a system of government with such flexibility as will enable it to adjust itself to the future areas of greatest population.

The startling though possibly exaggerated reports from the Yukon river country of the probable shortage of food for the large number of people who are wintering there without the means of leaving the country are confirmed in such measure as to justify bringing the matter to the attention of congress. Access to that country in winter can be had only by the passes from Dyea and vicinity, which is a most difficult and perhaps an impossible task. However, should these reports of the suffering of our fellow-citizens be further verified, every effort at any cost should be made to carry them relief.

### INDIAN TERRITORY QUESTION.

For a number of years past it has been apparent that the conditions under which the five civilized tribes were established in Indian territory under treaty provisions with the United States, with the right of self-government, and the exclusion of all white persons from within their borders, have undergone so complete a change as to render the continuance of the system thus inaugurated practically impossible.

The total number of the five civilized tribes as shown by the last census is 45,494, and this number has not materially increased; while the white population is estimated at from 200,000 to 250,000, which by permission of the Indian government has settled in the territory.

The present area of Indian territory contains 25,694,664 acres, much of which is very fertile land. The United States citizens residing in the territory, most of whom have gone there by invitation or with consent of the tribal authorities, have made permanent homes for themselves. Numerous towns have been built, in which from 500 to 5,000 white people now reside. Valuable residences and business houses have been erected in many of them.

Large business enterprises are carried on in which vast sums of money are employed, and yet these people who have invested their capital in the development of the productive resources of the country are without title to the land they occupy and have no voice whatever in the government, either of the nations or tribes. Thousands of their children who were born in the territory are of school age, but the doors of the schools of the nations are shut against them and what education they can get is by private contribution. No provision for the protection of life or property of these white citizens is made by the tribal governments and courts.

The secretary of the interior reports that leading Indians have absorbed great tracts of land to the exclusion of the common people, and government by Indian aristocracy has been practically established, to the detriment of the people. It has been found impossible for the United States to keep its citizens out of the territory, and the executive conditions contained in treaties with these nations have for the most part become impossible of execution. Nor has it been possible for the tribal governments to secure to each individual Indian his full enjoyment in common with other Indians of the common property of the nations.

#### INDIAN CITIZENSHIP.

Friends of the Indians have long believed that the best interests of the Indians of the five civilized tribes would be found in American citizenship, with all the rights and privileges which belong to that condition.

By section 16 of the act of March 3, 1893, the president was authorized to appoint three commissioners to enter into negotiations with the Cherokee, Choctaw, Chickasaw, Muskogee (or Creek), and Seminole nations, commonly known as the five civilized tribes, in Indian territory. Briefly, the purposes of the negotiations were to be: The extinguishment of tribal titles to any lands within that territory now held by any and all such nations or tribes, either by cession of the same or some part thereof to the United States, or by allotment and division of the same in severalty among the Indians of such nations or tribes respectively as may be entitled to the same, or by such other method as may be agreed upon between the several nations and tribes aforesaid, or each of them, with the United States, with a view to such an adjustment upon the basis of justice and equity as may, with the consent of said nations of Indians, so far as may be necessary, be requisite and suitable to enable the ultimate creation of a state or states of the union, which shall embrace the lands within the Indian territory.

The commission met much opposition from the beginning. The Indians were very slow to act, and those in control manifested a decided disinclination to meet with favor the propositions submitted to them.

A little more than three years after its organization the commission effected an agreement with the Choctaw nation alone. The Chickasaws, however, refused to agree to its terms, and as they have a common interest with the Choctaws in the lands of said nations the agreement with the latter nation could have no effect without the consent of the former. April 23, 1897, the commission effected an agreement with both tribes—the Choctaw and Chickasaw. This agreement it is understood has been ratified by the constituted authorities of the respective tribes or nations parties thereto,

and only requires ratification by congress to make it binding.

Sept. 27, 1897, an agreement was effected with the Creek nation, but it is understood that the national council of said nation has refused to ratify the same. Negotiations are yet to be had with the Cherokees, the most populous of the five civilized tribes, and with the Seminoles, the smallest in point of numbers and territory.

The provision in the Indian appropriation act approved June 10, 1896, makes it the duty of the commission to investigate and determine the rights of applicants for citizenship in the five civilized tribes. The commission is at present engaged in this work among the tribes and has made appointments for taking the census of these people up to and including the 30th of the present month.

Should the agreement between the Choctaws and Chickasaws be ratified by congress and should the other tribes fail to make an agreement with the commission, then it will be necessary that some legislation shall be had by congress which, while just and honorable to the Indians, shall be equitable to the white people who have settled upon these lands by invitation of the tribal nations.

Henry L. Dawes, chairman of the commission, in a letter to the secretary of the interior, under date of Oct. 11, 1897, says:

"Individual ownership is in their [the commission's] opinion absolutely essential to any permanent improvement in present conditions, and the lack of it is the root of nearly all the evils which so grievously afflict these people. Allotment by agreement is the only possible method, unless the United States courts are clothed with the authority to apportion the lands among the citizen Indians, for whose use it was originally granted."

I concur with the secretary of the interior that there can be no cure for the evils engendered by the perversion of these great trusts excepting by their resumption by the government which created them.

#### QUARANTINE REFORMS.

The recent prevalence of yellow fever in a number of cities and towns throughout the south has resulted in much disturbance of commerce and demonstrated the necessity of such amendments to our quarantine laws as will make the regulations of the national quarantine authorities paramount.

The secretary of the treasury, in the portion of his report relating to the operation of the marine hospital service, calls attention to the defects in the present quarantine laws and recommends amendments thereto which will give the treasury department the requisite authority to prevent the invasion of epidemic diseases from foreign countries, and in time of emergency like that of last summer will add to the efficiency of the sanitary measures for the protection of the people and at the same time prevent unnecessary restriction of commerce. I concur in his recommendation.

In further effort to prevent the invasion of the United States by yellow fever the importance of the discovery of the exact cause of the disease, which up to the present time has been undetermined, is obvious and to this end a systematic bacteriological investigation should be made.

I therefore recommend that congress authorize the appointment of a commission by the president, to consist of four expert

bacteriologists, one to be selected from the medical officers of the marine hospital service, one to be appointed from civil life, one to be detailed from the medical officers of the army and one from the medical officers of the navy.

### SALE OF THE UNION PACIFIC.

The Union Pacific railway main line was sold under the decree of the United States court for the district of Nebraska the 1st and 2d of November of this year. The amount due the government consisted of the principal of the subsidy bonds, \$27,236,512, and the accrued interest thereon, \$31,211,711.75, making the total indebtedness \$58,448,223.75. The bid at the sale covered the first mortgage lien and the entire mortgage claim of the government, principal and interest.

The sale of the subsidized portion of the Kansas Pacific line, upon which the government holds a second mortgage lien, has been postponed at the instance of the government to Dec. 16, 1897. The debt of this division of the Union Pacific railway to the government Nov. 1, 1897, was the principal of the subsidy bonds, \$6,303,000, and the unpaid and accrued interest thereon, \$6,625,690.33, making a total of \$12,928,690.33. The sale of this road was originally advertised for Nov. 4, but for the purpose of securing the utmost public notice of the event it was postponed until Dec. 16, and a second advertisement of the sale was made.

By the decree of the court the upset price on the sale of the Kansas Pacific will yield to the government the sum of \$2,500,000 over all prior liens, costs and charges. If no other or better bid is made this sum is all that the government will receive on its claim of nearly \$13,000,000. The government has no information as to whether there will be other bidders or a better bid than the minimum amount herein stated.

The question presented, therefore, is whether the government shall, under the authority given it by the act of March 3, 1897, purchase or redeem the road in the event that a bid is not made by private parties covering the entire government claim.

To qualify the government to bid at the sales will require a deposit of \$900,000, as follows: In the government cause, \$500,000, and in each of the first mortgage causes, \$200,000, and in the latter the deposit must be in cash. Payment at the sale is as follows: Upon the acceptance of the bid a sum which, with the amount already deposited, shall equal 15 per cent of the bid; the balance in installments of 25 per cent, thirty, forty and fifty days after the confirmation of the sale. The lien on the Kansas Pacific prior to that of the government on the 30th day of July, 1897, principal and interest, amounted to \$7,281,048.11. The government, therefore, should it become the highest bidder, will have to pay the amount of the first mortgage lien.

I believe that under the act of 1887 it has the authority to do this, and in the absence of any action by congress I shall direct the secretary of the treasury to make the necessary deposit as required by the court's decree to qualify as a bidder and to bid at the sale a sum which will at least equal the principal of the debt due the government; but I suggest, in order to remove all controversy, that an amendment of the law be immediately passed explicitly giving such powers and appropriating in general terms whatever sum is sufficient therefor.

In so important a matter as the government becoming the possible owner of railroad property, which it perforce must conduct and operate, I feel constrained to lay before congress these facts for its consideration and action before the consummation of the sale.

It is clear to my mind that the government should not permit the property to be sold at a price which will yield less than one-half of the principal of its debt and less than one-fifth of its entire debt, principal and interest. But whether the government, rather than accept less than its claim, should become a bidder and thereby the owner of the property, I submit to congress for action.

### THE NEW LIBRARY.

The library building provided for by the act of congress approved April 16, 1884, has been completed and opened to the public. It should be a matter of congratulation that through the foresight and munificence of congress the nation possesses this noble treasure-house of knowledge.

It is earnestly to be hoped that, having done so much toward the cause of education, congress will continue to develop the library in every phase of research, to the end that it may be not only one of the most magnificent but among the richest and most useful libraries in the world.

### EXTENSION OF CIVIL SERVICE.

The important branch of our government known as the civil service, the practical improvement of which has long been a subject of earnest discussion, has of late years received increased legislative and executive approval. During the last few months the service has been placed upon a still firmer basis of business methods and personal merit.

While the right of our veteran soldiers to reinstatement in deserving cases has been asserted, dismissals for merely political reasons have been carefully guarded against, the examinations for admittance to the service enlarged and at the same time rendered less technical and more practical, and a distinct advance has been made by giving a hearing before dismissal upon all cases where incompetency is charged or demand made for the removal of officials in any of the departments.

The order has been made to give to the accused his right to be heard, but without in any way impairing the power of removal, which should always be exercised in cases of incompetency and incompetency, and which is one of the vital safeguards of the civil-service reform system, preventing stagnation and deadwood, and keeping every employee keenly alive to the fact that the security of his tenure depends not on favor but on his own tested and carefully watched record of service.

Much, of course, still remains to be accomplished before the system can be made reasonably perfect for our needs. There are places now in the classified service which ought to be excepted, and others not classified may properly be included. I shall not hesitate to exempt cases which I think have been improperly included in the classified service, or include those which, in my judgment, will best promote the public service. The system has the approval of the people and it will be my endeavor to uphold and extend it.

I am forced by the length of this message to omit many important references to affairs of the government with which congress will have to deal at the present session. They are fully discussed in the departmental reports, to all of which I invite your earnest attention.

The estimates of the expenses of the government by the several departments will, I am sure, have your careful scrutiny. While congress may not find it an easy task to

reduce the expenses of the government, it should not encourage their increase. These expenses will, in my judgment, admit of a decrease in many branches of the government without injury to the public service.

It is a commanding duty to keep the appropriations within the receipts of the government and thus avoid a deficit.

WILLIAM M'KINLEY.

Executive Mansion, Dec. 6, 1897.

### POPULAR VOTE

For presidential candidates from 1824 to and including 1896. Prior to 1824 electors were chosen by the legislatures of the different states.

1824—J. Q. Adams had 105,321 to 155,872 for Jackson, 44,232 for Crawford and 46,587 for Clay. Jackson over Adams, 50,551. Adams less than combined vote of others, 140,863. Of the whole vote Adams had 29.92 per cent, Jackson 44.27, Clay 13.23. Crawford 13.23. Adams elected by house of representatives.

1828—Jackson had 647,231 to 509,097 for J. Q. Adams. Jackson's majority, 138,134. Of the whole vote Jackson had 55.97 per cent, Adams 44.03.

1832—Jackson had 657,502 to 530,189 for Clay and 33,103 for Floyd and Wirt combined. Jackson's majority, 124,395. Of the whole vote Jackson had 54.96 per cent, Clay 42.39 and the others combined 2.65.

1836—Van Buren had 761,549 to 736,656, the combined vote for Harrison, White, Webster and Mangum. Van Buren's majority, 24,893. Of the whole vote Van Buren had 50.83 per cent and the others combined 49.17.

1840—Harrison had 1,275,017 to 1,128,702 for Van Buren and 7,669 for Birney. Harrison's majority, 129,256. Of the whole vote Harrison had 52.89 per cent, Van Buren 46.82 and Birney .29.

1844—Polk had 1,237,243 to 1,209,068 for Clay and 62,300 for Birney. Polk over Clay, 38,175. Polk less than others combined, 24,125. Of the whole vote Polk had 49.56 per cent, Clay 43.14 and Birney 2.21.

1848—Taylor had 1,309,101 to 1,220,534 for Cass and 251,263 for Van Buren. Taylor over Cass, 139,577. Taylor less than others combined, 151,706. Of the whole vote Taylor had 47.36 per cent, Cass 42.50 and Van Buren 10.14.

1852—Pierce had 1,901,474 to 1,386,678 for Scott and 156,149 for Hale. Pierce over all, 58,747. Of the whole vote Pierce had 50.90 per cent, Scott 44.10 and Hale 4.97.

1856—Buchanan had 1,838,169 to 1,341,264 for Fremont and 874,534 for Fillmore. Buchanan over Fremont, 486,905. Buchanan less than combined vote of others, 377,629. Of the whole vote Buchanan had 45.24 per cent, Fremont 33.09 and Fillmore 21.67.

1860—Lincoln had 1,866,352 to 1,375,157 for Douglas, 845,763 for Breckinridge and 583,581 for Bell. Lincoln over Breckinridge, 491,186. Lincoln less than Douglas and Breckinridge combined, 354,568. Lincoln less than combined vote of all others, 944,149. Of the whole vote Lincoln had 39.91 per cent, Douglas 29.40, Breckinridge 18.08 and Bell 12.61.

1864—Lincoln had 2,216,067 to 1,808,725 for McClellan (eleven states not voting, viz.: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas and Virginia). Lincoln's majority, 408,342. Of the whole vote Lincoln had 55.06 per cent and McClellan 44.94.

1868—Grant had 3,015,071 to 2,709,613 for Seymour (three states not voting, viz.: Mississippi, Texas and Virginia). Grant's majority, 305,458. Of the whole vote Grant had 52.67 per cent and Seymour 47.33.

1872—Grant had 3,597,070 to 2,834,079 for Greeley, 29,408 for O'Connor and 5,698 for Black. Grant's majority, 729,975. Of the whole vote Grant had 55.63 per cent, Greeley 42.83, O'Connor .15, Black .09.

1876—Hayes had 4,033,950 to 4,284,885 for Tilden, 81,740 for Cooper, 9,522 for Smith and 2,636 scattering. Tilden's majority over Hayes, 250,935. Tilden's majority of the entire vote cast, 157,037. Hayes less than the combined vote of others, 344,833. Of the whole vote cast Hayes had 47.95 per cent, Tilden 50.94, Cooper .97, Smith .11, scattering .3.

1880—Garfield had 4,449,953 to 4,442,935 for Hancock, 307,306 for Weaver and 13,576 scattering. Garfield over Hancock, 7,018. Garfield less than the combined vote for others, 313,864. Of the popular vote Garfield had 48.26 per cent, Hancock 48.25, Weaver 3.23, scattering .13.

1884—Cleveland had 4,874,986 to 4,831,981 for Blaine, 159,369 for St. John, 173,370 for Butler. Cleveland had over Blaine 23,006. Cleveland had 48.48 per cent, Blaine 48.22, St. John 1.49, Butler 1.74.

1888—Harrison had 5,341,902 to 5,538,560 for Cleveland, 219,937 for Fisk, 147,521 for Sawyer, 3,073 for Cowdrey, 1,551 for Curtis and 9,945 scattering. Harrison had 96.65 less than Cleveland. Of the whole vote Harrison had 47.83 per cent, Cleveland 48.63, Fisk 2.21 and Streeter 1.30.

1892—Cleveland had 5,555,562 to 5,162,874 for Harrison, 264,066 for Bidwell, 1,045,424 for Weaver and 22,613 for Wing. Of the whole vote Cleveland had 45.73 per cent, Harrison 42.49, Bidwell 2.17 and Weaver 8.67.

1896—McKinley had 7,067,822; Bryan, 6,511,073; Levering, 150,633; Bentley, 13,950; Matthews, 33,545; Palmer, 133,800. Of the whole vote McKinley had 50.49 per cent and Bryan had 46.26.

Of the presidents, Adams, federalist; Polk, Buchanan and Cleveland, democrats; Taylor, whig; Lincoln, Hayes, Garfield and Harrison, republicans, did not, when elected, receive a majority of the popular vote. The highest percentage of popular vote received by any president was 55.97 for Jackson, democrat, in 1828, and the lowest 39.91 for Lincoln, republican, in 1860; Buchanan, democrat, next lowest, with 45.34. Hayes and Harrison, with the exception of John Quincy Adams, who was chosen by the house of representatives, were the only presidents ever elected who did not have a majority over their principal competitors, and Tilden and Cleveland the only defeated candidates who had a majority over the president-elect.

## Political Movements of the Year 1897.

### THE INDIANAPOLIS CONVENTION.

The monetary convention that met at Indianapolis Jan. 12, 1897, was not in any sense a political gathering, yet, as it dealt with the financial question that formed the chief issue in the political campaign of 1896 and may possibly be a factor in the campaigns of 1898 and 1900, it may not be out of place to give some account of its proceedings under this caption.

On the 18th of November, 1896, the governors of the board of trade of the city of Indianapolis issued a call to the boards of trade in the cities of Chicago, St. Louis, Cincinnati, Louisville, Cleveland, Columbus, Toledo, Kansas City, Detroit, Milwaukee, St. Paul, Des Moines, Minneapolis, Grand Rapids, Peoria and Omaha to send three delegates each to Indianapolis to a preliminary conference to be held Dec. 1, 1896, to consider the advisability of calling a larger conference composed of delegates from the boards of trade and commercial organizations of the cities of the United States, to consider the propriety of creating a nonpartisan commission to which shall be assigned the duty of formulating a plan for the reform of our currency system, to be reported to a subsequent meeting of the conference or convention.

The preliminary conference was held at the date specified, and organized by the election of E. O. Stanard of St. Louis as chairman and Jacob W. Smith of Indianapolis as secretary. The result of the conference was that a call was issued for a nonpartisan convention to meet at the city of Indianapolis on the 12th day of January, 1897, to be composed of representative men chosen from boards of trade, chambers of commerce, commercial clubs or similar commercial bodies in cities of 8,000 or more inhabitants according to the census of 1890, for the purpose of considering and suggesting such legislation as may, in their judgment, be necessary to place the currency system of the country upon a sound and permanent basis. The convention met at the time proposed, 299 delegates being present. A permanent organization was effected by the election of C. Stuart Patterson of Pennsylvania as president and Jacob W. Smith of Indiana as secretary.

The convention after a good deal of debate adopted the following resolutions by a practically unanimous vote:

"This convention declares that it has become absolutely necessary that a consistent, straightforward and deliberately planned monetary system shall be inaugurated, the fundamental basis of which should be—First, that the present gold standard should be maintained; second, that steps should be taken to insure the ultimate retirement of all classes of United States notes by a gradual and steady process, and so as to avoid injurious contraction of the currency or disturbance of the business interests of the country, and that until such retirement provision should be made for a separation of the revenue and note issue departments of the treasury; third, that a banking system be provided which should furnish credit facilities to every portion of the country and a safe and elastic circulation, and especially with a view of securing such a distribution of the loanable capital of the country as will tend to equalize the rates of in-

terest in all parts thereof. For the purpose of effectively promoting the above objects:

"Resolved, That fifteen members of this convention be appointed by the chairman to act as an executive committee while this convention is not in session, with full powers of this convention. The executive committee shall have the power to increase its membership to any number not exceeding forty-five, and five members thereof shall at all times constitute a quorum of said committee.

"The executive committee shall have special charge of the solicitation, receipt and disbursement of contributions voluntarily made for all purposes; shall have power to call this convention together again when and where it may seem best to said committee to do so, and said committee shall continue in office, with power to fill vacancies, until discharged at a future meeting of this convention.

"Resolved, That it shall be the duty of this executive committee to endeavor to procure at the special session of congress which it is understood will be called in March next legislation calling for the appointment of a monetary commission by the president to consider the entire question, and to report to congress at the earliest day possible.

"Or, failing to secure the above legislation, they are hereby authorized and empowered to select a commission of eleven members, according to the rules and plans set forth in the suggestions submitted to the convention by Mr. Hanna of Indianapolis, as follows:

"Article 1. The commission shall consist of eleven members to be named by the executive committee appointed by this convention. The executive committee shall have power to fill vacancies in the commission as they may occur.

"Art. 2. The first meeting of the commission shall be held at a time and place to be designated by the executive committee of this convention in a call to be issued therefor, and at such meeting the commission shall organize by the election of such officers and the adoption of such rules and by-laws for its own government as may be agreed by a majority of its members, and thereafter it shall be governed by such rules and by-laws, subject to these articles.

"Art. 3. All rules and by-laws of the commission, and all its proceedings, shall be directed toward the accomplishment of the objects of its creation, which are to make a thorough investigation of the monetary affairs and needs of this country, in all relations and aspects, and to make appropriate suggestions as to any evils found to exist and the remedies therefor; and no limit is placed upon the scope of such inquiry, or the manner of conducting the same, excepting only that the expenses thereof shall not exceed the sums set apart for such purpose by the executive committee.

"Art. 4. The executive committee of this convention shall use so much of the voluntary contributions made to it as may be available for that purpose to defray all necessary expenses of the commission, and shall notify the commission from time to time of the amount so available, in order that it may regulate its expenditures accordingly; and no liability shall attach to

said committee or to this convention beyond the amount so notified.

"Art. 5. When the labors of this commission have been completed as far as practicable the executive committee, if it deem it advisable, shall issue a call to bring this convention together again at a time and place designated in such call, and at the meeting so convened the commission shall make report of its doings and suggestions in such manner and form as it shall deem best adapted to present the same to this convention and its members for action, and, if legislation is deemed advisable, shall accompany such report with a draft of such bill or bills providing for such legislation.

"Resolved, That all resolutions and communications as to methods of currency reform which have been presented to this convention be referred to such commission when formed."

The executive committee appointed by the chairman pursuant to the foregoing resolutions was composed as follows: H. H. Hanna, Indianapolis, chairman; M. L. Crawford, Dallas, Tex.; W. B. Dean, St. Paul, Minn.; J. W. Fries, Salem, N. C.; J. F. Hanson, Macon, Ga.; C. C. Harrison, Philadelphia, Pa.; Rowland Hazard, Peacedale, E. I.; J. P. Irish, Oakland, Cal.; H. H.

Kohlsaat, Chicago, Ill.; J. J. Mitchell, Chicago, Ill.; A. E. Orr, New York city; G. F. Peabody, New York city; T. C. Power, Helena, Mont.; E. O. Stanard, St. Louis, Mo.; A. E. Willson, Louisville, Ky. President McKinley in a special message asked congress to authorize him to appoint a commission in accordance with the foregoing resolutions. The house of representatives voted favorably, but the bill was not reported back from the finance committee of the senate before adjournment of congress. The executive committee of the convention, acting under the instructions set forth in the resolutions referred to, chose a volunteer commission consisting of the following representative men: George F. Edmunds, of Vermont, chairman; Charles S. Fairchild, of New York city; O. Stuart Patterson, of Philadelphia; Stuyvesant Fish, of New York city; J. W. Fries, of Salem, N. C.; T. G. Bush, of Anniston, Ala.; George E. Leighton, of St. Louis, Mo.; W. B. Dean, of St. Paul, Minn.; R. S. Taylor, of Fort Wayne, Ind.; Louis A. Garnett, of San Francisco; J. L. Laughlin, of Chicago.

This commission was in session in Washington in October for the purpose of considering the subject and preparing a plan for recommendation for legislation.

### THE SILVER REPUBLICANS.

The bolt of the silver republicans from the national convention in St. Louis resulted in the purpose of forming a new party committed to the free coinage of silver as a fundamental principle. Accordingly, on the 22d of February, 1897, the following address was issued:

To the Silver Republicans of the United States: There could not be a better illustration of the great law by which in free government the rise, progress and decline of parties are determined than that afforded by recent and present political developments in the United States. Political parties are practical instruments for executing the will of the people in respect to principles and policies of governments.

They, therefore, should represent and respond to public opinion in its attitude toward the problems which the experience of the nation from time to time brings forward for solution. It is not parties that make issues, but it is issues that make parties.

For years events have been forcing upon the country, with ever-increasing definiteness and emphasis, the necessity of reform in our monetary system as respects both the coinage of the metallic money and the regulation and control of credit currency. Under stress of experience and consequent investigations, opinions have been gradually crystallizing. In this process the line of cleavage has paid little regard to previously existing party demarcations, and to-day the most careless observer cannot fail to see that the genius of the nation is approaching a settlement of this momentous controversy through the agency of political instruments now being fashioned to its hand.

In the story of these formative events the so-called silver republicans have taken an important part and discharged a necessary function. In doing so they have not surrendered their conviction on certain other great principles of political economy and government, but they realize that these principles are not capable of successful application under the present monetary conditions. They believe, therefore, that the adequate treatment of all other issues must

await the correct decision of the dominant one thus presented. In this spirit they co-operated with the organized forces of bimetallicism in the last campaign. Every consideration of patriotism and expediency seems to counsel a continuation of that policy.

Silver republicans believe themselves to be in harmony with the original spirit of the old republican party, and they claim a property in its great names and glorious traditions, justified by the splendid services and sanctified by the sacred memories of the time when that party embodied the aspirations and spoke the purposes of the great masses of the American people. That party was born in answer to the cry for a champion of liberty. Its early words were words of comfort and assurance to the oppressed. Its great deeds, by which it will hereafter live in history, were deeds of patriotism. Its policies professed above all things to hold dear the safety and welfare of the American people as against the rest of the world.

The silver republicans cannot forget that history. They cannot to-day follow those who have usurped the dominion of that party into a shameless abandonment of American interests and the tyranny of an alien money system. They believe that the duty of the hour demands that they maintain their identity and perfect their organization.

Circumstances have sometimes in the past thrust upon the undersigned responsibilities on behalf of silver republicans which, in the absence of formal organization, we have felt warranted in assuming. Recently, however, we have received a vast number of anxious inquiries from various parts of the country upon the question of party policy and requesting us to give some definite direction thereto. These communications exhibit a surprising and gratifying unanimity in sentiment and plan.

Responding to these earnest suggestions, and at the same time expressing our own deliberate opinion, we urge upon the silver republicans of the United States, and upon

all citizens of whatsoever previous party association, who are willing to co-operate with us in political action until the great monetary issue is settled, and settled right, that immediate steps be taken to perfect organizations in the various states and territories, to the end that thereafter a national convention may be held for the purpose of making an authoritative pronouncement to the country and effecting a national organization.

As soon as possible each of the states and territories should designate a member of the provisional national committee of the silver republican party, which committee will have charge of the calling of the national convention and of all matters preliminary thereto. Meanwhile we have taken the liberty of naming Mr. Charles A. Towne of Minnesota as chairman of said provisional national committee, whose official address for the present will be the city of Washington, and to whom all communications should be sent. The provisional national committee is hereby called to meet in executive session at the city of Chicago, at a place to be seasonably announced by the chairman, on Tuesday, the 8th day of June, 1897.

Signed at the city of Washington this 22d day of February, 1897, the anniversary of the birth of the "first American," whose life was a sublime example of patriotism, and whose precept, placing duty to country above and beyond all party obligation, is a deathless watchword of political liberty.

H. M. TELLER.  
FRED T. DUBOIS.  
FRANK J. CANNON.  
R. E. PETTIGREW.  
LEE MANTLE.  
JOHN P. JONES.  
CHARLES A. TOWNE.  
CHARLES S. HARTMAN.  
JOHN F. SHAFROTH.  
C. E. ALLEN.

The convention met at Chicago at the time specified. Charles A. Towne of Minnesota was chosen chairman and James B. Menager of West Virginia was selected secretary.

The committee on credentials reported the following delegates from thirty-one states entitled to seats: Alabama, Cutler Smith; Arkansas, Thomas Roles; California, Nathan Cole, Jr.; Colorado, A. M. Stevenson; Connecticut, Joseph Sheldon; Delaware, Charles G. Prentiss; Idaho, Frederick T. Dubois; Illinois, J. H. Teller; Indiana, Flavia J. Van Voorhis; Iowa, William Connor; Kansas, Dr. Frank R. Lawrence; Kentucky, A. J. Mosset; Louisiana, S. L. Carey; Michigan, C. E. Watkins; Minnesota, Frank A. Day; Missouri, J. D. Clarkson; Montana, Charles S. Hartman; Nebraska, D. D. Gregory; New Jersey, James H. Fleming; New York, Benjamin S. Dean; North Dakota, H. M. Creel; Ohio, J. C. Harper; Oklahoma, Dr. F. S. Peck; Oregon, R. H. Lien; Utah, W. C. Jones; Washington, George W. Thompson; West Virginia, J. B. Menager; Wisconsin, Dr. D. Park Powell; Wyoming, A. A. Johnson.

No regular platform was adopted, but the main purpose of the organization is well expressed in the following resolutions:

Whereas, It is not the province of this committee to anticipate the action of the national convention in the formation of a platform and declaration of principles; but,

Whereas, In order to preclude any basis for either misunderstanding or misrepres-

entation as to the object of this organization, it is prudent to make known the controlling principle of its existence; therefore,

Resolved, That the silver republican party of the United States favors the immediate establishment of bimetalism by the independent action of the United States through the free coinage of both silver and gold at the ratio of 16 to 1, and the clothing of both metals equally with every attribute of full money, with the right to every debtor to choose which coin shall be the basis of payment; and

Resolved, That the achievement of this great object is deemed by us of paramount political importance, and shall form the controlling motive of our political action until it is accomplished.

Your committee on plans and organization for the silver republican party of the United States beg leave to submit this, our report:

1. We recommend the appointment of a national executive committee of seven members, including the national chairman, to be appointed by the chairman of the national committee.

2. That this committee be empowered to take such action as may be necessary in order to fill any vacancies existing or which may exist at any time in the national committee.

3. The executive committee, with the advice and consent of the national committee, is authorized to call a national convention of the silver republican party to meet at such time and place as they may designate, and to perfect the necessary details therefor.

4. In those states where organizations are not complete the members of the national committee for such states shall take such steps under the direction of the national executive committee as are necessary to complete such organizations.

The resolutions were signed by Fred T. Dubois, Idaho, chairman; J. J. Harper, Ohio; J. D. Clarkson, Missouri; E. C. Watkins, Michigan; A. J. Mosset, Kentucky; A. M. Stevenson, Colorado; Charles A. Towne, Minnesota, and Ben S. Dean, secretary, New York.

The following national committeemen were named:

Alabama, Cutler Smith; Arkansas, Thomas Roles; California, Nathan Cole; Colorado, A. M. Stevenson; Connecticut, Joseph Sheldon; Delaware, Charles G. Prentiss; Idaho, F. T. Dubois; Illinois, James H. Teller; Indiana, F. J. Van Voorhis; Iowa, William Connor; Kansas, Frank R. Lawrence; Kentucky, A. J. Mosset; Louisiana, S. L. Carey; Massachusetts, Norman Cameron; Michigan, C. E. Watkins; Minnesota, Frank A. Day; Missouri, J. D. Clarkson; Montana, Charles S. Hartman; Nebraska, D. D. Gregory; New Jersey, James H. Fleming; New York, Ben S. Dean; North Dakota, H. M. Creel; Ohio, J. J. Harper; Oklahoma, F. S. Peck; Oregon, Charles W. Talmage; South Dakota, R. H. Lien; Utah, W. C. Jones; Washington, George W. Thompson; West Virginia, J. B. Menager; Wisconsin, D. Park Powell; Wyoming, A. A. Johnson.

An executive committee of seven members was appointed and ex-Senator F. T. Dubois was named as chairman.

No conclusion was reached as to when or where the national convention would be held, nor was any desire manifested to anticipate the action of that convention.

## THE AMERICAN PARTY.

A new party was organized at St. Louis at a convention held Aug. 25 and 26, 1857. About fifty delegates, representing nine states and one territory, were present. E. H. Sellers of Detroit, Mich., was elected chairman and the following somewhat lengthy platform was adopted:

1. With the nation, as with the individual, the most potent safeguard of prosperity is an abundant revenue. We therefore favor such an adjustment of our tariff and internal revenue schedules as will produce revenues sufficient to meet all expenditures requisite in every department of the government and afford protection to all productive labor; to the end that all legitimate demands upon the treasury may be promptly met without resort to questionable issues of interest-bearing obligations.

2. Whenever and wherever reciprocal trade relations can be fostered with foreign nations the result will tend to a practical stimulus of American commerce; therefore we favor such treaty relations with all nations as will promote a reciprocal trade relative to products not produced in whole or in part by the people of the United States; and for this reason no article of foreign production, unless included among those enumerated in a reciprocal schedule, should be admitted free.

3. All merchandise imported in foreign bottoms should be subject to a tonnage tax, such tax to be fixed by congress and be for and used exclusively as a subsidy to American vessels engaged in foreign trade; and no ship of foreign construction should be admitted to register under the flag of the United States.

4. Under the constitution of the United States the establishment of the standards of value and the issue of a legal circulating medium is the sole prerogative of the national government, and that prerogative cannot be lawfully delegated to states or private corporations. Since nearly or quite 99 per cent of all business transactions of the country are accomplished without the use of specie—and the experience of fifteen years during and subsequent to the late war demonstrated conclusively that a metallic currency was in no sense necessary to the material advancement of our people—we favor the demonetization of both gold and silver, the prohibition of contracts for payment in coin of either metal, and the substitution of metallic tokens for our present minor coins.

5. All currency should be in the form of treasury notes of unlimited legal-tender quality, and in such quantity as shall facilitate the freest commercial exchanges; and every other form of currency notes should be withdrawn from circulation.

6. No privilege can properly be granted to aggregated capital that is not accorded on like terms to our humblest citizen; therefore all necessary and duly authorized issues of interest-bearing obligations of the United States should invariably be offered to our own people, in sums within the reach of all, and at the lowest rate of interest compatible with their issue at par.

7. We demand the issuance in an annual series of low-interest-bearing savings certificates in multiples sufficiently small to insure wide popular investment, and which shall be exchangeable at all times for the non-interest-bearing notes of the United States and convertible into currency at par at the option of the holder. For the purpose of insuring the stability of all the obliga-

tions of the government congress should provide for the payment at maturity of all such certificates in either gold or silver bullion, at government option, at regular market rates, and for the cancellation of the same whenever returned to the treasury through conversion or payment. Their use by banks as an investment for their "reserve" funds should be authorized, and for the convenience of small investors the issue and conversion of these certificates should also be authorized at all postoffices and depositories.

8. All existing obligations of the government should be paid at maturity, in strict conformity with their expressed conditions. For this purpose the gold and silver coins withdrawn from circulation should be held by the treasury for the redemption of such bonds as are specifically payable in coin. No option favorable to the treasury should be waived or construed to favor the holders.

9. The mints of the United States should be open to American citizens free of charge for the assaying, refining, casting into bars and stamping weight and fineness of all gold and silver from mines within our own territory.

10. Attachment to the soil is the best conservator of patriotism; therefore all government lands should be held for sale or homestead entry to bona fide settlers only; and alien ownership should, after a limited time defined by statute, be prohibited. Hereafter no public lands should be donated or sold to any corporation, under any name or pretense whatever.

11. All mineral lands, including coal mining property and other natural sources of wealth of this character, should be owned and controlled by the national government, and all such mineral properties should be open for operation to all citizens, in limited areas and at a reasonable royalty.

12. All public conveyances and utilities should be owned or controlled by the government, national, state, county or municipal, as the subject demands.

13. We demand the taxation of all property, real or personal, not owned and controlled by the public.

14. Taxation without representation is wrong; therefore we favor the immediate submission to the different states of the question of equal suffrage for both sexes.

15. The constitution of the United States is broad enough to permit of the passage of an act by the national congress providing for an income tax to be levied upon all incomes. We therefore demand the enactment of such a law as speedily as possible.

16. The admission of paupers, criminals and idiots of other countries to the United States must be prohibited and American labor protected by placing a tax of at least \$200 upon all single persons sixteen years of age and upward who do not come as families, and a tax upon the head of a family of \$200, and \$50 for each minor child of such family, such sums to be paid into the national treasury. The heads of families, or single persons, must have money sufficient to maintain them one year after their arrival; said immigrants 14 years and upward must be able to read and write the language of the country from which they came.

17. No alien should become a citizen or be entitled to vote at any election until he shall have resided continuously in the United States for a period of not less than seven years after declaring his intention to become such citizen. Nor shall such alien

then become a citizen and entitled to exercise the suffrages thereof until he shall be able to satisfy a court of record that he can read and write the English language.

18. The power of naturalization should be restricted to the United States courts of judicature, and never exercised within three months immediately preceding a presidential, state or other election.

19. Hereafter all persons born in the United States must, before exercising the right of suffrage, be able to read and write in the English language; and we demand the enactment of a compulsory education law throughout the states which will keep all children in school six months in each year from the age of 5 until the age of 16 years, and that free textbooks be supplied by the state.

20. American Indians should be admitted to citizenship under the same conditions as are imposed upon native-born citizens; and we demand that the government live up to the letter of its treaty agreements with them in every particular and not allow any misuse of their allowances by agents of the government or others, under penalty of criminal prosecution.

21. The constitution of the United States should be so amended as to provide for the election of the president, vice-president and United States senators by direct vote of the people. United States senators should be elected for a term of three years, and the president should be ineligible for a second election.

22. The power of the speaker of the house of representatives has become, and is, little less than that of the president of the United States in shaping the legislation of the country; therefore, the constitution should be so amended as to provide that the speaker be elected by direct vote of the people and take his seat at the biennial organization of each congress.

23. While the constitution of the United States provides (Art. I, Sec. 5) that legislative bodies shall be the judges of the election returns and qualification of their own members, congress and all state legislatures are empowered, and should provide by law that all contested elections should be judicially determined by a court of competent jurisdiction within sixty days after said elections in the districts where such elections are held and that the certificates of such courts shall be the legal credentials of the holders thereof to seats in such legislative bodies, subject only to review by each legislative body upon the record evidence taken before said courts.

24. We demand the enactment of the proposed sixteenth amendment to the constitution of the United States, which is as follows:

"Article XVI. Neither congress nor any state shall pass any law respecting an establishment of religion or prohibiting the free exercise thereof, nor use the property or credit of the United States, nor of any state, nor any money raised by taxation, in maintaining or aiding, by appropriation, payment for services, expenses or otherwise, any church, religious denomination or religious society or any institution, society or undertaking which is wholly or in part under sectarian or ecclesiastical control."

25. The federal constitution should be so amended as to provide a uniform system of laws, and uniform code of practice in connection therewith, to meet the exigency of society in all our interstate relations. Such system should cover the ground of both civil and criminal law, and embrace all matters of a general nature and such as can be con-

sidered federal in their character, without interference with any of the police powers or internal government of any individual state.

26. The importunities of office seekers and place hunters not only impair the usefulness of the executive of the nation but occupy his time to the distinct detriment of more important matters; we therefore insist that all government appointments, except cabinet officers, ambassadors, envoys plenipotentiary, ministers, judges, territorial governors, consuls-general, generals in the army and admirals in the navy be relegated to the heads of the various departments, under such rules and regulations as may be established therefor by law.

27. The civil-service system of the United States, as now recognized, has entailed upon our country serious and evil consequences; therefore we favor the reference of all civil-service appointments to such members of the cabinet as have immediate control of the several departments for which such appointments are designed, and insist upon the abolition of all civil-service rules for examination and the making of all appointments on original diplomas from public educational institutions, showing fitness of applicants and appointing all applicants to the lowest grade of service, filling all higher grades by promotions based upon approved capacity. The inefficient and "holdovers" who have received their appointments arbitrarily through partisan selfishness and arrogance should be dismissed from the service.

28. We believe it would be wise and productive of the greatest good to all our people if the constitution of the United States—and to accord with it the constitution of every state—were so amended as to provide for a system of initiative and referendum by which organic statutes and laws involving large expenditures by the federal government, beyond the amount apportioned and fixed by law, or the granting of franchises to railroads or corporations or persons, and all attempts to organize "trusts" and "combines" under color of law, should have their initiative in at least five states, and, if enacted, be referred for approval to the voters of the United States at the next congressional election.

29. Believing the so-called "trusts," "monopolies" and "combines" to be a great and growing evil in our country, and one which will sooner or later bring dire disaster upon our land, we urge that immediate restrictive legislation should be enacted by the federal government to abolish and prohibit them, and that any attempt under color of interstate privilege to "corner" the products of our land should be dealt with as a crime.

30. All our laboring classes and wage-earners should be protected against the competition of alien labor, skilled or unskilled, and the importation of foreign contract labor should be prohibited by law.

31. We believe that a general nonsectarian public-school system is the bulwark of our nation's liberties and the foundation upon which our government rests. It is therefore a subject of national interest and concern, and its control should be directed by the national government in order that the system may be made uniform throughout the states. Hence we favor such amendments to our fundamental law as will make the system national in its character and place it under the dominion of American citizenship.

32. In the settlement of international differences war should be the last resort; but true patriotism requires that every nation

should be prepared to protect its interests at home or abroad. For that reason our navy should be adequate for the protection and defense of all our seacoast and our commercial interests upon the high seas.

33. We believe in the principles enunciated in the "Monroe doctrine" and demand that the government of the United States insist upon its enforcement throughout the whole extent of the western hemisphere.

34. We insist that the Hawaiian islands should and of right ought to belong to the United States; we therefore favor the proposed treaty of annexation.

35. The tripartite agreement now existing relative to the Samoan islands is unwise, and the interests of the United States therein are paramount. We therefore favor a protectorate.

36. We insist that the barbarous and bloody conflict now being waged in the island of Cuba should be speedily terminated, and that the government of the United States should, in the interest of civilization and humanity, intervene to secure its immediate cessation.

37. No soldier of the republic should suffer from want; we therefore favor adequate pension laws, impartially administered, but are opposed to any discrimination between the widows of officers and privates.

38. We enjoin strict obedience to the law at all times, but hold that it should never be invoked to abridge the constitutional right of our citizens to peaceable assembly, freedom of speech and the reasonable use, unhindered, of our public highways.

39. The elective franchise is a sacred right and every citizen must be fully protected in its exercise.

Finally, we believe in the elevation of the people and the protection of their rights by teaching them freedom of thought and freedom of conscience in all the walks of civilized life; likewise, the right of private judgment in all matters of social concern and entire freedom from foreign influences which are not wholly in harmony with our American republican form of government; and we have the most unbounded faith in the ability of this nation to maintain its own institutions regardless of the opinions or enactments of any other person, nation or people. To accomplish these purposes we should, so far as possible, maintain amicable relations with other nations, defend our territory, extend our commerce and set an example before the world of an advanced thought and civilization consistent with the American idea of free and independent government.

The convention recommended the following statement of principles as a platform for the several states:

1. All public utilities inhering to the state shall be placed under such supervision and legislative control as will best insure equal benefits to all the people.

2. The existence or employment of private armed bodies shall be prohibited.

3. The initiative and referendum should be employed in the formation of all laws and ordinances affecting the rights of the people.

4. The best ballot system should be adopted for all elections. There should be but one election held in any one year for national, state, county, town or municipal officers.

5. Registration and election laws should secure to every lawful voter the right to cast a ballot at every election and have the same correctly returned. Registration of voters should be completed on the same day by a system of school-district and neighbor-

hood meetings, convened by due public notice, at such an hour as will not conflict with general business pursuits, not less than ninety days previous to the day of election. Nominations of candidates for official positions shall be made at a primary election (and not by caucuses) to be held on a day fixed by law, not more than sixty nor less than thirty days before the date of general elections. All legislative offices should be so grouped as to insure minority representation.

6. We advocate equal suffrage for both sexes, based upon an educational qualification.

7. Neither the state, county nor municipality shall contribute to the support of any institution under denominational, sectarian or private control.

8. We insist upon the taxation of all property, real or personal, not owned by the public.

9. We consider the nonsectarian free public school as the only place where American children can obtain a practical education, and we protest against the employment of any person or persons not in sympathy with our American institutions as officers or teachers therein.

10. All corporations sole must be abolished.

11. All hospitals, asylums, reformatories and other institutions occupied by persons of either sex, voluntarily or involuntarily, whether public or private or semi-private, must be at all times subject to public inspection.

12. Labor must be recognized as the direct source of wealth. Its rights must be maintained equally with those of capital. All industrial pursuits should be fostered and encouraged in every possible way, and care better to prevent strikes and lockouts, co-operation between employers and employes should be the rule to be encouraged and adopted. Wage-earners must be protected against the competition of alien labor, skilled or unskilled, and the importation of contract labor into the state prohibited by law.

13. "Trusts" and "combinations" must be prohibited by immediate and appropriate legislation.

14. Municipal government should be conducted on strictly business principles only. Public utilities and necessities existing within the province of city government, such as gas, electric lights, water, street and elevated railroads, bridges, ferries, etc., should be owned and operated by the city, subject only to the general laws of the state.

15. The burden of taxation caused by intemperance and crime should be regulated and lessened as much as possible by wise and equitable legislation. We favor local option throughout the states and call upon the government to restrict the importation of spirituous or malt liquors, by way of original packages, under the guise of interstate commerce, into any state which deems it wise and proper to exercise its police powers in the control of or the prohibition of the liquor traffic, this being one of the rights reserved to the states by the federal constitution.

16. Convict labor must not be brought in competition with free labor, and convict contract labor must be prohibited.

National headquarters have been opened at Detroit. The following executive committee was chosen: E. H. Sellers, chairman; Charles Cochran, secretary; W. J. H. Traynor, treasurer; W. C. Holden, Illinois; James A. Phelps, New York; Dr. A. C. Miller, Michigan; Allison Stocker, Colorado; D. L. Tubbs, Iowa; H. A. Thompson, Missouri; G. H. Lytle, Ohio.

## THE PEOPLE'S PARTY.

On the 10th of July, 1897, about 700 members of the people's party met at Nashville. The delegates were members of that wing of the party which favors independent action in politics and is opposed to fusion, known as "middle-of-the-roadsers." J. S. Bradley of Texas was elected chairman and J. A. Parker of Kentucky secretary. The committee on credentials reported the number of delegates in attendance as follows:

Alabama, 38; Arkansas, 15; Florida, 4; Georgia, 39; Illinois, 24; Indiana, 12; Iowa, 7; Kansas, 2; Kentucky, 9; Louisiana, 13; Michigan, 12; Minnesota, 18; Mississippi, 5; Missouri, 17; Nebraska, 2; Montana, 3; New Hampshire, 1; North Carolina, 2; Ohio, 21; Rhode Island, 1; Tennessee, 12; Texas, 10; Washington, 1; West Virginia, 2; Wisconsin, 1. Total, 355. No seats were contested.

An address was issued which reviews the history of the party and affirms the previous platforms adopted at its national conventions. The address closes with a plan for preserving the autonomy of the people's party, which is as follows:

1. The election by this conference of a national organization committee, to be composed of three members from each state here represented, said members to be selected by the several state delegations. In states not represented at this conference the national organization committees, here created, may at their discretion provide for a proper representation on the committee.

2. The election by this conference of a chairman of the national organization committee, whose duty it will be to push the work of organization along strictly populist lines, and in the interest of populist principles and populist candidates; to preside over all meetings of the national organization committee and to perform other duties usually incumbent upon such officer.

3. The election by this conference of an executive committee of five members, whom the chairman may nominate from the members of the national organization committee, whose duties shall consist in assisting in the work of organization and education, and who shall co-operate with the chairman in his efforts to preserve and extend the organization of the party.

4. The election of a national secretary, whose duties shall be such as are usually performed by such officer.

5. The election of a treasurer, who shall have charge of the funds of the organization and perform such duties as are made incumbent upon him by the executive committee.

6. The officers of this organization shall hold their office until the time of holding the next national convention.

7. The national organization committee hereby created is instructed to look after the work of organization and education in each state, to reform our lines and to co-operate with the regular organization when in line with populist principles.

8. We further recommend that in each township, county and state the committees be looked after by the members of the national organization committee, and, where necessary, organized by the election of members who are in harmony with the party and its principles and who are in favor of preserving its autonomy.

9. We urge upon the members of this party the necessity of more thorough and vigorous plans of education and organization than have been in vogue the past two years. To

that end we heartily recommend the co-operative and club plans perfected by the committee appointed for that purpose by the National Reform Press at Memphis, of which J. H. Ferris, Joliet, Ill., is the present chairman.

10. The national organization committee shall provide for the management of the committee here constituted the initiative and referendum and imperative mandate, and we recommend that the first national convention of the people's party shall adopt the same as a governing law of the party in its entire organization.

11. The national organization committee of the people's party chosen by this conference, shall have full power and authority to call a national convention of the party, or to submit any question to the voters of the party on the referendum plan whenever they may determine that the best interests of the party require the same.

The following national committee was chosen and given power to act in the promotion of organization, calling conventions and furthering the cause of party interest:

Alabama—J. H. Harris, Oak Bower; Z. Gaston, Greenville; I. C. Watson, Jacksonville.

Arkansas—W. S. Morgan, Hardy; A. N. Files, Little Rock; J. E. Scanlon, Bee Branch.

Florida—F. H. Lytler, Stanton; A. P. Baskin, Anthony; C. C. Post, Sea Breeze.

Georgia—Gen. William Phillips, Marietta; William D. Hawkins, Flowery Branch; Dr. R. W. Mays, Jackson.

Illinois—J. H. Ferris, Joliet; L. D. Reynolds, Chicago; G. W. Wickline, Nashville.

Indiana—N. H. Molsinger, Shouls; J. H. Allen, Terre Haute; T. B. Rogers, Logansport.

Iowa—J. O. Beebe, Weaver; A. W. C. Weeks, Winterset; Albi Reed, Muscatine.

Kansas—J. F. Willets, McLouth; A. Stineberger, Girard; J. V. B. Kennedy, Ft. Scott.

Kentucky—Jo A. Parker, Louisville; W. B. Bridgeford, Frankford; Samuel James, Owensboro.

Louisiana—N. F. Naff, Naff; J. C. Rocket, Shreveport; B. W. Bailey, Winfield.

Michigan—John O. Zables, Petersburg; J. R. McBride, Grand Rapids; Robert Blemke, Marquette.

Minnesota—J. B. Dukes, Minneapolis; J. C. Hanley, St. Paul; L. D. Foster, St. Cloud.

Mississippi—Frank Burkitt, Okalona; S. M. Hollingsworth, Dry Grove; R. Brewer, Memphis.

Missouri—P. J. Dixon, Chillicothe; J. H. Ellis, McFall; Dr. D. W. Eskew, Poplar Bluff.

Nebraska—L. Stebbins, North Platte; H. M. Stewart, Clayton; J. O. Wyser, Omaha.

Rhode Island—George Arnold.

Tennessee—William Mullins, Antioch; W. E. McLennahan, Beechville; B. G. West, 109 Polk street, Memphis.

Texas—Charles Jenkins, Bronson; C. W. Kirkpatrick, McKinney; O. E. Metzger, Hallettsville.

Washington—A. P. Tugwell, Tacoma; Dr. R. H. McLean, Spokane; Dr. W. D. Mays, Pomeroy.

West Virginia—H. Z. Martin, Neponset; Dr. J. W. Shull, Pleasant Dale; H. A. Altizer, Arnoldsburg.

Wisconsin—Robert Schilling, Milwaukee; C. M. Burt, Viroqua; William Monroe, West Superior.

The following national officers were named:

Chairman—Milton Park of Texas.  
Secretary—W. S. Morgan of Arkansas.  
Treasurer—Dr. Crowe of Alabama.  
Executive Committee—A. A. Gunter of Alabama, Ignatius Donnelly of Minnesota, Col. W. D. Peake of Georgia, L. C. Bateman of Maine and A. Stineberger of Kansas.

The committee met at St. Louis Nov. 24 and, although the members met behind closed doors, a statement was made as to the business transacted. Resolutions were adopted as follows:

Recognizing the importance of active and aggressive work to the end of lining up all reform forces for future campaigns, we, the national organization committee of the people's party, hereby call a meeting of said committee at the Laclede hotel, St. Louis, Mo., for Jan. 12, 1898. To the end of restoring perfect harmony in the ranks of the party and effecting a more compact organization we respectfully invite the national committee of the people's party to meet with us in conference on the above date, appealing to their patriotic sense of duty to aid us in restoring to its once splendid estate our party organization.

Feeling it due to the members of the people's party to outline the objects of this call, we submit the following:

We recommend the holding of a national

nominating convention on the first Wednesday in April, 1898. We recommend the holding of state conventions, at which delegates to the national convention shall be chosen, on the third Wednesday in March, 1898. We recommend that the nominations of congressmen be delayed until after the holding of the national convention.

We recommend that the platform on which the contest for 1898 and 1900 be waged should embody the following propositions:

1. Absolute paper money, based upon every commodity and resource of the nation, a full legal tender and receivable for all dues to the United States.

2. Free coinage of gold and silver at the present legal ratio; the coin debts of the United States payable in either at the option of the government.

3. All money to be issued by the government and paid out direct to the people for services rendered or to be loaned to them at a low rate of interest on safe security and without the intervention of private banks, provided that the volume of the currency shall not exceed \$50 per capita.

4. Government ownership and operation of railroads, telegraph and telephone lines.

5. Opposition to alien ownership and holding of land for speculative purposes.

6. Opposition to court-made law.

7. Opposition to trusts.

8. We specially recommend the initiative and referendum and imperative mandate.

## DEEP WATERWAYS GREAT LAKES TO ATLANTIC SEABOARD.

(By L. E. Cooley of the U. S. Commission.)

In September, 1894, an international convention was called at Toronto, Ont., to consider the opening up of deep-water communication between the great lakes and the Atlantic seaboard. An International Deep Waterways association was formed, under the auspices of which a convention of specialists in trade and transportation was held at Cleveland in September, 1895. At both conventions the Hon. O. A. Howland of Toronto was made international president of the association, Lyman E. Cooley of Chicago, American vice-president, and James Fisher of Winnipeg, Canadian vice-president. The association has also a president for each state and province of the territory specially interested.

The action of both conventions was in the spirit of the treaty of Washington and in harmony with its provisions, by which any waterway which may be constructed between the great lakes and the seaboard, whether on American or Canadian soil, is made international in character and is available on equal terms to citizens of the United States and the subjects of Great Britain. The conventions went further and declared heartily in favor of an international court of arbitration, with special reference to the settlement of any difficulties that might arise in the use of the present and contemplated waterways. The spirit of this declaration has since been covered in the treaty of arbitration negotiated by Mr. Olney and submitted to the senate by President Cleveland.

Meantime the efforts of the association had resulted in the following item in the sundry civil bill of March 2, 1895:

"Resolved, by the senate and house of representatives of the United States of America in congress assembled, That the president of the United States is authorized to appoint immediately after the passage of this joint resolution three persons, who shall have power to meet and confer with any similar committee which may be appointed by the government of Great Britain or the Dominion of Canada, and who shall make inquiry and report whether it is feasible to build such canals as shall enable vessels engaged in ocean commerce to pass to and fro between the great lakes and the Atlantic ocean, with an adequate and controllable supply of water for continual use, where such canals can be most conveniently located and the probable cost of the same, with estimates in detail; and if any part of the same should be built in the territory of Canada what regulations or treaty arrangements will be necessary between the United States and Great Britain to preserve the free use of such canals to the people of this country at all times; and all necessary facts and considerations relating to the construction and use of deep-water channels between the great lakes and the Atlantic ocean.

"The persons so appointed shall serve without compensation in any form, but they shall be paid their actual traveling and other necessary expenses, not exceeding in all \$10,000, for which purpose the said sum of \$10,000, or so much thereof as may be necessary, is hereby appropriated. The president may, in his discretion, detail as one of such persons an officer of the United States navy or of the army."

On Nov. 4 following the president announced the appointment of James B. Angell, Ann Arbor, Mich.; John E. Russell, Leicester, Mass., and Lyman E. Cooley, Chicago, Ill., as the commission.

The Canadian government took identical action by an order in council, and appointed as its commission O. A. Howland, Toronto; Thomas Keefer, Ottawa, and Thomas Morris, Colean Landing.

The commissions held several joint meetings and assigned the respective lines of inquiry. The report of the American commission was submitted to congress on Jan. 18, 1897, by the president in a special letter of commendation and was followed by an appropriation of \$150,000 and the appointment of a board of engineers to make the examination and surveys recommended.

The report of the Canadian commission was submitted under date of June 17, 1897, and is largely supplemental to the American report and referring to the same collection of data. The position of the Canadian commission and the policy commended to its government is one that shall be responsive to the American initiative.

The American report does not attempt to reach final conclusions, as the funds were ridiculously inadequate to this end; but it presents for the first time a broad and comprehensive review of the physical conditions and the scope of the inquiry, determines that the purpose to be accomplished is entirely feasible, and narrows the matter down to a definite line of special inquiry and surveys, so that the board of engineers has only to make the special studies called for. The subject dealt with is of such transcendent importance and promises such a revolution in transportation conditions that an extended review is justified.

The commerce of the great lakes has now reached such proportions that the number of steam vessels of over 1,000 tons exceeds that of the same class owned on both the Atlantic and Pacific seaboard. The number of tons carried one mile is nearly one-third of that of all the railways of the United States. In the one item of iron ore some 60 per cent of the entire product of the country is carried on these waters. Industrial necessities and the longer water hauls as compared to the rail have brought about a revolution in the method of handling freight at terminals, especially in ore and coal, until the cost of carriage has been reduced on some lines below that of ocean service. The recent deepening of the intermediate channels gives low-water depths of eighteen feet in place of the former draft of fourteen feet and an ordinary depth of twenty feet in place of sixteen feet. The recent fleet built to utilize this improvement can carry a cargo of some 6,000 tons, and a steamer with two barge consort has been launched capable of taking with one crew and in one tow 20,000 tons of ore or coal.

These results have so far accentuated the advantages of water carriage that ore can be taken from Lake Superior to Lake Erie points, nearly 1,000 miles, at 50 cents per ton and coal returned at 25 to 40 cents, while the rate quoted on Mr. Carnegie's special double-track railway, with 100-pound rails and 50-ton cars, for mineral traffic between Conneaut and the Pittsburgh district is 50 cents and over for a haul of about one-tenth.

Grain cargoes to Buffalo, which have averaged about 1 1-3 cents per bushel, have not yet come down in proportion, but will drop to about two-thirds, or to  $\frac{1}{2}$  to 1 cent per bushel, and cargoes have been carried inside of 1 cent.

The maximum lake trip from Chicago and Duluth to Buffalo is now \$30 and 1,000 miles respectively. At Buffalo the charge for transshipment on east-bound business has been frequently greater (on grain) than the carriage by vessel. Charging to the terminal everything which legitimately pertains to the transfer, the cost for shipping grain to Liverpool for several years past has averaged as follows:

	Cents per bushel.
Lake rate for 330 miles.....	1.37
Buffalo transfer.....	1.38
Erie canal rate, 500 miles.....	1.38
New York transfer (depending on storage).....	1.63 or more
Ocean rate for 3,500 miles.....	4.57

Total, Chicago to Liverpool.....12.16

The combined lake and ocean rate is 5.94 cents, as against a charge of 6.23 cents across the state of New York with its two terminals. A reduction of lake rates due to the larger vessels will increase the discrepancy, while the improvement of the Erie canal now under way, and a reform in transfer charges, will decrease the charge across New York state. Still, the substantial fact remains that from Lake Erie to the seaboard the charge has been and is likely to continue greater than the free water carriage for ten times the distance.

In further illustration may be cited the grain rate to Montreal by lake vessel to Ogdensburg or Prescott and thence by barge to Montreal. After taking out canal and transfer charges it is found that the lake rate for 1,160 miles is less than the barge rate for 120 miles between Prescott and Montreal, and only about one-third the total through rate.

The consideration of such facts makes apparent the enormous advantage of moving freight in large cargoes without breaking bulk. With a suitable waterway development it is estimated that a vessel could make the round trip between Chicago and Montreal in 50 per cent more time than between Chicago and Buffalo and that the freight rate ought not to be over 50 per cent greater to Montreal than to Buffalo. Again, the round-trip time by the Champlain route to New York should not exceed the Buffalo time over 80 to 90 per cent, or the New York rate will be less than double the lake rate to Buffalo. With the new type of vessel and Buffalo rate of  $\frac{3}{4}$  to 1 cent the New York rate will be inside of  $\frac{1}{2}$  to 2 cents, as against the prevailing rate of 5.9 cents by lake and canal. The Mohawk route may give still more favorable results. The Montreal rate should be  $\frac{1}{4}$  to  $\frac{1}{2}$  cents under the new conditions.

It will be perceived that these probable rates to the seaboard do not differ greatly from the present transfer charge to ocean vessels, so there is a large margin to induce a type of vessel that shall be adapted to both lake and ocean navigation, that may carry cargoes unbroken for foreign delivery. Considering this class of facts induced Commissioner Russell to predict that with the early exhaustion of high-grade Spanish Bessemer ores Lake Superior ores could be profitably shipped for foreign delivery, and as if almost in fulfillment an agent of a

Belgian firm has asked a Chicago firm to quote a price, so that this may not be impossible even on the completion of the Canadian system of canals in 1899, which will then permit the passage of a steel vessel with a cargo of 2,000 tons. Mr. Russell is further of opinion that the methods of handling lake freights at terminals, if carried into the ocean business, will revolutionize the ocean carrying trade and that the pioneers in these methods will reap the fruits wherever they have the opportunity to enter the field.

The commissions conclude that in the interior of the continent is to be expected relatively the largest future development and that the economic conditions will demand the largest type of carrier found useful in any trade in the world, and they recommend the development of water routes adequate to vessels of a draft of not less than 28 feet. They assume a type of vessel with a draft of 27 feet, a beam (outside) of 60 feet and a length of 540 feet and capable of carrying a cargo of 11,000 to 15,000 net tons, according to model and speed.

They assume a second type, adapted to the present interlake and to the coasting trade, of a draft of 20 $\frac{1}{2}$  feet, a breadth of 45 feet and a length of 405 feet, with a cargo capacity of 4,800 to 6,400 net tons. They recommend that works be projected on the larger basis and so built, except in so far as they may, without prejudice, be developed progressively.

After an examination of all the routes that have been suggested and advocated by diverse interests they conclude that the most eligible route for deep-water navigation, starting from the head of Lake Superior at Duluth-Superior, and from the head of Lake Michigan at Chicago, is by the several lakes and their intermediate channels and by the proposed Niagara ship canal (Niagara river at Tonawanda to Lake Ontario at Olean) to Lake Ontario; thence the Canadian seaboard may be reached through the St. Lawrence, and the American seaboard via the St. Lawrence, Lake Champlain and the Hudson river, or by the Oswego-Onondaga-Mohawk valley and the Hudson river, the decision between the two latter lines to be reached on comprehensive surveys and matured projects. The Ottawa route from Georgian bay via the Ottawa river, the Huron-Lake route from Georgian bay via Lake Simcoe to Lake Ontario, and the direct route from Lake Erie through Western New York along the Erie canal are not considered available.

Attention is called to the fact that the domestic movement to and from that portion of the Atlantic seaboard between Norfolk and Portland vastly exceeds the foreign movement and that a St. Lawrence route would be of little utility in this trade on account of the distance that must be doubled by the Gulf of St. Lawrence, and that perforce a route to the American seaboard is a necessity and that its only available outlet is by the Hudson river.

Independent of seaboard considerations the utility of uniting Lake Superior to the upper lakes is conceived to have the same justification as the opening of Lake Superior, which has been so fruitful in developing traffic. The same argument carries the union to Lake Champlain, which lies at the back door of New England and is favorably situated for a distributive traffic and for return cargoes of package freight, iron ore and building stone. Thus would be united

the six great lakes, bordering immediately nine states.

To obtain thirty feet of water between Chicago and Buffalo involves forty-three miles of deepened channels, or about the same amount of work as has already been carried out in the deepening of the St. Lawrence, by which ocean navigation has been extended 160 miles from Quebec to Montreal. The deepening of the tidal Hudson so as to carry ocean navigation involves less work, over a distance of thirty-one miles.

The report gives the relative amount of canal, artificial channel and deepened channel by the three routes now under advisement and concludes that there are no difficulties beyond the magnitude of the works that are not within the resources of engineering of methods approved by experiment. It calls attention to the fact that the large extent of restricted channel makes expedient a comprehensive examination of the subject of ship resistance, to the end that canal prisms and other works may be planned so as to avoid the trouble heretofore met in the navigation of such channels and the assumption so often made that vessels capable of ocean navigation will not use such water routes.

The report presents an elaborate set of maps and profiles of all routes for connecting the several lakes and uniting the same with the Atlantic seaboard.

It also takes up in great detail the hydrology of the lake basin and presents for the first time all the known data in regard to lake fluctuations, area of lake surfaces and watersheds, elevations of the lake system and also the effect of gales on lake vessels. It also gives an original collection of data in regard to the ice season, covering the ter-

ritory from Cairo to Hudson's bay and from the Yellowstone to the Atlantic, from which important deductions are made respecting the effect of ice on the vessel routes.

Several important topics, as outflow of the lakes and its variations with rainfall, ship resistance in restricted channels and the purely commercial questions are not treated at length, although the necessity is pointed out. Lack of resources and time requires that these be deferred. The suggestions as to the final course of the investigations are, however, so complete and so explicit that congress has made them part of the instructions to the board of engineers recently appointed.

The commission estimates an expenditure of \$600,000 as required to complete the subject, \$250,000 to be devoted to a systematic measurement of the lake outflow and to kindred matters and \$350,000 to examinations, surveys and investigations leading quickly to a final project. Of this \$150,000 has been appropriated as recommended for the first year.

Both commissions in the spirit of the law of their creation have considered the subject-matter without international bias and ignoring the boundary line, considering that the facts should be clearly set forth and that the political aspects of the problem were the proper province of the legislative bodies of the two countries, after these facts had been ascertained and digested.

The question of a water route from the lake to the Gulf of Mexico seaboard was not considered within the province of the inquiry at this time.

The report is H. R. Doc. No. 192, LIVth cong, 2d Ses., and contains twenty-eight plates.

### ICE DATA RELATIVE TO NAVIGATION.

The following table, compiled from the report of the United States deep waterways commission, shows the average dates when rivers, streams, lakes and canals are closed by ice and the average dates of opening:

## INLAND NAVIGATION OF THE UNITED STATES.

The following is from a paper upon "Inland Navigation in the United States" presented to the Institution of Civil Engineers by Maj. Smith S. Leach, engineer corps, U. S. A.:

The length of the navigable rivers of the United States on which some measure of improvement has been undertaken exceeds 26,400 miles. The geographical distribution is: Atlantic slope, 5,500 miles; Gulf slope, 4,200 miles; Mississippi basin, 15,100 miles; lake basin, 200 miles; and Pacific slope, 1,500 miles. The great lakes have in the United States a developed shore line of 3,700 miles, along which are seventy-six harbors, improved or artificially created; while the bays and sounds of the Atlantic coast have 3,600 miles, and those of the Pacific, not including Alaska, 1,900 miles, making a total of 10,200 miles of shore along which goods might be embarked for water transportation. Of the 26,400 miles of navigable rivers 13,500 miles have been improved for open navigation, distributed as follows: Of 4 feet depth or less, 1,944 miles; of 4 feet depth, 3,373 miles; of 5 feet depth, 1,200 miles; of 6 and 7 feet depth, 2,792 miles; of 8 to 10 feet depth, 1,550 miles; of 11 to 20 feet, 280 miles, and of more than 20 feet depth, 246 miles.

Besides this open navigation projects have been approved and work completed or begun for 2,000 miles of slack-water navigation, with locks and fixed or movable dams. These projects will require 163 locks, with a total lift of 1,565 feet. Ninety-two locks have been constructed and are now in operation, with a total lift of 820 feet, which give 4,985 miles of navigation of 4 to 7 feet depth.

There are 32 miles of lateral canals in operation to avoid rapids on the St. Mary's, Mississippi, Ohio and Tennessee rivers; and on the latter stream 11 miles more are under

construction. There are also 31 miles of "cut-off" canals in operation, providing shorter and safer routes; and another canal of this class, 50 miles long, from the Mississippi to the Illinois, is under construction. All these are owned by the United States and are free. In addition, 4,665 miles of canals have been built by states and corporations, comprising both of the classes named, and a third class which may be called connecting canals, uniting two separate drainage basins having no natural inland water communication. Of these 2,215 miles have been abandoned, leaving 2,450 miles in operation, with 937 locks aggregating 9,723 feet lift. The canals in operation average a lock to 2.6 miles. Of those abandoned, 483 miles had 502 locks, and a ratio of a lock to the mile would probably be a fair average for all of them.

The Erie canal has been almost constantly in course of enlargement, first by doubling its locks, and then by lengthening them, which latter work is now complete except at the flights. Under a new project of enlargement just adopted the Erie canal will be deepened to 9 feet and the Champlain canal to 7 feet. Probably hydraulic lifts will replace the flights at Lockport and Cohoes and possibly elsewhere. Other important projects in progress are the Hennepin canal, connecting the Mississippi at Rock Island with the Illinois near LaSalle, and the Chicago drainage canal, which will ultimately replace the Illinois and Michigan canal. Surveys are being made by the United States to determine the feasibility of a modern canal across Ohio. Surveys have also been made for a ship canal from Pittsburgh to Lake Erie.

The total expenditure on works of inland navigation has exceeded \$450,000,000, one-ninth of which is represented by the abandoned canals.

## TRANS-MISSISSIPPI AND INTERNATIONAL EXPOSITION.

The Trans-Mississippi and International exposition will open its gates in Omaha, the metropolis of Nebraska, June 1, 1893, and continue for five months. It will for the first time adequately reveal the wealth and resources of the western world. This exposition had its origin in resolutions adopted by the trans-Mississippi commercial congress at Omaha in 1893, representing twenty-four states and territories. The exposition is controlled by a corporation known as the Trans-Mississippi and International Exposition, with a capital of \$1,000,000. The management is vested in a directory of fifty members, with an executive committee of six department managers. Each department is divided into appropriate bureaus in charge of experts in their respective branches. In addition to the stock subscriptions, revenues aggregating not less than \$1,000,000 from various sources have been assured. Under an act of congress the enterprise is granted recognition as a national and international exposition, with privileges for the admission of foreign exhibits free of duty, the right to strike memorial medals through the United States mints, and all other privileges heretofore granted to international exhibitions. The government will erect a large building and place therein a government exhibit. The bill carried an appropriation of \$200,000. The secretary of the treasury has issued official orders covering the regulations under which foreign exhibitors may participate. By direction of President McKinley the state department has extended invitations to the rulers of foreign nations soliciting them to participate. A commission appointed by the president will collect the materials for a magnificent government exhibit.

Nebraska has appropriated \$100,000, Illinois \$45,000, Montana \$30,000, and Colorado, Utah, Iowa and other western states have made appropriations and are preparing extensive exhibits. In Nebraska and adjoining states there is an aggregate population of over 9,000,000. The managers of the exposition estimate the total attendance will be not far from 2,500,000.

The city of Omaha has contributed \$30,000, through its park commission, and will doubtless increase this sum to a total of \$100,000 by expenditures for beautifying and improving the exposition grounds and approaches thereto before the opening day of the exposition, while Douglas county, of which Omaha is the seat, has authorized an issue of \$100,000 in exposition bonds.

The exposition grounds are within the city limits, on the north side. The area known as the Kountze tract, lying across 20th street and extending from Sherman avenue to 24th street, because of its location, topography and symmetry, was selected as the focus for the group of main buildings. This ground measures about half a mile in length by 670 feet in width. A tract of sixty acres lies at right angles to it on the east of Sherman avenue, stretching along the bluffs and overlooking the river and country beyond. The remainder of the exposition grounds lies west of Sherman avenue and includes the old fair grounds and the land beyond it as far as to the station of Oak Chatham. The area of the northwest tract is eighty acres. Sherman avenue will be spanned by two bridges, thus joining the three tracts, and, with the 20th street junction of the Kountze and Oak Chatham tracts, providing for unim-

peded circulation through the grounds. The main entrance is on the south side, at the intersection of 20th street, through the arch of states into the grand canal court. This arch, one of the most noticeable in the group of structures, is decorated with a frieze composed of the arms of the trans-Mississippi states, the whole being surmounted by sculpture figures bearing the United States shield. A lagoon extends the entire length of the tract.

The great buildings of the exposition are situated on either side of the lagoon, between Sherman avenue and 24th street, as follows: Agriculture, fine arts, electricity and machinery, mines and mining, liberal arts, manufactures and the auditorium. At the west end is the government building. On the north line, facing the lagoon, at the intersection of 20th street, stands the administration building. The arch of the states forms the main entrance to the grounds at the intersection of 20th street. The horticulture, dairy, apiary, poultry and the various state buildings are located on the bluffs tract east of the grand court. The estimated expenditures for preparation and embellishment of the grounds and the construction of buildings approximate \$1,200,000.

The Illinois building is two stories high, covering an area of 90 by 140 feet. The structure will be surmounted by a dome, the top of which will be sixty feet above the ground.

The Wisconsin building is a pleasing type of classic architecture. The pediment is supported by four immense fluted Corinthian columns, forming the entrance of the edifice. The angles of the building are flanked on both sides by pilasters of the Corinthian order.

At the extreme west end of the lagoon the water spreads out either way into a broad basin, a trefoll in plan, lying directly before the government building, and surrounded by a peristyle of double columns, forming shady promenades on both sides. These colonnades converge toward the west, the false perspective tending greatly to magnify the extent of water and open space beyond. Here the sculptured architecture is everywhere doubled in effect by reflection.

Under the department of exhibits the following subdivisions or bureaus have been created, viz.: Agriculture, horticulture, forestry, irrigation, live stock and dairy, mines and mining, liberal arts, manufactures, fine arts, education. The sections devoted to machinery and electricity are in charge of commissioners. The bureau of fine arts is under the direction of the Western Art association. The bureau of education is under the superintendency of the woman's board. Manufactures, mines and mining and liberal arts are under the direct control of the manager of the department.

Nearly eighty acres of land at the north end of the vast inclosure has been set apart for a racing course, live-stock stalls, a ten-acre irrigating exhibit in operation, agricultural exhibits, etc. In fact, agriculture and live stock are prominent features of the exposition.

All the agricultural products will be shown in a way to set forth their value and the proportionate part they take in the products of the west. The various branches, dairying, horticulture, poultry, stock growing, etc., will be cared for in separate buildings

specially erected for and adapted to them. The beet-sugar industry will be displayed in a most graphic manner.

No other exposition has ever given so much space proportionately to the horticultural exhibit and especially to the fruit-growing industry.

In pursuance of the original plan efforts are being put forth to present a collective mining exhibit which shall excel any former exposition of the products of American mines.

The northern extremity of the bluff tract is connected with the main grounds by a viaduct over Sherman avenue leading to a large area devoted to concessions. There will be exhibitions of mechanical novelties in infinite variety.

An interesting feature will be Cripple Creek in miniature, an exact reproduction of the famous Cripple Creek mining camp. The concession for Cripple Creek occupies 15,000 square feet.

The Afro-American village will be illustrative of every phase of life among the negroes of the south.

Among other attractions are: The baby incubator; Irish, Tyrolean and Moorish villages; old Vienna, reproduction of Marcus place, Venice; old English county fair; Haggenbeck's animal show; wild west show; Mogul Indian snake dance; cyclorama of the battle of Lookout mountain; the scenic railway, moving picture features, etc.

An attractive feature of the amusement section will be Sherman's umbrella, a massive mechanical invention by which passengers are elevated to a height of 300 feet and revolved slowly within a circle whose diameter is 250 feet. At night the tower will be brilliantly illuminated by electricity, while at the apex a powerful searchlight will be placed. This stream of light may be seen for a distance of 100 miles.

One of the features will be a reproduction, historically correct in all its details, of the last great council of the amalgamated tribes of the Kiowas and Apaches, held in June, 1867. The encampment, which at the time the council was held covered a circle of country ten miles in extent, will occupy four acres of ground at the exposition. The encampment will consist of 250 tepees.

#### OFFICERS.

Gurdon W. Wattles, president.  
Alvin Saunders, resident vice-president.  
Herman Kountze, treasurer.  
John A. Wakefield, secretary.  
Carroll S. Montgomery, general counsel.

#### EXECUTIVE COMMITTEE.

Zachary T. Lindsay, chairman and manager department ways and means.  
Edward Rosewater, manager publicity and promotion.  
Freeman P. Kirkendall, manager department buildings and grounds.  
Edward E. Bruce, manager department exhibits.  
Abram L. Reed, manager department concessions and privileges.  
Wm. N. Babcock, manager department transportation.

#### U. S. GOVERNMENT COMMISSION.

Department of Agriculture—J. H. Brigham, president of commission.  
Treasury Department—Charles E. Kemper, architect.  
Department of the Interior—F. W. Clarke, State Department—W. H. Michael, Smithsonian Institution and National Museum—F. W. True.  
Department of Justice—Frank Strong.  
Postoffice Department—J. B. Brownlow.  
War Department—Capt. A. C. Sharpe.  
Navy Department—Lieut. C. McCormick.  
Fish Commission—Wm. De C. Ravenal.

#### FOREIGN CARRYING TRADE.

Values of imports and exports of the United States carried in American and foreign vessels each fiscal year for the last thirty years, with the percentage carried in American vessels.

## THE COAL MINERS' STRIKE OF 1897.

Early in January, 1897, the annual convention of the United Mine Workers of America was held in the city of Columbus, O., at which the question of miners' wages formed the leading subject of discussion. The continued decline in the wages paid miners for their work induced the convention to take positive grounds not only against a further decrease but also in favor of an advance in the scale then paid in the bituminous-coal districts, which covered a considerable portion of five states, with lesser areas in five or six others. The total number of miners in the entire area is not far from 375,000.

In June the prospect for a further reduction in the wages of coal miners in Ohio increased the unsettled condition and made it evident that a strike would be ordered against such a movement. On the 2d day of July, 1897, the circular announcing a strike was issued by authority of the national executive board and district presidents of the United Mine Workers, which was as follows:

"To the mine workers of the country, greeting. Fellow-miners: At the last annual convention of the United Mine Workers of America, held in the city of Columbus, O., Jan. 12 to 16, 1897, after a full and careful review of the distressing conditions of our craftsmen, brought on by the continued reductions in our wages, in order to prevent any further reduction from taking place and to secure for us a living rate of wages that will enable us to live as Americans ought to, so as to realize from our labor at least a sufficiency to provide the necessities of life, it was determined that the scale of prices should be advanced to the following rates:

"Pennsylvania (Pittsburg district), pick mining, 69 cents per ton; Ohio, pick mining, 60 cents per ton; Indiana (bituminous), pick mining, 60 cents per ton; Illinois (Grape Creek), pick mining, 55 cents per ton, the balance of the state (Illinois) the mining rate of 1894. Machine mining to be paid three-fifths per ton of the price paid for pick mining, except in Indiana (bituminous), where the price shall be four-fifths per ton of the price paid for pick mining; other mining sections a corresponding increase in price that will place them on a relative basis.

"It was further agreed that the time for enforcement of the scale be left with the national executive board and district presidents to determine when it would be most opportune. Therefore, pursuant to the instructions of the national convention, the national board and district presidents met in Columbus on June 24-26 and decided that in their judgment the time was opportune on July 4, 1897, for the enforcement of the before-mentioned scale rates. Therefore, mine workers everywhere will take notice and govern themselves accordingly.

"Fellow-miners, the success and effectiveness of this movement will depend upon the unanimity and fidelity with which you observe and maintain the action of your national convention. The signs of the times, as pointed out by the press and by testimony of men versed in public affairs, are that business is reviving, that an upward tendency in prices of all commodities is apparent. In the general business revival and industrial improvement which are earnestly proclaimed we ought to share, and if we do

not attempt to share we shall be false to ourselves and those dependent upon us, for remember that it has ever been 'that they who would be free must strike the first blow themselves' and that 'eternal vigilance is the price of liberty.'

"Therefore, let our watchword be 'labor is worthy of its hire and mine workers are entitled to a fair day's pay for a fair day's work.'

"In conclusion we would urge upon the mine workers everywhere the necessity of constituting themselves into local committees for the purpose of seeing that action is at once taken to give effect and maintain the objects sought to be accomplished.

"The field of operations is large and it will be an impossibility for the national and district officers to attend to all points, consequently local leaders are urged to assume the responsibility and authority for the successful consummation of our desires.

"To insure success great care should be exercised by all that no breach of the peace occurs at any time or place or under any circumstances. Bulletins will be issued from time to time to keep you informed of the progress of affairs.

"Signed by members of the national executive board and district presidents.

"FRED DITCHER,

"M. D. RATCHFORD,

"President National Executive Board.

"JOHN KANE,

"Vice-President National Executive Board.

"W. C. PEARCE,

"Secretary National Executive Board."

The number of men to be affected by the strike was given by President Ratchford at 150,000, in round numbers as follows: Ohio, 25,000; Indiana, 20,000; Pennsylvania, 50,000; West Virginia, 10,000; Illinois, 30,000; Kentucky and Tennessee, 10,000; Colorado and other states, 5,000.

With the exception of some mines in the states named, the mines comprising the union very promptly obeyed the orders of the executive committee and mining was practically suspended in the entire area of the bituminous-coal districts. On the 19th of July M. D. Ratchford, president of the executive board of the union, issued the following address, in which he set forth the grievances of which the miners complained and the demands they made upon the mine operators. He said:

"Many inquiries have been made by the press and public as to the causes leading up to our suspension, to which we make the following signed statement: Our suspension is not a choice but an alternative. It is the voice of an enslaved class urged to action by cruel and unbearable conditions, the protest of an overworked, underpaid people against longer continuing a semi-starved existence. This method of re-establishing a living rate of wages was not adopted until all other means had hopelessly failed. Conciliation looking toward a permanent, uni-

form mining price to be jointly determined has been repeatedly proposed by us, and as frequently rejected and even ignored by the employers. The spirit of the opposition was crystallized and summed up by a leading operator in joint conference, who threw down the gage of battle in the following significant language: 'Go on and fight; we are ready for you.'

"Notwithstanding the irritableness and unfairness of the above challenge, conciliation was not despaired of at that time, but was pursued until further and more convincing experience demonstrated the futility of our efforts, when we very reluctantly were forced to abandon them and resort to the last and only means at our command. In entering upon this action of last resort we were fully conscious of the vast proportions of our struggle and its effects upon the business and labor interests of the country, but having done all in our power to avert it, and exceedingly regretting its serious consequences, we do not hesitate to appeal to the nation for its verdict. The limit of endurance was reached when honest labor could no longer sustain itself. On the one side we were confronted by a heartless array of employers, whose combated wisdom and wealth suggested no remedy other than continued submission to avarice and greed. On the other side we were met by the cries of nearly 1,000,000 men, women and children, appealing for their rights to the opportunities of life, and wages to sustain them compatible with economy, civilization and present industrial conditions. That wages have been reduced below the living point no one will deny who is at all familiar with the conditions surrounding the lives and earnings of the mine workers.

"The following comparison of prices paid in 1893 with those paid at present tells the story: The great mining district of western Pennsylvania paid for mining in 1893, thin vein, 79 cents, and thick vein 85 cents a ton. The rate paid at present is, thin vein 47 to 54 cents a ton; thick vein, 28 to 30 cents a ton. During the same year the prices in Ohio and Indiana were 70 cents and 75 cents a ton, respectively. At present the price is 51 cents a ton or less in both states, with reduction offered, or at least contemplated, to 45 cents a ton in consequence of the low prices in western Pennsylvania. This ratio of fallen wages holds good all along the line affecting every mining state almost equally alike. In the great Hocking valley district of Ohio the average wage per miner, in one of the largest mines, for a period of eight months, from Oct. 1, 1896, to June 1, 1897, was \$60 per man, or \$7.50 per man per month, gross earnings. From this amount the cost of mine supplies is deducted, leaving the remainder with which to pay house rent, coal, etc., and support his family. At another mine in the same district the gross earnings of thirty-nine miners is shown by the written statements of the company to aggregate \$223.98 for two weeks' labor, or an average of \$2.87 per man per week for the same period. The deductions for company store, powder and rent, including some back rental, aggregate \$619.029. The deduction for store alone, which bespeaks the total cost of supporting thirty-nine families for two weeks, amounts to \$179.05, or an average of \$2.28 per family per week. Further illustrations indicative of the poverty and extreme suffering of the miners, and equally as heartrending, can be found everywhere.

"Ohio furnishes a fair example of the gen-

eral condition of mining. I quote from the report of R. M. Hunseltine, chief inspector of mines of Ohio for 1896, when the mining rate was 55 cents per ton: 'Therefore at 55 cents per ton the daily wages will be found to be \$1.32, or a total of \$221.75 for the year's work, which will give to each miner an average of \$18.48 per month.' This, it will be remembered, is exclusive of all deductions, and the mining rate was 4 cents per ton higher than the present price. The amount of increase in wages demanded, and for which we are now contending, is but 9 cents per ton over our former scale, together with a readjustment of machine mining which will place it upon an equal basis with pick mining giving to each his just proportion.

"Summing up the whole situation in a few words, this movement is nothing less than a spontaneous uprising of an enslaved people, who have determined to submit no longer to the cruel, heartless and inhuman conditions imposed upon them by unscrupulous employers, which have reduced them and their dependents to actual starvation. It should be said, in justice to a large majority of employers, that they are not responsible for this condition. It is due to the actions of a few who have cut prices far below the demands of the market, thus demoralizing trade and cutting wages indiscriminately, until a point is reached where men can no longer live by their thrift and industry.

"M. D. RATCHFORD, President.

"W. C. PEARCE, Secretary."

The proposal to arbitrate the differences between the operators and the miners was favorably received on both sides, but an agreement could not be reached as to the terms upon which the arbitration should proceed. The miners demanded 69 cents a ton for mining coal until such time as the arbitrators should decide the controversy, while the operators offered 65 cents a ton pending the arbitration, and in case the arbitrators should decide upon 69 cents as the pay to which the miners were entitled the operators would make up in back pay such wages as the miners were entitled to under the award of the arbitrators. If the arbitrators should award less than 65 cents the miners should work at a rebate until such excess should be refunded. Attempts at arbitration were therefore abandoned.

As a rule there were few outbreaks of violence. At points in Pennsylvania and West Virginia where the miners continued at work strenuous efforts were made by the operators to retain the men, while the strikers were equally determined to call them out and close the mines. The result was that meetings were held in which the working miners were appealed to to join the strikers who roamed about in large bands from one mining district to another advocating the strike. In the federal court of West Virginia the Monongah Coal and Coke company, which had been bitterly complained of by leaders of the strike, applied to Judge Jackson for an injunction restraining the leaders from any interference with its men. The injunction was granted against Eugene V. Debs and his associates, and Judge Jackson, after reciting the allegations in the complaint, said:

"Upon consideration whereof the bill is ordered to be filed and process issued thereon, and a temporary restraining order is allowed, restraining and inhibiting the defendants or all others associated or con-

connected with them from in any wise interfering with the management, operation or conducting of said mines by their owners or those operating them, either by menaces, threats or any character of intimidation used to prevent the employees of said mines from going to or from said mines, or from engaging in the business of mining in said mines.

"And the defendants are further restrained from entering upon the property of the owners of the said Monongah Coal and Coke company for the purpose of interfering with the employees of said company, either by intimidation or by holding of either public or private assemblies upon said property or in any wise molesting or interfering with or intimidating the employees of the said Monongah Coal and Coke company so as to induce them to abandon their work in said mines.

"And the defendants are further restrained from assembling in the paths, approaches and roads upon said property leading to and from their homes and residences to the mines, along which the employees of the Monongah Coal and Coke company are compelled to travel to get to them, or in any way interfering with the employees of said company in passing to and from their work, either by threats, menaces or intimidation; and the defendants are further restrained from entering the said mines and interfering with the employees in their mining operations within said mines, or assembling upon said property at or near the entrance of said mines.

"The purpose and object of this restraining order is to prevent all unlawful combinations and conspiracies and to restrain all the defendants engaged in the promotion of such unlawful combinations and conspiracies from entering upon the property of the Monongah Coal and Coke company described in this order, and from in any wise interfering with the employees of said company in their mining operations, either within the mines or in passing from their homes to the mines, and upon their return to their homes, and from unlawfully inciting persons who are engaged in working the mines from ceasing to work in the mines, or in any wise advising such acts as may result in violations and destruction of the rights of the plaintiff in this property."

The injunction was the subject of merciless criticism by the strikers and their friends and was as vigorously defended by those who opposed them. Whatever may have been the merits or wisdom of the injunction, it intensified the feeling between the operators of the mines and the strikers, which culminated in a tragic affair near Hazleton, Pa., on the 10th of September, in which twenty-one marching miners were killed and forty wounded, some of them fatally, by a sheriff's posse. It seems that a band of marching miners, mostly Slavs, had been previously driven away from the Hazleton workings, after a sharp conflict, and were intercepted as they were on their way to the Lattimer breaker. The posse was under the command of Sheriff Martin and he claims his band was being roughly handled when the deputies were ordered to fire.

Previous to this a conference of the coal operators was held in the Pittsburg district on the 26th of July and an agreement was reached as to what wages they would pay for the mining of coal. It was claimed to have no reference to the strike, but it

undoubtedly did exercise considerable influence in that direction.

The agreement as adopted provided for cash payment of wages, 2,000 pounds to the ton, check weighs on the tipples, miners to be credited with the full quantity of coal contained in the mine car, abolition of company stores, semi-monthly pay days, uniform price for pick mining in the thin and thick vein districts, and screens not exceeding one-half inch.

It also provided that in case of the violation of the provisions and terms of the agreement a penalty of 10 cents a ton on the total output of coal mined by the violator will be charged, which penalty is to be paid a commission subject to the right of further arbitration or appeal. Said penalty when collected is to be distributed among the signers of the agreement pro rata in proportion to the total amount of tonnage or output made by them during the year.

The commission is to be chosen annually and shall be known by the name of the uniformity commission. It shall be composed of nine members, the thick and thin vein operators having proper representation. The members shall be sworn to faithfully and impartially perform the duties of their office, and will be authorized and empowered to enforce the judgment and awards.

It shall also be empowered to subpoena witnesses with the same force and effect as a board of arbitrators duly appointed under the act of the assembly of the state of Pennsylvania relating to compulsory arbitration. The agreement shall not become effective unless it has been signed by 95 per cent of the operators on or before Jan. 1, 1898.

After 90 per cent have signed the agreement, if any fifteen operators shall be of the opinion that enough have signed to render it effective, a meeting shall be called in Pittsburg to declare it in force.

On the 10th of September an interstate convention of miners was held at Columbus, O., at which a resolution was adopted accepting the proposal of the Pittsburg operators. The vote was 496 for adoption to 817 against accepting the terms of settlement.

The delegates from Illinois, who had 250 votes, were unanimously against a settlement. Indiana and West Virginia voted solidly to accept the operators' proposition, but there were scattering votes among the Ohio and Pennsylvania delegates against it. The resolution adopted is as follows:

"Resolved, That we, the miners of Pennsylvania, West Virginia, Ohio, Indiana and Illinois, in convention assembled, do hereby agree to accept the proposition recommended by our national executive committee—viz., 65 cents in the Pittsburg district—and in all of the places in the above-named states where a relative price can be obtained to resume work and contribute liberally to the miners who do not receive the advance and where the fight must be continued to a bitter finish.

"Resolved, That the national officers, executive board and district presidents act as an advisory board for the purpose of providing ways and means for the carrying on of the strike where necessary; provided, however, that no district resume work for ten days, for the purpose of giving miners in other districts time to confer with their operators and get the price if possible."

The basis of the settlement was at the rate

of 65 cents a ton for the Pittsburgh district. A proportionate rate for Illinois and Indiana would be 56 cents a ton. The rate is different in the different districts owing to the greater or less labor required in digging a ton of coal. Where the veins are rich and thick and not deeply covered the rate is less than where the veins are lean and deep under the soil.

There was no arbitration in the settlement. The miners demanded 69 cents a ton. The mine owners offered them 65 cents a ton pending arbitration. If the arbitrators should decide on 69 cents they would make that up in back pay to the miners. If the arbitrators awarded less than 65 cents the miners should work at a rebate until the excess should be refunded.

The miners agreed to accept 65 cents a ton but without waiting for the action of arbitrators rather than to accept the floating scale offered by the operators with a chance of a lower rate being awarded.

Ten days were given to resume work under the new schedule. On the 21st of September Mr. Ratchford issued the following statement:

"To-day will see about 75,000 miners resume work in the bituminous-coal fields of the central states. The strike generally will end to-day. This is the middle of the twelfth week of its duration. The mining situation is not likely to become disturbed

again until the beginning of next year, at which time we hope to be able to settle wage differences amicably and without the necessity of a strike.

"It is well understood that the fight will continue from the present time in all fields and against all operators who refuse to meet the rates. The greatest trouble will be found in West Virginia and a portion of Illinois. I am still hopeful, however, that the producers in those fields will conform to the change and put their mines in operation. Failing to do this, we will fight them as we have done until the beginning of next year, at which time it is said their present contracts will expire.

"I am well satisfied with the agreement reached, and feel that it is the greatest victory gained by trade unions for years. Of course the victory is not altogether one of the miners. While they have done the striking, trade unions and organized bodies have supplied the necessities without which the miners could not possibly succeed. It is a victory for organized labor and not for any particular trade, and we want our friends who have helped us to feel that it is their victory as well as ours. I feel very grateful for the assistance given us by the American Federation of Labor and the kindly disposition shown us at all times by Mr. Gompers and the members of his executive committee."

### HEIGHTS OF MOUNTAIN OBSERVATORIES.

The following table gives the heights of the principal mountain observatories and stations of the world:

Abastouman .....	4,600
Alto de los Huecos .....	13,300
Arequipa .....	8,080
Ben Nevis .....	4,368
Chashani-Summit .....	20,000
Station .....	16,650

### THE LONGEST BRIDGES.

The longest bridge in the world is that over the Tay, in Scotland, which is 3,200 meters (9,696 feet) long; and the next longest is also in Great Britain, being that over the Firth of Forth, 2,394 meters (6,552 feet) in length. The following table gives in meters and in feet the lengths of the principal bridges in various countries:

	Meters.	Feet.
Tay, Great Britain .....	3,200	9,696
Forth, Great Britain .....	2,394	6,552

	Meters.	Feet.
Moerdyck, Holland .....	1,470	4,820
Volga, Russia .....	1,448	4,715
Welchsel, Germany .....	1,325	4,346
Thoen, Germany .....	1,273	4,172
Grandenz (Elbe), Germany .....	1,082	3,580
Brooklyn, United States .....	488	1,601

The greatest single span of the Forth bridge is 521 meters (1,725 feet); of the Elbe bridge, 420 meters (1,375 feet); of the East River bridge, 488 meters (1,610 feet).

## RAILWAYS OF THE UNITED STATES.

For the year ended June 30, 1896.

The ninth statistical report of the Interstate commerce commission, being the complete report for the above-named period, was issued Sept. 30, 1897, and the following is an abstract:

## MILEAGE.

The total railway mileage in the United States on June 30, 1896, was 182,776.63 miles, there being an increase of 2,119.16 miles, or 1.17 per cent, during the year. California shows an increase of 202.06 miles; Florida, 125.84 miles; Georgia, 233.77 miles; Louisiana, 130.17 miles; Michigan, 140.53 miles; Minnesota, 110.43 miles; Ohio, 111.06 miles; Pennsylvania, 168.13 miles; Texas, 144.79 miles; Wisconsin, 115.25 miles, and Indian territory, 181.66 miles. The increase in mileage in the other states and territories in which an increase has occurred is less than 100 miles. The aggregate length of railway mileage, including all tracks, on June 30, 1896, was 240,129.12 miles, the increase being 3,234.86 miles. The length of second track was 10,635.16 miles; of third track, 990.45 miles; of fourth track, 764.15 miles. The mileage of yard track and sidings was 44,912.73 miles.

In the report it is stated that on June 30, 1896, there were 151 roads in the hands of receivers, a net decrease of eighteen being shown in the number of receiverships as compared with the previous year. The length of operated mileage represented by these 151 roads was 30,475.39 miles, the corresponding mileage on June 30, 1895, being 27,855.80 miles. Of the roads in the hands of receivers on June 30, twenty-eight operated a mileage greater than 300 miles and twenty-six operated a mileage between 100 and 300 miles. The capital stock represented by the railways controlled by receivers on June

30, 1896, was \$742,597,698 and the funded debt was \$999,733,766. As compared with the corresponding figures for 1895, the figures given show a decrease of over \$183,000,000 in capital stock and \$319,000,000 in funded debt.

#### CLASSIFICATION OF RAILWAYS.

The number of railway corporations on June 30, 1896, in the United States was 1,935. Of this number 1,008 maintained operating accounts, 782 being classed as independent operating roads and 226 as subsidiary operating roads. Of the roads operated under lease or other agreement 324 received a fixed money rental and 192 a contingent money rental; 262 roads were assigned for operation under forms of agreement not easily classifiable.

The operated mileage affected by reorganization and other corporate changes during the year ended June 30, 1896, was 13,271.31 miles, of which 11,734.85 miles pertained to reorganized roads.

#### EQUIPMENT.

The total number of locomotives in service on June 30, 1896, was 35,950, or 251 more than on the same date of the preceding year. Of this number 9,943 were passenger locomotives, 20,351 were freight locomotives, 5,161 were switching locomotives and 495 were unclassified. The number of cars of all classes in service was 1,297,649, indicating an increase of 27,083 cars during the year ended June 30, 1896. The number of cars assigned to the freight service increased 25,768, being 1,221,887.

From summaries in the report indicating the density of equipment and its efficiency in the transportation of passengers and freight, it appears that the railways in the United States employ twenty locomotives and 713 cars per 100 miles of line. Referring to the country at large, it is shown that 51,471 passengers were carried and 1,312,381 passenger miles accomplished per freight locomotive. It is also shown that 27,634 tons of freight were carried and 4,644,219 ton-miles accomplished per freight locomotive. The number of passenger cars per 1,000,000 passengers carried during the year ended June 30, 1896, was sixty-four and the number of freight cars per 1,000,000 tons of freight carried was 1.595. This average, however, does not include the freight cars owned by outside parties, for the use of which the railways paid nearly \$12,000,000. The total of equipment, including in the term locomotives and cars, on June 30, 1896, was 1,333,599. Of this number 448,854 were fitted with train brakes and 545,583 with automatic couplers.

#### EMPLOYEES.

The number of men employed by the railways of the United States on June 30, 1896, shows an increase of 41,586, being 826,620, which, assigned on a mileage basis, gives 454 men per 100 miles of line. The corresponding figures for the year ended June 30, 1895, were 873,602 and 515. The assignment of employees corresponding to the four main divisions of the classification of operating expenses was as follows: General administration, 31,792; maintenance of way and structures, 243,627; maintenance of equipment, 167,850; conducting transportation, 373,747; unclassified, 9,609.

For the first time a summary showing the amount of compensation paid to the several classes of railway employees is presented in this report. It includes the compensation of over 99 per cent of the employees for 1895 and 1896. The aggregate amount of money paid in wages and sala-

ries for the year ended June 30, 1896, was \$468,824,531, or 60.65 per cent of the total operating expenses of railways. The aggregate compensation for 1895 was \$445,608,261, or 61.33 per cent of the total operating expenses.

#### CAPITALIZATION AND VALUATION OF RAILWAY PROPERTY.

The amount of railway capital on June 30, 1896, was \$10,568,865,771, which, assigned on a mileage basis, shows a capital of \$69,610 per mile of line. It should be noted, however, that these figures do not include current liabilities, which, if included as a part of capital, as in former years, would increase the amount of outstanding capital about \$613,000,000, making the amount per mile of line \$63,068. The amount of capital stock was \$5,236,527,269, of which \$4,265,470,577 was common stock and \$969,956,692 preferred stock. The funded debt was \$5,340,338,502, consisting of bonds, \$4,517,872,063; miscellaneous obligations, \$447,735,531; income bonds, \$314,425,977, and equipment trust obligations, \$50,864,931. The amount of stock paying no dividend was \$3,667,563,194, or 70.17 per cent of the total outstanding. The amount of funded debt, not including equipment trust obligations, which paid no interest, was \$99,559,442. Of the stock paying dividends, 1.63 per cent of the total stock outstanding paid from 3 to 4 per cent; 5.55 per cent of this stock paid from 4 to 5 per cent, 6.83 per cent paid from 5 to 6 per cent, 3.91 per cent paid from 6 to 7 per cent, and 4.37 per cent paid from 7 to 8 per cent. The total amount of dividends was \$87,603,371, which would be produced by an average of 5.62 per cent on the amount of stock on which some dividend was declared. The amount of bonds paying no interest was \$515,029,668, or 11.40 per cent; of miscellaneous obligations, \$68,918,680, or 15.05 per cent, and of income bonds, \$276,611,094, or 87.96 per cent.

#### PUBLIC SERVICE OF RAILWAYS.

The number of passengers carried during the year ended June 30, 1896, was 511,772,737, being an increase of 4,351,375 as compared with the year ended June 30, 1895. That year, however, showed a decrease of 33,266,837 as compared with 1894. The number of passengers carried one mile during the year was 13,049,007,238, showing an increase as compared with the previous year of \$60,560,962. The corresponding decrease of the year 1894 was 2,100,999,622. The number of passengers carried one mile per mile of line—that is, the figures indicating the density of passenger traffic during the year ended June 30, 1896—was 71,705, an increase of 3,133 in this item being shown. The corresponding decrease as shown by the report of 1895 was 12,761. The number of tons of freight carried during the year under consideration was 765,891,385. This is the largest tonnage ever reported for railways in the United States. The increase during the year was 69,130,214. The number of tons of freight carried one mile was 95,328,360,278, there being an increase of 10,100,844,387. The density of freight traffic is shown by the number of tons of freight carried one mile per mile of line, which was 523,832. These figures, as compared with those of the preceding year, show an increase of 44,342 ton-miles per mile of line.

#### EARNINGS AND EXPENSES.

The gross earnings of the railways of the United States for the year ended June 30, 1896, were \$1,150,169,376, having increased in

comparison with the previous year \$74,797, 914. The sources of the income comprised in gross earnings from operation during the year were: Passenger revenue, \$266,562,633; increase, \$14,316,363; mail, \$22,379,819; increase, \$1,410,077; express, \$24,880,283; increase, \$565,376; other earnings, passenger service, \$6,691,279; increase, \$576,493; freight revenue, \$786,616,337; increase, \$66,622,375; other earnings, freight service, \$3,885,890; decrease, \$254,960; unclassified, \$579,368. The expenses of operation for the year covered by the report were \$772,989,844, being greater by \$47,268,629 than the preceding year. The operating expenses were assigned as follows: Maintenance of way and structures, \$160,344,960; increase, \$16,368,806; maintenance of equipment, \$132,381,935; increase, \$19,593,259; conducting transportation, \$432,217,582; increase, \$11,068,619; general expenses, \$36,082,285; increase, \$176,268; unclassified, \$961,229. A comparative summary giving a detailed analysis of operating expenses for 1896 and 1895 appears in the report.

The income from operation—that is, the amount of gross earnings remaining after the deduction of operating expenses—was \$377,180,332, which exceeds the corresponding item for 1895 by \$37,529,285. The income from other sources, mainly from leases and investments, was \$129,024,731, which, added to the income from operation, makes a total income of \$506,205,063. The total deductions from income were \$416,573,137, so that the net income out of which dividends and surplus were declared was \$89,631,926. This amount is \$33,615,667 larger than the corresponding one for the previous year. The dividends declared were \$87,093,371, leaving a surplus of \$1,538,555, after the satisfaction of adjustment claims amounting to \$24,385. This small amount of surplus, however, shows an improvement, since the results of railway operations during the years 1895 and 1894 showed deficits of \$29,945,241 and \$45,851,294, respectively.

An analysis of the total deductions from

income, \$416,573,137, shows that they were composed of the following items: Salaries and maintenance of organization, \$545,468; interest on funded debt, \$349,624,177; interest on interest-bearing current liabilities, \$5,469,063; rents paid for lease of road, \$32,972,323; taxes, \$39,970,791; permanent improvements, \$5,162,240; other deductions, \$19,829,076.

#### RAILWAY ACCIDENTS.

The statistics submitted show that the number of railway employees killed during the year ended June 30, 1896, was 1,861, and the number injured was 29,969. These figures indicate an increase of 50 in the number killed and of 4,273 in the number injured as compared with the preceding year. The number of passengers killed was 181, and the number of passengers injured 2,873, being an increase of 11 in the number killed and of 498 in the number injured. The number of persons other than employees and passengers killed was 4,406, and the number injured 5,345. These figures include casualties to persons reported as trespassers, of whom 3,811 were killed and 4,468 were injured. From summaries showing the ratio of casualties it is found that for every 444 men employed on railways 1 was killed, and for every 28 men employed 1 was injured. A similar comparison as to trainmen shows that 1 trainman was killed for each 152 trainmen employed, and that 1 trainman was injured for each 10 trainmen employed. The number of passengers carried for 1 passenger killed was 2,827,474, and the number of passengers carried for 1 passenger injured was 178,132. As showing in another way the immunity of passengers from accidents, the report gives ratios based upon the number of miles traveled, from which it appears that 72,093,993 passenger-miles were accomplished for every passenger killed, and 4,541,945 passenger-miles for every passenger injured.

#### THE COMMERCIAL NAVIES OF THE WORLD—1896.

The latest edition of the "Repertoire Generale de la Marine Marchande," published by the Bureau Veritas, contains the usual general summary of the steamships belonging to the different maritime nations and measuring 100 tons gross and upward, as also the accustomed list of sailing vessels measuring fifty tons and upward, and likewise a list of the smaller vessels which are classed in the Veritas Register. The following table shows the number of steamers of over 100 tons and the collective gross tonnage belonging to the sixteen principal maritime nations—that is, whose aggregate gross steam tonnage surpasses 100,000 tons:

	Steamers.	Gross tons.
Great Britain and colonies.	5,690	10,245,577
Germany	831	1,360,472
France	523	953,244
United States	477	761,797
Spain	365	619,315
Norway	551	494,612
Italy	223	344,523
Holland	204	326,794
Japan	267	215,363
Russia	314	277,328
Austria-Hungary	255	254,269
Denmark	265	248,773
Sweden	127	238,777
Greece	107	144,975
Brazil	314	134,395
Belgium	66	139,340

Besides the steam tonnage set forth in the foregoing table there are 2,667 small steamers (below 100 tons), measuring altogether 415,069 tons gross. The number of existing steamers whose measurement is between 5,000 and 5,000 tons is 131; between 6,000 and 8,000 tons, 53; those over 8,000 tons, 25, and of these eight are of more than 10,000 tons—viz., the Campania, Friedrich der Grosse, Georgic, Lucania, New York, Paris, St. Louis and St. Paul. The general total of the steamers of over 100 tons is given in the Repertoire as 11,155, representing 17,089,596 tons gross and 10,761,025 tons net. The sailing tonnage is divided among the principal maritime nations as follows, thirteen nations possessing sailing tonnage of over 100,000 tons:

	Ships.	Net tons.
Great Britain and colonies.	5,726	3,267,627
United States	3,881	1,358,467
Norway	2,801	1,176,174
Germany	1,094	566,973
Italy	1,062	472,002
Russia	1,763	363,044
Sweden	1,444	286,665
France	1,425	252,940
Greece	1,059	246,176
Turkey	1,247	241,098
Spain	1,115	167,143
Denmark	795	149,843
Holland	642	139,649

## GREECE, TURKEY AND CRETE.

## THE EASTERN QUESTION.

The causes of the trouble between Greece and Turkey are remote and the many complications leading to existing difficulties cannot be easily understood without some knowledge of the political history of modern Europe. Primarily of a religious nature, what is now generalized as "the eastern question" gradually became a political problem involving the existence of some nations, the commercial supremacy of others and the success or defeat of distinctive national policies.

The Christian church was for many centuries a united body with power centering at Rome. When Constantine made Constantinople the capital of the Roman empire the bishop of the new capital became the rival of the Roman pontiff and aspired to exclusive dominion over the church. This led to a bitter quarrel, and finally, in 1054, to separation between the east and the west—between the Greeks and Latins. Constantinople remained the actual capital of the Roman empire and head of the eastern or Greek church, while Rome was the head of the Latin or Roman catholic church.

The western portion of the empire was overrun by the northern barbarians and several kingdoms were founded on the ruins. Charlemagne united these in one empire, of which France was the chief, with the recognition of Rome as the head of the western church. All this time the eastern or Greek empire had been in existence with Constantinople as the head of the church and the seat of government. The west was hostile to the east, and church and national policies was shaped on this basis. The crusaders of the west even went so far as to turn aside from their attempts to recover Jerusalem from the Turks to capture and pillage Constantinople, the capital of the Christians of the east.

This blow was a serious one, and from it dates the decline of the eastern or Greek empire. The empire and the church went down with the capture of Constantinople by the Turks in 1453. The Turkish policy was to trample out the religion of the east as well as its political spirit and centuries of cruel struggle ensued. The Christians of the northern sections found a friend in young Russia. That nation adopted from the first the Greek faith and worship and became its champion. The struggling nations of the east turned naturally to her and she rose rapidly in power. She inherited the quarrel with the catholic powers of the west and all her people hated the Turk. Her national policy was relentlessly aggressive. Her aim was to repossess the countries of the eastern empire and, above all, to recapture Constantinople. That city was to the Russian the holy city in rounding out his empire and be in the earlier stages of the struggle never lost sight of the purpose to regain the old capital. This spirit entering into a national policy became threatening to western Europe, and, as the government of Russia schemed for commercial as well as political ascendancy, the commercial nations of the west shaped their policy to oppose any such consummation. This feeling entered into all alliances and combinations, and the west being strong politically and commercially, has prevailed. The west drove the Turk from every state or nation, but she has resisted every attempt of the east to drive the same

people from her empire. This is one phase of the case.

Politically Russia has always been the friend and ally of every nation opposed to the Turk. She has been in sympathy with the rebels in every revolutionary or insurrectionary movement in Turkey, because the insurrectionists were Christians of the Greek church. She early conquered Moldavia and Wallachia and compelled Turkey to grant concessions to the Christians of other northern provinces. The war of 1828-9 grew out of her interference in behalf of the Greeks in their struggle for liberty a few years before. She undertook this war, however, under pledges to Great Britain and France that it should not be a war of conquest. If Russia absorbed Turkish territory, gaining absolute control of the Black sea and valuable ports on the Mediterranean, the commercial interests of the western nations would suffer, and on this ground the Turk was better than the Russian. Russia made peace when she had virtually conquered Turkey, and this was "in the interests of Europe." Russia was content with treaty stipulations looking to the protection of the Christians.

## THE CRIMEAN WAR.

Kinglake contends that the origin of the Crimean war in 1853 was a quarrel between the Greek and Latin churches as to privileges at Jerusalem. Turkey, influenced by Louis Napoleon, favored the Roman church, and the complications led to irritation and the irritation to war. Russia, taking up the old quarrel of the Greek church and claiming that existing treaties had been violated, invaded Turkey. Great Britain and France formed an alliance with Turkey and Russia was compelled to make peace on their terms. While Russia made war in the name of persecuted Christians, England and France made war not so much in the interest of the Turk as in the interest of western Europe. Their scheme in the event of the dismemberment of Turkey was to form an independent nation of the Christian provinces of Turkey and thus remove the cause of Russian irritation. Russian influence was met on its own ground and counteracted. The result of the defeat of Russia at Sevastopol was the treaty of Paris, in which the eastern question was taken out of her hands and committed to the great powers of Europe. All troubles, after the Christians in Turkey were to be considered in common and no nation was to act independently except under given circumstances. The Black sea was opened to the fleets of all nations, but no war vessels of Russia or Turkey were to be allowed in its waters. Russia was to disarm and the fortifications on the Black sea coast were to be dismantled. The Christian provinces of Wallachia and Moldavia, lying between Austria and Turkey, were formed into the independent principality of Roumania and placed under the guardianship of Europe.

In 1870, when France was powerless and England embarrassed, Russia receded from certain provisions of the treaty of Paris and placed a war fleet on the Black sea. She began the work of putting her army on a war footing and under various pretenses made ready for the coming struggle. The Herzegovinian insurrection of 1875 was the rebellion of the Christians of that prov-

ince against Turkish taxation and persecution. Servia was drawn into the conflict; and as Servia was a creation of the treaty of Paris (made semi-independent under the rule of native princes and placed under the protection of the European powers, although tributary to Turkey) all Europe became incidentally interested. European interference compelled a truce and negotiations were commenced looking to permanent peace. Russia secretly assisted Servia in the struggle against Turkey and demanded that the great powers should interfere in behalf of the Christians of the northern provinces. Certain reforms were demanded and these met the approval of England, France, Germany, and Austria.

Turkey adopted a new constitution and announced her intention to carry out reforms herself. Russia held that this was a mere promise and demanded that certain plans should be followed. Turkey rejected all plans and denied the right of any power to interfere. Russia proposed the protocol, suggesting a basis of peace. The great powers signed this but Turkey rejected it, and in rejecting it denied the right of Europe to manage the eastern question or to dictate any policy to the Turkish government. Russia, holding herself warranted in such action, proposed to enforce the demands for reform made by herself. This left the other powers free to act by the terms of the agreement or protocol, as they deemed best. While Turkey clung to the treaty of Paris, the other powers held that she had practically ignored it.

#### THE RUSSO-TURKISH WAR.

The war between Russia and Turkey in 1877 had its origin in the persecution by Turkey of Slavonic Christians whose cause Russia espoused. After lasting 323 days nothing stood between the Russians and Constantinople following the fall of Plevna. Turkey, thoroughly beaten, was willing to consent to any terms of peace that would preserve the capital, and the treaty of San Stefano was signed, under which Roumania was accorded independence of Turkey and Bulgaria was practically free under a mild Turkish suzerainty. The great powers of Europe would not indorse the treaty of San Stefano and the conference at Berlin was called, which resulted in a new treaty which it was hoped would settle the eastern question. This was the condition of affairs when the disturbances of 1895 broke out and the six great Christian nations of Europe were bound hand and foot to preserve the integrity of the Ottoman empire on the European continent.

#### THE OUTBREAK IN CRETE.

Crete was one of the "isles of Greece," but in 823 it fell into Moslem hands, in which it remained for 137 years, when it was retaken by the Greeks. It remained under Greek rule until 1204, when it became Venetian territory by purchase. In 1645 it came again under Moslem authority. For the next 100 years the island was in a constant state of revolt against Turkish authority. When Greece, in 1821, achieved independence of Turkey, Crete, which had aided Greece in the war, would have become a part of the Greek empire had not the powers of Europe by the treaty of London forced Crete back to Turkish rule. Since then insurrections have been frequent and bloody, the most important being in 1866, 1877 and 1888. Following the last one Shakir Pasha

was sent to the island as its governor, invested with military authority, and he proclaimed martial law. In 1889 the provisions of the Halepa pact, which had received international sanction, were violated, the five years' tenure of office by the governor was set aside, the provisions regarding the legislative assembly were abolished, the number of its members reduced and the entire customs revenues of the island were appropriated by Turkey. Following these outrages Crete was ruled despotically by the Turks and at the elections the Christians refused to go to the polls. The powers of Europe interfered and near the end of 1894 a Christian was appointed to the governorship. In 1894 the assembly met for the first time since 1889, but trouble began over the question of finances, there being a large deficit in the Cretan treasury. Moslem officials had misappropriated large sums collected in taxes and the Cretans demanded that the government should reimburse them, which request was denied. A revolt was started and Christians in the country armed themselves, while the Moslem population fled to the towns to save their lives. Terrible outrages were committed on both sides. In March, 1896, the Christian governor was recalled and a Mussulman put in his place and the revolt assumed formidable proportions. The powers tried to check the revolt but the Greek Christians were receiving substantial aid from Greece, and to prevent such aid a blockade of Crete was proposed by Austria, Russia, Germany, France and Italy. Great Britain refused assent to the proposal on the ground that she could not join the Sultan in suppressing a revolt of his Christian subjects. The five powers induced the Sultan to inaugurate reforms, which he promised to do, and a new constitution was granted Crete, but it did not check the revolt nor bring peace to the island. The island has a population of 270,000, of whom 70,000 are Moslems.

The origin of the recent war was the formal efforts of Greece to wrest the island of Crete from Turkey and incorporate it with the Greek kingdom, with which the people of the island by a large majority were in active sympathy. The people of Greece were so strongly in favor of a war with Turkey to that end that had King George opposed them such an act would have unquestionably resulted in his downfall. On the 7th of February the insurgent Christians of Halepa formally proclaimed a union of Crete with Greece, and a few days later a fleet of torpedo boats, under command of Prince George of Greece, was sent to Crete. On the 11th of February the Greek government sent a note to the European powers which set out at length the Greek views of the case. It declared that Greece could no longer remain a passive spectator of the progress of events in Crete and that the idea of race and religion compelled her to intervene in behalf of the outraged Christians in that island. The purpose of the Greek government was to send fresh troops to the island made it certain that the scenes of rapine, bloodshed and incendiarism in which the Turkish troops at Chania lent willing aid to the native Mohammedans would be repeated on a larger scale. Therefore the Greek government had decided to prevent the landing of troops at all costs. The Cretans themselves, of their own free will, had declared their determination to effect the union of their island with the Greek kingdom, and the Greek government considered this com-

summation as the only possible solution of the Cretan question.

The calling out of the reserves by the Greeks followed on the 14th and an army, under command of Col. Vassos, was dispatched to Crete. There was no longer reason to doubt the determined position of the Greeks.

The sultan made to the powers a vigorous protest against the action of Greece and threatened to retaliate by carrying the war against Greece into Thessaly. The powers at once determined to take steps to stop the hostile action of Greece, the result being that on the 15th of February 400 men from the Russian, British, French and Italian fleets were landed at Canea, in Crete, and placed under the command of Admiral Canvaro of the Italian squadron. Official notice was served upon Greece that unless the Greek forces were withdrawn from the island a blockade of the Piræus, the port of Athens, would follow. Greece refused to respect the warning thus given. Col. Vassos issued at once a proclamation which showed the determined spirit of Greece. It was as follows:

"Cretans! You are suffering from the present state of anarchy and are exposed to the excesses of a fanatical populace, excesses which have awakened the national sentiment and have deeply stirred the Hellenic people. This lamentable situation of a people of the same race and the same religion, having common destinies with ourselves, could not any longer be allowed to exist. The king of the Hellenes has resolved to end this state of things by proclaiming a Greek occupation of the island.

"In making this proclamation I promise in the name of King George to protect the lives, honor and property of the inhabitants, without distinction of religion or nationality, and to respect the religious convictions of the inhabitants, while bringing to them peace and law."

On the 21st of February the insurgent Christians of Crete made an attack upon the Turkish forces near Canea and they would have succeeded had not three British war vessels, with three others in the harbor, opened fire upon them, when the Cretans gave up the fight. The condition of affairs was daily growing more and more desperate, meetings following each other with astonishing rapidity. The whole island was in a state of siege and the people were suffering for food.

The powers, while actuated by a desire to stop the war, could not agree as to the best means for that purpose. Great Britain favored the granting to Crete of autonomy, with a merely nominal suzerainty to be retained by the porte. The position taken by Great Britain was outlined by the following note sent to the representatives of that government at the court of each of the powers:

"Inform the government to which you are accredited that her majesty's government propose to make the following declaration of the policy they intend to pursue, which they believe to be in accordance with that of their allies:

"1. That the establishment of administrative autonomy in Crete is necessary to the termination of international occupation of that island.

"2. That subject to such system of administrative autonomy Crete ought to remain a portion of the Turkish empire.

"3. That the governments of Turkey and

Greece ought to be informed of this resolution.

"4. That if either Turkey or Greece should persist in a refusal when required to withdraw her naval and military forces from the island the powers should impose their decision by force."

This was followed on the 2d of March by the following note sent by the powers, collectively (Great Britain, Austria-Hungary, France, Germany, Italy and Russia), to both Greece and Turkey:

"The great powers have agreed upon a course of action with the object of putting an end to a situation which it did not rest with them to prevent, but the prolongation of which would be calculated to compromise the peace of Europe.

"The powers have come to an agreement on the two following points:

"1. Crete cannot in any case, under present circumstances, be annexed to Greece.

"2. In view of the delays caused by Turkey in the application of the reforms agreed upon in conjunction with the Ottoman government, the powers are resolved while maintaining the integrity of the Ottoman empire, to confer upon Crete an absolutely effective autonomous regime, intended to assure the island a separate government under the high suzerainty of the sultan.

"The powers consider that these views can only be realized by the withdrawal of the Greek ships and troops. They confidently await this wise determination on the part of the Greek government, which cannot wish to persist in pursuing a course contrary to the resolutions of the powers.

"The ministers do not conceal that their instructions prescribe them to warn the Greek government that, in case of refusal, the powers are irrevocably determined to hesitate at no measure of compulsion if on the expiry of a period of six days the withdrawal of the ships and troops has not been effected."

A supplemental note was sent to Turkey under date of March 5, saying that as the autonomy of Crete "implies the progressive reduction of the Ottoman forces it will be necessary, as soon as the island has been evacuated by the Hellenic troops, to take necessary measures for the concentration of the Imperial troops in the fortified places which are at present occupied by European detachments."

The sultan replied and expressed his willingness to accept the proposal, leaving details to the future. Greece made a more formal and vigorous reply, in which the position of that government was set out with determination not to obey the powers. The following extracts from the reply of Greece were published in the papers:

"Greece also ardently desires to contribute to the maintenance of peace and to save from utter ruin the population of an island put to so severe a trial and so often decimated.

"We believe that the new regime of autonomy adopted by the powers unhappily cannot correspond to the noble intentions that inspired it, and that it will suffer the fate of the different administrative systems which at various times and without success have been tried in Crete. . . . anarchy will continue to ravage the country with fire and sword in its hands. Blind fanaticism will continue its destructive work of exterminating a people which assuredly does not deserve such a fate.

"Before such a prospect our responsibility would be enormous if we did not earnestly urge the powers not to insist upon the scheme of autonomy proposed, but rather to restore to Crete what she already had at the time of the enfranchisement of the other provinces which form the kingdom of Greece and to lead her back to Greece. . . .

"In the presence of the recent scenes of massacre, pillage and conflagration . . . our whole country was torn with remorse for the responsibility it assumed last year in inducing the Cretans to lay down their arms. The misfortunes that resulted forbid us to undertake such a task again. . . .

"If the powers believe it to be their duty to persevere in their resolutions, with the above views and in the name of humanity, as well as in the interest of the island, the pacification of which is the unique object of the solicitude of the powers, we do not hesitate to appeal to them on the subject of the other measures—namely, the recall of our military forces. Indeed, if, because of the presence of the united squadrons in Cretan waters and in the conviction that these squadrons will not permit Turkish troops to disembark on the island, the presence also of all the ships of the Greek fleet off Crete is judged to be unnecessary, the presence of the Greek army on the island is nevertheless shown to be desirable alike from the sentiments of humanity and in the interests of the definitive re-establishment of order.

"Our duty specially forbids us to abandon the Cretan people to the mercy of Muslim fanaticism and the Turkish army, which at all times has deliberately and intentionally participated in the aggressive acts of the populace against the Christians. Above all, if our troops on the island, who are worthy of all the confidence of the powers, had received a mandate to pacify the country, their desires and intentions would have received promptly the most perfect satisfaction. It would be, then, after the re-establishment of order that it would be possible to learn the desires, freely expressed, of the Cretan people for a decision as to their fate.

"The sorrows which have recurred regularly in Crete for many decades past not only do not occur without profoundly agitating the Hellenic people, but they also interrupt social activity and gravely disturb the economy and finances of the state. Even if we admit that it would be possible to forget for an instant that we share the common religion of the Cretan people, that we are of the same race and bound by ties of blood, we could not in silence allow the powers to assume that the Greek state is able any longer to resist such shocks.

"For this reason we appeal to the generous sentiments animating the powers and beg them to permit the Cretan people themselves to declare how they desire to be governed."

The only reply of the powers to the Greek note was the formation of plans for the blockade of Piræus and Crete, but the powers could not agree upon a concert of action. A so-called pacific blockade of Crete was finally decided upon and went into force March 21, 1867. Fighting between the Greek and Turkish forces continued and battles were fought March 25 at Malaxa, on the same date at Halepa, March 30 and 31 at Fort Issedin, in most of which the forces of the powers took part against the Christian Cretans.

But Greece and Turkey were making ac-

tive preparations for war. The Greek reserves were called out in March and appeals were sent for Greeks in the United States to return and join the army. Toward the end of March a considerable Greek force of about 80,000 men had assembled on the frontiers of Thessaly and Crown Prince Constantine left Athens to assume command. The army was formed into two divisions, having bases of supplies at Larissa and Trikkala. The porte was equally active and troops were hurried toward the Thessalian border, the headquarters of the army being established at Monastir. Edhem Pasha was in command of the Turkish forces, which numbered about 150,000 thoroughly equipped and armed men. Turkey declared war on the 16th of April and the struggle opened at once. Both nations and their armies facing each other on the Thessalian frontier.

The first severe contest began on the 17th of April to gain possession of Miloussa pass, in the Olympian mountains, near Tynaovo, which was the gateway to the plain of Thessaly. The fighting lasted for three days, each side claiming the victory, but the Turks drove the Greeks from every position except from the ridge commanding Tynaovo and a few days later that place fell into the hands of the Turks, with large quantities of supplies and ammunition. In all about 50,000 men were engaged in the battle, but the Greeks met with the heavier losses in killed and wounded. The Greek headquarters were located at Larissa, a place about ten or twelve miles south of Tynaovo, where Constantine was in command. The next movement of the Turks was an attempt to reach the rear of the Greek army by forcing Revenli pass, thus cutting off its retreat from Larissa. The project failed and the Turks were turned back by a body of Greek troops at Damasi. A severe battle was fought at Mati, in which the Greeks lost heavily and were defeated, which made it necessary for the crown prince to retreat from Tynaovo on the 24th of April and fall back upon Pharsalos. This retreat was one of the most disgraceful events of the war and became a panic. The next day the whole Greek army retreated from Larissa to Volo and Pharsalos, accompanied by nearly the entire population of the city, and in the great haste war materials, guns and supplies of all kinds were abandoned. It was more like a stampede than a military movement.

Some successes attended the naval efforts of the Greeks. Preveza was bombarded, Epirus was captured and the squadron in the Gulf of Salonica captured a large quantity of Turkish stores. April 27 the Greek advance toward Janina reported large captures of war materials, but the Turks assumed the offensive and the advance was checked.

At the end of April and beginning of May the center of hostilities was about Veles-tino and on the 30th of April a bloody battle was fought, when a Turkish attack with 14,000 troops upon Gen. Smolenski, with 13,000, was repulsed, with heavy Turkish losses. May 2 another assault upon the Greek position failed. May 5 some 50,000 Turks attacked 23,000 Greeks at Pharsalos and the latter were forced to retreat. The position was now such as to satisfy the Greeks that the Turks had enough men to cut the Greek line between Volo and Pharsalos, outflank the Greek army and force it to surrender. May 6 the Greeks evacuated Pharsalos and retired some thirteen miles south. Volo had been practically abandoned on the 30th of April. At this time the Greek army

had collapsed, the soldiers were disheartened, the navy had proved a disappointment, the treasury was without funds and the capital of the country was at the mercy of the enemy. The Greeks felt the hopelessness of the struggle in which they were involved.

On the 8th of May the government informed the powers that Col. Vassos, with his men, would be recalled from Crete, which showed that Greece had reached a point at which it would be guided by the powers. Germany demanded that Greece should consent to autonomy for Crete. On the 11th of May a joint note was sent by the powers to the Greek minister of foreign affairs proffering mediation. On the next day a request for an armistice was sent by the powers to the porte. The reply of the porte was sent May 16 and in it he declined an armistice until the following principal conditions were accepted: Annexation of Thessaly; an indemnity of £10,000,000 Turkish (\$43,560,000); abolition of the capitulations or treaties conferring privileges on Greeks in the Ottoman empire; and a treaty of extradition with Greece. Should these conditions be refused the Turkish army would continue its advance.

All Europe protested against the submission of the harsh terms proposed by the porte. Thessaly had been a Greek province since 1831, it had an area of 5,073 square miles, a population of 345,000 and was essential to the revenues of Greece. The czar of Russia in a personal letter asked the sultan to stop the war and provide for an armistice. Immediately Edhem Pasha was directed from Constantinople to arrange with the Greek commander the terms of an armistice and the white flag appeared in both the opposing armies. Since the Turks had in fact conquered Thessaly and held it, the sultan could then consent to a termination of hostilities. The Turks had an army of 200,000 men in Thessaly and more than that number near at hand and they were in position to accede to the request of Russia.

On the 20th of May an armistice for seventeen days was concluded, which was extended to near the middle of June. In the meantime the last of the Greek troops had been withdrawn from Crete. The restoration of the Turks to the garrisons resulted in the pillage of several Christian villages and the murder of their inhabitants. Something like quiet was restored early in June. Peace negotiations were begun by the representatives of the powers in Constantinople

June 3, but little progress was made for a month, the cause of the failure to agree being the future status of Thessaly. Great Britain, France and Italy opposed the surrender of Thessaly to Turkey, Austria and Russia were less dictatorial, and Germany in effect sustained Turkey. Another point of controversy was the amount of the war indemnity to be paid by Greece to Turkey. Greece was poor and any sum awarded Turkey must be based on the ability of Greece to pay. The question of the cession of Thessaly was referred to a military commission that reported adversely to the demands of Turkey and recommended no cession beyond the mountain summits on the Turkish frontier, which gave to Turkey a strategic boundary. Negotiations were not concluded until Sept. 13, when a treaty was formulated and submitted to Turkey and Greece. Hard as the terms may be for Greece, she can do nothing but accept them. At the time of concluding this sketch the treaty had not been published, but its terms in general are pretty well known.

The first of these pertains to the definition of the frontier between Greece and Turkey. The demand of the latter that it should retain possession of that portion of the great Thessalian plain which it had conquered and occupied during the war was not allowed by the powers, but as it has been conceded possession of the passes and all the strategic points on the mountainous frontier, as determined and located by military experts with the express object in view of rendering Turkish territory safe against any future Grecian invasion, it will be seen that physically Greece lies at the mercy of Turkey in case of any further trouble between the two. To this extent Greece has been humiliated.

The second provision is the indemnity to be paid by Greece. This will amount to \$15,000,000, to be paid out of the revenues and to be guaranteed by the powers. In addition to this it will have to pay interest on some old bonds held in Germany, which Greece hoped to escape. The indemnity will be a serious burden to Greece, which is almost a nonproductive country and raises barely enough to feed its own people.

Greece must be in fact the ward of the great powers for some years. It will have to disband its army, sell its vessels of war and take a position greatly inferior to that occupied by some of the principalities of Europe.

## VENEZUELA AND GREAT BRITAIN.

The serious dispute between the United States and Great Britain growing out of the location of the boundary line between Venezuela and the British possessions, this country having espoused the claims of Venezuela that the matter in controversy should be settled by arbitration, has ceased to be a disturbing one, although it is not yet finally settled. Through the instrumentality of the United States a treaty was concluded between Great Britain and Venezuela for arbitrating the subject in dispute. This treaty was signed Feb. 2, 1897, and is as follows:

Her majesty the queen of the united kingdom of Great Britain and Ireland, and the United States of Venezuela, being desirous to provide for an amicable settlement of the question which has arisen between the respective governments concerning the

boundary between the colony of British Guiana and the United States of Venezuela, have resolved to submit to arbitration the question involved, and to the end of concluding a treaty for that purpose have appointed as respective plenipotentiaries: Her majesty the queen of the united kingdom of Great Britain and Ireland, the Rt.-Hon. Sir Julian Pauncefote, a member of her majesty's most honorable privy council, knight grand cross of the most honorable Order of the Bath and of the most distinguished Order of St. Michael and St. George and her majesty's ambassador extraordinary and minister plenipotentiary to the United States; the president of the United States of Venezuela, Senator Jose Andrade, envoy extraordinary and minister plenipotentiary of Venezuela to the United States of America, who, having communi-

cated to each other their respective full powers, which were to be in due and proper form, have agreed to and concluded the following articles:

Article 1. An arbitration tribunal shall be immediately appointed to determine the boundary line between the colony of British Guiana and the United States of Venezuela.

Art. 2. The tribunal shall consist of five jurists: Two on the part of Great Britain, nominated by the members of the judicial committee of her majesty's privy council—namely, the Rt. Hon. Baron Herschell, knight grand cross of the most honorable Order of the Bath, and the Hon. Sir Richard Henn Collins, knight, one of the justices of her Britannic majesty's Supreme Court of Judicature; two on the part of Venezuela, nominated, one by the president of the United States of Venezuela—namely, the Hon. Melville Weston Fuller, chief justice of the United States of America—and one nominated by the justices of the Supreme court of the United States of America—namely, the Hon. David Josiah Brewer, a justice of the Supreme court of the United States of America; and of a fifth jurist to be selected by the four persons so nominated, or, in the event of their failure to agree within three months of the date of the exchange of ratifications of the present treaty, to be selected by his majesty the king of Sweden and Norway. The jurist so selected shall be president of the tribunal.

Art. 3. In case of the death, absence or incapacity to serve of any of the four arbitrators above named, or in the event of any such arbitrator omitting or declining or ceasing to act as such, another jurist of repute shall be forthwith substituted in his place. If such vacancy shall occur among those nominated on the part of Great Britain the substitute shall be appointed by the members for the time being of the judicial committee of her majesty's privy council acting by a majority; and if among those nominated on the part of Venezuela, he shall be appointed by the justices of the Supreme court of the United States acting by a majority. If such vacancy shall occur in the case of the fifth arbitrator a substitute shall be selected in the manner herein provided for with regard to the original appointment.

Art. 4. The tribunal shall investigate and ascertain the extent of the territories belonging to or that might lawfully be claimed by the United Netherlands or by the kingdom of Spain, respectively, at the time of the acquisition by Great Britain of the colony of British Guiana, and shall determine the boundary line between the colony of British Guiana and the United States of Venezuela.

Art. 5. The arbitrators shall meet in Paris within sixty days after the delivery of the printed arguments mentioned in Art. 8, and shall proceed impartially and carefully to examine and decide the questions that have been or shall be laid before them as herein provided on the part of the governments of her Britannic majesty and the United States of Venezuela, respectively.

Provided, always, that the arbitrators may, if they shall think fit, hold their meetings, or any of them, at any other place which they may determine.

All questions considered by the tribunal, including the final decision, shall be determined by a majority of all the arbitrators.

Each of the high contracting parties shall name one person as its agent, to attend the

tribunal and to represent it generally in all matters connected with the tribunal.

Art. 6. The printed case of each of the two parties, accompanied by the documents, the official correspondence and other evidence on which each relies shall be delivered in duplicate to each of the arbitrators and to the agent of the other party as soon as may be after the appointment of the members, not exceeding eight months from the date of the exchange of the ratifications of this treaty.

Art. 7. Within four months after the delivery on both sides of the printed case either party may in like manner deliver in duplicate to each of the said arbitrators, and to the agent of the other party, a counter case, and additional documents, correspondence and evidence in reply to the case, documents, correspondence and evidence so presented by the other party.

If in the case submitted to the arbitrators either party shall have specified or alluded to any report or document in its own exclusive possession, without annexing a copy, such party shall be bound, if the other party thinks proper to apply for it, to furnish that party with a copy thereof, and either party may call upon the other, through the arbitrators, to produce the originals or certified copies of any papers adduced as evidence, giving in each instance notice thereof within thirty days after delivery of the case; and the original or copy so requested shall be delivered as soon as may be and within a period not exceeding forty days after the receipt of notice.

Art. 8. It shall be the duty of the agent of each party within three months after the expiration of the time limited for the delivery of the counter case on both sides to deliver in duplicate to each of the said arbitrators and to the agent of the other party a printed argument showing the points and referring to the evidence upon which his government relies, and either party may also support the same before the arbitrators by oral argument of counsel; and the arbitrators may, if they desire further elucidation with regard to any point, require a written or printed statement or argument or oral argument by counsel upon it; but in such case the other party shall be entitled to reply either orally or in writing, as the case may be.

Art. 9. The arbitrators may, for any cause deemed by them sufficient, enlarge either of the periods fixed by Arts. 6, 7 and 8 by the allowance of thirty days additional.

Art. 10. The decision of the tribunal shall, if possible, be made within three months from the close of the argument on both sides. It shall be made in writing and dated, and shall be signed by the arbitrators who may assent to it.

The decision shall be in duplicate, one copy whereof shall be delivered to the agent of Great Britain for his government and the other copy shall be delivered to the agent of the United States of Venezuela for his government.

Art. 11. The arbitrators shall keep an accurate record of their proceedings and may appoint and employ the necessary officers to assist them.

Art. 12. Each government shall pay its own agent and provide for the proper remuneration of the counsel employed by it and its arbitrators appointed by it, or in its behalf, and for the expense of preparing and submitting its case to the tribunal. All other expenses connected with the arbitra-

tion shall be defrayed by the two governments in equal moieties.

Art. 13. The high contracting parties engage to consider the result of the proceedings of the tribunal of arbitration as a full, perfect and final settlement of all the questions referred to the arbitrators.

Art. 14. The present treaty shall be duly ratified by her Britannic majesty and by the president of the United States of Venezuela by and with the approval of the congress thereof, and the ratifications shall be exchanged in London or in Washington within six months from the date hereof.

As some objections were raised to the choice of King Oscar as a member of the tribunal, his name was omitted in the ratification of the treaty. It was not until October that the fifth jurist was chosen; he is Prof. Maertens, a distinguished Russian jurist, who will be president of the court.

Prof. Maertens' reputation as an author-

ity on international law is world-wide and has led to his frequent selection as arbitrator and umpire in international differences. He is an official of the Russian foreign office, professor of international law at the University of St. Petersburg and author of "Maertens' Treatise," the standard book of reference on all the treaties of the world.

Arrangements are being made for the assembling of the court at Paris during the late summer or autumn of the present year (1898).

On the 27th of February, 1897, the Venezuelan boundary commission, consisting of D. J. Brewer, A. D. White, F. R. Couderc, D. C. Gilman and R. H. Alvey, appointed by President Cleveland, ceased its labors, the treaty between Venezuela and Great Britain making it unnecessary for it to proceed further. The report will be published in four large volumes and will be of value to the court when it meets in Paris.

### SPECIAL FLAGS OF OFFICIALS.

Among the special flags of the United States there is now for the first time one belonging to the secretary of war. About eight years ago a special flag was made for

the secretary of the navy and the president has had his private flag for many years longer than that.

The new flag is of scarlet bunting, the fly measuring twelve feet and the hoist six feet eight inches. In the center is an eagle with outstretched wings, bearing upon its breast a United States shield. The eagle, which is the same as that on the national arms, holds in its right talon an olive branch with red berries and in its left a bunch of arrows. In its beak is a scroll with the motto "E

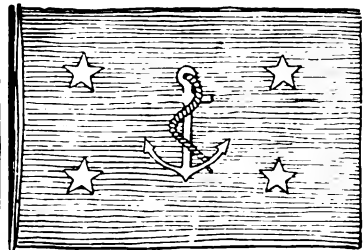

Pluribus Unum." In the field of the shield are two rows of stars, six in the upper and seven in the lower row. There is also a large white star in each of the four corners of the flag itself. Provision has likewise been made for a smaller nearly square flag

of silk, in the same design. This latter is officially known as the "colors" of the secretary of war.

The special flag of the president of the United States is similar to the one just described, and the new design is evidently a modification of the older one. The only differences between the two are that the president's flag is of blue instead of scarlet bunting and has instead of the four white stars in the corners a row of thirteen smaller white stars curving around and above the eagle.

The secretary of the navy has a much simpler flag than either of the above. Upon the blue field there is an anchor and the four white stars are in the corners, as in the

emblem of the secretary of war. With the exception of the flags of the admiral, vice-admiral, commodore and other officers of the navy, the three flags described above are the only special ones belonging to government officials.

The use of these special flags is, as a rule, confined strictly to ceremonious occasions and the natural result of this is that they are unfamiliar to the general public. Wherever the president's flag flies it denotes his presence in the vessel or building over which it is hoisted.

The flag of the secretary of the navy is displayed at the main during the time that the secretary remains on board of any war vessel. There has not yet been any occasion for the use of the new flag of the secretary of war, but, like the others, its display will indicate the presence of the secretary either afloat or ashore.

## ALASKA, ITS BOUNDARY AND GOLD FIELDS.

## THE BOUNDARY DISPUTE.

The discovery of rich gold fields near and about the eastern boundary of Alaska, north of Mount St. Elias, has added considerable interest to the controversy between the United States and Great Britain as to the exact location of the line of demarcation between this country and British Columbia. What was then known as Russian America, now as Alaska was ceded to the United States by Russia on the 30th of March, 1867. The sum agreed upon as the consideration for the transfer was \$7,000,000, but when it was ascertained that there were a fur company and an ice company enjoying monopolies under the Russian government the United States thought it expedient to extinguish the rights of these companies, and \$200,000 additional was added to the purchase price and the territory was ceded to the United States free from all incumbrances.

The treaty of cession described the eastern boundary as follows: "Commencing from the southernmost point of an island called Prince of Wales island, which point lies in the parallel of 54 degrees 40 minutes north latitude, and between the 131st and 132d degree of west longitude (meridian of Greenwich), the said line shall ascend to the north along the channel called the Portland channel as far as the point of the continent where it strikes the 56th degree of north latitude; from this last-mentioned point the line of demarcation shall follow the summit of the mountains situated parallel to the coast as far as the point of intersection of the 141st degree of west longitude (same meridian); and finally, from said point of intersection, the said meridian line of the 141st degree. In its prolongation as far as the frozen ocean."

Although there is no record of official correspondence on the subject, the eastern boundary line of Alaska appears to have been a matter of informal discussion between the United States and Great Britain soon after the territory was purchased. In his annual message to congress in December, 1872, President Grant recommended the appointment of a joint commission to locate the line, but no action was taken by congress. In May, 1886, President Cleveland transmitted to congress copies of a correspondence on the subject between the secretary of state and Mr. Phelps, our minister to England, and recommended the appropriation of \$100,000 for making a preliminary survey of the frontier territory. In August Lord Gough asked Secretary of State Olney if a joint surveyor could not be appointed to act with Mr. William Ogilvie, who was then about to survey the intersection of the 141st meridian and the Yukon river.

The result of this correspondence was a treaty between the United States and Great Britain, signed Jan. 30, 1897, which provided for the appointment of a joint commission of two (one commissioner from each government) to ascertain and mark by visible objects "so much of the 141st meridian of west longitude as is necessary to be defined for the purpose of determining the exact limits of the territory ceded to the United States by the Treaty between the United States and Russia of March 30, 1867." It will be seen by the text of the treaty quoted that it provides only for the ascertainment and marking of that portion of the Alaskan boundary about which there has never been any dispute—namely, the portion lying

north of Mount St. Elias and constituted by the 141st meridian as mentioned in the treaty of March 30, 1867. The location of the line is merely a matter of geodesy. In fact, Mount St. Elias is in longitude 140 degrees 55 minutes 47.2 seconds west, or something like two miles east of and on the British side of the 141st meridian. The location of the line on the 141st meridian line will add to the British territory a strip of land about twenty miles long, two miles wide at its base and tapering to a point, with an area of about twenty square miles. The boundary controversy as to the divisional line south of Mount St. Elias and running south, parallel with the coast, to Prince of Wales island, is not a subject for the commissioners appointed under the treaty of Jan. 30, 1897, to consider. As to the boundary line southeast of the 141st degree of west longitude to the Prince of Wales island the treaty of cession says:

"Wherever the summit of the mountains, which extend in a direction parallel to the coast from 56 degrees of north latitude to the point of intersection of 141 degrees of west longitude, shall prove to be a distance of more than ten marine leagues from the ocean the limit between the British possessions and the line of coast which is to belong to Russia, as above mentioned, shall be formed by a line parallel to the widening of the coast and which shall never exceed the distance of ten marine leagues therefrom."

In regard to this part of the boundary line Gen. Duffield, superintendent of the coast and geodetic survey, and a member of the boundary commission, said in July, 1897:

"On all maps from 1825 down to 1884 the boundary line has been shown as in general terms parallel to the windings of the coast and thirty-five miles from it. In 1884, however, an official Canadian map showed a marked deflection in this line at its south end. Instead of passing up Portland channel this Canadian map showed the boundary as passing up Behn canal, an arm of the sea some sixty or seventy miles west of Portland channel, this change having been made on the late assertion that the words 'Portland canal' as inserted, were erroneous. By this change an area of American territory about equal in size to the state of Connecticut was transferred to British territory. There are three facts which go to show that this map was incorrect. In the first place, the British admiralty, when surveying the northern limit of the British Columbian possessions in 1868, one year after the cession of Alaska, surveyed Portland canal, and not Behn canal, and thus, by implication, admitted this canal to be the boundary line. Second, the region now claimed by British Columbia was at that time occupied as a military post of the United States without objection or protest on the part of British Columbia. Third, Annette island, in this region, was, by act of congress four years ago, set apart as a reservation for the use of the Metektaia Indians, who sought asylum under the American flag to escape annoyances experienced under the British flag.

"Another change was made at Lynn canal, the northernmost extension of the Alexander archipelago, which runs north of Juneau and is the land outlet of the Yukon trade. If the official Canadian map of 1884 carried the boundary line around the head

of this canal another Canadian map, three years later, carried the line across the head of the canal in such a manner as to throw its headwaters into British territory. Still later Canadian maps carry the line, not across the head of the canal, but across near its mouth, some sixty or seventy miles south of the former line, in such a way as practically to take in Juneau, or at least all overland immediately back of it. And the very latest Canadian map, published at Ottawa within a few days, while it runs no line at all southeast of Alaska, prints the legend "British Columbia" over portions of the Lynn canal which are now administered by the United States.

The report of the commission has not yet been acted upon by congress.

### THE KLONDIKE GOLD REGION.

Where is the Klondike? In reply to this question H. K. Carroll, LL. D., says:

"The Klondike is one of a number of creeks which empty into the Yukon, and gold is found in the gravel deposits which form the valleys through which these streams run. The richest finds have been on the Klondike and the Bonanza; but claims have been laid out also on Dominion, Indian, Hunker, Glacier, Miller, Eldorado and Gold Bottom creeks. These are nearly all in British territory. But we have good fields just across the border in our own territory of Alaska. There are paying mines at Circle City on the Yukon, at Forty Mile, at the junction of Forty Mile creek with the Yukon, and probably on other streams to the south.

"The discovery of the wonderful deposits in the Klondike region appears to have been made in August, a year ago, by George Carmack. Evidently he was not succeeding at Forty Mile, which is on the Yukon, in Alaska, and strolled across the border on a prospecting tour. He found gold in paying quantities near the junction of the Bonanza and Klondike creeks, and returned to Forty Mile for help. With two Indians he was able to 'pan out' about \$500 a week. The news was slow in reaching Circle City, a large camp of miners about 200 miles lower down on the Yukon. Perhaps they did not believe the first reports. At all events, it was December before any movement was made. Then in one day Circle City was depopulated and a new city, Dawson, was established at the mouth of the Klondike, on the Yukon. There was a mad rush for the new country. Immediately it was all staked out. Along every stream and in every gulch claims were marked out and with feverish haste the work of thawing the gravel was begun. There was then no water to wash the dirt with; but they could not wait for summer to loose the streams, so some of them made 'rockers' and tunneled and 'rocked' the earth and found it full of gold."

In a report made by Prof. J. E. Spurr to the United States geological survey, 1897, the statement is made that the first discoveries in the Yukon district were made in 1885, on Stewart river, Cassiar bar and Lewis river. In the following year gold was found on Forty Mile creek and its tributaries, Glacier creek, Davis creek, Poker creek, etc., were prospected with good results for several years. Miller creek (in British territory) was opened for mining in 1892. Birch creek, with its various branches, was discovered in 1893 and Circle City was founded. In 1890 the director of the United States mint estimated the production of the Yukon placers

as \$50,000; in 1891 this amount doubled; in 1893 the product of the Alaskan creeks was given as \$128,000; in 1894 it reached \$409,000, and in 1896 \$709,000 was the amount estimated for the Yukon district and \$69,069 for outside creeks. In that year Eagle creek, a tributary of Birch creek, was discovered. The condition of the Forty Mile district in the summer of 1896 was not as encouraging as formerly, owing to the six weeks' drought, which prevented the water from running the sluices and caused enforced idleness. The Birch creek region, on the other hand, was flourishing. At this time discoveries were made on the Klondike river (about twenty miles from Forty Mile creek), placers on Hunker creek, Indian creek and Bonanza creek, the principal branch of the Klondike, gave good returns. On Bonanza creek \$1,000 was taken out in August and September, 1896, and 400 claims were located up to January, 1897. Gulches and creeks showing good prospects are spread over 700 square miles. The mining population in the Yukon region was estimated in 1896 at about 1,700, and the gold production for that year, including United States and British territory, is estimated at \$1,400,000. Upon the subject of prospecting and mining Prof. Spurr says:

"The Yukon districts lie in a broad belt of gold-producing rocks, having a considerable width and extending in a general east and west direction for several hundred miles.

"Throughout this belt occur quartz veins which carry gold but so far as yet found out the ore is of low grade and a large proportion of the veins have been so broken by movements in the rocks that they cannot be followed. For this reason the mines in the bed rock cannot be worked, except on a large scale with improved machinery, and even such operations are impossible until the general conditions of the country in reference to transportation and supplies are improved.

"Through the gold-bearing rocks the streams have cut deep gullies and canyons and in their beds the gold which was contained in the rocks which have been worn away is concentrated, so that from a large amount of very low-grade rock there may be formed in places a gravel sufficiently rich in gold to repay washing. All the mining which is done in this country, therefore, consists in the washing out of these gravels.

"In each gulch prospectors are at liberty to stake out claims not already taken, the size of the claims being determined by vote of all the miners in each gulch, according to the richness of the gravel. The usual length of a claim is about 500 feet along the stream and the total width of the gulch bed, which is ordinarily narrow. When a prospector has thus staked out his claim it is recorded by one of the miners, who is elected by his fellows in each gulch for that purpose, and this secures him sufficient title. The miners' laws are practically the entire government in these districts, for the remoteness prevents any systematic communication being carried on with the United States. All questions and disputes are settled by miners' meetings and the question in dispute is put to popular vote.

"In prospecting the elementary method of panning is used to discover the presence of gold in gravel, but after a claim is staked and systematic work begun long sluice boxes are built of boards, the miners being obliged to fell the trees themselves and saw out the lumber with whipsaws, a very laborious kind of work. The depth of gravel in the bottom of the gulches varies from a foot

up to twenty or thirty feet and when it is deeper than the latter figure it cannot be worked.

"The upper part of the gravel is barren and the pay dirt lies directly upon the rock beneath and is generally very thin. To get at this pay dirt all the upper gravel must be shoveled off and this preliminary work often requires an entire season, even in a very small claim. When the gravel is deeper than a certain amount, say ten feet, the task of removing it becomes formidable. In this case the pay dirt can sometimes be got at in the winter season, when the gravel is frozen hard, by sinking shafts through the gravel and drifting along the pay dirt."

#### ROUTES TO THE KLONDIKE.

The Klondike region can be reached by St. Michael and a voyage up the Yukon, which is perhaps the most comfortable but longest route. The current of the river is so swift that the trip up is necessarily slow. Boats from San Francisco, touching at Seattle, Victoria and Unalaska, connect at St. Michael and with the river steamers, in the "Guide to the Yukon Gold Fields." Mr. Wilson gives the following rates for the river boats, which he says accommodate about 100 passengers:

From Forty Mile Post to St. Michael, first class, \$50; second class, \$30. The through trip from San Francisco costs, he says, from \$150 to \$175. After leaving the steamer, says the same authority, packs are carried by Indians and dogs in summer and in winter are conveyed by sleds. The cost of freighting in summer is \$30 per 100 pounds for a distance of 60 miles; in winter, \$10 to \$15 per 100 pounds. The dogs haul large loads and can cover long distances.

A more direct but more fatiguing route is from Lynn canal to the Lewes river by way of several lakes. There is the Chilkat pass (long and less used than formerly), the White and the Chilkoot. The terminus of the White pass is some eighty-five miles north of Juneau and ocean steamers can run up to the landing at all times. The pass lies through a box canyon and is comparatively easy. Mr. Wilson considers this the best pass and says the trail would not exceed thirty-two miles in length and would strike Windy arm of Tagish lake, or Taku arm, coming in farther up the lake. This part of the lake is accessible to Lake Bennett and the pass could be used as a mail route any month of the year. The Chilkoot pass is the one most used by miners. Steamers ply from Juneau to Dyea, a distance of 100 miles, and the head of steamship navigation. The charge is \$10 for one man and outfit. Mr. Wilson's description of the route is summarized as follows:

At Dyea the actual journey begins. If the trip is made by sleighs the parties usually do their own work; but if the snow and ice have left the canyon the outfit will have to be packed to Lake Lindeman. Indian packers charge \$14 per 100 pounds; the distance is about twenty-four miles. Canoes can be used for about six miles up the Dyea river; then the trail, steep and precipitous, leads up the canyon to the summit, fifteen miles distant and 3,500 feet above tide water. From the summit there is a sheer descent of 500 feet to the bed of Crater lake. The water has cut a small canyon down the mountain side which should be followed to Lake Lindeman (twenty-four miles from Dyea inlet). Here a raft should be made with a deck of small poles a foot above the body, which prevents the

waves from wetting the outfit. The latter should be protected by water-tight sacks, either of oilskin or canvas. A short portage of three-fourths of a mile (the fall being about twenty feet) leads to Lake Bennett. The stream connecting the two lakes is crooked and rocky, making it unsafe for a boat. Lake Lindeman is about six miles long and opens up from May 15 to June 10. After reaching Lake Bennett the journey may be continued by raft or by ascending a small river which enters the head of the lake from the west, a distance of one mile; good boat timber may be found. The only timber used in the construction of boats is spruce or Norway pine. Lake Bennett is some twenty-six miles long; Caribou Crossing leads to Tagish lake. Navigation on these two lakes is sometimes interrupted by the high winds. A wide, sluggish river leads to Lake Marsh, twenty miles long. The river from here to the canyon has about a three-mile current. Just above the canyon quantities of salmon are found. The canyon proper is five-eighths of a mile in length, but the distance to portage is about a mile and that run by the boats is three-fourths of a mile. The average width of the canyon is 100 feet and the water is very deep. There is little danger in passing the canyon if the steersman does not lose his head. The water in the center is four feet higher than at the walls and if the boat is kept under control it will remain on this crest and so avoid striking the walls. The boat should be strong and the cargo well protected from the water. It takes two minutes and twenty seconds to pass through the canyon. Two miles below White Horse rapids are reached. It is practically impossible to pass these and portage must be resorted to. This part of the river can never be made navigable for steamers. A tramway could easily be built here and operated by the power from the falls.

About fifteen miles from the rapids the Tahkeena river joins the Lewes. This is the inland waterway used in connection with the Chilkat pass, which is long (125 miles) and less used by miners or Indians. The Tahkeena is easily navigable. A steamer could ascend it perhaps seventy miles. Lake Labarge is twelve miles below the Tahkeena. This lake is thirty-one miles long and is often very rough. After leaving it the current of the river increases to five or six miles an hour. The course is very crooked and the bed is filled with bowlders, which might make it dangerous for river steamers, especially on the down trip. The Hootalingua, Big Salmon and Little Salmon rivers enter the Lewes within the next hundred miles the first two showing signs of gold. Fifty-three miles below the Little Salmon is the Five Fingers rapid, which can be run with a good boat with comparative ease. The channel to the right should be followed. Rink rapids are six miles below Five Fingers and the east shore should be followed closely. Old Fort Selkirk is fifty-five miles from Five Fingers and just below the confluence of the Pelly and Lewes rivers. Here the Yukon begins and soon broadens to a mile in width. Ninety-six miles below the White river enters from the west. This is a large stream, extremely muddy. It probably flows over volcanic deposits. Eighty miles farther on is the mouth of Sixty Mile creek, where there is a trading post and sawmill and where a number of miners annually winter. Thirty miles below Indian creek enters the Yukon and twenty miles from Indian creek is the mouth of the Klondike. Some twenty miles

beyond is the mouth of Forty Mile creek. There is a trading post at its outlet and Dawson is near the mouth of the Klondike river. Circle City is 140 miles from Forty Mile post and Dawson is 676 miles from Juneau.

The act of congress approved July 4, 1866, relating to mineral lands and mining in the United States, says:

"All valuable mineral deposits in lands belonging to the United States, both surveyed and unsurveyed, are hereby declared to be free and open to exploration and purchase and lands in which these are found to be occupied and purchased by citizens of the United States and by those who have declared an intention to become such, under the rules prescribed by law and according to local customs or rules of miners in the several mining districts, so far as the same are applicable and not inconsistent with the laws of the United States."

The act of congress approved May 17, 1884, providing for civil government for Alaska, has this language as to mines and mining privileges:

"The laws of the United States relating to mining claims and rights incidental thereto shall, on and after the passage of this act, be in full force and effect in said district of Alaska, subject to such regulations as may be made by the secretary of the interior and approved by the president. Parties who have located mines or mining privileges therein, under the United States law applicable to the public domain, or have occupied or improved or exercised acts of ownership over such claims, shall not be disturbed therein, but shall be allowed to perfect title by payment so provided for."

Commissioner Hermann says that the patenting of mineral lands in Alaska has been going on since 1884.

### ARBITRATION WITH GREAT BRITAIN.

#### PRESIDENT'S MESSAGE OF TRANSMISSION.

To the Senate: I transmit herewith a treaty for the arbitration of all matters in difference between the United States and Great Britain.

The provisions of the treaty are the result of long and patient deliberation and represent concessions made by each party for the sake of agreement upon the general scheme.

Though the result reached may not meet the views of the advocates of immediate, unlimited and irrevocable arbitration of all international controversies, it is, nevertheless, confidently believed that the treaty cannot fail to be everywhere recognized as making a long step in the right direction and as embodying a practical working plan by which disputes between the two countries will reach a peaceful adjustment as matter of course and in ordinary routine.

In the initiation of such an important movement it must be expected that some of its features will assume a tentative character looking to a further advance; and yet it is apparent that the treaty which has been formulated not only makes war between the parties to it a remote possibility but precludes those fears and rumors of war which of themselves too often assume the proportions of national disaster.

It is eminently fitting as well as fortunate that the attempt to accomplish results so beneficent should be initiated by kindred peoples, speaking the same tongue and joined together by all the ties of common traditions, common institutions and common aspirations. The experiment of substituting civilized methods for brute force as the means of settling international questions of right will thus be tried under the happiest auspices. Its success ought not to be doubtful and the fact that its ultimate ensuing benefits are not likely to be limited to the two countries immediately concerned should cause it to be promoted all the more eagerly. The example set and the lesson furnished by the successful operation of this treaty are sure to be felt and taken to heart sooner or later by other nations and will thus mark the beginning of a new epoch in civilization.

Profoundly impressed as I am, therefore, by the promise of transcendent good which this treaty affords, I do not hesitate to accompany its transmission with an expression of my earnest hope that it may commend itself to the favorable consideration of the senate. GROVER CLEVELAND.

Executive Mansion, Jan. 11, 1897.

The United States of America and her majesty the queen of the united kingdom of Great Britain and Ireland, being desirous of consolidating the relations of amity which so happily exist between them and of consecrating by treaty the principle of international arbitration, have appointed for that purpose as their respective plenipotentiaries:

The president of the United States of America, the Hon. Richard Olney, secretary of state of the United States, and her majesty the queen of the united kingdom of Great Britain and Ireland, the Rt. Hon. Sir Julian Pauncefote, a member of her majesty's most honorable privy council, knight grand cross of the most honorable Order of the Bath and of the most distinguished Order of St. Michael and St. George and her majesty's ambassador extraordinary and plenipotentiary to the United States, who, after having communicated to each other their respective full powers, which were found to be in due and proper form, have agreed to and concluded the following articles:

Article 1. The high contracting parties agree to submit to arbitration, in accordance with the provisions and subject to the limitations of this treaty, all questions in difference between them which they may fail to adjust by diplomatic negotiation.

Art. 2. All pecuniary claims or groups of pecuniary claims which do not in the aggregate exceed \$100,000 in amount and which do not involve the determination of territorial claims shall be dealt with and decided by an arbitral tribunal constituted as provided in the next following article.

In this article and in Art. 4 the words "groups of pecuniary claims" mean pecuniary claims by one or more persons arising

out of the same transactions or involving the same issues of law and of fact.

Art. 3. Each of the high contracting parties shall nominate one arbitrator, who shall be a jurist of repute, and the two arbitrators so nominated shall within two months of the date of their nomination select an umpire. In case they shall fail to do so within the limit of time above mentioned, the umpire shall be appointed by agreement between the members for the time being of the Supreme court of the United States and the members for the time being of the Judicial committee of the privy council in Great Britain, each nominating body acting by a majority. In case they shall fail to agree upon an umpire within three months of the date of an application made to them in that behalf by the high contracting parties, or either of them, the umpire shall be selected in the manner provided for in Art. 10.

The person so selected shall be the president of the tribunal and the award of the majority of members thereof shall be final.

Art. 4. All pecuniary claims or groups of pecuniary claims which shall exceed £100,000 in amount and all other matters in difference in respect of which either of the high contracting parties shall have rights against the other, under treaty or otherwise, provided that such matters in difference do not involve the determination of territorial claims, shall be dealt with and decided by an arbitral tribunal constituted as provided in the next following article.

Art. 5. Any subject of arbitration described in Art. 3 shall be submitted to the tribunal provided for by Art. 3, the award of which tribunal, if unanimous, shall be final. If not unanimous either of the high contracting parties may within six months from the date of the award demand a review thereof. In such case the matter in controversy shall be submitted to an arbitral tribunal consisting of five jurists of repute, no one of whom shall have been a member of the tribunal whose award is to be reviewed, and who shall be selected as follows—viz.: Two by each of the high contracting parties and one, to act as umpire, by the four thus nominated and to be chosen within three months after the date of their nomination. In case they shall fail to choose an umpire within the limit of time above mentioned the umpire shall be appointed by agreement between the nominating bodies designated in Art. 3 acting in the manner therein provided. In case they shall fail to agree upon an umpire within three months of the date of an application made to them in that behalf by the high contracting parties, or either of them, the umpire shall be selected in the manner provided for in Art. 10.

The person so selected shall be the president of the tribunal and the award of the majority of the members thereof shall be final.

Art. 6. Any controversy which shall involve the determination of territorial claims shall be submitted to a tribunal composed of six members, three of whom (subject to the provisions of Art. 8) shall be Judges of the Supreme court of the United States or Justices of the Circuit courts, to be nominated by the president of the United States, and the other three of whom (subject to the provisions of Art. 8) shall be Judges of the British Supreme Court of Judicature or members of the Judicial committee of the privy council, to be nominated by her Britannic maj-

esty, whose award by a majority of not less than five to one shall be final. In case of an award made by less than the prescribed majority the award shall also be final unless either power shall, within three months after the award has been reported, protest that the same is erroneous, in which case the award shall be of no validity.

In the event of an award made by less than the prescribed majority and protested as above provided, or if the members of the arbitral tribunal shall be equally divided, there shall be no recourse to hostile measures of any description until the mediation of one or more friendly powers has been invited by one or both of the high contracting parties.

Art. 7. Objections to the jurisdiction of an arbitral tribunal constituted under this treaty shall not be taken except as provided in this article.

If, before the close of the hearing upon a claim submitted to an arbitral tribunal constituted under Art. 3 or Art. 5, either of the high contracting parties shall move such tribunal to decide, and thereupon it shall decide that the determination of such claim necessarily involves the decision of a disputed question of principle of grave general importance, affecting the national rights of such party as distinguished from the private rights whereof it is merely the international representative, the jurisdiction of such arbitral tribunal over such claim shall cease and the same shall be dealt with by arbitration under Art. 6.

Art. 8. In cases where the question involved is one which concerns a particular state or territory of the United States it shall be open to the president of the United States to appoint a judicial officer of such state or territory to be one of the arbitrators under Art. 3 or Art. 5 or Art. 6.

In like manner in cases where the question involved is one which concerns a British colony or possession it shall be open to her Britannic majesty to appoint a judicial officer of such colony or possession to be one of the arbitrators under Art. 3 or Art. 5 or Art. 6.

Art. 9. Territorial claims in this treaty shall include all claims to territory and all claims involving questions of servitudes, rights of navigation and of access, fisheries and all rights and interests necessary to the control and enjoyment of the territory claimed by either of the high contracting parties.

Art. 10. If in any case the nominating bodies designated in Arts. 3 and 5 shall fail to agree upon an umpire in accordance with the provisions of the said articles, the umpire shall be appointed by his majesty the king of Sweden and Norway.

Either of the high contracting parties, however, may at any time give notice to the other that, by reason of material changes in conditions as existing at the date of this treaty, it is of opinion that a substitute for his majesty should be chosen either for all cases to arise under the treaty or for a particular specified case already arisen, and thereupon the high contracting parties shall at once proceed to agree upon such substitute to act either in all cases to arise under the treaty or in the particular case specified, as may be indicated by said notice; provided, however, that such notice shall have no effect upon an arbitration already begun by the constitution of an arbitral tribunal under Art. 8.

The high contracting parties shall also at once proceed to nominate a substitute for his majesty in the event that his majesty shall at any time notify them of his desire to be relieved from the functions graciously accepted by him under this treaty either for all cases to arise thereunder or for any particular specified case already arisen.

Art. 11. In case of the death, absence or incapacity to serve of any arbitrator or umpire, or in the event of any arbitrator or umpire omitting or declining or ceasing to act as such, another arbitrator or umpire shall be forthwith appointed in his place and stead in the manner provided for with regard to the original appointment.

Art. 12. Each government shall pay its own agent and provide for the proper remuneration of the counsel employed by it and of the arbitrators appointed by it and for the expense of preparing and submitting its case to the arbitral tribunal. All other expenses connected with any arbitration shall be defrayed by the two governments in equal moieties.

Provided, however, that, if in any case the essential matter of difference submitted to arbitration is the right of one of the high contracting parties to receive disavowals of or apologies for acts or defaults of the other not resulting in substantial pecuniary injury, the arbitral tribunal finally disposing of the said matter shall direct whether any of the expenses of the successful party shall be borne by the unsuccessful party, and if so to what extent.

Art. 13. The time and place of meeting of an arbitral tribunal and all arrangements for the hearing and all questions of procedure shall be decided by the tribunal itself.

Each arbitral tribunal shall keep a correct record of its proceedings and may appoint and employ all necessary officers and agents.

The decision of the tribunal shall, if possible, be made within three months from the close of the arguments on both sides.

It shall be made in writing and dated and shall be signed by the arbitrators who may assent to it.

The decision shall be in duplicate, one copy whereof shall be delivered to each of the high contracting parties through their respective agents.

Art. 14. This treaty shall remain in force for five years from the date at which it shall come into operation and further until the expiration of twelve months after either of the high contracting parties shall have given notice to the other of its wish to terminate the same.

Art. 15. The present treaty shall be duly

ratified by the president of the United States of America, by and with the advice and consent of the senate thereof, and by her Britannic majesty; and the mutual exchange of ratifications shall take place in Washington or in London within six months of the date hereof or earlier if possible.

In faith whereof, we, the respective plenipotentiaries, have signed this treaty and have hereunto affixed our seals.

Done in duplicate at Washington, the 11th day of January, 1897.

RICHARD OLNEY. [L. S.]  
JULIAN PAUNCEFOTE. [L. S.]

The senate, June 5, 1897, by a vote of 43 to 28, refused to ratify the treaty. The rules of the senate require a majority of two-thirds for the ratification of treaties. Hence four more affirmative votes would have been required to secure a favorable result.

The vote in detail was as follows:

#### YEAS.

Allison.	Hale.	Platt (N. Y.).
Bacon.	Hanna.	Pritchard.
Barrows.	Hawley.	Proctor.
Caffery.	Hoar.	Smith.
Clay.	Lindsay.	Spooner.
Collins.	Lodge.	Thurston.
Davis.	McBride.	Turpie.
Deboe.	McEnery.	Vest.
Fairbanks.	McMillan.	Walthall.
Faulkner.	Mitchell.	Warren.
Foraker.	Morrill.	Wellington.
Frye.	Nelson.	Wetmore.
Gallinger.	Pasco.	Wilson.
Gear.	Perkins.	
Gray.	Platt (Conn.).	

#### NAYS.

Baker.	Stewart.	Penrose.
Bate.	Welfield.	Pettigrew.
Butler.	Jones (Ark.).	Pettus.
Carter.	Jones (Nev.).	Rawlins.
Cockrell.	Kyle.	Quay.
Daniel.	Martin.	Roach.
Hansbrough.	Mason.	Shoup.
Harris (Kas.).	Mills.	White.
Harris (Tenn.).	Morgan.	

A total of 69 votes was cast, leaving nineteen senators who did not respond. The pairs so far as obtainable were as follows, two affirmative senators being paired with one negative senator in most instances: Chandler and Clark for, with Teller against; Tillman and Turner for, with Chilton against; Sewell and Earle for, with Mantle against; Senator George was paired for the treaty and Senator Berry against it. Pairs were not announced for the following: Aldrich, Cannon, Elkins, Gorman, Murphy, Wolcott, Kenney and Allen.

### INTERNATIONAL Bimetallism.

An act was passed by congress, approved March 3, 1897, entitled "An act to provide for the representation of the United States by commissioners at any international monetary conference hereafter to be called and to enable the president to otherwise promote an international agreement," as follows:

"Be it enacted, That whenever after March 4, 1897, the president of the United States shall determine that the United States should be represented at any international conference called by the United States or

any other country with a view to securing by international agreement a fixity of relative value between gold and silver as money by means of a common ratio between these metals, with free mintage at such ratio, he is hereby authorized to appoint five or more commissioners to such international conference; and for compensation of said commissioners and for all reasonable expenses connected therewith, to be approved by the secretary of state, including the proportion to be paid by the United States of the joint

expenses of any such conference, the sum of \$100,000, or so much thereof as may be necessary, is hereby appropriated.

"Sec. 2. That the president of the United States is hereby authorized, in the name of the government of the United States, to call, in his discretion, such international conference, to assemble at such point as may be agreed upon. And he is further authorized, if in his judgment the purpose specified in the first section hereof can thus be better attained, to appoint one or more special commissioners or envoys to such of the nations of Europe as he may designate to seek by diplomatic negotiations an international agreement for the purpose specified in the first section hereof. And in case of such appointment so much of the appropriation herein made as shall be necessary shall be available for the proper expenses and compensation of such commissioners or envoys."

In accordance with Sec. 2 of this act the president, on the 12th of April, 1897, announced the appointment of three commissioners—Senator E. O. Wolcott of Colorado, Gen. Charles J. Paine of Massachusetts and ex-Vice President Adlai E. Stevenson of Illinois—to sound the sentiment of the commercial nations of Europe upon the advisability of international bimetalism and the holding of a monetary conference.

The commissioners reached Europe in May and held conferences with the French and German governments and reached London in midsummer. Until the report of the commission has been presented to congress, with the official correspondence, it is impossible to state with authority in detail what success the commission has met with abroad. On the 22d of October, 1897, the correspondence in regard to the bimetallic proposals of the United States monetary commission was issued by the British foreign office. The following synopsis of the negotiations is published as being taken from the official correspondence:

At the conference held at the foreign office July 12 the premier, the marquis of Salisbury; the secretary of state for India, Lord George Hamilton; the chancellor of the exchequer, Sir Michael Hicks-Beach; the first lord of the treasury, A. J. Balfour; the United States ambassador, Col. John Hay, and the United States monetary commissioners, Senator Edward O. Wolcott of Colorado, ex-Vice President Adlai E. Stevenson of Illinois and Gen. Charles Jackson Paine of Massachusetts, were present.

On the invitation of the British premier Senator Wolcott explained that the object of the mission was to ascertain in advance of an international conference the views of the governments, and the envoys had determined to ascertain the views of the French, British and German governments on the question of reaching an international bimetallic agreement. They had been to France, where they reached a complete and satisfactory understanding with the French government, and the envoys would have the co-operation in this matter of the French ambassador in London.

The senator then explained that the success of the mission depended upon the attitude Great Britain would take and he requested Great Britain to agree to open the Indian mints as its contribution to the attempt to restore international bimetalism, with France and the United States co-operating together in an attempt to that end.

The marquis of Salisbury asked if France

was ready to open her mints to free coinage and Senator Wolcott replied: "Yes."

The premier thereupon inquired at what ratio France would open her mints. Senator Wolcott said 15½, adding that the American envoys had accepted this ratio.

Senator Wolcott then presented the following list of contributions which, among others, he suggested Great Britain might make:

1. The opening of the Indian mints and the repeal of the order making the sovereign legal tender in India.

2. Placing one-fifth of the bullion in the issue department of the Bank of England in silver.

3. Raising the legal-tender limit of silver to, say, £10, and issuing 20-shilling notes based on silver, which shall be legal tender, and the retirement, in graduation or otherwise, of the 10-shilling gold pieces and the substitution of paper based on silver.

4. An agreement to coin annually so much silver, the amount to be left open.

5. The opening of the English mints to the coinage of rupees and the coinage of British dollars which shall be full tender in the Straits Settlements and other silver standard colonies and tender in the United Kingdom to the limit of silver legal tender.

6. Colonial action and the coinage of silver in Egypt.

7. Something having the general scope of the Huskisson plan.

The meeting then closed and it was understood by the parties that on account of the absence of the French ambassador, Baron de Courcel, the proceedings should be regarded as informal, and a second conference was held on the 15th of July, at which, in addition to those already mentioned, the French ambassador and M. Geoffrey, the councillor of the French embassy, were present.

The French ambassador was invited to declare the position of the French government, and he said France was ready to reopen her mints to the coinage of silver if the commercial nations adopted the same course, and he advocated at great length the ratio of 15½. But, he explained, France would not consider the reopening of the mints of India alone as being sufficient guaranty to permit the French government to reopen the French mints to free coinage of silver.

Sir Michael Hicks-Beach then announced definitely that Great Britain would not agree to open the English mints to the unlimited coinage of silver, and that whatever views he and his colleagues might separately hold regarding bimetalism, he could say that they were united on this point.

Baron de Courcel said, as a personal suggestion, that among other contributions he thought Great Britain should open the Indian mints and also agree to purchase annually £10,000,000 of silver for a series of years.

Senator Wolcott seconded the proposal that the British government should make this purchase with proper safeguards and provisions as to the place and manner of its use.

Since this conference the British government has been considering the proposals and finally made the reply handed the United States ambassador Oct. 22.

The reply of the government of India upon which Lord Salisbury based his decision is

a long document, giving an emphatic negative to the proposal to reopen the Indian mints. It says:

"The first result of the suggested measures, if they were to succeed even temporarily in their object, would be an intense disturbance of Indian trade and industry. There would be a sudden rise in exchange, which, if the ratio of 15½ to 1 were adopted, would be to about 3 pence the rupee. Such a rise would be enough to kill our export trade for a time, at least, unless the public were convinced that the arrangement would be permanent and have the effect intended.

"The paralysis of trade and industry would be prolonged and would be accompanied by acute individual suffering. None of the advantages expected would be attained and the country would pass through a critical period which would retard its progress for years. The position would be disastrous alike to the state, to individuals and to trade generally. The exchange value of the rupee, having risen suddenly, would fall equally suddenly to a point far lower than the present level, probably 9 pence, and even lower. Such a fall, apart from other disastrous results, would necessitate additional taxation to the amount of many crores."

The reply then proceeds to point out that the proposed agreement would be a much more serious question for India than for the United States and France, as the whole risk of disaster from failure would fall upon India. If the agreement broke down, the United States and France could take precautions against a depletion of their gold reserve, but in India the rupee, when the collapse came, would fall headlong and the government would have no remedy against fluctuation in the exchange value of India's standard of value with the fluctuations in the price of silver.

"For," continues the reply, "if the Indian mints are reopened to silver now it will be practically impossible for the government ever to close them; and if it were possible it would be only after very large additions had been made to the amount of silver in circulation."

After noting that "the effect of the adoption of the scheme would probably be an increase in prices in France and the United States, but a decrease in India," a change which France and the United States "would contemplate with equanimity, but which would be manifestly impossible to India," the reply suggests that the United States is doubtless partly inspired in making its proposals by a fear of experiencing some difficulties and dangers which India has already surmounted after years of embarrassment.

Then follows the opinion that India is on the point of securing a stable exchange of 18 pence per rupee, and it would be exceedingly foolish to throw away the position already attained by an acceptance of proposals which, if they failed of their intended object, would place India permanently under the silver standard, with all its admitted disadvantages. "Nothing but assured success could justify India in joining in the experiment, and the belief is that the proposals will fail to secure a permanent ratio of 15½ to 1. One reason for this conclusion is that the arrangement would rest on too narrow a basis. The union of two countries, with a third lending assistance, is a very different thing from the international union of a majority of the important

countries of the world advocated by the Indian government in dispatches forwarded in March and June, 1892, and in February and September, 1896.

"We doubt whether any two or three nations in the world, unless one of them were Great Britain, could establish the required stability. It is certain that France, the United States and India could not."

The reply then proceeds to discuss various reasons why the experiment would not succeed. First, France and the United States, seeing the prospect of a total disappearance of gold coinage before the price of silver has been raised to the intended ratio, might take measures to prevent the export of gold. Second, either country might be reduced to a paper currency, in which case the agreement would cease to operate. Third, a three-sided agreement would be open to greater risk of termination by one or two parties than a many-sided international agreement, besides which either France or the United States might some day think some other nation benefiting at its expense, and this would lead to discussions as to the expediency of the termination of the agreement, discussions only less serious than actual termination.

"For these reasons alone, without considering objections to the particular ratio proposed, we do not hesitate," continue the authors of the reply, "to recommend that your lordship refuse to give the undertaking desired. We shall be willing to consider what effect the co-operation of any other nations, if secured, may have on the problem, but we believe that our best policy is to link ourselves to Great Britain."

They then proceed to argue that the ratio of 15½ to 1 is too high. "Differing so widely from the existing ratio, it would immensely increase the difficulty. Indeed, if it could be secured and maintained successfully, we would object to the ratio in the interests of India, and we recommend your lordship on behalf of India to decline to participate in or to do anything to encourage the formation of a union based thereon.

"As we have already pointed out, the sudden rise in the exchange value of the rupee would be so disastrous to Indian industries, especially planting, in which European capital is largely embarked, that in our opinion the true interests of India demand that any measures to attain stability of exchange for gold and silver should be based upon a ratio not greatly differing from 16 pence the rupee. Any advantages from a considerable rise in exchange would be far outweighed by the resulting evils."

Having discussed the probable effect in various directions upon India's local interests, the dispatch recommends a reply in the negative, adding:

"We presume that a union based upon a ratio low enough to suit our interests would not be acceptable to France and the United States."

In conclusion the official dispatch intimates that the present proposals might have been favorably considered in 1892, but "the experience of the last few years has made the position very different." It also notes that "the conditions under which we have had to reply to your lordship's dispatch preclude our consulting with the commercial and banking communities of India," but, "even had another reply been possible it could have been only after the fullest preliminary consideration by our banking and commercial bodies."

## HAWAIIAN ANNEXATION.

The present movement to annex the republic of Hawaii to the United States originated in 1892. King Kalakaua, who was elected ruler on the 15th day of February, 1874, died in San Francisco, Cal., while on a journey to recruit his health, on the 20th of January, 1891. His remains were taken to Honolulu, arriving there Jan. 29, and on the same day his sister took the oath of sovereignty and was proclaimed queen under the title of Liliuokalani. The queen at once appointed a new cabinet and used her power to secure a stronger hold on the government than her predecessor had ever acquired. The legislative session of 1892 was a prolonged one and considerable ill feeling was engendered by the attempt of the queen to regain absolute control of the executive power and by her determination to secure the passage of what were known as the opium and lottery bills. Her efforts were bitterly opposed on the ground that if they succeeded the government would be practically transformed from a limited to an absolute monarchy, besides disfranchising a class of citizens who paid two-thirds of the taxes for the support of the government. The efforts of the queen to put her ideas into practice precipitated a revolt.

The leaders of the opposition to the queen organized their forces and formed a provisional government, which was proclaimed Jan. 17, 1893. The United States steamer Boston was in port, and on the day previous had landed a force to protect the lives and property of American citizens in case of an outbreak. Under the advice of her cabinet the queen resigned, under protest, and decided to appeal to the United States. On the 15th of February, 1893, President Harrison sent a message to the United States senate submitting a treaty for the annexation of the Hawaiian Islands to this country. He took the ground that the restoration of the queen to the throne "was inadvisable if not impossible"; that "only two courses were open—one the establishment of a protectorate, and the other annexation full and complete"—and that the "latter course, which has been adopted in the treaty, will be highly promotive of the best interests of the Hawaiian people and is the only one that will adequately secure the interests of the United States."

This treaty was not acted upon by the senate, and shortly after his inauguration it was withdrawn by President Cleveland. Hon. James H. Blount was sent by the president as a special commissioner to the Hawaiian Islands to ascertain and report upon the facts in connection with the revolution. In his message to congress in December, 1893, the president said the report submitted by Mr. Blount showed that "the constitutional government of Hawaii had been subverted with the active aid of our representative to that government and through the intimidation caused by the presence of an armed naval force of the United States which was landed for that purpose at the instance of our minister." It therefore seemed to him "the only honorable course for our government to pursue was to undo the wrong that had been done by those representing us, and to restore as far as practicable the status existing at the time of our forcible intervention."

In the following year (June, 1894) a convention was elected, which sat in Honolulu

and framed a new constitution for the country, and the republic of Hawaii was formally proclaimed July 4, 1894. The president is elected for six years. The legislature consists of a senate and house of representatives, all members being elected by popular vote. The senators are elected for a term of six years, and voters for senators must have real property worth \$1,500, or personal property worth \$3,000, or an income of not less than \$600 per annum. The vote for representatives is based on manhood suffrage. The judiciary consists of a supreme court, five circuit courts in which trials by jury are conducted, and district courts in every district. There is an efficient police force in every part of the group.

All males between the ages of 20 and 60 pay a personal tax of \$5—viz.: Poll tax, \$1; road tax, \$2; school tax, \$2. Land pays a tax of 1 per cent on the cash value and personal property a similar rate. Carts pay \$2, brakes \$3, carriages \$5, dogs \$1, female dogs \$3. From the above it will be seen that the taxes are not heavy as compared with other countries; moreover, there are no local taxes of any kind. The republic was formally recognized by the United States in a letter from President Cleveland to President Dole dated Aug. 7, 1894.

A royalist conspiracy in the fall of 1894 resulted in the insurrection of Jan. 6, 1895, which was promptly suppressed. A number of persons, including ex-Queen Liliuokalani, were arrested and imprisoned, but ultimately released. The ex-queen left the country in 1896 and proceeded to the United States, where she has since resided.

The republic of Hawaii maintained itself during the four years that followed and the government showed itself qualified to enter into such negotiations as it saw fit with other nations.

On the 16th of June, 1897, President McKinley sent to the senate of the United States another treaty of annexation, which is still under consideration in that body. In his message of transmission the president said:

"I transmit herewith to the senate, in order that, after due consideration, the constitutional function of advice and consent may be exercised by that body, a treaty for the annexation of the republic of Hawaii to the United States, signed in this capital by the plenipotentiaries of the parties on the 16th of June instant.

"The incorporation of the Hawaiian Islands into the body politic of the United States is the necessary and fitting sequel to the chain of events which from a very early period of our history has controlled the intercourse and prescribed the association of the United States and the Hawaiian Islands. The predominance of American interests in that neighboring territory was first asserted in 1820 by sending to the islands a representative agent of the United States. It found further expression by the signature of a treaty of friendship, commerce and navigation with the king in 1826—the first international compact negotiated by Hawaii. It was signally announced in 1843, when the intervention of the United States caused the British government to disavow the seizure of the Sandwich Islands by a British naval commander and to recognize them by treaty as an independent state, renouncing forever any purpose of annexing the islands or exercising a protec-

torate over them. In 1851 the cession of the Hawaiian kingdom to the United States was formally offered and although not then accepted this government proclaimed its duty to preserve alike the honor and dignity of the United States and the safety of the government of the Hawaiian Islands. From this time until the outbreak of the war in 1861 the policy of the United States toward Hawaii and of the Hawaiian sovereign toward the United States was exemplified by continued negotiations for annexation or for a reserved commercial union. The latter alternative was at length accomplished by the reciprocity treaty of 1875, the provisions of which were renewed and expanded by the convention of 1884, embracing the perpetual cession to the United States of the harbor of Pearl River in the island of Oahu. In 1888 a proposal for the joint guaranty of the neutrality of the Hawaiian Islands by the United States, Germany and Great Britain was declined on the announced ground that the relation of the United States to the islands was sufficient for the end in view. In brief, from 1820 to 1893 the course of the United States toward the Hawaiian Islands has consistently favored their autonomous welfare with the exclusion of all foreign influence save our own, to the extent of upholding eventual annexation as the necessary outcome of that policy.

"Not only is the union of the Hawaiian territory to the United States no new scheme, but it is the inevitable consequence of the relation steadfastly maintained with that mid-Pacific domain for three-quarters of a century. Its accomplishment, despite successive denials and postponements, has been merely a question of time. While its failure in 1893 may not be a cause of congratulation, it is certainly a proof of the disinterestedness of the United States, the delay of four years having abundantly sufficed to establish the right and the ability of the republic of Hawaii to enter, as a sovereign contractant upon a conventional union with the United States, thus realizing a purpose held by the Hawaiian people and proclaimed by successive Hawaiian governments through some seventy years of their virtual dependence upon the benevolent protection of the United States. Under such circumstances, annexation is not a change; it is a consummation."

#### TEXT OF THE TREATY.

The United States of America and the republic of Hawaii, in view of the natural dependence of the Hawaiian Islands upon the United States of their geographical proximity thereto, of the preponderant share acquired by the United States and its citizens in the industries and trade of said islands, and of the expressed desire of the government of the republic of Hawaii that those islands should be incorporated into the United States as an integral part thereof and under its sovereignty, have determined to accomplish by treaty an object so important to their mutual and permanent welfare.

To this end the high contracting parties have conferred full powers and authority upon their respectively appointed plenipotentiaries—to wit:

The president of the United States: John Sherman, secretary of state of the United States.

The president of the republic of Hawaii: Francis March Hatch, Lorrin A. Thurston, and William A. Kinney.

Article 1. The republic of Hawaii hereby cedes absolutely and without reserve to the

United States of America all rights of sovereignty of whatsoever kind in and over the Hawaiian Islands and their dependencies; and it is agreed that all the territory of and appertaining to the republic of Hawaii is hereby annexed to the United States of America under the name of the territory of Hawaii.

Art. 2. The republic of Hawaii also cedes and hereby transfers to the United States the absolute fee and ownership of all public government or crown lands, public buildings or edifices, ports, harbors, military equipment and all other public property of every kind and description belonging to the government of the Hawaiian Islands, together with every right and appurtenance thereunto appertaining.

The existing laws of the United States relative to public lands shall not apply to such lands in the Hawaiian Islands; but the congress of the United States shall enact special laws for their management and disposition: Provided, that all revenue from or proceeds of the same, except as regards such part thereof as may be used or occupied for the civil, military or naval purposes of the United States, or may be assigned for the use of the local government, shall be used solely for the benefit of the inhabitants of the Hawaiian Islands for educational and other public purposes.

Art. 3. Until congress shall provide for the government of such islands all the civil, judicial and military powers exercised by the officers of the existing government in said islands shall be vested in such person or persons and shall be exercised in such manner as the president of the United States shall direct, and the president shall have power to remove said officers and fill the vacancies so occasioned.

The existing treaties of the Hawaiian Islands with foreign nations shall forthwith cease and determine, being replaced by such treaties as may exist or as may be hereafter concluded between the United States and such foreign nations.

The municipal legislation of the Hawaiian Islands, not enacted for the fulfillment of the treaties so extinguished, and not inconsistent with this treaty, nor contrary to the constitution of the United States, nor to any existing treaty of the United States, shall remain in force until the congress of the United States shall otherwise determine.

Until legislation shall be enacted extending the United States customs laws and regulations to the Hawaiian Islands the existing customs relations of the Hawaiian Islands with the United States and other countries shall remain unchanged.

Art. 4. The public debt of the republic of Hawaii, lawfully existing at the date of the exchange of the ratifications of this treaty, including the amounts due to the depositors in the Hawaiian Postal savings bank, is hereby assumed by the government of the United States; but the liability of the United States in this regard shall in no case exceed \$4,000,000. So long, however, as the existing government and the present commercial relations of the Hawaiian Islands are continued as hereinbefore provided said government shall continue to pay the interest on said debt.

Art. 5. There shall be no further immigration of Chinese into the Hawaiian Islands, except upon such conditions as are now or may hereafter be allowed by the laws of the United States, and no Chinese by reason of anything herein contained shall be allowed to enter the United States from the Hawaiian Islands.

Art. 6. The president shall appoint five commissioners, at least two of whom shall be residents of the Hawaiian islands, who shall, as soon as reasonably practicable, recommend to congress such legislation concerning the territory of Hawaii as they shall deem necessary or proper.

Art. 7. This treaty shall be ratified by the president of the United States by and with the advice and consent of the senate, on the one part; and by the president of the republic of Hawaii, by and with the advice and consent of the senate, in accordance with the constitution of the said republic, on the other; and the ratifications hereof shall be exchanged at Washington as soon as possible.

In witness whereof the respective plenipotentiaries have signed the above articles and have hereunto affixed their seals.

Done in duplicate at the city of Washington, this sixteenth day of June, one thousand eight hundred and ninety-seven.

JOHN SHERMAN,  
FRANCIS MARCH HATCH,  
LORRIN A. THURSTON,  
WILLIAM KINNEY.

#### SECRETARY SHERMAN'S REPORT.

Accompanying the president's message and the Hawaiian treaty was the following report from Secretary Sherman:

"The President: The undersigned, secretary of state, has the honor to lay before the president for submission to the senate, should it be deemed for the public interest to do so, a treaty, signed in the city of Washington on the 16th inst., by the undersigned and by the duly empowered representatives of the republic of Hawaii, whereby the islands constituting the said republic of Hawaii and all their dependencies are fully and absolutely ceded to the United States of America forever.

It does not seem necessary to the present purpose of the undersigned to review the incident of 1893, when a similar treaty of cession was signed on Feb. 14, and submitted to the senate, being subsequently withdrawn by the president on March 9, following.

"The negotiation which has culminated in the treaty now submitted has not been a mere resumption of the negotiation of 1893 but was initiated and has been conducted upon independent lines. Then an abrupt revolutionary movement had brought about the dethronement of the late queen, and set up, instead of the heretofore titular monarchy, a provisional government for the control and management of public affairs and the protection of the public peace, such government to exist only until terms of union with the United States should have been negotiated and agreed upon. Thus self-constituted, its promoters claimed for it only a de facto existence until the purpose of annexation in which it took rise, should be accomplished.

"As time passed, and the plan of union with the United States became an uncertain contingency, the organization of the Hawaiian commonwealth underwent necessary changes; the temporary character of its first government gave place to a permanent scheme, under a constitution framed by the representatives of the electors of the islands; administration by an executive council not chosen by suffrage, but self-appointed, was succeeded by an elective and parliamentary regime, and the ability of the new government to hold—as the republic of Hawaii—an independent place in the family of sovereign states, preserving order at

home and fulfilling international obligations abroad, has been put to the proof.

"Recognized by the powers of the earth, sending and receiving envoys, enforcing respect for the law and maintaining peace within its island borders, Hawaii sends to the United States not a commission representing a successful revolution, but the accredited plenipotentiary of a constituted and firmly established sovereign state. However sufficient may have been the authority of the commissioners with whom the United States government treated in 1893, and however satisfied the president may then have been of their power to offer the domain of the Hawaiian Islands to the United States, the fact remains that what they then tendered was a territory rather than an established government—a country whose administration had been cast down by a bloodless but complete revolution and a community in a state of political transition.

"Now, however, the republic of Hawaii approaches the United States as an equal and points for its authority to that provision of article 32 of the constitution, promulgated July 24, 1894:

"The president, with the approval of the cabinet, is hereby expressly authorized and empowered to make a treaty of political or commercial union between the republic of Hawaii and the United States of America, subject to the ratification of the senate."

"The present negotiation is, therefore, as has been said, not a mere renewal of the tender of Hawaiian territory made in 1893, but has responded to the purpose declared in the Hawaiian constitution, and the conferences of the plenipotentiaries have been directed to weighing the advantages of the political and commercial union proposed here relatively considering the scope and extent thereof.

"It soon appeared to the negotiators that a purely commercial union on the lines of the German sovereign could not satisfy the problems of the administration in Hawaii and of the political association between the islands and the United States. Such a commercial union would, on the one hand, deprive the Hawaiian government of its chief source of revenue from customs duties by placing its territory in a relation of free exchange with the territory of the United States, its main market of purchase and supply, while, on the other hand, it would entail upon Hawaii the maintenance of an internal revenue system on a par with that of the United States, or else involve the organization of a corresponding branch of our revenue service within a foreign jurisdiction.

"We have had with Hawaii, since 1875, a treaty of commercial union, which practically assimilates the two territories with regard to many of their most important productions and excludes other nations from enjoyment of its privileges; yet, although the treaty has outlived other favored reciprocity schemes, its permanency has at times been gravely imperiled.

"Under such circumstances, to enter upon the radical experiment of a complete commercial union between Hawaii and the United States as independently sovereign, without assurance of permanency and with perpetual subjection to the vicissitudes of public sentiment in the two countries, was not to be thought of.

"Turning, then, to the various practical forms of political union, the various phases of a protectorate, an offensive and defensive alliance and a national guaranty were passed in review. In all of these the inde-

pendence of the subordinated state is the distinguishing feature, and with it the assumption by the paramount state of responsibility without domain. The disparity of the relative interests and the distance separating the two countries could not fail to render any form of protective association either unduly burdensome or illusory in its benefits, so far as the protecting state is concerned, while any attempt to counteract this by tributary dependence or a measure of auserein control would be a retrograde movement toward a feudal or colonial establishment alike inexpedient and incompatible with our national policy.

"There remained, however, the annexation of the islands and their complete absorption into the political system of the United States as the only solution satisfying all the given conditions and promising permanency and mutual benefit.

"The present treaty has been framed on this basis, thus substantially reverting to the original proposal of 1893 and necessarily adopting many of the features of that arrangement. As to most of these the negotiators have been constrained and limited by the constitutional powers of the government of the United States.

"As in previous instances when the United States has acquired territory by treaty, it has been necessary to reserve all the organic provisions for the action of congress. If this were requisite in the case of the transfer to the United States of part of the domain of a titular sovereign, as in the cession of Louisiana by France, of Florida by Spain, or of Alaska by Russia, it is the more requisite when the act is not cession but union involving the complete incorporation of an alien sovereignty into the body politic of the United States.

"For this the only precedent of our political history is found in the uncompleted treaty concluded during President Grant's administration, Nov. 29, 1899, for the annexation of the Dominican republic to the United States.

"Following that example, the treaty now signed by the plenipotentiaries of the United States and the republic of Hawaii reserves to the congress of the United States the determination of all questions affecting the form of government of the annexed territory, the citizenship and elective franchise of its inhabitants and the manner in which laws of the United States are to be extended to the islands.

"In order that this independence of congress shall be complete and unquestionable, and pursuant to the recognized doctrine of public law that treaties expire with the independent life of the contracting state, there has been introduced, out of abundant caution, an express provision for the determination of all treaties heretofore concluded by Hawaii with foreign nations and the extension to the islands of the treaties of the United States. This leaves congress free to deal with such especial regulation of the contract labor system of the islands as circumstances may require.

"There being no general provision of existing statutes to prescribe the form of government for newly incorporated territory, it was necessary to stipulate, as in the Dominican precedent, for continuing the existing machinery of the government and laws in the Hawaiian islands until provisions shall be made by law for its government, as territory of the United States, of the domain thus incorporated into the union; but, having in view the peculiar status created in Hawaii by laws enacted in execu-

tion of the treaties heretofore concluded between Hawaii and other countries, only such Hawaiian laws are thus provisionally continued as shall not be incompatible with the constitution or the laws of the United States or with the provisions of this treaty.

"It will be noticed that express stipulation is made prohibiting the coming of Chinese laborers from the Hawaiian islands to any other part of our national territory. This provision was proper and necessary in view of the Chinese exclusion acts, and it behooved the negotiators to see to it that this treaty, which in turn is to become in due constitutional course a supreme law of the land, shall not alter or amend existing law in this most important regard.

"JOHN SHERMAN.

"Department of State, Washington, D. C., June 15, 1897."

#### QUEEN LILIUOKALANI'S PROTEST.

On the 17th of June, 1897, the queen filed the following protest with the secretary of state:

Liliuokalani of Hawaii, by the will of God named her apparent on the 10th day of April, A. D. 1877, and by the grace of God queen of the Hawaiian Islands on the 17th day of January, A. D. 1893, do hereby protest against the ratification of a certain treaty which, so I am informed, has been signed at Washington by Messrs. Hatch, Thurston and Kinney, purporting to cede those islands to the territory and dominion of the United States. I declare such treaty to be an act of wrong toward the native and part native people of Hawaii, an invasion of the rights of the ruling chiefs, in violation of international rights both toward my people and toward friendly nations with whom they have made treaties, the perpetuation of the fraud whereby the constitutional government was overthrown, and finally an act of gross injustice to me.

"Because the official protest made by me on the 17th day of January, 1893, to the so-called provisional government was signed by me and received by said government with the assurance that the case was referred to the United States of America for arbitration.

"Because that protest and my communications to the United States government immediately thereafter expressly declare that I yielded my authority to the forces of the United States in order to avoid bloodshed and because I recognized the futility of a conflict with so formidable a power.

"Because the president of the United States, the secretary of state and an envoy commissioned by them reported in official documents that my government was unlawfully coerced by the forces, diplomatic and naval, of the United States; that I was at the date of their investigations the constitutional ruler of my people.

"Because such decision of the recognized magistrates of the United States was officially communicated to me and to Sanford B. Dole, and said Dole's resignation requested by Albert S. Willis, the recognized agent and minister of the government of the United States.

"Because neither the above named commission nor the government which sends it has ever received any such authority from the registered voters of Hawaii, but derives its assumed powers from the so-called committee of public safety organized on or about said 17th day of January, 1893, said committee being composed largely of persons claiming American citizenship, and not one single Hawaiian was a member thereof or

in any way participated in the demonstration leading to its existence.

"Because my people, about 40,000 in number, have in no way been consulted by those, 3,000 in number, who claim the right to destroy the independence of Hawaii. My people constitute four-fifths of the legally qualified voters of Hawaii, and, excluding those imported for the demands of labor, about the same proportion of the inhabitants.

"Because said treaty ignores not only the civic rights of my people, but, further, the hereditary property of their chiefs. Of the 4,000,000 acres composing the territory said treaty offers to annex a million—or 250,000—acres have in no way been heretofore recognized as other than the private property of the constitutional monarch, subject to a control in no way differing from other items of a private estate.

"Because it is proposed by said treaty to confiscate said property, technically called the crown lands, those legally entitled thereto either now or in succession receiving no consideration whatever for estates their title to which has been always unimpaired and which is legitimately in my name at this date.

"Because said treaty ignores not only all professions of perpetual amity and good faith made by the United States in former treaties with the sovereigns representing the Hawaiian people, but all treaties made by those sovereigns with other and friendly powers, and it is thereby in violation of international law.

"Because, by treating with the parties claiming at this time the right to cede said territory of Hawaii the government of the United States receives such territory from the hands of those whom its own magistrates (legally elected by the people of the United States, and in office in 1893) pronounced fraudulently in power and unconstitutionally ruling Hawaii.

"Therefore, I, Liliuokalani of Hawaii, do hereby call upon the president of that nation to whom alone I yielded my property and my authority to withdraw said treaty (ceding said islands) from further consideration. I ask the honorable senate of the United States to decline to ratify said treaty and I implore the people of this great and good nation, from whom my ancestors learned the Christian religion, to sustain their representatives in such acts of justice and equity as may be in accordance with the principles of their fathers; and to the Almighty Ruler of the Universe, to Him who judgeth righteously, I commit my cause.

"Done at Washington, District of Columbia, U. S. A., this 15th day of June, in the year 1897.

"LILIUOKALANI.

"JOSEPH HELELUHE.

"WEKEKI HELELUHE.

"JULIUS A. PALMER.

"Witnesses to signature."

#### JAPAN'S PROTEST.

On the 15th of June the Japanese minister sent the following communication to the secretary of state:

"Legation of Japan, Washington, D. C., June 15, 1897.—Sir: I beg to again call your attention to the subject of our interview today, the rumor that the governments of the United States and Hawaii are on the point of concluding a treaty annexing the Hawaiian islands to this country as a territorial part thereof. As I had the honor to state to you, this rumor has been repeated during the past few days with a circumstantiality

of detail which gives it the appearance of authority. It not only states positively that the annexation will soon take place, but also gives with apparent precision certain portions of the alleged arrangement which directly affect the rights acquired by the government of Japan and Japanese subjects by treaties with Hawaii and under the constitution and laws of that country.

"It is on this account that I desire to repeat what I had the honor to state in our interview to-day, that my government cannot view without concern the prospects of a sudden and complete change in the status of Hawaii, whereby the rights of Japan and of Japanese subjects may be imperiled.

"While, therefore, they confidently rely upon the United States to maintain toward them a just and friendly attitude in this as in all other matters, they feel that under the circumstances they cannot be regarded as spectators merely, without interest in the important change which it has been so positively asserted is about to take place in the relations of the United States and the Hawaiian Islands. For this reason, if it is really true that a treaty of annexation is about to be concluded, I feel that I am justified in inquiring from you, Mr. Secretary, what provision has been made therein for the preservation and maintenance of the rights acquired and enjoyed by Japan in her intercourse with Hawaii under the solemn sanctions of law and of treaty.

"Accept, Mr. Secretary, the renewed assurance of my highest consideration.

"TORU HOSHI.

"To John Sherman, Secretary of State."

To this Secretary Sherman replied as follows:

"Department of State, Washington, D. C., June 15, 1897.—Sir: Referring to your note of the 15th inst., just received, I have to say that the governments of Hawaii and the United States, by their duly authorized representatives, have signed a treaty annexing the Hawaiian Islands to this country. This has been done in pursuance of the policy long since adopted by the United States, and the treaty will, I understand, be submitted to the senate of the United States by the president for ratification.

"As to your inquiry as to the provision made therein concerning the treaties which may be in existence between Japan and the present Hawaiian government, my understanding is that the government of the United States does not take upon itself any obligations of the Hawaiian government arising from treaties or conventions made by it with other governments.

"It is believed that there is nothing in the proposed treaty prejudicial to the rights of Japan, and certainly the United States had no disposition to disturb the friendly relations which have long existed between the government of Japan and this country.

"Accept, Mr. Minister, the renewed assurance of my highest consideration.

"JOHN SHERMAN.

"To Toru Hoshi, etc."

Minister Hoshi then submitted Japan's formal protest as follows:

"Legation of Japan, Washington, D. C., June 15, 1897.—Sir: Referring to the correspondence which has passed between us regarding the proposed annexation of the Hawaiian Islands to the United States, I have the honor to inform you that, having communicated with my government upon the subject, I am now in receipt of instructions from his imperial majesty's minister for foreign affairs in relation thereto.

"Before divulging the nature of these instructions I desire to state that, although the imperial government could not have failed to attach due weight to the statement in your communication to me of the 16th inst., that in your opinion 'there is nothing in the proposed treaty prejudicial to the rights of Japan,' they must also have taken note of the fact that in alluding in the same communication to existing treaties between Japan and Hawaii you state that your understanding is that the government of the United States does not take upon itself any obligations of the Hawaiian government arising from treaties or conventions with other governments.

"I have now the honor to inform you that I am instructed by his imperial majesty's government to formally protest against the proposed annexation of the Hawaiian Islands to the United States.

"This protest is made for the following reasons:

"First—That the maintenance of the status quo of Hawaii is essential to the good understanding of the powers which have interests in the Pacific.

"Second—The annexation of Hawaii would tend to endanger the residential, commercial and industrial rights of Japanese subjects in Hawaii, secured to them by treaty and by the constitution and laws of that country.

"Third—Such annexation might lead to the postponement by Hawaii of the settlement of claims and liabilities already existing in favor of Japan under treaty stipulations.

"With reference to the mischievous suggestion or report which has been so industriously circulated in this country and elsewhere, that Japan has designs against the integrity of sovereignty of Hawaii, I am further instructed by the imperial government to state most emphatically and unequivocally that Japan has not now and never had such designs, or designs of any kind whatever against Hawaii.

"Permit me to add in conclusion, Mr. Secretary, that in making this protest and in asking full and careful consideration for it the imperial government is actuated by what it regards as an imperative duty and not in the remotest degree by a desire to embarrass the United States. It prizes most highly the cordial relations which have always existed between our countries, and they confidently trust that their representations on this occasion will be received with that spirit of justice and fair dealing which has so notably characterized the intercourse of Japan and the United States.

"Accept, Mr. Secretary, the renewed assurances of my highest consideration.

"TORU HOSHI.

"To Hon. John Sherman, Secretary of State."

On the 25th of June Secretary Sherman replied to the protest of Japan. The reply was a long one and covered all the points made by the Japanese minister.

After reciting the grounds of Japan's protest as quoted above, Mr. Sherman says that they suggest "confusion between the formal stipulations of treaties and the vested rights which the subjects of one country may acquire in another under treaty or the law of the land. . . . The principle of public law whereby the existing treaties of a state cease upon its incorporation into another state is well defined by Halleck, who says:

"But the obligations of treaties, even where some of their stipulations are in terms perpetual, expire in case either of the con-

tracting parties loses its existence as an independent state, or in case its internal constitution is so changed as to render the treaty inapplicable to the new condition of things."—Halleck's Int. Law, Ch. 18, Sec. 35.

"So also Wheaton, in the 275th section of his 'Elements of International Law.' Both of the stated conditions necessarily attend the annexation of one state, or of its territory to another. Vattel went further, holding in effect that even a partial loss of sovereignty, as in the case of alliance, causes the ancient treaties to fall if incompatible with such alliance. . . . The history of Europe, of America, of the whole world, is full of examples where independent states have ceased to be such through constrained or voluntary absorption by another, with attendant extinction of their former treaties with other states. It needs no stipulation in a formal annexation treaty to work this result, for it attends de facto annexation, however accomplished. The incorporation of Hanover into the Prussian kingdom, the admission of Texas to the union and the recent annexation of Madagascar by France are cited as cases in point. . . . It does not even follow," says Mr. Sherman, "that the existing treaties of the absorbing state extend to the acquired territory. The treaties of the German empire are held not to apply to the ceded French provinces of Alsace and Lorraine. . . . The treaty of annexation does not abrogate these instruments [the treaties of Hawaii]; it is the fact of Hawaii's ceasing to exist as an independent contractant that extinguishes these contracts.

"As to the vested rights, if any be established, in favor of Japan or of Japanese subjects in Hawaii the case is different; and I repeat what I said in my note of the 16th inst., that 'there is nothing in the proposed treaty prejudicial to the rights of Japan.' Treaties are terminable in a variety of ways; that of 1886 between Japan and Hawaii, to which your protest is supposed to relate, is denounceable by either party on six months' notice; but its extinction would no more extinguish vested rights previously acquired under its stipulations than the repeal of a municipal law affects rights of property vested under its provisions.

As to the necessity of maintaining the status quo of Hawaii, Mr. Sherman points out that the predominance of United States influence has been the one essential feature of the status quo there for three-quarters of a century; that union of the islands with the United States would be but the "destined culmination" of the trend of developments for many years past; that no power protested against the proposal of annexation in 1893; that no occasion for such protest has since arisen; that, on the contrary, all interests of common benefit will be strengthened and perpetuated by annexation.

The administration will permit no foreign interference with its policy with respect to the annexation of Hawaii. This is the meaning of the reply of the state department to the protest made by the Japanese government.

The state department declares that Japan cannot hold perpetual treaty rights with Hawaii, for the reason that when a government falls its treaties expire.

It refers to the well-established principle of international law that the obligations of treaties, even when some of their stipulations are in their terms perpetual, expire in case either of the contracting parties loses its existence as an independent state or in case its internal constitution is so

changed as to render the treaty inapplicable to the new condition of things.

In regard to the declaration by Japan that 25,000 Japanese residents in the islands are under present conditions entitled to become citizens of Hawaii, the department holds that this is a matter to be decided by congress and the courts. The department points out that the rights enjoyed by Japan in Hawaii will be continued under the terms of the treaty between the Washington and Tokyo governments, which will go into effect in 1893.

On the 26th of July the state department received the reply of Japan to the note of the secretary of state. It bore date July 10, 1897, and the following is the full text of the answer:

"Replying to your note of date the 25th ult., in answer to mine of the 19th ult., regarding the proposed annexation of the Hawaiian Islands to the United States, I have the honor to inform you that I communicated its substance to Count Okuma, from whom I am in receipt of telegraphic instructions embodying the views of the imperial government in relation thereto.

"Taking note of what you say in reply to the representation I had the honor to make on behalf of my government with reference to the necessity of maintaining the status quo of Hawaii, the imperial government has no hesitation in admitting the predominant influence of the United States in the Hawaiian Islands. In its opinion, however, the very fact that such predominance has existed so long unquestioned might be urged as a reason against the disturbance of the status quo, more especially as practically the whole population of Hawaii acknowledges the paramount importance of the relations of their country with the United States, while it is understood that only a small fraction of their number favor annexation.

"From this it may be reasonably inferred that the predominant and paramount influence of the United States, which, as you remark, 'has been the one essential feature of the status quo through three-quarters of a century, in which the constitution and government of Hawaii and the commerce of the islands with the world have undergone notable changes,' furnishes on the one hand the amplest guaranty against anything inimical to either the United States or Hawaii, while, on the other hand, it obviates the necessity of a change in existing conditions which will injuriously affect the interests of others.

"As regards the further statement in your communication under reply that four years ago, when a similar project of annexation followed the Hawaiian revolution, 'the occasion for maintaining the status quo was not even suggested by any power possessing interests in the Pacific,' I beg to say that the imperial government does not think the attitude of Japan at that time can be regarded as even impliedly acquiescent in the annexation project then under consideration. In view of the rapidity with which the important events connected with the incident of 1893 followed each other, and especially in the light of the ultimate action of the United States concerning the proposed plan of annexation, the imperial government cannot perceive that any contract can justly be drawn so far as Japan is concerned, between what was done or omitted to be done on that occasion and the position they have now taken. But, in any event, the changes which have since occurred in the situation and the augmentation that has in the mean-

time taken place in the interests of Japan in the Pacific make such acquiescence inapplicable now.

"The policy of colonial expansion among European countries was especially active in the Pacific during the decade ending 1892, and as a result nearly all of the island groups then autonomous passed under the sway of various western powers. By common accord the powers have recently appeared willing to stay their hands and international rivalry and conflicting interests are now the best guaranties for the continued sovereign existence of the few remaining island groups, but the absorption by the United States of such an important part of the remaining unappropriated region as Hawaii would doubtless be the signal for the revival of dormant territorial ambition in the Pacific, and the last vestige of native autonomy would disappear; and it is not too much to apprehend that a partial redistribution of colonial possessions among the various western powers might also follow.

"It can easily be seen how this would affect the interests of Japanese subjects who are now engaging in increasing numbers in various undertakings and enterprises in the Pacific, with profit to themselves and advantage to Japan. It was precisely on account of the prevalence of this spirit of colonial absorption that one of your honorable predecessors was led to declare to the German government that your government attached great importance to 'the maintenance of the rights to which the United States has become entitled to the few remaining regions now under independent and autonomous native governments in the Pacific ocean.' (Mr. Bayard to Mr. Pendleton, Foreign Relations, 1888, page 599.)

"The justice of that declaration cannot be questioned, and the imperial government, entertaining similar views, could not behold with indifference changes in the status of those governments that would extinguish Japanese rights. It has no intention of questioning the actual existing situation in the Pacific, and certainly no desire to in any wise disturb it; but its position in that part of the world renders it impossible for it to view with unconcern and in a spirit of acquiescence the consequences which would probably follow the extinction of Hawaiian sovereignty.

"You state in your note of the 25th ult. that the recital of the grounds upon which the protest of Japan against the proposed annexation of Hawaii is based is of itself proof that my government has misapprehended the statements and assurances contained in your note of the 16th ult., and that in relation to the treaty question involved it 'strongly suggests confusion between the formal stipulations of the treaties and the vested rights which the subjects of one country may acquire in another under treaty or the law of the land. It does not seem to me that the question is a material one, but I beg to observe that the appearance of confusion which has suggested itself to you is at most only superficial. The protest of my government was general as well as specific in character. It was based on the consequences which would directly follow from annexation, as foreshadowed in your note of the 16th ult. and subsequently definitely stated in the communication under reply and also upon the collateral results which might certainly be expected from the changed conditions which the extinction of Japan's treaties would create.

"The imperial government recognizes it is

a well-established principle of international law that the completion of annexation would render the treaties and conventions at present existing between Japan and Hawaii voidable either at the option of Japan or the United States. But it cannot anticipate without apprehension the consequences, whether direct or indirect, which would follow the practical consummation of the theory that annexation ipso facto means the immediate termination of those treaties and conventions and the consequent cessation for the future of the privileges granted thereunder.

"The justice or expediency of extending to Hawaii the treaty of 1853, at present subsisting between Japan and the United States, is quite another question. Such extension might be inferred from the language of the second paragraph of article III of the proposed treaty of annexation, which also provides for the extension of Hawaii's existing treaties, but the treaty of 1853 is wholly nonreciprocal and the imperial government is not prepared to admit that it could be so extended without its consent.

"Under the circumstances only the most cursory review of the actual situation is required to show the disadvantageous position in which Japan would be placed by the abrupt termination of her treaties and by the consequent absence of satisfactory conventional stipulations for the protection of her rights and the rights and the interests of her people.

"The sphere of Japan's expanding activities is in the Pacific.

"Her trade with Hawaii is important and nearly 25,000 Japanese subjects are now residing there. Her commerce with the United States and with Canada is constantly increasing. In Mexico and central South America Japanese immigrants are welcomed and trade is springing into existence. One line of Japanese steamers already plies between Japan and the United States, and another is about to be established. It is not too much to predict that the near future will witness the inauguration of other trans-Pacific steamer lines. All or nearly all of these lines of steamers will make Honolulu a port of call.

"The importance to Japan of the staple and well-recognized commercial, residential and industrial status which her subjects have gained in Hawaii is consequently evident. The growth and prosperity of the interests I have enumerated depend in no small measure upon it, and hence it must be acknowledged that the concern which the Japanese government feels in the maintenance of the rights that underlie the welfare of Japanese commerce in the Pacific is both legitimate and commendable.

"In the note under reply you intimate that vested rights, if any, be abolished in favor of Japan or of Japanese subjects in Hawaii, will be respected. As germane to this branch of the subject I have the honor to call your attention to a note addressed on March 4, 1896, by your honorable predecessor, Mr. Bayard, to Mr. Von Alvensleben, then German minister to the United States. In reply to the verbal announcement of the protectorate established by Germany over certain island groups in the Pacific, (Foreign Relations, 1896, page 333.)

"Referring to the declaration made on behalf of the German government that 'well-established rights of third parties' were to be respected, Mr. Bayard replied that in the absence of precise knowledge as to the meaning intended to be given to the term 'well-established rights' he believed that he

interpreted it rightly as a declaration that American citizens who already had established or might thereafter establish themselves on the islands in question in peaceful accord with the natives and on a footing of perfect equality with settlers of German and other nationality would not be disturbed in their rights of residence or intercourse or discriminated against as compared with German subjects by reason of the establishment of a German protectorate.

"Without pausing to consider the analogy in many essential particulars between the principle thus announced by the United States in 1836 and that now maintained by Japan I have the honor to state that if the United States government attach to the expression 'vested rights' the same significance as Mr. Bayard's note to the term 'well-established rights' the imperial government would have little to complain of under this head.

"But the absolute extinction of Japan's treaties and conventions without even the formality of previous notice creates a very different situation, not alone by removing conventional privileges and exemptions, but also by substituting therefor new and burdensome changes.

"In that case the application of United States custom laws to Hawaii would check the further development of Japanese trade, the extension of United States naturalization and immigration laws would be detrimental to the future residential and industrial rights of Japanese subjects and the enforcement of United States navigation laws, making the carrying trade between this country and Hawaii a part of the coasting trade, would probably prove fatal to the interests of Japanese steamship lines crossing the Pacific to the United States.

"With reference to the third point set forth in my note of the 19th ult. I have the honor to observe that the imperial government has large unliquidated claims against Hawaii for what it deems to be clear and deliberate violations of treaty.

"Regarding the inherent justice of these claims the imperial government entertains no doubt whatever, and bearing in mind the clear provisions of international law it cannot admit that any alterations in the Hawaiian status would in the least tend to relieve Hawaii of liability.

"It might easily happen, however, that the change in the plan of the negotiations consequent upon the consummation of the proposed project of annexation would tend to delay an adjustment that ought not to be postponed.

"The foregoing are the grounds upon which my government bases its objection to the proposed annexation of Hawaii to the United States. I should, however, signally fail in the duty which has been intrusted to me if I did not add that this full and frank explanation of the views of the imperial government is due not alone to its wish to protect the interests confided to its care but also to its sincere desire to remove all possible cause for misunderstanding between the government of the United States and itself. I should also add that I have received with great pleasure your courteous acknowledgment of the disclaimer I had the honor to make on behalf of my government in regard to the false report that Japan has designs against Hawaii.

"I regret to say, however, that similar reports are constantly appearing even in the reputable section of the American press, and, coupled with baseless or distorted accounts of occurrences in Japan and Hawaii,

are now, I am credibly informed, being urged in responsible quarters as a pretext for immediate action upon the treaty of annexation.

"Therefore, I have the honor to repeat that Japan has absolutely no designs of any kind whatever inimical to Hawaii and no motive in her dealings with that country except to secure by legitimate means the due observance of just obligations.

"Accept, Mr. Secretary, the renewed assurance of my highest consideration.

"TORU HOSHI."

This closed the correspondence between the two governments up to Aug. 1, 1897.

As collateral to the protests of Japan may be mentioned the claim made by that country against Hawaii for a violation of the treaty between the two countries. The influx of Asiatics into Hawaii induced the government to secure legislation that should act as a check upon such immigration. To this Japan objected. Hawaii proposed to arbitrate the matters in dispute, to which proposal Japan made the following reply, received Sept. 7, 1897, which indicates the points in the controversy.

It is from Count Okuma, minister of foreign affairs, to H. Shimamura, Japanese minister to Hawaii. After acknowledging the receipt of Hawaii's offer of arbitration it says:

"The Imperial government is firmly convinced that its complaints in this matter are well founded and that its demands are just and reasonable. Nevertheless, in a spirit of conciliation and in the hope that its action may contribute to the good relations of the two countries, it has resolved to accept, subject to certain necessary limitations and qualifications, the proposal of the government of Hawaii.

"Accordingly on the 28th ult. I telegraphed to you to the effect that the Japanese government accepted in principle the suggestion of the government of Hawaii for arbitration and that the terms and conditions of such acceptance would follow by mail.

"I now confirm that telegram, and the object of this instruction is to explain the nature of the terms and conditions an adhesion to which is in the estimation of the Imperial government essential to a satisfactory issue of the contemplated arbitration.

"The reasons assigned by the minister of foreign affairs of Hawaii in favor of arbitration make it also desirable that the award, when pronounced, shall be of the highest and most commanding character. Consequently the Imperial government proposes that the two governments shall, when the proper time arrives, unite in requesting that his majesty the king of the Belgians may be pleased to accept the position of sole arbitrator.

"The Imperial government is, moreover, persuaded of the desirability of expressly defining the scope of the reference, not only in order to lighten the labors of the arbitrator but with the view as well that the decision may address itself solely to the actual points of divergence.

"We therefore propose that the two governments shall agree to the essential facts of the case and that the arbitration shall be limited to specified questions at law and, in case the award is in favor of Japan, the measure of damages suffered by the subjects of his Imperial majesty.

"It is due to frankness that I should, in this connection, state that for reasons which are fully set forth in another instruction the Imperial government cannot consent that the

question of the bona fide possession of \$50 by each of the rejected free laborers, or of the applicability of the treaty of 1871 to the Japanese subjects other than those belonging to the merchant class, shall be regarded as points of issue upon which the decision of the arbitrator is to be invited.

"If the government of the republic is prepared to meet the Imperial government upon the foregoing essential points it is not apprehended that any difficulty will be experienced in arriving at an understanding in reference to questions of minor importance.

"You are consequently directed to communicate a copy of this instruction to the minister of foreign affairs as the reply of the Imperial government to the suggestion contained in his note of June 28. You will at the same time urgently impress upon him the importance from every point of view of an immediate response. I am, sir, etc.,

"COUNT OKUMA SHIGENOBU,

"Minister for Foreign Affairs."

Two points in the controversy Japan was not at that time disposed to submit to arbitration—viz., the questions of the bona fide possession of \$50 by each of the rejected free laborers and the applicability of the treaty of 1871 to Japan's subjects other than the merchant class. On the 12th of October, 1897, it was reported from Honolulu that the Japanese government had notified Hawaii that it would include these two excepted points in the arbitration. The whole dispute seems to be in a fair way of settlement.

On the 9th of September the Hawaiian senate met in special session for the purpose of considering the annexation treaty pending in the United States senate. It was believed that favorable action on the treaty by the Hawaiian senate would have a good effect upon the American senate. The question of ratification came up on the 10th of September and the treaty was promptly ratified by a unanimous vote. A press report from Honolulu under the date of Sept. 14, 1897, says:

"From the time in 1893 when the queen was dethroned there has been no subject on which there was more unanimity and there has been no body with more of the feeling than the senate.

"When the session was called there was a feeling that there might be some objection on the part of some members who did not like the form of the treaty.

"It was so thoroughly discussed at the meeting of the members of the upper body that from the first time when it was known the government was to put all its power behind the treaty it was recognized that it was best to have a great majority.

"There was an explanation by Minister Hatch, a member of the body, and by the commissioners at Washington, Messrs. Castle and Kinney. But these were not necessary for the action of the body.

"The meeting at which the ratification of the treaty took place was the most largely attended of any in the history of the government, not excepting the trying time of revolution.

"There were always in the senate chamber large crowds of the best people of the islands, for the call for an extra session was made the call likewise for an assembling at the capital of the leading people from all the islands, and the social side of the republic was at its best.

"Many members of the lower house were in attendance, for though they were not to do with treaties most of them were elected with the understanding that they were an-

nationists, and the proceedings interested them as much as they did the principal actors in the drama of annexation.

"As soon as the fact was made known that the senate had agreed to the ratification there was great enthusiasm all through the city. It had been promised to make the oc-

casion the excuse for the most elaborate ceremonies that have been carried out since the republic came into power.

"There was nothing lacking to the appropriate celebration and the people joined in the ceremonies and jollification as freely as the most ardent of the republicans."

## THE CUBAN REVOLT.

Narrative of events in the great uprising from Nov. 1, 1896, to Nov. 1, 1897.

The record of events in the Cuban rebellion in the Daily News Almanac for 1897 was brought down to Nov. 1, 1896.

The cause of the patriots was never brighter since the rebellion began than it was on the 1st of November, 1896. Notwithstanding the hopes of Spain that Gen. Weyler would accomplish what he had done nothing, Havana was stricken with fear and the cabinet at Madrid began to lose confidence. More than 200,000 troops had been sent to Cuba, tens of thousands had died and on the date given fifty-six hospitals contained 13,650 sick Spanish soldiers. Fear of the intervention of the United States caused the government of Spain to urge upon Gen. Weyler greater activity in suppressing the rebellion and he was ordered to take the field in person. In obedience to such command he, with his staff, sailed from Havana on the 6th of November for Mariel, the northern terminus of the trocha. The object of the campaign was to do something to break the prestige of Gen. Maceo, the Cuban general. Gen. Weyler had under his command three brigades besides three other bodies of troops and the intention was to surround Maceo in the Rubi hills and crush him. From the hilltops the insurgent riflemen harassed the main column, retreating as it advanced and constantly eluding the Spanish troops. The whole campaign on Weyler's part was a dismal failure and he returned to Havana Nov. 23, reporting that the forces of Maceo had been scattered and their food supplies destroyed. This did not satisfy the Spanish government. On the 27th of November Weyler returned to Pinar del Rio province, but to the end of the year he accomplished nothing except to drive the people of the country into the cities and devastate portions of the country.

The most disastrous event of the year for the Cubans was the death on the 7th of December, 1896, of Gen. Maceo, who was second in command of the Cuban army. Many different stories were told as to the manner of his death and many contradictory reports were published on both sides. The account given by Andre Hernandez of the Cuban cavalry, who was one of Maceo's companions in arms, is believed to be the most authentic. He says: "It was on Dec. 7 that we suffered a great misfortune in the tragic death (by ambush) of our leader Maceo. We were encamped near the fight that day, and heard the firing. Maceo came across the trocha, unknown to us, with but forty men. More than 1,500 Spaniards, who had been informed of his trip, ambushed him. He rode into the ambush and was shot at the first firing. We heard the volley, and thinking that some of our friends were attacked by the Spanish guerrillas started off at once to their aid, though we had but 400 men. When we reached the scene of the slaughter it was mostly over, and then we were told that Maceo was dead and that the enemy had his body tied to a horse's tail and were taking it off. Our men were perfectly frantic over the report and begged to be led against the Spaniards. We dashed forward with drawn machetes, and what a fight that was!

"The Spaniards met us and the encounter was horrible. Our men fought to kill; only bent on avenging Maceo. Our trusty and sharp machetes fell with regularity, and I think we killed more than 200 of the enemy;

and, what is more, we had the consolation of recovering the body of our beloved leader, Maceo. The Spaniards fought hard again to regain it, charging upon us repeatedly, but our sharp machetes were too much for them and they sullenly retreated.

"We buried the body in a secret and secure place. Only myself and a few selected men and officers know the location. In due time it will be marked. If known now, the murderous Spaniards would try to get it and parade it as showing their great triumph. Poor Maceo sleeps in peace, but his brothers remain to avenge him, and that they are doing daily."

The year 1897 opened with a good deal of vigor in military operations. On the 4th of January a battle took place at Tapeato, near Havana, between a force of 2,000 insurgents and a smaller body of Spaniards. The latter were on the point of retreating when they were re-enforced by a column under command of Col. Aguilera, which turned the tide of battle against the Cubans and they were forced to retreat, leaving forty dead on the field. A severe engagement took place at Gabunqueto Jan. 13 between the Cubans under Gen. Garcia and the Spaniards under Gen. Segura. The attack was made by Gen. Segura upon the rebels in strong intrenchments. The Spanish forces were utterly routed, Segura being unable to rally his men to meet the deadly fire of the Cuban rifles and Hotchkiss guns.

Jan. 17 the insurgents attacked some Spanish gunboats in the Cauto river. Two of them were sunk by torpedoes and the royalists lost a large number of men. In the latter part of January an attempt was made by the insurgents to capture Gen. Weyler. He was en route for Gopaste, having destroyed the village of Quatro Caminos. When near his destination a party was sent forward to reconnoiter. A small force of insurgents had concealed themselves in a house to effect the capture and were to be signaled when to make the attack. A gun was accidentally discharged, which put the royalist scouts on their guard, and the plans of the rebels failed. Gen. Weyler returned to Havana March 4. No change in the military situation was effected by his visit to the provinces of Matanzas and Santa Clara.

March 28 the Spanish captured Gen. Rivera, who was at Cabesadas in the province of Pinar del Rio with a small force of about 100 men. Since his capture he has been a prisoner of war and his fate has not as yet been decided. Nothing of importance was done during April, but on the 12th of May the Spanish forces met with a serious disaster. The royalists had used every possible effort to retain possession of the town of Bayamos. On that day a royalist brigade under command of Gen. Lonois set out to escort a mule train bearing provisions from Manzanillo. While en route the train was attacked by forces under Garcia and Rabi and captured and the brigade of Lonois utterly routed. The Spanish lost 5,000 men, besides large quantities of provisions and military supplies. During May the rebels attacked the port of Baracoa and were defeated, and later they were repulsed in an attack on Fort Lama.

June 21 Gen. Weyler left Havana for Sagua la Grande, from which place he had planned a campaign into the province of Santiago. He had thirty-six battalions of

infantry and a strong force of cavalry and artillery. To counteract this movement the rebels marched a strong force into Havana province and were attacked by Aguilera at Sierra de Grito. The fighting was vigorous but the rebels were forced to retreat with considerable losses. Gen. Weyler reached Santiago June 27. He made an address to the people in which he claimed to be desirous of peace. He said in closing his speech: "I come to bring peace or war. If the former is accepted we will return to the law. But if the latter is desired, behind me come forty battalions of troops."

July 3 Gen. Weyler ceased active movements on account of the beginning of the rainy season and offered full pardon to all who would surrender. The insurgents continued aggressive movements and engaged in many raids and skirmishes. Insurgent Leader Lacret crossed the Jucaro Morán trocha and joined Gomez in the Cacatalles hills. The insurgents concentrated their forces in Matanzas, stopping all traffic on the railroads in Matanzas and Santa Clara provinces. Capt.-Gen. Weyler ordered troops to the front and in the meantime the rebels entered Marianado, a suburb of Havana, securing \$15,000 worth of goods.

Aug. 7 Gomez, while on his way toward Havana, met a large force of Spanish under Weyler, who were routed at Matanzas in a severe conflict, and many were killed and wounded.

The insurgents planned to capture Weyler on his way back to Havana, the encounter taking place near Aguacate. Gen. Castillo commanded the insurgents, Gen. Molina and Col. Aldea commanding the Spanish. Both Spanish officers were wounded. The Spanish fell back upon Guanabacoa. Five miles from Guanabacoa Gen. Weyler was attacked by a rebel force under Gen. Rodriguez. Weyler, refusing to fight, continued on into town with 300 head of cattle he had collected on the way.

Gen. Weyler on the 14th of August tendered his resignation because of the death of Canovas, the Spanish premier. He was requested to remain until his successor was appointed.

Weyler checked the rebel advances to the west by drawing his troops from other sources into Havana province, and left Havana for the inspection of forts and returned upon receipt of important dispatches from Madrid. Gen. Lee left Cuba for New York on the 4th of September. A battle occurred between the Spanish forces and the Cuban general, Rodriguez, while the latter was transporting medicines and ammunition from Mariel in Pinar del Rio, both sides losing heavily.

On Sept. 10 Victoria de las Tunas surrendered to the rebels, an exchange of prisoners was effected, being the first exchange during the war. The Spanish, assisted by warships, destroyed the towns of Tasajeras and Bijara.

A severe fight took place between insurgents under Savon and the Spanish column at Cardoba, in Santiago de Cuba; about fifty were killed and wounded on each side.

Col. Acosta, who commanded the Cuban forces when they raided the city of Marianao, was taken sick and safely arrived in Mexico through Havana. His command was taken by Castillo. On Sept. 24 the insurgents attacked Socorro and were repulsed, the Spanish commander of the town being killed. The Cubans lost munitions of war through the treachery of Dr. Louis Mayolini. Ramon Rios, brother of Salvador Rios

was reported killed at the Tronquillidad plantation in Santiago de Cuba.

In October Gen. Blanco was appointed to succeed Gen. Weyler. He arrived in Havana the last of the month.

At once on assuming the office of captain-general Gen. Blanco issued the following proclamation:

"To the Inhabitants of the Island of Cuba: I have come to you again with as much sincerity and good-will as ever. I will feel happy if when I depart this time I leave behind me the pleasant recollection of having brought you peace, security and the improvement of your interests, which are to me dearer than my own.

"The government of our nation on honoring me with the supreme command of this island has also intrusted me with the carrying out of the political and administrative reforms which constitute the programme of the government. These reforms, at the same time that they will give to the country a government by itself, will insure in it the sovereignty of Spain and will serve as a basis for the political concert of all its elements.

"As a faithful interpreter of the will and the purposes of her majesty the queen and her responsible government it is my purpose to follow a broad policy of expansion, of generosity and of forgiveness, tending to re-establish through liberality fraternity among all the inhabitants of the country and to cement their adhesion to the mother country, not only through their filial duties but also through their gratitude for the benefits they will receive.

"It is hardly worth while for me to assure you, for you all know me well, that I shall not spare effort or sacrifice in order to deserve well the trust which has been placed in me by the government, applying and developing faithfully the new policy which has for its chief aim an effort to bring about peace, to render justice to all to make a way and open a place for every legitimate interest, and to direct the energies of the country toward the re-establishment of wealth and the insurance of prosperity.

"I hope in my heart that, persuaded of the sentiment which the mother country has for the most favored of her daughters, you will all flock around her flag without any distraction as to parties or origin, in order to fight and drive from its soil those who are now making it red with blood.

"While those who remain within the law will find security and protection in their homes, I will, painful as it may be to me, punish with all the energy and harshness of the force of arms those who ungratefully or obstinately should pretend to perpetuate the horrors of war in this rich and fertile soil which Spain discovered and raised to the greatest level of prosperity which any country ever attained, and whose peace and welfare it feels compelled to maintain at all cost.

"Soldiers, marines and volunteers: Upon assuming command of the army I comply with a sense of justice in paying a tribute of admiration to you for your distinguished behavior during two years of rude campaigning in a country which has been sprinkled with the blood of so many heroes. You have defended the integrity of the Spanish fatherland, fighting with your proverbial courage and exemplary discipline the infamous insurrection which is devastating this fertile and hospitable country.

"I trust to see this insurrection crushed and subdued, thanks to your heroic efforts and the support of the country at large.

which will not hesitate to place itself at our side in order to combat those illusionists who, amid ruin, tears and blood, aspire only to the complete destruction of the country, sinking its unfortunate inhabitants in sadness and ruin for no other compensation than that of renouncing their history and race or that of selling their country to foreigners.

"Let there be war, then, to the implacable enemies of the Spanish people and protection to all those who take shelter under the flag of Spain. Let us once for all end this rebellion which is impoverishing and dishonoring us.

"I trust, as does the government, to see soon fulfilled our purposes, which are the will of our august queen regent. You will then be worthy of the gratitude of the fatherland and of your captain-general.

"Soldiers, marines, volunteers and firemen: Viva Espana! Long live the king and long live the queen!" KATHOS BLASCO.

On the 4th of November, 1897, the Cuban presidential election was held at Guaymilla, Puerto Principe, and the representatives of all the six states into which the island has been divided were present. The Cuban assembly, or congress, was convened there by former President Cienfuegos, and, after reviewing and amending the constitution and approving the acts of the retiring government, these officers were elected:

President, Gen. Bartolome Masso; vice-president, Mendez Capote; secretary of war, Brigadier Aloman; secretary of state, Foute Sterling; secretary of foreign affairs, Monreno Delatoro; secretary of the interior, Dr. Manuel R. Silva; commander-in-chief of the army, Gen. Maximo Gomez; inspector-general, Carlos Roloff.

The official Spanish gazette, published at Madrid, Spain, in its issue of Nov. 29 gave the royal decrees granting autonomy to Cuba and Puerto Rico, previously adopted by the Spanish cabinet. The following is a synopsis of the document:

Article 1 explains the principles of the governments of the two islands.

Art. 2 decrees that the government of each island shall be composed of a parliament, divided into two chambers, while a governor-general, representing the home government, shall exercise in its name the supreme authority.

Art. 3 declares that the faculty of making laws on colonial affairs rests with the colonial parliament and the governor-general.

Art. 4 directs that the colonial representatives shall be composed of two corporations, with equal power—a chamber of representatives and a council of administration.

Art. 5 provides that the council of administration shall consist of thirty-five members, of whom eighteen shall be elected and seventeen nominated by the home government.

Almost simultaneously with the formal promulgation of the new Spanish scheme of Cuban autonomy in Madrid and Havana the people of Havana were aroused by the news of positive military orders by Gen. Gomez and Gen. Garcia to the effect that any Cuban who listens to the autonomy proposals will be treated as a traitor and that any Spanish agent coming to confer about them will be killed as a spy. Gen. Gomez' order is as follows:

"Headquarters of the General-in-Chief of the Cuban army, Sancti Spiritus, Nov. 15, 1897. Third Year of the Independence:

"The news I have received of the establishment of autonomy in Cuba by the Spanish government compels me to remind the

military and civil leaders of the revolution once more that our only aim is independence."

Then the orders just mentioned are declared. Gen. Garcia in his orders explains:

"The only channel through which proposals of peace from Spain can be made to the Cubans, according to our constitution, is the supreme government of the republic, and even in this case that these proposals shall only be on a basis of independence. Any agent sent to propose to the Cubans submission to Spain shall be tried and punished as a spy."

The same resolute spirit was shown against autonomy by Capote, the president of the new Cuban assembly. He signed a proclamation issued at the recent meeting of the assembly. It is addressed by the "representatives of the Cuban people to all those who have the independence and future welfare of Cuba at heart," and says:

"No special laws, no political reform, or autonomy—nothing, in short, that the Spanish government may be willing to grant, that may mean Spanish sovereignty over Cuba—shall be accepted by the Cubans as a settlement of the war. Independence or death is and shall be the unalterable and sacred motto of the Cubans.

"The Cubans have not resorted to arms in order to obtain any political measure which does not once and for all solve the Cuban question. That is the reason we will accept nothing short of absolute independence.

"It is our purpose to constitute a separate, independent state, orderly, prosperous and happy, over the ruins of a worn-out colony.

"We are firmly determined to carry on the war until victory or death crowns our efforts."

#### ACTION OF THE UNITED STATES.

The strong feeling of sympathy in the United States for the Cuban rebels made itself felt in congress and an effort was made in the senate to force the government to recognize the belligerent rights of the Cuban patriots. On the 9th of December, 1896, Senator Mills of Texas introduced a resolution directing the president to take military possession of the island of Cuba. Senator Call of Florida offered a resolution which provided for "recognizing the republic of Cuba as a free and independent government and extending to the people of Cuba all the rights of a free and independent government in the ports and within the jurisdiction of the United States."

Senator Cameron of Pennsylvania offered a resolution which, being amended, provided "that the independence of the republic of Cuba be and the same is hereby acknowledged by the United States of America; that the United States will use its friendly offices with the government of Spain to bring to a close the war between Spain and Cuba." Dec. 10, 1896, Senator Cullom of Illinois offered a resolution which declared that "the extinction of Spanish title and the termination of Spanish control of the islands at the gateway of the Gulf of Mexico are necessary to the welfare of those islands and to the people of the United States."

All these resolutions were referred to the senate committee on foreign affairs, which reported in favor of the Cameron resolution. The president opposed taking any positive action in the matter and it was understood that he would veto any of the resolutions should they pass. The friends of the various measures believed that there

were votes enough in congress favorable to the Cubans to pass such resolutions as might receive the senate's indorsement over the president's veto. The fear that the adoption of the resolutions would involve the country in a war with Spain aroused the business men of the country to oppose them and meetings were held in Boston, St. Louis, Baltimore and Vicksburg in opposition to their passage. The secretary of state, Mr. Olney, made a public declaration in which he said that "the power to recognize the so-called republic of Cuba as an independent state rests exclusively with the president," and that if the Cameron resolution passed both houses of congress it would be merely "an expression of opinion by the eminent gentlemen who might vote for it." This raised a grave constitutional question and Senator Davis of Minnesota replied to Mr. Olney disputing his claim that the right to recognize the independence of Cuba rested exclusively with the president. The senate did not, however, force the issue on the constitutional question raised by the secretary of state. It became evident as time passed that the resolution could not pass the house and in January (5th, 1897) it was announced that the senate had decided not to pass the resolution offered by Mr. Cameron. There seemed to be a willingness to leave the whole subject to the incoming administration. The next congress (LVth) met in extra session March 15, 1897.

The country had become excited by the death of Ricardo Ruiz, a physician residing in Guanabacoa in Cuba, who was a naturalized citizen of the United States. He died in prison and under circumstances so suspicious that his friends charged that he had been murdered by the Spanish authorities. So good a case was made out that in February, 1897, the secretary of state instructed the American minister at Madrid to demand of the Spanish government a thorough investigation of the case. Little satisfaction was given by Spain, and in the latter part of April W. J. Calhoun of Illinois was appointed by the president a special counsel to Consul-General Lee to go to Cuba and investigate the circumstances of the death of Dr. Ruiz. Consul-General Lee in his official report says that Dr. Ruiz was at the home of a friend at the time of the attack on the railroad train in which he was said to be implicated; that his confinement in prison was in violation of law; that his trial by court-martial was a violation of his rights as an American citizen; that he was denied communication with his family and friends; and that although he was a strong, robust man he was, after being under arrest 315 hours, taken from his cell a corpse. Consul-General Lee in his report says:

"He [Dr. Ruiz] died from congestion of the brain produced by a blow on the top of the head.

"There are two theories connected with the wound on the head. One, that in a state of mental excitement he ran across the cell, as described by one of the jailers, and butted his head on the door in a frantic effort to get out. Another, that he was struck over the head with one of the clubs carried by the jailers—by the immediate watchman, who had probably ordered him to cease his cries for relief and for his children, and upon his not doing so struck him with more force than he intended; or it is possible the blow was delivered to make him confess or give evidence against others.

"It is possible he went mad, and many

causes combined to produce such a result. \* \* \* But whether from bereft of reason he inflicted the blows which produced brain congestion, or whether he died at the hands of others—the truth will probably only be known when the hearts of all are revealed—the fact remains, his unjust confinement killed him; and, had he been released from incommunicado by the hand of man at the end of seventy-two hours, the hand of death might not have released him at the end of 315 hours, and to-day the widow would have the support of her husband and the moans of his fatherless children would never have been heard in the land.

"I therefore conclude, saying, as I have done in all previous reports about this case, that whether Dr. Ruiz killed himself or was killed by some one else will, under the existing conditions, always remain unknown."

Mr. Mahany of New York offered a resolution in the house directing the secretary of state to "represent to the Spanish government the profound sense of satisfaction with which the people of the United States would view the extension of clemency as regards the remission of the death penalty in the case of General Ruiz Rivera." On the 1st of April Senator Allen of Nebraska offered a resolution protesting against the alleged purpose of the Spanish authorities to try Gen. Rivera by summary court-martial, which passed April 5. A few days later Secretary Sherman made a statement that the Spanish government had given the assurance that Gen. Rivera would not be executed but would be treated as a prisoner of war.

On the 17th of May the president sent the following message to congress:

"To the Senate and House of Representatives of the United States: Official information from our consuls in Cuba establishes the fact that a large number of American citizens in the island are in a state of destitution, suffering for want of food and medicines. This applies particularly to the rural districts of the central and eastern parts.

"The agricultural classes have been forced from their farms into the nearest towns, where they are without work or money. The local authorities of the several towns, however kindly disposed, are unable to relieve the needs of their own people and are altogether powerless to help our citizens.

"The latest report of Consul-General Lee estimates 600 to 800 Americans are without means of support. I have assured him that provision would be made at once to relieve them. To that end I recommend that congress make an appropriation of not less than \$50,000, to be immediately available for use under the direction of the secretary of state.

"It is desirable that a part of the sum which may be appropriated by congress should, in the discretion of the secretary of state, be used for the transportation of American citizens who, desiring to return to the United States, are without means to do so.

"WILLIAM McKINLEY.

"Executive Mansion, May 17, 1897."

On the same day Senator Davis introduced the following resolution:

"Resolved, By the senate and house of representatives of the United States in congress assembled, That the sum of \$50,000 be and the same is hereby appropriated out of any money in the treasury not otherwise appropriated, for the relief of destitute citizens of the United States in the island

of Cuba, said money to be expended at the discretion and under the direction of the president of the United States in the purchase and furnishing of food, clothing and medicine to such citizens and for transporting to the United States such of them as so desire and who are without means to transport themselves."

This passed the senate without objection. It passed the house and was signed by the president May 24.

On the 20th of May the senate passed by a vote of 41 to 14 a resolution introduced by Senator Morgan, which was as follows:

"Resolved, That a condition of public war exists between the government of Spain and the government proclaimed and for some time maintained by force of arms by the people of Cuba, and that the United States of America shall maintain a strict neutrality between the two contending powers, according to each all the rights of belligerents in the ports and territory of the United States."

The following gives the vote in the senate on the resolution:

## THE MISSISSIPPI RIVER COMMISSION.

The Mississippi river commission is made up of Col. G. L. Gillespie, Lieut.-Col. Amos Stickney and Maj. T. H. Handbury, all of the engineer corps, U. S. A.; Henry L. Marinden of the United States coast survey; H. M. Harrod, president, and Henry Flad, past president of the American Society of Civil Engineers, and Judge H. S. Taylor of Fort Wayne, Ind. The commission advises the contraction of the river channel to 3,000 feet in width by the building of low dikes extending from the shores, and the result of the experiments made at Lake Providence and Plum point about fifteen years ago seem to warrant the conclusion arrived at, though the failure of appropriations prevented the completion of the work at these points. In 1896 the commission made some estimates of the probable cost of the revetment of the river banks. Earlier experiments put the cost at \$12 per linear foot, but they now estimate that it will cost \$30, or about \$150,000 per mile. Though the river is 950 miles long from Cairo to New Orleans, and two banks must be considered, the commission believes that not over 600 miles of the river will need revetment, and that the total cost will be somewhere between \$63,000,000 and \$100,000,000, and that the maintenance of the work will cost 10 per cent additional. The

execution of this work will probably extend over forty years, as the present available annual supply of material for wicker mattresses is only sufficient for the construction of fifteen miles. The chief purpose of levee construction is now admitted to be the protection of the population and the agricultural interests, and of late years from one-half to three-fifths of the \$2,000,000 to \$3,000,000 annually expended by the commission is devoted to this purpose. The states of Missouri, Arkansas, Tennessee, Mississippi and Louisiana have expended large sums in levee building and maintenance in the last fifty years, and in combination with the national government about \$55,000,000 has been spent upon these works. In 1896 the commission estimated that \$18,000,000 was needed to complete the system, by cutting off outlets a larger proportion of the river is now kept between the banks, and the highest flood level of 1897 was 5 feet, in places, above the floods of the last twenty years. With all contemplated improvements completed it is estimated that the maximum flood level will be 3 feet higher than it was in 1897, and this raising of flood level must be provided for in the levee construction.

\*Includes scattering, blank and defective votes.

In calculating pluralities in this and the following tables the Bryan-Sewall, the Bryan-Watson and the middle-of-the-road votes are combined for the Bryan vote. There was fusion on the electoral ticket of the democrats and populists, and in some states silver republicans. In the following states: Arkansas, California, Colorado, Connecticut, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Missouri, Montana, Nebraska, New Jersey, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota, Utah, Washington, West Virginia, Wisconsin and Wyoming. In some of the states, like Illinois and Kansas, there were Bryan-Watson tickets run by the middle-of-the-road populists.

It has been impossible to separate the populist from the democratic vote in the states in which there was a fusion of those parties. In some of the states, like Illinois, in which the two parties voted for the same electors, but upon separate tickets, county officers, in making returns to the secretaries of state, have combined the votes on electors and it is impossible to say how the vote should be divided. In such cases the vote classed under the head "Bryan-Watson" is no indication of the strength of the people's party, while at the same time it gives too large a vote to the democrats. There is no way of giving, even approximately, the vote of the two parties on presidential electors.

The certificate of the vote of Charlton county was lost and the vote was not included in the official canvass.

For governor in 1896 W. T. Atkinson, Dem., received 120,827; Seaborn Wright, Pop., 53,832; Atkinson's majority, 34,995.

For secretary of state A. D. Candler, Dem., received 132,184; J. A. Parsons, Pop., 76,453; Candler's majority, 55,731.

Other candidates for state offices received substantially the same vote as that cast for secretary of state.

#### VOTE FOR GOVERNOR, 1896.

Total vote.....	544786								422458	

\*The vote was for McKinley and Hobart electors, Bryan and Sewall electors, Bryan and Watson electors, Palmer and Buckner electors and Levering and Johnson electors.

†Three state tickets were voted—headed respectively by Charles A. Culberson, Dem., Jerome C. Kearby, Pop.-Rep., and Randolph Clark, Pro., for governor. Fusion was not generally regarded by the populists and republicans, many thousand colored voters supporting Culberson on account of dissatisfaction with the school provision in the platform of the populists who nominated Kearby.

‡Two republican electoral tickets were voted—the "regular" and the "lily white." In 1886 Palmer, Nat. Dem., received 5046 and Levering, Pro., 1736 votes for president. Counties for which no returns are given are unorganized and held no elections.

#### OTHER STATE OFFICERS ELECTED, 1896

Lieut.-Gov.—George T. Jester, Dem.  
 Attorney-General—M. M. Crane, Dem.  
 Comptroller—R. W. Finley, Dem.  
 Treasurer—W. B. Wortham, Dem.  
 Land Commissioner—A. J. Baker, Dem.  
 Superintendent of Public Instruction—J. M. Carlisle, Dem.  
 Associate Justice Supreme Court—Leroy G. Denman, Dem.  
 Judge Court of Criminal Appeals—W. L. Davidson, Dem.  
 Railroad Commissioners—John H. Reagan, L. J. Storey, Allison Mayfield, all Dem.

#### REPRESENTATIVES IN CONGRESS, 1896.

1. The counties of Chambers, Freestone, Grimes, Harris, Leon, Madison, Montgomery, Trinity, Walker and Waller.

T. H. Hall, Dem..... 19,161  
 J. H. Eagle, Pop.-Rep..... 15,169  
 A. C. Tompkins (scattering)..... 153

2. The counties of Anderson, Angelina, Cherokee, Harbison, Harrison, Houston, Jasper, Jefferson, Liberty, Nacogdoches, Newton, Orange, Panola, Polk, Sabine, St. Augustine, San Jacinto, Shelby, Tyler.

S. R. Cooper, Dem..... 25,196  
 B. A. Calhoun, Rep..... 12,822  
 J. M. Calaborne, Rep..... 5,168

3. The counties of Gregg, Henderson, Hunt, Rains, Rockwall, Rusk, Smith, Upshur, Van Zandt and Wood.

R. C. De Graffenreid, Dem..... 21,206  
 W. E. Farmer, Pop..... 16,351

4. The counties of Bowie, Camp, Cass, Delta, Franklin, Hopkins, Lamar, Marion, Morris, Red River and Titus.

J. W. Cranford, Dem..... 20,187  
 J. H. Davis, Pop..... 13,703  
 M. W. Johnson, Dem..... 3,468

5. The counties of Collin, Cooke, Denton, Fannin, Grayson and Montague.

J. W. Bailey, Dem..... 28,416  
 W. D. Gordon, Rep..... 9,050  
 R. C. Foster, Dem..... 4,747

6. The counties of Bosque, Dallas, Ellis, Hill, Johnson, Kaufman and Navarro.

R. E. Burke, Dem..... 33,144  
 Barnett Gibbs, Pop..... 25,230

7. The counties of Bell, Brazos, Falls, Limestone, McLennan, Milam and Robertson.

Robert L. Henry, Dem..... 26,151  
 T. A. Pope, Rep..... 11,632  
 W. F. Douthitt, Pop..... 9,634

8. The counties of Brown, Coleman, Comanche, Coryell, Erath, Hamilton, Hood, Lampasas, Mills, Parker, Runnels, Somervell and Tarrant.

S. W. T. Lanham, Dem..... 20,935

## Events of the Year 1897.

## DOMESTIC.

## JANUARY.

2. Senator Wolcott sailed from New York for England to confer with the Europeans upon the subject of an international bimetallic monetary conference.
3. Severe storms swept through parts of Texas, Arkansas, Louisiana, Missouri and parts of Oklahoma, destroying many lives and much valuable property.
4. The Mississippi river rose 15½ feet at St. Louis.
8. The striking miners at Rutland, Ill., indulged in a riot. They had been on a strike for nearly two months, alleging unjust weights.
9. Troops are employed to hold the striking miners at Ottawa, Ill., in check.
13. Heavy snowstorms prevailed in many parts of the west.
16. Sixteen children were burned to death in a fire that destroyed the Buckner orphan asylum at Dallas, Tex.
18. The United States Supreme court decided that the South Carolina dispensary liquor law was unconstitutional. Severe storms prevailed in many parts of the west.
19. Portland, Mich., was flooded in consequence of an ice gorge in the river.
21. Gov. Leedy of Kansas pardoned H. C. Wilmoth, who had wives in eleven cities and towns.
23. A severe blizzard raged through Iowa, Nebraska and Kansas, the weather being severely cold. Ex-Queen Lilliulokani arrived in Washington.
25. Intensely cold weather very general throughout the entire country.
28. Snowstorm throughout New England unusually heavy, all sections reporting a depth of snow varying from fifteen to thirty-four inches on the level and drifts from five to ten feet high.
30. A treaty for the settlement of the Alaskan boundary line was signed in Washington between the secretary of state and the British ambassador.

## FEBRUARY.

2. The treaty for arbitration of the boundary dispute between Venezuela and Great Britain was signed at Washington.
3. The government practically completed the terms of the purchase of Fisher's island and a part of Plum island in Long Island sound for coast defense purposes.
11. President Cleveland's last formal reception was given at the white house to the army, navy and marine corps.
14. Joseph A. Isagi, Turkish consul at Boston, was arrested at New York, charged with embezzlement.
17. By a decision of the secretary of the interior the great tract of swamp land in Florida known as the Everglades, and comprising about 2,242,800 acres, was conveyed to the state of Florida. About 2,000 tanners and curriers in Chicago went on a strike.
22. The president issued thirteen executive orders establishing many additional forest reservations, embracing in the aggregate 21,397,940 acres. Floods were reported in the Ohio river.
23. Floods were general in western Maryland, Virginia, West Virginia, Pennsylvania, Kentucky, Tennessee and southern Ohio.

24. A bill making all contracts payable in gold noncollectible and void passed both houses of the Oklahoma legislature. Senator Wolcott left London for the United States.
27. The clothing house of Willoughby, Hill & Co. of Chicago failed.
28. A fire in Fort Wayne, Ind., caused the loss of \$150,000 worth of property.

## MARCH.

1. President-Elect McKinley left his home for Washington.
3. Thirty members of the Idaho legislature sent a telegram to the vice-president protesting against the swearing in of Mr. Heltfeld as United States senator from that state. John Corwine, naval paymaster, charged with embezzlement, was arrested in Chicago.
4. William McKinley was inaugurated as president of the United States. An explosion in a Boston subway killed eight and injured thirty persons. Senator Wolcott arrived in New York from England.
5. A fire in Worcester, Mass., caused the loss of \$300,000 worth of property. A grain elevator burned in Peoria, causing a loss of \$500,000.
8. Capt. John D. Hart was sentenced to two years' imprisonment and a fine of \$500 at Philadelphia for engaging in a filibustering expedition to Cuba.
10. A washout on the Evansville & Terre Haute railroad near Hazleton caused a train wreck that killed seven persons. The mine workers' strike at Leadville, Col., which began June 19, was called off, the mine-owners acceding to the demands of the men.
12. Beginning of the great floods on the Mississippi and other rivers.
13. A passenger train on the Southern railroad was wrecked near Rome, Ga., and four train hands were fatally injured.
14. The Mississippi river at Memphis was higher than it had been in twenty-five years and many towns in Arkansas were submerged.
15. Meeting of the extra session of congress.
17. Charges of wholesale corruption were made in the Iowa legislature and Speaker Byers resigned pending an investigation. Washington Heising, postmaster of Chicago, resigned to begin a campaign for the mayoralty of the city.
18. Sixty-four persons were lost in the wreck of the St. Nazaire off Cape Hatteras.

22. Cuba rejects Spain's offer of autonomy.
24. The members of the lower house of the Austrian reichsrath indulged in a riot.
26. The German government made a demand upon China for 600,000 taels as an indemnity for outrages on German citizens.
28. The Austrian cabinet resigned, owing to differences between the Austrian and Hungarian divisions of the empire.
29. Serious riots in Prague, which were suppressed by the soldiers.
30. An imperial edict in Russia directed the coinage and issue of five-ruble pieces in gold equal in value to one-third of the imperial ruble.

## DECEMBER.

1. A revolt began in Albania against the Turks, from 5,000 to 10,000 persons being involved.
2. The Albanian insurgents captured the village of Guisla, compelling the Turkish garrison to surrender.
4. The definite treaty of peace between Turkey and Greece was signed.
5. Severe storms swept over Italy and twenty-five merchant vessels were wrecked in the Bay of Naples.
6. Two German naval vessels arrived at Port au Prince and demanded that the Haitian government pay the demand for an indemnity in the Lueders case within eight hours, which demand was complied with.
7. In a prize fight in England between Walter Croot and James Barry the former was killed by a knockout blow.
13. Gen. Weyler reached Madrid and met a reception in which he was warmly welcomed back to Spain. It was announced that Gen. Sanguilly, a citizen of the United States, had offered his services unconditionally to Gen. Gomez.

## NOVEMBER.

3. Joseph Chamberlain installed lord rector of the University of Glasgow.
4. The Schwarz aluminum airship, fitted with a motor operated by benzine, was tested at Berlin, but after reaching an elevation of 1,000 feet it became unmanageable.
5. In an attempt upon the life of the president of Brazil his brother was seriously wounded and the minister of war was killed.

## CHANGES IN ACREAGE OF PRINCIPAL CROPS.

CROP.	1879.	1889.	Increase or decrease		CROP.	1879.	1889.	Increase or decrease	
	Acres.	Acres	Decrease.....	Acres.		Acres.	Acres.	Increase.....	Acres.
Corn.....	219.0	201.3	Decrease.....	17.4	Hay .....	107.6	149.1	Increase.....	40.5
Wheat.....	124.4	93.9	Decrease.....	30.5	Cotton.....	50.7	66.2	Increase.....	5.3
Oats.....	66.7	79.3	Increase.....	22.5					
Barley.....	7.0	9.0	Increase.....	2.0	Total area				
Rye.....	6.5	6.1	Decrease.....	.4	in these				
Buckwheat.....	3.0	2.4	Decrease.....	.6	products.	574.9	596.5	Net increase	21.6

It is thus shown that for every 1,000 acres of improved land in 1889 there were 48.9 fewer acres in corn, wheat, rye and buckwheat, and 70.5 more in oats, hay, barley and cotton, than for the corresponding area in 1879.

1894, "anchor nurse" barred. Cushion-carom game—Best run by Frank C. Ives at Boston, April 14, 1895, 83.

### Ocean Steamships.

The Kaiser Wilhelm der Grosse broke all records for a single day by covering 567 miles, Nov. 16, 1897, on a westward trip. The Cunarder Lucania still holds the record from Queenstown to New York—5d., 7h., 23m.; average speed per hour, 22.01 knots; greatest day's run, 5d. knots, or average speed per day, 23.57 miles; greatest day's run, 5d. miles. The Lucania also holds the record from New York to Queenstown—5d., 8h. and 48m. Both runs were made in 1894.

The best trips for 1895 are: Umbria—Fastest trip westward from Liverpool, 5d., 21h., 7m.; Etruria—Fastest trip eastward from New York, 6d., 40m. Both belong to the Cunard line.

### THE TRANSATLANTIC RECORD BY YEARS.

1819—Eastward, Savannah, 23d.  
1820—Westward, Great Western, 18d.  
1845—Westward, Britannia, 14d.  
1851—Westward, Persia, 9d. 20h.  
1852—Westward, Baltic, 9d., 19h.  
1856—Westward, Scotia, 8d., 2h., 48m.  
1860—Eastward, City of Brussels, 7d. 15h., 2m.  
1873—Eastward, Baltic, 7d., 20h., 9m.  
1875—Eastward, City of Berlin, 7d., 15h., 48m.  
1876—Westward, Germania, 7d., 11h., 31m.  
1877—Westward, Britannia, 7d., 19h., 53m.  
1879—Westward, Arizona, 7d., 9h., 23m.  
1882—Westward, Alaska, 6d., 22h., 10m.  
1883—Westward, Oregon, 6d., 19h., 10m.  
1884—Westward, America, 6d., 10h.  
1885—Westward, Etruria, 6d., 5h., 31m.  
1887—Westward, Umbria, 6d., 4h., 42m.  
1888—Westward, Etruria, 6d., 1h., 55m.  
1890—Westward, City of Paris, 5d., 21h., 7m.  
1890—Westward, City of Paris, 5d., 19h., 15m.  
1890—Westward, Teutonic, 5d., 19h., 5m.  
1891—Westward, Majestic, 5d., 18h., 8m.  
1891—Westward, Teutonic, 5d., 16h., 31m.  
1891—Eastward, Teutonic, 5d., 21h., 3m.  
1892—Eastward, City of New York, 5d., 19h., 57m.  
1892—Westward, City of Paris, 5d., 14h., 24m.  
1893—Westward, Lucania, 5d., 12h., 47m.  
1894—Eastward, Campania, 5d., 12h., 7m.  
1894—Westward, Lucania, 5d., 7h., 48m.  
1894—Westward, Lucania, 5d., 7h., 25m.  
1896—Westward, St. Paul, 6d., 31m.  
1897—Eastward, Kaiser Wilhelm der Grosse, 5d., 21h., 10m.  
1897—Westward, Kaiser Wilhelm der Grosse, 5d., 22h., 35m.

### Rowing.

Performances by amateurs are designated by an \*.

1 mile—\*0:57, Edwin Hedley, straightaway, Newark, N. J., July 19, 1891; \*1:19, single-scutt, straightaway, dead water, John F. Corbet, Iroquois Boat club, July 23, 1890.  
3 mile—\*1:37½, six-oared barge, straightaway, Iroquois Boat club, Lake Calumet, Pullman, Ill., May 30, 1890.  
1 mile—5:01, Ellis Ward, Savannah river, June 24, 1888.  
1½ miles—\*7:41, eight oars, straightaway, Atlanta Boat club, Lake Calumet, Pullman, Ill., Aug. 9, 1890. [The Cornell university crew rowed the distance in 7:30 at Philadelphia July 4, 1889, but the conditions were unfair, the current running very strong.] 8:01½, four oars, straightaway, Fairmount Rowing association, Albany, N. Y., July 21, 1886. [The Watkins crew rowed the distance in 7:49½ at Detroit, Mich., Aug. 15, 1887, but the current was very strong.] \*7:58, double scull, straightaway, J. Buckley and W. O'Connell, Portland Boat club, Lachine, Canada, Aug. 21, 1882. \*8:35, single scull, straightaway, Joseph

Laing, Lachine, Canada, Aug. 19, 1882. \*8:39½, four oars, turn, still water, Modoc Boat club, Salt Lake, Utah, Aug. 30, 1888. \*8:41, paired oars, straightaway, J. H. Clegg and F. D. Standish, Excelsior Boat club, Lachine, Canada, Aug. 19, 1882.

2 miles—\*9:49½, eight oars, straightaway, Columbia college crew, New London, Conn., June 25, 1889. \*12:18, double-scutt, turn, F. E. Yates and C. E. Courtney, Saratoga, N. Y., Aug. 8, 1876. \*12:20½, paired oars, straightaway, J. H. Riley and J. A. Kennedy, Greenwood lake, N. Y., Oct. 9, 1876. \*13:21½, single scull, turn, J. H. Riley, Saratoga, Aug. 9, 1876.

2½ miles—\*12:57, eight oars, straightaway, Yale university crew, New London, Conn., June 25, 1888.

3 miles—\*15:23, eight oars, straightaway, Yale university crew, New London, Conn., June 25, 1888. \*15:37½, four oars, straightaway, Argonaut R. A., Kill von Kull, N. J., Sept. 8, 1875. \*16:32½, six oars, straightaway, Amherst university, G. E. Brewer, B. L. Brown, L. Bradley, Jr., F. M. Wilkins, A. J. Benedict, W. Negley, Springfield, Mass., July 24, 1872. \*17:34½, eight oars, straightaway, Cornell university crew, Owasco lake, N. Y., July 17, 1878.

### RECORD OF AMERICA CUP RACES.

1851—Aug. 22, around the Isle of Wight: America, 10:37:00; Aurora second.  
1870—Aug. 8, New York Yacht club course: Magic, 3:58:21; Cambria, 4:37:58.  
1871—Oct. 16, New York Yacht club course: Columbia, 6:19:41; Livonia, 6:46:45. Oct. 18, 20 miles to windward of Sandy Hook and return: Columbia, 3:47:49½; Livonia, 3:18:15½. Columbia disabled in third race Oct. 19. Oct. 21, 20 miles to windward of Sandy Hook and return: Sappho, 5:25:02; Livonia, 6:09:23. Oct. 23, New York Yacht club course: Sappho, 4:16:17; Livonia, 5:11:55.  
1876—Aug. 11, New York Yacht club course: Madeleine, 5:23:54; Countess of Dufferin, 5:34:53. Aug. 12, 20 miles to windward of Sandy Hook and return: Madeleine, 7:18:46; Countess of Dufferin, 7:46:00.  
1881—Nov. 9, New York Yacht club course: Mischief, 4:17:00; Atalanta, 4:45:39½. Nov. 10, 16 miles to leeward of Sandy Hook and return: Mischief, 4:54:53; Atalanta, 5:33:47.  
1885—Sept. 14, New York Yacht club course: Puritan, 6:06:46; Genesta, 6:22:24. Sept. 16, 20 miles to leeward of Sandy Hook light and return: Puritan, 5:43:14; Genesta, 5:54:52.  
1886—Sept. 9, New York Yacht club course: Mayflower, 5:26:41; Galatea, 5:38:43. Sept. 11, 20 miles to leeward of Sandy Hook light and return: Mayflower, 6:49:10; Galatea, 7:18:00.  
1887—Sept. 27, New York Yacht club course: Volunteer, 4:58:18; Thistle, 5:12:41½. Sept. 30, 20 miles to windward of Scotland light and return: Volunteer, 5:12:56½; Thistle, 5:51:45.  
1893—Oct. 7, 15 miles to windward of Sandy Hook light and return: Vigilant, 4:03:47; Valkyrie, 4:11:35. Oct. 9, triangular 30-mile course, first leg to windward: Vigilant, 3:25:01; Valkyrie, 3:35:36. Oct. 13, 15 miles to windward of Sandy Hook light and return: Vigilant, 3:24:33; Valkyrie, 3:25:19.  
1895—Sept. 7, 15 miles to windward and return, east by south of Point Sanbright, N. J.: Defender, 4:57:56; Valkyrie III, 5:08:02. Sept. 11, triangular course, 10 miles in each leg: Valkyrie, 3:35:02; Defender, 3:55:36; won by Defender on a foul. Sept. 13, Defender sailed over course and claimed cup and race; claim allowed.

### YALE RACES AT HENLEY.

The Yale crew visited the Henley regatta during 1896, and on July 7 was defeated by the Leander crew. Yale's crew probably will make it an annual trip.

## Railroading.

All long-distance railway runs were broken in 1886 by both the Lake Shore and New York Central systems. The following table shows the best runs made in America and Europe. It can be seen that the best run was made by the Lake Shore:

	Lake Shore & Mich. South'rn	N. Y. Central & H. R.	West Coast Route.
	1885.	1885.	1885.
Date.....	Oct. 24.	Sept. 11.	Aug. 22-3
Number of cars.....	3	4	3
Weight of cars.....	304,500 lbs.	361,310 lbs.	150,080 lbs.
Starting point.....	100th st., Chicago.	New York.	London.
Finish.....	Buffalo Creek.	East Buffalo.	Aberdeen.
Total dist. in miles	510.1	438.32	539.75
Total time in minutes and seconds	481m. 3s.	411m. 56s.	512m.
Average speed in miles per hour.....	63.61	63.54	63.24
Total time in motion.....	470m. 20s.	407m. 41s.	505m.
Average speed, deducting stops.....	65.07	64.22	63.93
Length of fastest run on which fastest average speed was made.....	36 miles.	145.6 miles.	141.25 miles.
Average speed on said division....	72.92 miles.	65.75 miles.	67.50 miles.

Some of the remarkable features of the Lake Shore run are as follows:

1 mile at the rate of 92.30 miles per hour.  
8 miles (Ripley to Westfield) at the rate of 83.44 miles per hour.

33 miles (Moorehead to Van Buren) at the rate of 80.06 miles per hour.

Prior to this the best runs were as follows: May 9, 1883, the Empire State express on the New York Central & Hudson River railroad, consisting of engine 999, three coaches and a Wagner drawing-room car, made a run of 102 miles in 1h.

May 10, 1883, the same train ran 1 mile in 32s., a rate of 112 1/4 miles in 1h.

The "Exposition Flyer," an engine and four Wagner coaches, repeatedly made the run from New York to Chicago, 976 miles, in 30h. The record noted on May 10—a mile in 32s.—has been questioned by some railroad men. Oct. 14, 1887, a Holman locomotive in a trial near Cape May, N. J., made 56 1-10 miles in 55 minutes, including starting and stopping. A mile for time was recorded in 42s., and on the run it was claimed that two miles were made in 66s.

1 mile—37s., Philadelphia & Reading railroad, Nov. 20, 1882; engine had 64-foot drivers; train, one combination car, two day coaches and a Pullman car.

2 miles—1m. 15s., same train; second mile in 38s.

8 miles—1m. 54s., same train; third mile in 38s. 5 miles—8m. 25s., same train, five consecutive miles, an average of 87.8 miles an hour; this train also ran five miles on a section having a heavy grade in 4m., an average of 75 miles an hour.

1 mile—39 1-5s., Philadelphia & Reading railroad, Aug. 27, 1891; 504s. during run of special train from West Philadelphia to Jersey City, Sept. 4, 1872.

2.1 miles—1m. 30s., engine 366 and an ordinary day coach, P. & R. R. R., Yardley to Trenton Junction, N. J., March 10, 1890.

2.9 miles—2m., engine 3 s and an ordinary day coach, P. & R. R. R., Somerton to Nesboay Falls, N. J., March 10, 1890.

3.1 miles—2m., engine, two parlor cars and dining-room car, P. R. R., Aberdeen to Perryman's, N. J., March 10, 1890.

4.1 miles—3m., engine 366 and an ordinary day coach, P. & R. R. R., Skillman to Belle Mead, N. J., March 10, 1890.

6.1 miles—4m. 30s., engine 355 and an ordinary day coach, P. & R. R. R., Bethayres to Nesboay Falls, N. J., March 10, 1890.

10 miles—8m. 38s., Skillman to Weston, N. J., engine 368 and one ordinary day coach, P. & R. R. R., March 10, 18 0.

14 miles—11m., locomotive Hamilton Davis and six cars, N. Y. Central R. R., 1885.

18 miles—15m., special train conveying the duke of Wellington, Paddington to Slough, England.

27.1 miles—25m., special extra 963 and two cars, Pennsylvania R. R., Morrisville to Germantown Junction, Pa., May 6, 1885.

36.7 miles—34m., special extra 963 and two cars, Pennsylvania R. R., Rahway to Trenton, N. J., May 6, 1885.

44 miles—43m. 30s., special train conveying newspaper correspondents, last 1 1/4 miles in 14m., Washington Junction to Washington, D. C., June 10, 1834.

53 1/4 miles—47m., broad-gauge engine Great Britain, four carriages and vans, Paddington to Uldcot, England, May 11, 1848.

54.9 miles—49m. 30s., engine 300 and one ordinary day coach, P. & R. R. R., Wayne Junction, Pa., to Bound Brook, N. J., March 10, 1890.

59.2 miles—56m., engine 300 and one ordinary day coach, P. & R. R. R., Philadelphia (9th and Green streets) to Bound Brook, N. J., March 10, 1890.

89.4 miles—91m. (actual running time 85m.), special train, engine 366 and one ordinary day coach, P. & R. R. R., 9th and Green streets, Philadelphia, to Jersey City, N. J., March 10, 18 0.

90 miles—1h. 37m. (actual running time 90m.), special extra 163 and two cars, Pennsylvania R. R., Jersey City to Broad street station, Philadelphia, May 6, 1885; 1h. 47m., train 19, engine 733 and six cars, two regular stops, Jersey City, N. J., to Broad street, Philadelphia, Feb. 12, 1890.

111 miles—93m., Fontaine engine and two coaches, Amherstburg to St. Thomas, Canada, May 3, 1831; 100m., locomotive, baggage car, one coach and one Pullman passenger car, St. Thomas to Amherstburg, Sept. 12, 1877.

118 miles—120m., engine No. 10, special palace car; 17 miles (Welland to Victoria) in 14 1/4m.; St. Thomas to Victoria, Canada, 153 miles, Fontaine engine and two coaches, in 261m., May 5, 1881. The schedule time from London to Bristol, England, 118 1/4 miles, by the train known as "The Flying Dutchman," is 123m.

157.74 miles—165m., special train, Niagara Falls to Syracuse, N. Y., March 1, 1873. 158 miles in 178m., West Coast Flyer, London to Crewe, England, Aug. 6, 1888.

180.1 miles—188m., exclusive of stops (no time given including stops), Chicago & Northwestern, Clarence, Iowa, to West Fortieth street, Chicago, April 22, 1891.

228 miles—A Pennsylvania railway train consisting of one Pullman combination car, a parlor car and an observation car made the run from New York to Washington, Nov. 23, 1891, in 4h. 11m. The 11m. was consumed in stops and changing locomotives, making the actual running time 4h., an average of 57 miles an hour.

228.9 miles—4h, 18m., including stops, A. M. Palmer's special theater train, two parlor cars and a Pullman dining car, Pennsylvania R. R., Jersey City to Washington, D. C., March 10, 1890. Made return trip same day in 4h, 18m.

40 miles—4h, 25m., West Coast Flyer, London to Edinburgh, Scotland, Aug. 6, 1888.

43½ miles—New York to Buffalo, New York Central & Hudson River railroad (actual running time), 1h, 49m., Sept. 14, 1891. The train consisted of engine No. 870, weight 100 tons; private car No. 347, weight 88,500 lbs.; Wagner Palace Car company's private cars Traveler, weight 77,500 lbs., and Marquise, weight 88,000 lbs. Total weight of train, 280 tons, about equal to that of an ordinary passenger train of five cars. The run from New York to Albany, 143 miles, which was made without stop, occupied 140m.; the distance from Albany to Syracuse, 148 miles, was covered in 160m., and that from Syracuse to East Buffalo, 16 miles, in 147m. 48s. The change of engines at Albany required 2m. 28s., the change at Syracuse 2m. 58s., and a hot journal at Fairport occasioned a delay of 1m. 50s. The gross time of the trip from New York to East Buffalo, 43½ miles, was 43m. 49s. (7h, 49m.), including all stops, while the actual running time, exclusive of all stops, was 42m. 44s. (7h, 14m. 10s.) for the 43½ miles. An accurate schedule of the time between stations was kept by a disinterested party. The 4.08 miles between Kirkville and Chittenango were made in 3m.

34s. or at the rate of 68.63 miles an hour. The 5.37 miles between West Batavia and Corfu were made in 4m. 28s., a speed of 74.35 miles an hour. The run from Forks to East Buffalo, 3.35 miles was made in 3m. 36s., a rate of 5.6 miles an hour.

49½ miles—Council Bluffs to Chicago, April 22, 1891, Jay Gould's special train, including baggage car, one ordinary passenger coach, and Mr. Gould's private car. The entire distance was made in a little less than ten hours, including stops, an average of 49.6 miles per hour; actual running time averaged 35.9 miles per hour.

813 miles—23h., (actual running time 19h. 30m.), special train conveying Washington newspaper correspondents from convention, Chicago, Ill., to Washington, D. C., June 7 and 8, 1884.

1,025 miles—Chicago to Denver, Feb. 15, 1897, C. & O. R. R., 1.131 minutes. Actual running time 1,017 minutes, averaging 58.74 miles per hour.

Jersey City to San Francisco, Cal., 38h. 39 m. 30s. Jarrett & Palmer's train, combination passenger, mail and baggage car and Pullman hotel car, June 1 to 4, 1876. No stop between Jersey City and Pittsburg, Pa. Notable performances in 1886 were:

135 miles—25m., including stops, 18m. exclusive of stops, Chicago & Alton, Chicago to Springfield, April 20, 1886.

181 miles—221m., including stops, 210m. exclusive of stops, Chicago, Rock Island & Pacific, Rock Island to Chicago, Nov. 8, 1886.

## THE SANITARY DISTRICT OF CHICAGO.

### OFFICERS.

**President**—William Boldenweck.  
**Clerk**—James Reddick.

Following is a list of the more important Chicago buildings begun or completed in 1897:

## FEDERAL BUILDING.

The bill for the construction of a new federal building in Chicago passed the house of representatives Jan. 21 and the senate Feb. 6, 1895. It was signed by the president and became a law Feb. 14. The work of building a temporary postoffice and tearing down the old one occasioned much delay, and it was not until the 13th of September, 1897, that actual work upon the foundation of the new structure was begun. In March, 1898, Henry Ives Cobb was appointed architect and in September of that year preliminary sketches and plans were submitted by him. These were accepted without substantial modifica-

tion, though a number of minor changes were made and doubtless more will be made before the building is completed. The first two stories are to be built dash with the inner sidewalk line, with ground dimensions of 321 by 336 feet. The first floor will be lighted from a skylight at the bottom of an ample shaft cut through the second story. Above the second story the building is to be of a cruciform shape, so as to admit of the maximum of light and air. In the center of the cross rise all the elevators and stairways to the eighth story from the ground, while surmounting the whole is a flat-topped dome 190 feet in diameter and 200 feet high. In this it is expected that the weather bureau will be quartered. The building is planned in the Corinthian style throughout. The

CHICAGO—J. HARPER BONNELL CO.—NEW YORK

material is to be smooth-dressed, light-gray granite, iron and brick. On the central dome, which is to be gilded, bronze eagles are to be placed, while bronze statuary will fill niches in other parts of the structure. The arrangement of the interior has not been fully decided upon at the time this is written, but ample provision will be made for the federal courts, customs officers and other departments in the upper stories.

The lower floors will, of course, be exclusively devoted to the postal work. Congress appropriated \$4,000,000 for the building.

#### WELLS BUILDING.

The Wells building at the southeast corner of Harrison and Clark streets will, when completed, be ten stories high. The lot is 100 feet square. The exterior will be of pressed brick, with terra-cotta trimmings, and the interior will be of steel skeleton construction. The building will be unusually substantial, some of the floors being designed to carry 150 pounds to the square foot and others a heavier load than that. The equipment so far as heating, lighting and power are concerned will be of a high grade. The building will be provided with passenger and freight elevators and will be heated by steam and lighted by electricity. The building will be devoted to the occupancy of printers and publishers. Holabird & Roche are the architects of the building, the cost of which will be approximately \$200,000. W. A. and E. A. Wells are the owners. They have a lease on the lot from Dr. J. E. Baker for ninety-nine years.

#### WILLIAMS BUILDING.

The Williams building, so named after the owner, Mr. J. M. Williams, is a ten-story structure at the southwest corner of Monroe street and 5th avenue. The lot on which it stands is 50 feet on Monroe street by 125 feet on 5th avenue, with an eleven-foot alley on the west, with larger space at the rear for teaming. The building is in Italian renaissance design, constructed of dark red brick, with terra cotta on front and with plate-glass, and is absolutely fireproof. The foundations are of combined steel and concrete. The building is designed for two tenants, each occupying one-half of the Monroe street front, or for one tenant for the entire building, and is also so arranged that each floor or portion of floors may be leased to separate tenants.

There are two entrances on Monroe street. The entire first story is of terra cotta and iron, with ample plate-glass. The building is provided with two passenger and two freight elevators of the latest improved hydraulic pattern, and is equipped with power plant, heated by steam and lighted by electricity. In construction the building is absolutely fireproof, using flat hollow tile arches and porous tile partitions. The floors throughout the building are of selected maple, and the inside finish is of red oak, finished in dark antique. The basement is lighted with semi-prism glass on the two

street fronts, and the entire building, from basement to ninth floor, inclusive, is plastered and finished complete. Holabird & Roche were the architects. The cost was about \$200,000.

#### ALDIS BUILDING.

The eight-story building at the southeast corner of Market and Van Buren streets was begun early in the summer and completed in December. It stands on a triangular lot 80 by 170 feet in area formerly occupied by a three-story structure which for several years was used by the American Express company. The new building is of the most modern construction, the material chiefly used being iron, pressed brick and glass. It is designed for the wholesale clothing trade and presents no distinctive features. The owners are represented by Owen Aldis. The architects were Holabird & Roche and the cost was about \$150,000.

#### WATSON BUILDING.

The Watson building at 84 Wabash avenue is seven stories high, 24 feet wide and 163 feet deep. There are two elevators, one for passengers and one for freight, both being operated by electricity. The street front is of iron and plate-glass. The alley front is of brick, with small wood mutins dividing large plate-glass. The amount of light in the rear is about equal to that of the front. The transoms are provided with semi-prism glass. The entrance to store and corridor is in mosaic, and the corridor floor is of the same material. The corridor entrance and first-story corridor have marble wainscoting five feet high. The upper corridors are finished with cement wainscoting and will be painted. The floors throughout the building are of maple. The building is arranged for two tenants on a floor if desired, or for one tenant on entire floor or entire building. The building is lighted by electricity and gas. The basement is provided with freight chute, and a large general packing and receiving room will be arranged near the freight elevator in the basement. The walls will be tinted with calcimine. Mrs. Julia M. Watson, represented by Frank M. Elliot, is the owner and Holabird & Roche were the architects. The cost was about \$100,000.

#### MILLS-SPOFFORD BUILDING.

The old Willoughby-Hill building, on the southeast corner of Madison and Clark streets, put up immediately after the fire of 1871, was remodeled and greatly enlarged during the summer and fall of 1897. Four stories were added, making the building eight stories high. The supporting pillars were strengthened and the structure made as nearly fireproof as possible, the construction being of brick, steel, stone and terra cotta. The first floor was divided into stores, while the other seven were made into a hotel of 225 rooms. The cost of the improvement was about \$100,000. D. W. Mills and George W. Spofford are the owners.
